PREFACE

The Annual Report on Registration of Births and Deaths in N.C.T. of Delhi has been brought out for the year 2017 by the Directorate of Economics and Statistics & Office of Chief Registrar (Births & Deaths) under Sections 4(4) and 19(2) Registration of Births & Deaths Act, 1969, which makes it mandatory to bring out the Annual Report on Registration of Births and Deaths.

This report presents an overview of the working of the Civil Registration System (CRS) in the NCT of Delhi and provides good source of information on the vital rates at all levels. The Report elicits very useful statistical information on registered births, deaths, infant deaths and still births and sex ratio at birth based on Civil Registration Records. Many valuable indicators are presented in the Report like birth rate, death rate, trends in birth order and its relation with level of literacy of parents, type of medical attention at the time of birth, deaths by age group, leading medically certified causes of deaths and a host of many other features in an exhaustive manner. The information would be very useful for evolving policies for improved health management in the state.

The report is presented in five sections. The first section gives details of the administrative set-up of the Civil Registration System, registration initiatives taken for effective implementation of the provisions of the Registration of Births & Deaths Act, 1969 and other related aspects, whereas, sections three and four covers birth profile and death profile respectively. Detailed statistical tables are given in section five. Maximum number of tables, as prescribed by the Office of RGI, have been presented in the Report.

The Report has been prepared by the Vital Statistics Unit of the Directorate of Economics & Statistics, Delhi with IT support from the EDP Section. I sincerely acknowledge the sincere efforts of all the officers and officials associated in this exercise. My special thanks are to the functionaries of the local bodies (East DMC, North DMC, South DMC, NDMC & DCB) engaged in the Civil Registration work for providing the basic data on registration of births & deaths in Delhi.

I hope, this report will be of immense help to the Policy makers, Planners and Research Scholars interested in the study of Vital Statistics in N.C.T. of Delhi. It will be our constant endeavor to improve the quality of the publication, for which, we invite the valuable comments and suggestions from the readers of this Report.

ANNUAL REPORT ON REGISTRATION OF

BIRTHS & DEATHS IN DELHI – 2017

EXECUTIVE SUMMARY

The following are the main highlights of the "Annual Report on Registration of Births & Deaths in Delhi - 2017.

A. PRIME VITAL INDICATORS:

- i) **Birth Rate:** The birth rate worked out to 19.36 per thousand of population during 2017 as against 20.38 for the year 2016.
- ii) **Death Rate:** The Death Rate per thousand of population worked out to 7.18 during 2017 as against 7.61 in 2016.
- iii) **Infant Mortality Rate:** The infant mortality rate per thousand live births was 20.83 during 2017 as against 21.35 during 2016.
- iv) **Maternal Mortality Rate:** Maternal mortality rate per thousand live births was 0.48 in 2017 while it was 0.41 in 2016.
- v) **Sex Ratio at Birth:** The Sex Ratio has improved to 913 females per thousand males during 2017 while it was 902 during 2016.

B. BIRTH REGISTRATION: The brief profile of birth registration is as under:

- i) The total number of births registered during 2017 was 367046 as against 379161 during 2016.
- ii) Average number of births per day in Delhi worked out to 1006 in 2017 as against 1036 in 2016.
- iii) Out of the total births registered, 191876 (52.28%) were male, 175090 (47.70%) female and 80(0.02%) others ("others" includes transgender/ambiguous/ not stated).
- iv) Out of the total births 327049 (89.10%) were institutional and 39997 (10.90%) domiciliary in nature.

- v) Out of 327049 institutional births, 221516 (67.73%) births occurred in govt. hospitals. Out of the total institutional births, 155191 (47.45%) were females.
 - Out of 39997 non institutional births, 19899 (49.75%) were females.
- vi) MCD accounted for 316260 (86.16%) of total births where as 46876 (12.77%) occurred in NDMC areas and 3910 (1.07%) in DCB. Further, the analysis as per five local bodies (i.e. considering the trifurcation of MCD) shows that maximum (34.59%) births were in North Delhi Municipal Corporation.
- vii) Out of total births, 5.97% births were rural and 94.03% were urban.
- viii) Out of the total births, 54.48% were of first order, 34.24% of second order, 9.32% of third order and 1.96% were of fourth or higher order.
- Analysis of domiciliary birth events with respect to the type of medical assistance available at the time of delivery revealed that in 1.02% of cases the doctor/nurse/ trained mid-wife was present and in 59.25% of cases attendance of un-trained mid-wife/traditional birth attendant was available. In 39.73% cases the delivery occurred with the help of relatives/others.
- Age-group of the mother at the time of delivery was analyzed and it was revealed that in maximum (42.85%) cases it was 20-24 years followed by 37.18% cases in 25-29 years group and in 17.95% cases the age of mother was more than 29 years. Further, it is observed that in 2.03% cases, the age of mother was even 19 years or less.
- There is a close relationship between the level of educational attainment of the mother and order of births. It is observed that out of total births of fourth and higher birth order, in 28.24% cases the level of education of mother was 'primary but below metric' and in 18.81% cases, the mothers were illiterate. Obviously, in case of fourth and higher order of birth minimum proportion of births (4.25%) were in the category of mother having 'graduation or above qualification'.

C. DEATH REGISTRATION:- A brief profile of death registration is as under:

- i) In Delhi, 136117 deaths were registered during 2017 as compared to 141632 deaths registered during 2016.
- ii) Out of the total deaths registered 83600 (61.42%) were male and 52485 (38.56%) female while 32 cases of deaths were having sex "others" (includes transgender/ ambiguous/ not stated).
- iii) MCD accounted for 78.66% of total registered deaths while the share of NDMC was 20.15% and DCB registered only 1.19% of the total deaths. Further, the analysis as per five local bodies (i.e. considering the trifurcation of MCD) shows that maximum (36.72%) deaths were in North Delhi Municipal Corporation.
- iv) The average number of deaths per day in Delhi worked out to 373 in the year 2017 as against 387 during 2016.
- v) 65.66% of the total deaths were reported by the medical institutions and the remaining 34.34% were domiciliary deaths during 2017.
- vi) Out of total 136117 deaths registered during the year 2017 the infant deaths were 7645.
- vii) Deaths by age group revealed that maximum (36.10%) deaths occurred in 65 years & above age group followed by 17.58% in 55-64 years age group, 13.68% in 45-54 age group and other 30.75 % deaths were in the age of below 45 years. However, 1.89% deaths occurred in age group (Not Stated).
- viii) The analysis of major causes of institutional deaths during 2017 as per ICD 10 (i.e. International Classification of Diseases-10th Revision) reflect that 9.21% deaths were due to septicemia, 6.81% due to hypertensive diseases, 6.12% due to disease of pulmonary circulation and other forms of heart diseases, 4.44% due to shock (n.e.c.) and 4.09% due to tuberculosis. The remaining MCCD deaths were due to other causes.

-: SECTION ONE :INTRODUCTION

(Review of the Working of Act)

SECTION ONE INTRODUCTION

The Civil Registration System (CRS) aimed at proper accounting of vital events for the issuance of certificates as well as generation of valuable data for plan & policy formulation on health sector, received a big boost with the promulgation of The Registration of Births and Deaths Act, 1969 (RBD Act, 1969) in all states/ UTs in the country. This Act came into force in Delhi w.e.f. 1st July, 1970 and accordingly The Delhi Registration of Births and Deaths Rules, 1970 have also been notified w.e.f. 1st January, 1971. These rules were modified and made more people friendly in December 1999 and came into force w.e.f. 1st January, 2000. Prior to the implementation of the Registration of Births and Deaths Act, 1969 (Act No. 18 of 1969), Registration of Births and Deaths in Delhi was governed by multiple Acts/Rules. The urban area of Municipal Corporation of Delhi (MCD) was covered under the provisions of the Delhi Municipal Corporation Act, 1957 (Section 394-96) and bye laws made there under, whereas this function in the rural area of MCD was carried out under the Panchayat Raj Act, 1959. Further, the MCD has been trifurcated w.e.f. May, 2012 into three corporations namely East Delhi Municipal Corporation (East DMC), North Delhi Municipal Corporation (North DMC) and South Delhi Municipal Corporation (South DMC). On the other hand, the registration within the limits of New Delhi Municipal Council (NDMC) was governed by section 188(c) and subsection (1) of section 199 of the Punjab Municipal Act, 1911. In the area under Delhi Cantonment this function was performed under clause (1) of section 281 of Cantonment Act, 1924.

MEANING & SCOPE OF CRS

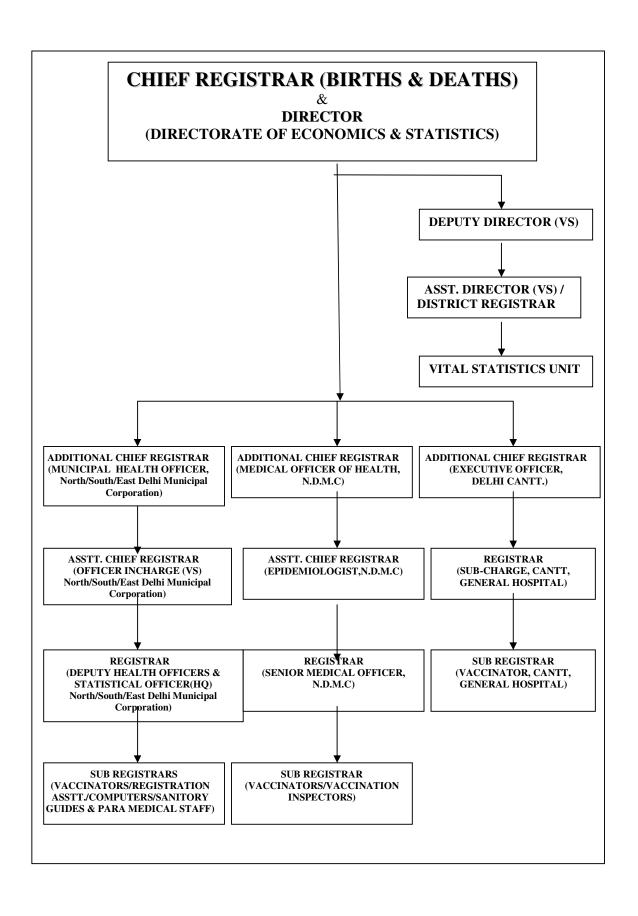

Civil Registration System may be defined as the legal recording of the occurrence of vital events (birth and death) through a network of government offices and designated officials, together with certain identifying or descriptive characteristics of the events on a continuous, permanent and compulsory basis. Civil Registration System also serves as the tool for measuring the changes in the population. In other words, population census held once in a period of 10 years gives stock of population at a point of time whereas, vital statistics presents the flow of population.

ADMINISTRATIVE SET UP

Director, Directorate of Economics and Statistics, Govt. of NCT of Delhi also functions as the Chief Registrar (Births & Deaths) for the NCT of Delhi. The Chief Registrar is responsible for the proper implementation of the RBD Act, 1969 and the rules made there under and keeps a close liaison with the Registrar General of India, Ministry of Home Affairs, which is the nodal agency for such matters at the national level. The Chief Registrar is assisted by a secretariat in the form of vital statistics unit of the Directorate. The actual registration of births and deaths in Delhi was done by three local bodies viz MCD, NDMC and Delhi Cantonment Board through a network of centers spread all over Delhi and with effect from May 2012 five local bodies are doing the civil registration work due to trifurcation of MCD into North/South/East Delhi Municipal Corporations. Each local body has a notified Additional Chief Registrar to coordinate the functions in the designated geographical area. The administrative set up of the civil registration system in Delhi may be seen from the organization chart.

REGISTRATION PROCEDURE

Registration of births, still births and deaths is compulsory under the Registration of Births & Deaths Act, 1969 and rules framed there under. According to the Act, it is the duty of the head of the household and if he is not present in the house the nearest relative of the head present in the house and in the absence of any such person, the oldest adult person present in the house to report the occurrence of any live birth or still birth or death. For births and deaths in hospitals/health centers/ maternity homes/nursing homes, other similar institutions or in jail or in dharamshala or in hostels etc., it is the responsibility of the Incharge of the institution to report birth, still birth and death to the Registrar (B&D) in their respective area within the prescribed time limit. Further, Registrar (Birth &Death) can act suo-motto and direct concerned to report the event under section 21 of the RBD Act 1969, if he/she comes to know that a vital event has occurred in the area under jurisdiction.

As per Delhi Registration of Births & Deaths Rules, 1999, all births, still births and deaths within 21 days of the occurrence are to be reported to the Registrar/ Sub-Registrar of the concerned local area. The information is to be given in live birth report (Form-1), still-birth report (Form-3) and death report (Form-2). To get the birth registration of adopted child in the name of adoptive parents, the provision of Form 1-A has been made. Further, as per direction of ORGI, the UID number has been incorporated in the Forms. As soon as registration of birth or death is completed, a certificate in form No.5 or 6 respectively containing essential particulars of the event is given free of cost to the applicant under Section 12 of the R.B.D. Act 1969. Additional copies of the birth/death certificates may be obtained by the applicant by paying the prescribed fee under section 17 of the RBD Act.

In case, where the birth of any child had been registered without a name, the parents or guardian of such a child may approach the Registrar (B&D) for addition of the name of the child in the birth certificate free of cost within 12 months from the date of registration of the birth of a child. After one year but within a period of 15 years for the births occurred on or after 01.01.2000 and within a period of 20 years for the births occurred before 01.01.2000, the name of child in birth record can be entered on the payment of the prescribed late fee.

DELAYED REGISTRATION

Any vital event not reported to the appropriate authority with in a period of 21 days from date of occurrence constitutes delay. The following procedure is to be followed in such situations:

- (a) Any birth or death of which information is given to the Registrar after the expiry of the specified period of **21 days** but within thirty days of its occurrence shall be registered on payment of a late fee of Rs.2/-.
- (b) Any birth or death of which information is given to Registrar after **30 days**, but within one year of its occurrence shall be registered only with the written permission of the concerned Registrar on payment of late fee of Rs.5/-.
- (c) Any birth or death which has not been registered within one year of its occurrence, shall be registered only on an order of Area Sub- Divisional Magistrate and payment of late fee of Rs. 10/-.

MEDICAL CERTIFICATION OF CAUSE OF DEATH

Medical Certification of Cause of Death (MCCD) provides reliable data on cause of mortality. This data serves as a valuable tool for public health planners, administrators, medical professionals and research workers to study cause of death in the population. Keeping in view the importance of this information, the provision has been made u/s 10(2)

and 10(3) of the Registration of Births & Deaths Act, 1969 for cause of death certification by the medical practitioner of the hospital last attended by the deceased and report it on Form No. 4 (in case of institutional death) and on Form No. 4A (for domiciliary death) for further submission of it along with death reporting form (Form No. 2) to the Registrar's office at the time of registration of death.

In Delhi, the reporting of Medical Certification of Cause of Death has been made compulsory since the year 2003 in respect of institutional deaths. The domiciliary deaths have not been brought under the ambit of MCCD due to various practical problems such as lack of awareness among the citizens, economic conditions and also due to non-availability of adequate health infrastructure.

DEATH REGISTRATION AT CREMATION GROUND

The facility of on the spot registration and issuance of Death Certificates has been provided by North Delhi Municipal Corporation in respect of domiciliary deaths occurred in Delhi and body cremated at Nigam Bodh Ghat Cremation Ground.

LEVEL OF COMPUTERIZATION & FLOW OF DATA

All local bodies have computerized the births & deaths registration system and all major hospitals are reporting the events online to the concerned Registrar (B&D). In North/South/East Delhi Municipal Corporations, approx. 800 hospitals/nursing homes report the vital events through online institutional registration (OLIR) system thereby avoiding manual handling for feeding the data/information and consequently less chances of delays, omissions etc for reporting the events. In NDMC & DCB, almost all hospitals are reporting the vital events online. Soft copy of the CRS data is supplied along with MCCD to Chief Registrar's Office by the local bodies for preparation of Annual Report.

As we are aware that the office of RGI has taken the initiative for adopting a uniform software throughout the country which will certainly improve the CRS because the complexities of handling the data / information can be culled out, as output of different softwares will be nullified by using a uniform software.

FUNDS UTILISED FOR CIVIL REGISTRATION SYSTEM

During the year 2017-18, a total amount of Rs. 17,82,504/- was spent on different activities / programmes for improvement of civil registration system in Delhi. Out of this Rs. 16,62,754/- was from State Budget and Rs. 1,19,750/- was the central financial assistance.

The item wise expenditure is as under:

Statement 1.1: Expenditure incurred on CRS in Delhi

GI.		Expenditure incurred from				
Sl. No.	Items	State Bud	dget (Rs)	Central Ass	Central Assistance(Rs)	
110.		2016-17	2017-18	2016-17	2017-18	
1	Printing of reporting forms	779528	16,62,754	-	-	
2	Financial Assistance for Preservation & Maintenance of CRS Records in NDMC	-	-	-	-	
3	Training programmes (CRS/MCCD)	-	-	-	-	
4	Creation of data base of Medical institutions	-	-	-	-	
5	Hiring of Man Power for strengthening of CRS	-	-	1714037	1,19,750	
6	Pilot Project of DEC in district South of GNCTD	-	-	148764	-	
	Total	779528	16,62,754	1862801	1,19,750	

LEVEL OF REGISTRATION

The health of CRS in quantitative terms can be gauged primarily from the level of registration achieved consistently in a given region/state. The level of registration may be taken as the ratio of actual number of births/deaths registered as per CRS to the estimated births/deaths under SRS in a calendar year.

Statement 1.2: Level of Registration in Delhi

Year	Registered Under Civil Registration System		Estimate Sample Re Sche	gistration	Level of Registration	
	Births	Deaths	Births	Deaths	Births	Deaths
2001	296287	81100	262956	70956	113	114
2002	300659	86176	243948	72333	123	119
2003	301165	87743	250123	72290	120	121
2004	305974	85378	271198	69273	113	123
2005	324336	94187	279465	69115	116	136
2006	322750	98908	281814	71985	115	137
2007	322044	100974	282595	74942	114	135
2008	333908	107600	292854	76397	114	141
2009	354482	112013	293673	71390	121	157
2010	359463	124353	294412	69468	122	179
2011	353759	112142	295062	72501	120	155
2012	360473	104616	297975	72340	121	145
2013	370000	97185	302015	71992	123	135
2014	373693	121286	300712	68018	124	178
2015	374012	124516	299253	65690	125	190
2016	379161	141632	293922	75851	129	187
2017	367046	136117	NA	NA	NA	NA

Obviously, Delhi is among the few states/UTs which have achieved 100% level of birth and death registration. Apart from Delhi, this list includes Kerala, Goa, Chandigarh, and Pondicherry. The level of registration of births/deaths in Delhi over a period of time is indicated in the above statement. It is evident from the above statement that the level of registration in Delhi was more than hundred percent mainly because of the existence of good health infrastructure as well as responsive registration mechanism at ground level. Due to this fact, the people from other areas outside Delhi also come to avail better health facilities / treatment in Delhi's hospitals and consequently the births & deaths pertaining to non-residents of Delhi also occurred here and then the registrations of such vital events are done in Delhi in accordance with provisions of the RBD Act, 1969 to register the vital event as per the place of occurrence of the event. Evidently, this factor plays a key role in having the number of registered births & deaths higher than the SRS estimates.

MEASURES FOR IMPROVEMENT OF CIVIL REGISTRATION SYSTEM

- (i) A Citizen's Charter for Registration of Births & Deaths has been implemented and the issuance of Births & Deaths certificates has been covered under e-Service Level Agreement (SLA) to facilitate the public. The citizen charter indicates brief procedure and guidelines to be followed by the citizens of Delhi and Local Bodies for registration of Births & Deaths. This may prove helpful to improve the Civil Registration System in Delhi. All registration centers have to display the informative boards regarding various provisions under e-SLA pertains to issuance of Birth & Death certificate to guide the public properly.
- (ii) The Chief Registrar's Office is operating a website 'www.des.delhigovt.nic.in' giving details of registration procedure, area wise registration centre, administrative machinery for redressal of grievances etc. Provision has also been made for the general public to give their suggestions for the improvement of the system through email.
- (iii) All the local bodies have computerized their operations resulting in improvement in the quality of service rendered to the public. All major hospitals, government/private have been provided the facility of online reporting of events and this has sped up the process of reporting/registration of events. Further, online facility to take the birth/death certificates directly from website is also being provided by NDMC, North, East and South DMCs.
- (iv) Inspection of Registration centers: Inspections of registration centers, Zonal offices and major hospitals were done from time to time by the officers/officials of Office of Chief Registrar to examine the working of registration centres and ascertain the

- difficulties of public in registration and obtaining birth and death certificates and suitable remedial action has been initiated.
- (v) Supply of Registration stationery: The office of Chief Registrar (B & D) provides registration stationary i.e. Birth reporting forms, Death reporting forms, Still birth reporting forms, MCCD forms etc. free of cost to the local bodies, Govt. and Private hospitals, Nursing homes and Maternity Centers.
- (vi) NGOs and other voluntary organizations were involved in the propagation of benefits of registration of births/ deaths and identification of unregistered cases if any, in slum areas. The Office of Chief Registrar (Birth & Death) has cooperated in the mission of Plan India by providing the birth certificate of children in difficult circumstances with the help of zonal offices Municipal Corporation.
- (vii) As per initiative of ORGI for creation of data base of medical institutions where births & deaths occurred, this work was done in the year 2013. In Delhi, the CRS is in accordance with the jurisdiction of registration zones of local bodies which are not co-terminus with the administrative / revenue district of Delhi Govt. Due to this fact, as per consultation with ORGI, the data base of medical institutions was created considering five local bodies of Delhi as districts.
- (viii) During 2014-15, under the Centrally Sponsored Scheme of ORGI regarding the financial assistance for strengthening the Civil Registration System through hiring of man power, this office has hired one State Coordinator and ten Data Processing Assistants on contract basis w.e.f. 01.07.2014 to 30.06.2015 and after a break their contract has been further revised twice w.e.f. 06.07.2015 to 30.06.2016 and then from 13.07.2016 to 30.06.2017. This hired manpower was deployed in five local bodies and in Chief Registrar Office. As per direction of office of RGI this scheme has been discontinued w.e.f. Financial Year 2017-2018 onwards.
- (ix) As per the initiative of office of RGI, GOI; some new tables based on statistical information reflected in birth & death reporting forms have been added w.e.f. the Annual Report, 2013. These statistical tables (like birth weight of child at the time of birth, age of mother at the time of marriage, the gap in years between marriage and different orders of the children etc.) have been presented in the section 5 of the report.

Monitoring and Coordination

A high level Interdepartmental Co-ordination Committee (IDCC) has been constituted in Delhi under the Chairmanship of Pr. Secretary (Plg.) and Chief Registrar (B&D) as Member Secretary. This committee consists of representatives from Directorate of Health Services, Education, Police & local bodies etc. to sort out the matters relating to the

subject without much delay. This platform is expected to ensure close coordination and effective monitoring of the implementation of the provisions of the Act. The latest IDCC meeting was held on 04/09/2014 under the Chairmanship of Pr. Secretary (Plg.), GNCTD to discuss further measures to make the Civil Registration System people friendly.

Sex Ratio in Delhi

The main source for bringing out this vital indicator is Population Census data and CRS data. The population data gives universal sex ratio for every 10 years. This data suffers from two major limitations viz. time lag and does not give the realistic situation as it gets affected by the in and out migrations. Therefore, the records of registration of births & deaths become the primary source for compilation of sex ratio at State/District etc. levels. The CRS data will provide short term and very effective inputs on this burning problem so that remedial measures can be initiated without loss of time.

The sex ratio is expressed as the number of female births to thousand male births for a particular period of time says one year/month etc. As per the International practice, sex ratio is worked out as number of male births per 100 female births. As per the International standard, sex ratio around 105 males per 100 females is considered as an acceptable level.

Sex Ratio as per Population Census

The universal sex ratio of Delhi as per population census for all age groups taken together was 821 females per 1000 males in 2001 and it has become 868 females per 1000 males as per final data of census - 2011. Child sex ratio (0-6 years) of Delhi went up marginally from 868 (as per census 2001) to 871 (as per census 2011). As can be seen from statement 1.3, at both points of time the figures of Delhi were below the All India level. The district-wise scenario for the children of 0-6 years varies in different districts.

Statement 1.3: Sex ratio of Delhi/All India as per population Census Data

SI.No.	Item	Cens	sus year
	District wise sex ratio (children of 0-6		
	years)	2001	2011
	South	888	885
	South West	846	845
	North West	857	865
	North	886	873
	Central	903	905
	New Delhi	898	894
	East	865	871
	North East	875	880
Α	West	859	872
	Delhi		
	Children of 0-6 years	868	871
В	All ages	821	868
	All India		
	Children of 0-6 years	927	919
С	All ages	933	943

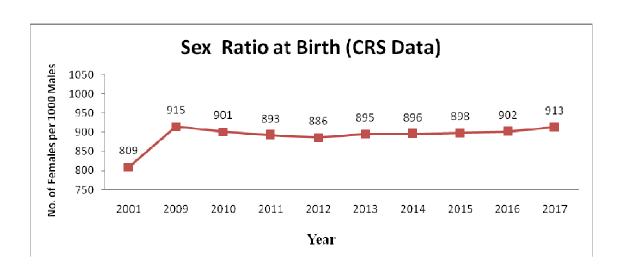

Source: Population Census -2011.

Sex Ratio as per CRS Data

The data available from Civil Registration System indicates that sex ratio at birth (refer statement 1.4) was 809 females per 1000 males in the year 2001 and it is improving every year and was 848 in the year 2007. However, during 2008 the sex ratio was reversed showing 1004 females per 1000 males which was unprecedented and may be due to implementation of LADLI SCHEME w.e.f. 01.01.2008. Further, the sex ratio at birth has increased from 902 females per 1000 males in the year 2016 to 913 during the year 2017.

Statement 1.4: Sex ratio of Delhi at birth – CRS Data

V	Sex Ratio at Birth (CRS Data)						
Year	No. of Females per 1000 males	No. of Males per 100 females					
2001	809	124

2017	913	110					

MONTHLY MONITORING OF THE SEX RATIO OF INSTITUTIONAL BIRTH

The national conference of Chief Registrars Births & Deaths, held in 2003 unanimously recommended for the monitoring of sex ratio on a regular basis at the State/UT level taking into account the alarming decline in the sex ratio which has become a cause of concern for the policy makers and administrators. In compliance of the mandate of the Chief Registrar Conference, Delhi has started the monthly monitoring of sex ratio of institutional births w.e.f. the year 2004.

The data is collected on monthly basis from 50 major hospitals which account for 57.19% of total registered births in the year 2017 in Delhi. This helps to review the sex ratio at the highest level in the shortest possible time without waiting for the yearly indicators. The sex ratio of institutional births on the basis of these 50 hospitals comes out to 908 in the year 2017.

Efforts will be made to increase the coverage of health institutions under the monthly monitoring system to make this exercise meaningful and truly representative of the ground reality.

COMPARISON OF SEX-RATIO AMONG STATES/UTs

The data pertaining to the scenario of sex ratio in different States/UTs, given by office of R.G.I. may be seen in Statement 1.5. However, at the time of comparing it should also be kept in mind that Level of Registration is not uniform in all States/U.Ts.

Statement 1.5: Sex Ratio at Birth based on registered events

-: SECTION TWO :RESULTS AT A GLANCE 2017

SECTION TWO

RESULTS AT A GLANCE

This section is devoted to the brief analysis of the vital events registered under the Civil Registration System in Delhi during the calendar year 2017. The main focus will be on number of events, sex-wise distribution, type of event, geographical distribution etc., The total number of vital events registered in Delhi during 2017 were 503163. Out of them 367046 were births and 136117 deaths. Gross natural addition to the population of Delhi during 2017 comes to about 2.31 lakh persons.

Statement 2.1.: Distribution of Vital Events by Sex.

Sl. No.	Item	Male	Female	Others #	Total
		Eve	ents		
	Births	191876	175090	80	367046
A.	Percentage	52.28	47.70	0.02	100.00
	Deaths	83600	52485	32	136117
В.	Percentage	61.42	38.56	0.02	100.00
	Gross natural addition to the population (A) - (B)	108276	122605	48	230929

[#] Sex "others" includes transgender/ambiguous/ not stated.

Sex wise distribution of births revealed that 52.28% were male, 47.70% female and 0.02% others during 2017. Break up of death registrations in terms of sex indicated that 61.42% were male, 38.56% female whereas 0.02% were others.

Statement 2.2.: Distribution of Vital Events by Sector

			Number					
Sl. No.	Item	Male	Female	Others	Total	Percentage		
Α			Births					
(i)	Rural	11474	10424	3	21901	5.97		
(ii)	Urban	180402	164666	77	345145	94.03		
В			Deat	hs				
(i)	Rural	10215	5836	2	16053	11.79		
(ii)	Urban	73385	46649	30	120064	88.21		

Births and Deaths registered in Delhi during 2017 are presented sector wise in statement 2.2. For births, it is based on the town or village pertaining to the residence of mother of the new born and for deaths, it is based on the town or village of residence of the deceased.

During 2017, the proportion of urban births has accounted for 94.03% and rural births 5.97%. For deaths, this proportion is 88.21% for urban and 11.79% for rural.

Statement 2.3: Distribution of Vital Events by Type

		Number						
Sl. No.	Item	Male	Female	Other	Total	Percentage		
Α		Births						
(i)	Institutional	171778	155191	80	327049	89.10		
(ii)	Non-institutional	20098	19899	00	39997	10.90		
В		Deaths						
(i)	Institutional	55694	33654	29	89377	65.66		
(ii)	Non-institutional	27906	18831	3	46740	34.34		

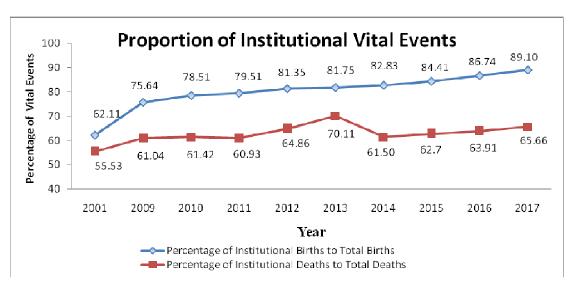

It is observed that during 2017 the institutional births have accounted for 89.10% and domiciliary i.e. non-institutional births 10.90%. On a positive note, it is observed that the proportion of institutional births out of total births is continuously increasing. It has increased from 62.11% (in 2001) to 89.10% (in 2017) i.e. more than 27% increase has occurred in proportion of institutional births during preceding 16 years.

During 2017, the proportion of institutional deaths was 65.66% and non-institutional 34.34%.

Statement 2.4:-Proportion of Institutional Vital Events

Year	Percentage of Institutional Births to Total Births	Percentage of Institutional Deaths to Total Deaths
2001	62.11	55.53
2002	68.85	52.18
2003	71.38	55.25
2004	71.54	56.88
2005	73.72	59.87
2006	77.92	60.92
2007	74.57	58.68
2008	73.45	53.09
2009	75.64	61.04
2010	78.51	61.42
2011	79.51	60.93
2012	81.35	64.86
2013	81.75	70.11
2014	82.83	61.50
2015	84.41	62.70
2016	86.74	63.91
2017	89.10	65.66

The analysis of institutional vital events reflects that the proportion of institutional births to total births is higher than the proportion of institutional deaths to total deaths. During the year 2017, the proportion of institutional births to total births has touched the highest level of approx. 89%.

Registration of Vital Events by Local body

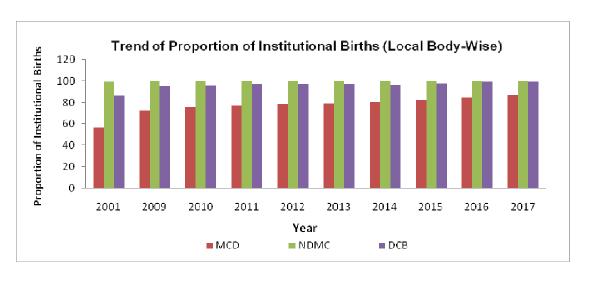

The responsibility for registration of all types of vital events lies with the local bodies in Delhi. The majority of the registrations were done in North Delhi Municipal Corporation followed by South Delhi Municipal Corporation, East Delhi Municipal Corporation, New Delhi Municipal Council and Delhi Cantonment Board. The details about proportion of registered births and deaths in different local bodies during the year 2017 are reflected in statement 2.5.

Statement 2.5: Distribution of Vital Events by Local body

	I and Dady	Nur	mber	Percentage		
Sl. No.	Local Body	Births	Deaths	Births	Deaths	
A	Total MCD (i + ii + iii)	316260	107074	86.16	78.66	
(i)	North Delhi Municipal Corporation	126981	49981	34.59	36.72	
(ii)	South Delhi Municipal Corporation	113937	34883	31.04	25.63	
(iii)	East Delhi Municipal Corporation	75342	22210	20.53	16.31	
В	New Delhi Municipal Council	46876	27426	12.77	20.15	
С	Delhi Cantonment Board	3910	1617	1.07	1.19	
	Total (A+B+C)	367046	136117	100.00	100.00	

Statement 2.6: Trend of Proportion of Institutional Births (Local Body-Wise)

Year	Percer	Percentage of institutional Births to Total					
	North DMC	South DMC	East DMC	Erstwhile MCD	NDMC	DCB	Births
2001	NA	NA	NA	56.35	99.24	86.17	62.11
2002	NA	NA	NA	61.87	99.02	88.9	66.85
2003	NA	NA	NA	67.15	99.95	83.94	71.38
2004	NA	NA	NA	67.21	99.25	85.39	71.54
2005	NA	NA	NA	69.99	98.5	86.38	73.72
2006	NA	NA	NA	74.61	99.65	89.74	77.92
2007	NA	NA	NA	70.85	98.94	93.44	74.57
2008	NA	NA	NA	68.73	99.66	96.47	73.45
2009	NA	NA	NA	72.18	99.71	95.11	75.64
2010	NA	NA	NA	75.56	99.79	95.63	78.51
2011	NA	NA	NA	77.02	99.8	97.05	79.75
2012	NA	NA	NA	78.77	99.78	97.02	81.35
2013	83.89	75.03	78.45	79.33	99.77	97.02	81.75
2014	84.43	76.56	79.72	80.43	99.85	96.95	82.83
2015	85.78	77.92	82.55	82.16	99.81	97.95	84.41
2016	87.18	80.26	87.31	84.73	99.83	99.37	86.74
2017	90.02	83.89	88.20	87.38	99.87	99.39	89.10

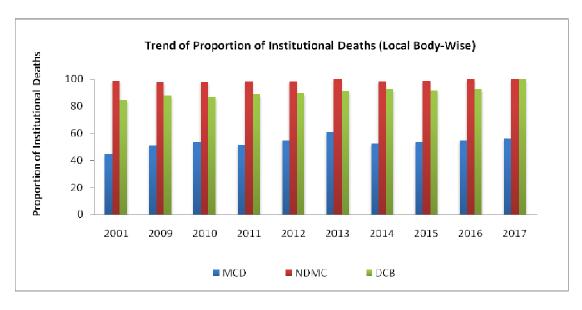

The analysis of trend of proportion of institutional births in local bodies reveals that the NDMC had almost 100% births in the institutions/hospitals where as this proportion in case of MCD mostly lies in between 70 to 90%. However, individual analysis among three corporations reflect that during 2017, the North Delhi Municipal Corporation had 90.02% institutional births out of total births that occurred in North DMC which is better than East DMC (88.20% institutional births of its total births) and South DMC (approx. 84% institutional births of its total births).

It is observed that in Delhi, the proportion of institutional births is increasing every year and during 2017 it was the highest i.e. approx. 89% in consequence of the positive impact of different government programmes to encourage institutional delivery for safe maternal and child health. Still, there is strong need to take further measures to achieve the milestone of cent-percent institutional delivery.

Statement 2.7: Trend of Proportion of Institutional Deaths (Local Body-Wise)

Year	Percentage of Institutional Deaths to Concerned Local Body's Total Deaths							
	North DMC	South DMC	East DMC	Erstwhile MCD	NDMC	DCB	Deaths	
2001	NA	NA	NA	44.90	98.97	84.49	55.53	
2002	NA	NA	NA	41.57	90.03	66.10	52.18	
2003	NA	NA	NA	45.05	99.55	86.99	55.25	
2004	NA	NA	NA	47.36	99.31	89.17	56.88	
2005	NA	NA	NA	49.36	97.67	89.66	59.87	
2006	NA	NA	NA	51.35	97.93	89.08	60.92	
2007	NA	NA	NA	47.51	98.50	92.42	58.68	
2008	NA	NA	NA	72.30	96.22	93.28	53.09	
2009	NA	NA	NA	51.00	98.20	87.94	61.04	
2010	NA	NA	NA	53.04	98.21	86.74	61.42	
2011	NA	NA	NA	51.50	98.25	88.95	60.93	
2012	NA	NA	NA	54.82	98.35	89.74	64.86	
2013	67.32	43.89	79.06	60.65	100.00	91.50	70.11	
2014	52.95	46.93	60.97	52.58	98.35	92.39	61.50	
2015	54.35	47.41	61.32	53.42	98.72	91.73	62.70	
2016	53.49	50.25	64.55	54.71	100.00	92.46	63.91	
2017	56.29	50.40	65.84	56.35	100.00	100.00	65.66	

It is observed that the proportion of institutional deaths in the year 2017 was 65.66%. Further, local body wise analysis clearly reflect that the proportion of institutional deaths in case of NDMC and Delhi Cantt. was 100%, whereas it was in the range of 50 to 66% in case of the three municipal corporations.

Main Vital Indicators of Delhi and India

The vital indicators emerged out of the CRS of Delhi are presented in statement 2.8. For the benefit of data users; indicators of national level are also included.

Statement 2.8: Main Vital Indicators of Delhi and India

Sl.No.	Item	Delhi @	India**					
A	Vital Rates (per 1000)							
1	Birth Rate	19.36	20.4					
2	Death Rate	7.18	6.4					
3	Natural growth rate	12.18	14.0					
4	Infant Mortality Rate	20.83	34.0					
5	Maternal Mortality Rate	0.48	NA					
В	No. of events per day							
1	Births	1006	NA					
2	Deaths	373	NA					

[@] Data of Delhi pertains to CRS 2017

Religion wise sex composition of births and deaths is presented in statement 2.9. It can be observed that more or less same pattern was noticed in all religions with regard to sex composition, particularly in birth events.

^{**}Data of India pertains to SRS 2016

Statement 2.9: Distribution of Vital Events by Main Religion

MEDICALLY CERTIFIED CAUSE OF DEATH:

As per the Act, it is mandatory to provide medically certified cause of death for each institutional death by the doctor who attended the patient / deceased. During the year 2017, total 89377 deaths were reported by the hospitals/nursing homes and registered in local bodies. These deaths have been provided medically certified cause of death as per ICD-10 coding of WHO. The medically certified cause-wise broad classification of these deaths is given in statement 2.10.

Statement 2.10: Broad Classification of MCCD by sex

ICD 10	Name of Prood Disease Crown		% to

CRS vis-à-vis SRS Results

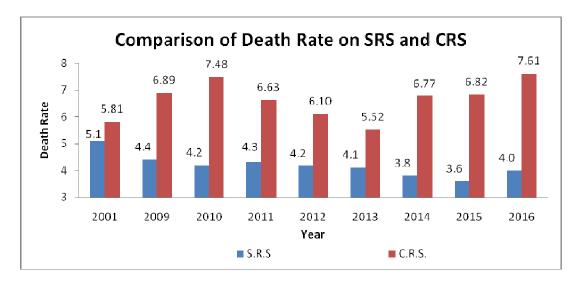

Any attempt aimed at making a comparison between SRS estimates and CRS results strictly speaking is not tenable as they follow different approaches to determine the basic parameters. However they can be taken as two alternatives to complement/ supplement each other. SRS estimates which are based on sampling approach serves as a short term tool in the management of health scenario as CRS results are not available at short notice. More over SRS covers events pertaining to domicile population where as CRS is inclusive of vital events of migratory population as events are registered as per place of occurrence under RBD Act. That is the reason why CRS results are usually on the higher side when compared to that of SRS. Further, if CRS results could be brought about in shortest possible time frame it can supplement the SRS in the times to come. Therefore the following statements are included to serve academic purpose at present.

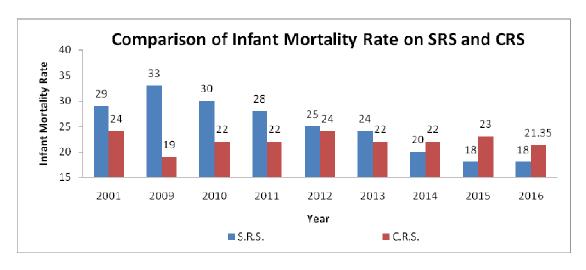

Statement 2.11: Comparison of Vital Rate on SRS and CRS Results

-: SECTION THREE :BIRTH REGISTRATION PROFILE

SECTION THREE

PROFILE OF BIRTHS REGISTRATION

In this section various aspects of birth registrations, that had taken place during 2017 under Civil Registration System, are analyzed with special reference to the number of events registered across years, male- female composition, matters relating to birth order and literacy, age of the mother at the time of child birth, the type of medical attention available in case of domiciliary events, local body-wise registration of events etc. The level of birth registration was found to be more than 100% consistently over a period of time thereby indicating the sound health of Civil Registration System in Delhi.

Birth Registration under Civil Registration System

During 2017, a total of 367046 birth events were registered by all the local bodies taken together. Out of them, 191876 (52.28%) were male, 175090 (47.70%) were female and 80 (0.02%) were others.

Statement 3.1: Total Number of Births registered under CRS sex-wise

		Nur	Average registered				
Year	Male	Percentage	Female	Percentage	Total	births per day	Sex Ratio
2001	163816	55.29	132471	44.71	296287	812	809
2002	164184	54.61	136475	45.39	300659	824	831
2003	165173	54.84	135992	45.16	301165	825	823
2004	167849	54.86	138125	45.14	305974	836	823
2005	178031	54.89	146305	45.11	324336	889	822
2006	176242	54.61	146508	45.39	322750	884	831
2007	174289	54.12	147755	45.88	322044	882	848
2008	166583	49.89	167325	50.11	333908	915	1004
2009	185131	52.22	169351	47.78	354482	971	915
2010	189122	52.61	170341	47.39	359463	985	901
2011	186870	52.82	166889	47.18	353759	969	893
2012	191129	53.02	169344	46.98	360473	988	886
2013	195226	52.76	174774	47.24	370000	1014	895
2014	197078	52.73	176615	47.26	373693	1024	896
2015	197080	52.69	176932	47.31	374012	1025	898
2016	199358	52.58	179738	47.4	379161	1036	902
*2017	191876	52.28	175090	47.70	367046	1006	913

- Out of total registered births, 80 births have Sex "Others" during the year 2017.
- Sex "others" includes transgender/ ambiguous/ not stated.

It may be observed from the statement 3.1 that the composition of male and female births in the total births was consistently 50 - 55% and 45 - 48% respectively across the years.

The sex ratio at birth has increased from 902 females per thousand males during 2016 to 913 in 2017. Further analysis of institutional and non institutional births indicates that sex ratio in respect of institutional births increased from 891 (in the year 2016) to 903 in 2017, and domiciliary births sex ratio increased from 971 in 2016 to 990 in 2017.

Statement 3.1 Comparative Position of Sex Ratio in Institutional And Non-Institutional Births.

	I	nstitution	al Births		Domiciliary Births				Sex Ratio
Year	Total	Male	Female	Sex Ratio	Total	Male	Female	Sex Ratio	based on Total Births
2007	240154	129124	111030	860	81890	45165	36725	813	848
2008	245254	128095	117159	915	88654	38488	50166	1303	1004
2009	268119	143210	124909	872	86363	41921	44442	1060	915
2010	282197	150370	131827	877	77266	38752	38514	994	901
2011	282115	150392	131723	876	71644	36478	35166	964	893
2012	293231	157067	136164	867	67242	34062	33180	974	886
2013	302453	160932	141521	879	67547	34294	33253	970	895
2014	309538	164324	145214	884	64155	32754	31401	959	896
2015	315694	167868	147826	881	58318	29212	29106	996	898
2016	328872	173839	154969	891	50289	25519	24769	971	902
*2017	327049	171778	155191	903	39997	20098	19899	990	913

^{*}Out of total registered institutional births 80 births have sex "others" whereas in domiciliary births no case registered having sex "Others".

The exceptionally higher sex ratio (during 2008) can perhaps be attributed mainly to the implementation of the various welfare schemes of the girl child (including Ladli Scheme w.e.f. 01.01.2008). Besides this, it may also be noted that the sex ratio based on total registered births (including institutional and domiciliary) during 2017 has been improved in comparison to the year 2016.

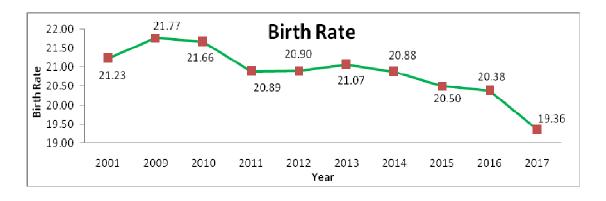

Birth Rate

One of the important indicators that emerge out of Civil Registration System is the birth rate. Statement number 3.2 provides the time series data from 2001-17. The birth rate during the period of the year 2001 to 2017 has been hovering at 19-22 per 1000 population. The graph plotting the birth rate for the said period clearly exhibits this fact.

Statement 3.2: Birth Rate as per CRS

	In I		
Year	*Mid Year Population as on 1st July	No. of Births	*Birth Rate
2001	139.40	2.96	21.23
2002	142.10	3.01	21.18
2003	144.86	3.01	20.78
2004	147.68	3.06	20.72
2005	150.54	3.24	21.52
2006	153.47	3.23	21.05
2007	156.45	3.22	20.58
2008	159.49	3.34	20.94
2009	162.58	3.54	21.77
2010	165.74	3.59	21.66
2011	168.96	3.53	20.89

2013	175.59	3.70	21.07
2014	179.00	3.74	20.88
2015	182.47	3.74	20.50
2016	186.01	3.79	20.38
2017	189.63	3.67	19.36

^{*}Estimated Mid Year Population based on Census-2011.

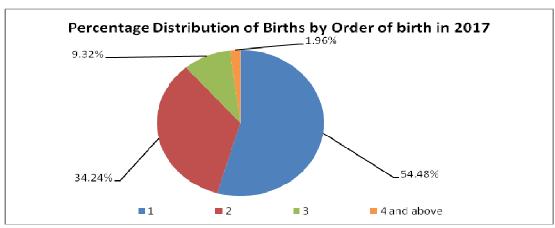

DISTRIBUTION OF LIVE BIRTHS BY BIRTH ORDER

Birth order statistics are important indicators for measuring the progress and effectiveness of family welfare activities. Time series data on percentage distribution of births by birth order is given in statement 3.3.

Statement 3.3: Percentage Distribution of Births by Order of birth

Year			Birth Order	
1001	1	2	3	4 & above
2001	40.94	27.33	11.17	20.56
2002	36.90	25.81	10.40	26.89
2003	44.53	33.80	12.88	8.79
2004	47.14	34.28	13.12	5.46
2005	50.59	32.42	12.45	4.54
2006	56.79	28.97	11.08	3.16
2007	58.98	27.47	9.79	3.76
2008	55.12	31.24	10.15	3.49
2009	53.39	32.81	11.01	2.79
2010	60.33	29.28	8.07	2.32
2011	56.37	32.39	8.80	2.44
2012	55.80	33.14	8.83	2.23
2013	61.19	29.21	7.69	1.91
2014	55.47	33.75	8.67	2.11
2015	62.78	32.57	3.93	0.72
2016	55.78	32.89	9.29	2.04
2017	54.48	34.24	9.32	1.96

It is obvious from the above statement that the first order of births account for 54.48% of the total births registered during 2017. The proportion of first and second order of birth taken together accounted for 88.72% in the total registered birth of 2017. The share of births beyond third order was only 1.96%.

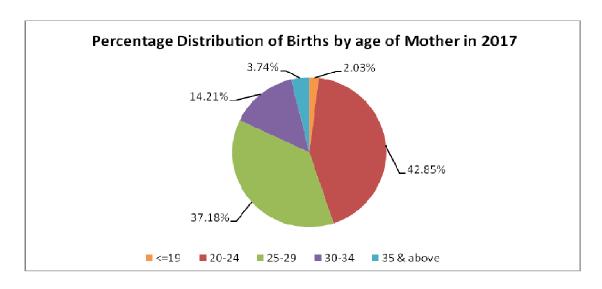

DISTRIBUTION OF LIVE BIRTHS BY AGE OF MOTHER

The age of the mother at the time of attainment of motherhood will have an influence on the overall health of the child and the safety of mother during the time of delivery. Attainment of motherhood below the age of 18 years is considered to be undesirable in the interest of the mother as well as of the newly born child. Out of the total registered births during 2017 only 2.03 % are from mothers in the age group <=19 years. The need of the hour is to undertake a sustained campaign focused towards eligible couples in the age group of up to 18 years and living in slums, advising to avoid attainment of motherhood at such an early age.

Statement 3.4: Percentage Distribution of Births by age of Mother

V		Age	Group of Moth	ners in Years	
Year	<=19	20-24	25-29	30-34	35 & above
2001	1.84	31.84	40.89	8.28	17.15
2002	1.58	29.46	37.69	8.28	22.99
2003	2.58	44.78	36.66	9.82	6.16
2004	2.34	46.34	38.37	10.06	2.89
2005	2.25	46.62	38.56	9.86	2.71
2006	1.97	45.56	39.67	9.37	3.43
2007	1.97	48.71	37.39	9.61	2.32
2008	1.91	49.86	36.23	9.63	2.37
2009	1.74	45.79	38.9	11.16	2.41
2010	1.62	52.37	34.3	9.46	2.25
2011	1.68	53.35	31.99	10.47	2.51
2012	2.21	51.51	33	10.66	2.62
2013	2.03	49.48	34.49	11.21	2.79
2014	1.93	46.69	36.91	11.56	2.91
2015	2.75	43.97	38.00	12.15	3.13
2016	3.10	43.58	36.52	13.35	3.45
2017	2.03	42.85	37.18	14.21	3.74

Statement 3.4 further reveals that 80.03% of births were given by the mothers in the age group of 20 - 29 years followed by 14.21% by the mothers in the age group of 30 - 34 years, while 3.74% of the births were by the mothers in the age group of 35 & above years.

TYPE OF MEDICAL ATTENTION RECEIVED AT DELIVERY

The type of medical attention received at the time of birth in case of domiciliary events is an important factor in controlling the level of infant mortality. Further, it will have a bearing on the quality of service rendered by health workers involved in the field.

Statement 3.5: Percentage Distribution of Births by type and medical attention

		Percentage of Births							
			Non Institutional						
,,		Туј	pe of Medical Attention						
Year	Institutional	Doctor/Nurse/ Trained Midwife	Untrained Midwife i.e. Traditional Birth Attendant	Relatives/ Others					
(1)	(2)	(3)	(4)	(5)					
2001	62.11	34.69	3.19	0.01					
2002	66.85	30.10	3.04	0.01					
2003	71.38	24.67	3.45	0.50					
2004	71.54	17.98	9.99	0.49					
2005	73.72	0.32	19.16	6.8					
2006	77.92	4.56	13.01	4.51					
2007	74.57	5.27	13.86	6.30					
2008	73.45	8.31	11.09	7.15					
2009	75.64	7.18	11.97	5.21					
2010	78.51	14.17	5.73	1.59					
2011	79.75	8.92	8.42	2.91					
2012	81.35	3.30	8.96	6.39					
2013	81.75	3.78	8.89	5.58					
2014	82.83	3.28	8.75	5.14					
2015	84.41	2.66	12.80	0.13					
2016	86.74	1.24	6.37	5.65					
2017	89.10	0.11	6.46	4.33					

Statement 3.5 gives percentage wise distribution of live births by type of medical attention at the time of child birth. It may be seen from the above statement that medical institutions have accounted for more than four fifth (89.10%) of the total births during 2017. Obviously, the share of institutional births has gone up continuously. It was only 62.11% in 2001. During 2017, the proportion of institutional births to total registered births has increased by more than 2% in comparison to year 2016. In the year 2017, total 327049 live births occurred in the hospitals i.e. on an average 896 live births occurred daily in the hospitals during 2017.

BIRTH EVENTS - LOCAL BODY WISE

Statement 3.6 reveals the distribution of birth events of 2017 among local bodies of Delhi. Out of the total births, 86.16% were registered in the MCD whereas NDMC accounted for 12.77%. The total registration under DCB constitutes only 1.07% of the total births. After the trifurcation of MCD, it has been observed that maximum (34.59%) births were registered in North DMC followed by South DMC (31.04%) and East DMC (20.53%). Further, break-up of registered birth events reveals that only 5.97% of the births were rural, whereas 94.03% were urban.

Statement 3.6: Distribution of Rural and Urban Births as per Local Bodies

GLN	V 47 15 1	No. of Births					
Sl.No.	Name of Local Body	Rural	Urban	Combined			
Α	Total MCD (i+ ii + iii)	19543	296717	316260 (86.16)

Figures in () indicate % to total

BIRTHS BY BIRTH ORDER VIS-À-VIS LEVEL OF MOTHER'S EDUCATION

It is widely known that there is close relationship between the level of educational attainment of mother and order of births. However, the data presented in statement 3.7 states that a specific trend has been seen in the level of education of the mother, and the birth order. It is evident from column No. 6 that proportion of birth under "Graduate and above" category is decreasing with the higher order of birth.

Further, it is observed that out of total births of fourth and higher birth order, in 28.24% cases the level of education of mother was 'primary but below metric' and in 18.81% cases, the mothers were illiterate. Obviously, in case of fourth and higher order of birth minimum proportion of births were in the category of mother having 'graduation or above qualification'.

Statement 3.7: Distribution of Births by birth order and level of education of mother

			Levels	of Literacy			
Birth order	Illiterate	Below Primary	Primary but Below Metric	Metric but below Graduate	Graduate and above	Not Stated	Total

DISTRIBUTION OF BIRTHS LOCAL BODY WISE BY TYPE AND SEX

Statement 3.8 gives the distribution of births in institutional (government and non government) and non institutional categories in each local body. It reveals that during 2017, out of total births 89.10% births were institutional including 60.35% births in govt. institutions and 28.75% in non-govt. institutions, whereas, 10.90% were non-institutional i.e. domiciliary births. During 2017, govt. hospitals in Delhi have handled on an average 607 cases of live births per day (604 per day in 2016) as against 289 per day (295 per day in 2016) by non govt. institutions. The sex composition in birth events in both type of

institutions was more or less having the same pattern and on the other hand the sex composition in non-institutional i.e. domiciliary cases has a different picture.

Statement 3.8: Distribution of Birth events by type and sex

REGARDING STILL BIRTHS

Of late, it is being observed that data / information which pertains to still births is not reported regularly by the hospitals / institutions to the concerned Registrar (birth & death). The Office of Chief Registrar (B&D) has made a communication to sensitize the Medical Superintendents of the hospitals/ institutions to report the vital events inclusive of still births within the stipulated period of 21 days to the concerned Registrar (B&D).

An effort has been made to present the data on still births; for the years 2011 to 2017 in the statement 3.9.

Statement 3.9: The Local Body wise No. of Still Births

-: SECTION FOUR :DEATH REGISTRATION PROFILE

SECTION FOUR

PROFILE OF DEATHS REGISTRATION

This section reflects the information on different aspects of death registrations that had taken place during 2017 under Civil Registration System with special reference to the number of events registered across years, male- female composition, age at the time of death, medically certified causes of deaths, infant and maternal mortality rates, local bodywise registration of death events etc. The level of death registration was found to be more than 100% consistently over a period of time thereby indicating good status of Civil Registration System in Delhi.

Death Registration under Civil Registration System

During 2017, a total of 136117 deaths were registered by five local bodies. Out of total deaths, 83600 (61.42%) were male, 52485 (38.56%) were female and 32 (0.02%) were others. Sex ratio of deaths revealed that for every 1000 male deaths 628 female deaths have occurred during 2017. On an average 373 number of deaths were registered per day during 2017.

Statement 4.1: Total Number of Deaths registered under CRS, sex-wise

^{*}Total No. of registered deaths also includes 32 cases having sex "Others".

DEATH RATE

The time series data on death rate from the year 2001 to 2017 is reflected in the statement 4.2. It is observed that the death rate in Delhi has remained in the range of 6 to 8 per 1000 persons in the population during said period.

The death rate of Delhi (CRS) & All India (SRS) is also presented in graphic form. Due to the non availability of CRS data for the concerned year at national level, a comparative view with SRS results of All India have been taken.

Statement 4.2: Death Rate of Delhi (as per CRS) & All India (as per SRS)

Local Body –wise Deaths Registration

Distribution of registration of deaths local body-wise is presented in statement 4.3. Municipal Corporation of Delhi accounted for 78.66% deaths including 36.72% of North DMC, 25.63% of South DMC & 16.32% of East DMC where as 20.15% deaths in NDMC and 1.19% deaths in DCB. It is observed that out of total registered deaths, 88.21% were in urban Delhi.

Statement 4.3: Distribution of Deaths Registered by Sector and Local Body

Sl.No.	Name of Local		No. of Dea	aths	% to total

Type of Registration

The registered deaths as per type of registration under institutional and non institutional categories have been shown in Statement 4.4. The ratio of **65.66**: **34.34** was observed between institutional and domiciliary death events registered in 2017. The proportion of non institutional events decreased from 36.09% to 34.34% in 2017.

Statement 4.4: Distribution of Deaths by type of Registration

Deaths by Age group

Distribution of registered deaths in different age groups is presented in statement 4.5. As per this statement, it is observed that maximum (36.10%) deaths occurred in the age group of 65 years & above followed by 17.58% in the 55-64 years age group. Further, sex wise analysis reflects that the same trend continues for male deaths and female deaths.

Statement 4.5: Distribution of Deaths by Age group and sex

Age Group (Year)	Male	Percentage	Female	Percentage	Others	Percentage	Total	Percentage
Below 1	4709	5.63	2928	5.58	8	25	7645	5.62

Infant Deaths

It is evident from statement 4.6 that during the year 2017 the infant deaths were 7645 i.e. 5.62% of the total registered deaths which is significantly less than 5.72% infant deaths during preceding year. Out of these infant deaths 7569 were institutional and 76 non institutional i.e. domiciliary. The Infant Mortality Rate per thousand live births during 2017 worked out to be 20.83 which is on the lower side as compared to preceding year.

Statement 4.6: Distribution of infant Deaths

Medically Certified Cause of Deaths

Statement 4.9 provides MCCD data pertaining to institutional deaths as per coding of ICD-10. The ICD-10 is used to translate diagnosis and other health related problems from words to alphanumeric code and there by facilitates the classification and analysis of data. This statement provides the status regarding major causes of deaths as per MCCD for institutional deaths during 2017. In this regard, more details are presented in Table D-11 of the section 5 of the report.

Statement 4.9: Main causes of Death under MCCD by sex

-: SECTION SIX :ANNEXURE

CONCEPTS & DEFINITIONS

Some important concepts used in this Annual Report are defined as follows:

- 1. **Birth:** "Birth" means live-birth or still birth.
- 2. <u>Live Birth:</u> "Live-Birth" means the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which after such expulsion or extraction, breathes or shows any other evidence of life, and each product of such birth is considered live-born.
- 3. <u>Still-Birth</u>: "Still-Birth" means foetal death where a product of conception has attained at least the prescribed period of gestation.
- 4. <u>Death:</u> "Death" means the permanent disappearance of all evidence of life at any time after live-birth has taken place.
- 5. <u>Foetal Death:</u> "Foetal Death" means absence of all evidence of life prior to the complete expulsion or extraction from its mother of a product of conception irrespective of the duration of pregnancy.
- 6. <u>Birth Rate:</u> Birth rate acts as an index of the relative speed at which additions are being made to the population through child-birth. It is only a live birth that signifies an addition to the existing population, excluding still births.

The annual birth rate is defined as:

No. of Births in a year
Birth Rate =
$$x 1000$$
Mid-year Population

7. **Death Rate**: The death rate for a given year tells us at what rate deaths have depleted the population over the course of the year.

The death rate, which measures the decrease in a population due to deaths, is perhaps the most widely used of any vital statistics rate because of its value as an index in numerous demographic & public health problems.

The Annual Death Rate is defined as:

8. <u>Infant Mortality Rate:</u> Infant mortality rate serves as one of the best indices to the general "healthiness" of a society. It is similar to age-specific death rate for infants under 1 year of age.

The annual infant mortality rate is defined as:

9. <u>Maternal Death Rate:</u> Maternal death rate is defined as maternal deaths per thousand live births.

10. **Neo Natal Mortality Rate:** The neo-natal mortality rate, like the infant mortality rate, is similar to an age specific rate. It is a rate used to measure the risk of death during the first month of life and is defined as:

11. Average Age at Death: Average age at death is defined as:

Average age at death =
$$\sum_{\text{N}} fx$$

Where f = frequency of each age-group x = mid-point of the various age-groups N = total frequency

Note: — Indicates not available
