PREFACE

The present report on Annual Survey of Industries (ASI) 2006-2007 of the Govt. of NCT of Delhi, Twenty eighth in the series, being issued by the Directorate of Economics & Statistics, is based on unit level data supplied by the CSO(IS Wing), Kolkata on the basis of returns furnished by the factories registered under Sections 2 m (i) & 2 m (ii) of the Factories Act, 1948. The report consists of two parts. The Part-I contains introduction, concepts and definitions and brief analysis of the industrial structure in the National Capital Territory, while Part-II is devoted to statistical tables.

The report provides a comprehensive data on characteristics of the industrial activity. The report also contains important characteristics relating to capital structure, capital formation, employment pattern, input, output, value added by manufacture etc. It also highlights the distribution of principal characteristics by the employment size, capital size and type of ownership/organisation and by size of capital.

The report has been prepared by Annual Survey of Industries Unit of the Directorate of Economics & Statistics under the guidance of Sh. N. T. Krishna, Dy. Director whereas Sh Sabir Ali, Assistant Director and Sh. K. R. Chhibber, Statistical Officer have supervised the work.

Data processing and tabulation work has been done by the EDP unit by Nidhi Rajpal, Assistant Programmer. The strenuous efforts made by the officers and staff of ASI unit and EDP unit of this Directorate is highly appreciated.

The valuable co-operation, extended by the CSO(IS Wing), Kolkata of the Government of India by providing pre requisite data and guidance is acknowledged.

I hope the data published in this report will be useful to the Planners and Policy makers. Suggestions for improvement in the content of tables etc. in our future ASI reports are welcome.

CHAPTER - I

INTRODUCTION

The Annual Survey of Industries (ASI) is the principal source of industrial statistics in Delhi. It provides statistical information to assess and evaluate objectively and realistically the change in the growth, composition and structure of the organised manufacturing (Factory Sector) comprising activities associated with manufacturing processes, repair services, personal services, sanitary services, generation and transmission of electricity, gas, water supply and cold storages. Industrial sector occupies an important position in Delhi's economy and plays a pivotal role in the rapid and planned economic development.

The Annual Survey Industries is conducted annually under the statutory provisions of the collection of Statistical Act, 1953 and the rules framed there under in 1959. The work of collection of Industrial Statistics from the organised industrial sector (Factory –Sector) has been entrusted to the Field Operations Division (FOD) of the National Sample Survey Organisation (NSSO), Government of India. Under the arrangement, provision has been made for the supply of a copy of each of the ASI returns submitted by the factories to the NSSO (FOD) to the Directorate of Economics & Statistics for use of State Government.

COVERAGE

2. Coverage of the Annual Survey of Industries extends to the entire Factory Sector, comprising industrial units (called factories) registered under section 2(m)(i) and 2(m)(ii) of the Factories Act.1948, wherein a "Factory", which is the primary statistical unit of enumeration for the ASI is defined as:-

"Any premises" including the precincts thereof:-

(i) wherein ten or more workers are working or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power or is ordinarily so carried on,

or

(ii) wherein twenty or more workers are working or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on without the aid of power or is ordinarily so carried on, but does not include a mine subject to the operation of the Mines Act,1952, or a railway running shed.

The "manufacturing process" referred to above has been defined under section 2(k) of the Factories Act, 1948 as:-

"Any process" for-

- (i) making, altering, ornamenting, finishing, packing, oiling, washing, cleaning, breaking up, demolishing or otherwise treating or adapting any article or substance with a view to its use, sale, transport, delivery or disposal; or
- (ii) pumping oil, water or sewage; or
- (iii) generating, transforming or transmitting power; or
- (iv) composing types for printing by letter press, lithography, photogravure or other similar process or book binding; or
- (v) constructing, reconstructing, repairing, refitting, finishing or breaking up ships or vessels;

In addition to section 2(m)(i) & 2(m)(ii) of the Factories Act, 1948, electricity units registered with the Central Electricity Authority and Bidi & Cigar units, employing 10 or more workers with the aid of power and 20 or more workers without the aid of power and registered under the Bidi & Cigar Workers (Conditions of Employment) Act, 1966 are also covered in ASI.

Unit of Enumeration

The primary unit of enumeration in the survey is a factory in the case of manufacturing industries, a workshop in the case of repair services, an undertaking or a licensee in the case of electricity, gas and water supply. The owner of two or more establishments located in the same state and pertaining to the same industry group and belonging to same scheme (census or sample) is, however, permitted to furnish a single consolidated return, termed as 'Joint Return'. Such consolidated returns are a common feature in the case of bidi and cigar establishments, electricity and certain public sector undertakings.

ASI Frame

The ASI frame is based on the lists of registered factories/units maintained by the Chief Inspector of Factories in each state and those maintained by registration authorities in respect of bidi and cigar establishments and electricity under-takings. The frame is being revised once in three years from 1989-90 but updated every year by the regional offices of the Field Operations Division of NSSO in consultation with the Chief Inspector of Factories in the state. At the time of revision, the names of the de-registered factories are removed from the ASI frame and those of the newly registered factories are added. In updation, only new registrations are added to the existing frame. Inspite of regular updating of the frame, quite a number of small-sized factories selected for the survey are found to be non-existing in the field and are termed as deleted factories. However, such factories are not taken into consideration for the purpose of tabulation and analysis in this report.

All the factories in the frame have been classified into two sectors, viz., the census sector and the sample sector.

The Census Sector consists of the following categories:

- (i) Units having 100 or more workers and
- (ii) All factories covered under Joint return and contributing significantly in terms of GVA.

The Sample sector: All industrial units of the entire ASI frame minus the Industrial units of the Census Sector will form the sample sector.

Since ASI 1999-2000, all electricity undertakings other than captive units have been kept outdside the purview of ASI. All departmental undertakings such as Railway workshop etc have also been kept outside the preview of ASI.

Sampling Design and Sample Allocation

From ASI 2004-05 onwards a new sampling design has been adopted as per the decision taken by the Standing Committee on Industrial Statistics. According to the new sampling design, the samples are to be selected in such a manner so as to cover the entire ASI frame in five years. For the purpose of sampling, the entire frame (main frame of 2004-05) has been divided into (a) Census sector [C] where all the units are to be selected for survey in every year during ASI 2004-05 to ASI 2008-9 and (b) Sample sector [S] where a minimum of one-fifth of the units are to be selected for every year so that the entire frame is surveyed during ASI 2004-05 to ASI 2008-09. In respect of new units registered in the year 2006-07, a supplementary frame has been prepared and units from the supplementary frame has been selected using the same criteria as applied to the main frame.

Strata (State by 4-digit of NIC-04) having less than or equal to six units after selecting the Census Sector units as defined above are also selected for survey every year.

In general, a sampling fraction of 20% (25% in case of supplementary frame) in sample sector was taken for sampling with a minimum of six samples in each stratum in the form of two independent sub-samples with half in each of the two sub-samples.

From ASI 2002-03, Relative Standard Error (RSE) is being provided as an estimate for error in estimation. The RSE for basic characteristics like Worker, Wages to worker and GVA for All India at 2-digit NIC-04 have been tabulated. RSE of a characteristics has been calculated as:

$$V = \sum_{k} \sum_{j} (R_1 - R_2)^2 / 4$$
, $R = \sum_{k} \sum_{j} (R_1 + R_2) / 2$, $RSE = 100 \text{ x } \sqrt{V/R}$

Where R_{jjk} is estimate of the characteristics of sub-sample 1 of sub-stratum J of stratum K.

ESTIMATION PROCEDURE

The total ASI population is divided into two major categories viz Census (C) and Sample (S). In each state the sample sector S is divided into a number of strata as per 4-digit level of NIC-2004. The estimation procedure is described as under:

NOTATION:

Let

 N_i = Number of units considered for selection from the jth stratum of sample Sector S.

 N'_{i} = Number of units reported to be existent in the frame for the jth stratum of S.

 n_i = Number of sample units selected from the jth stratum of S.

 n'_{i} = Number of sample units reporting in the jth stratum of S.

 M_i = Multiplier for the jth stratum of S.

T_c = Aggregate of a characteristics of all the units reporting under census sector C.

 T_i = Aggregate of a characteristics of the reporting units of jth stratum in S.

T = Aggregate of a characteristics for the factory sector as a whole in a State/ Union Territory.

Estimation:

The estimate of T for any characteristics is given by

$$T = Tc + \sum_{j} M_{j} T_{j}$$

Where $M_j = \frac{N'_j}{n'_j}$. In case N'_j and n'_j are not known, M_j can be estimated by

using the formula $M_j = \frac{N_j}{n_j}$ with the assumption that

$$\frac{N_j}{N_i'} = \frac{n_j}{n_i'}$$

Thus, according to the above estimation procedure, separate multipliers were built up for sample sector for the entire Delhi.

Reference Period

Reference period for ASI 2006-2007 was the accounting year of the factory, ending on any day during the fiscal year 2006-2007. Thus in ASI 2006-2007 data collected from respective establishment relate to their accounting year ended on any day between 1st April, 2006 and 31st March, 2007. Survey was conducted in the year 2007-2008 (October, 2007 to March, 2008).

Schedule of Enquiry

The schedule for ASI 2006-2007 is more or less similar to the ASI schedule 2005-06, and it aims to collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items - indigenous and imported, products and by-products, distributive expenses etc.

CLASSIFICATION OF INDUSTRIES

The NIC - 1970 was followed to classify economic activities of the factories from ASI 1973-74 to ASI 1988-89. NIC - 1987 had been introduced and followed till ASI 1997-98. NIC 1998 was then followed from ASI 1998-99 to ASI 2003-04. New series of classification, i.e. NIC - 2004 has been introduced from ASI 2004-05. All the factories in the ASI frame are accordingly classified in their appropriate industry groups on the basis of the value of the principal product manufactured by them. This way a unit gets classified in one and only one industry group even though it might be manufacturing products belonging to different industries. The estimates for different aggregates presented at two or three digit level in this report correspond to the NIC 2004.

LIMITATION

As data relating to less than 3 units in an industry group cannot be published (with a view to safeguard its secrecy), the data in respect of such industrial units has been combined with the nearest sub-group or group keeping the nearness in the line of production, as far as possible.

Also, the results presented in this report are subject to some limitations. Firstly, these are mainly based on the summary block characteristics and do not take into account all the details provided in the inner blocks of the schedule. Secondly, as the figures were rounded upto the nearest integer at various levels of aggregates during the course of tabulation, there might be slight variation in the totals presented at higher level of aggregation and the sums of corresponding constituents shown in different tables.

CHAPTER - II

CONCEPTS AND DEFINITIONS

REGISTERED FACTORY is one which is registered under sections 2m (i) and 2m (ii) of the Factories Act, 1948. The Sections 2m (i) and 2m (ii) refer to any premises including the precincts thereof (a) wherein ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on or (b) wherein twenty or more workers are working or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on.

FIXED CAPITAL represents the depreciated value of fixed assets owned by the factory as on the closing day of the accounting year. Fixed assets are those which have a normal productive life of more than one year. Fixed capital includes land including leasehold land, buildings, plant and machinery, furniture and fixtures, transport equipment, water system and roadways and other fixed assets such as hospitals, schools etc. used for benefit of factory personnel.

PHYSICAL WORKING CAPITAL is the total inventories comprising of raw materials and components, fuels and lubricants, spares, stores, semi-finished goods and finished goods as on the closing day of the accounting year. However, it does not include the stock of the materials, fuels, stores etc. supplied by others to the factory for processing and finished goods processed by the factory from raw materials supplied by others.

INVESTED CAPITAL is the total of fixed capital and physical working capital.

WORKING CAPITAL is the sum of the physical working capital as already defined above and the cash deposits in hand and at bank and the net balance receivable over amounts payable at the end of the accounting year. Working capital, however, excludes unused overdraft facility, fixed deposits irrespective of duration, advances for acquisition of fixed assets, loans and advances by proprietors and partners irrespective of their purpose and duration, long-term loans including interest thereon and investments.

PRODUCTIVE CAPITAL is the total of fixed capital and working capital as defined above.

GROSS VALUE OF PLANT OF MACHINERY represents the total original (undepreciated) value of installed plant and machinery at the end of the accounting year. It includes the book value of the newly installed plants and machinery and the approximate value of rented in plants and machinery at the time of renting- in but excludes the value of rented- out plants and machinery. Total value of all the plants and machinery acquired on hire - purchase basis is also included.

WORKERS are defined to include all persons employed directly or through any agency whether for wages or not and engaged in any manufacturing process or in cleaning any part of the machinery or premises used for manufacturing process or in any other kind of work incidental to or connected with the manufacturing process or the subject of the manufacturing process. Labour engaged, in the repair and maintenance or production of fixed assets for factory's own use or labour employed for generating electricity or producing coal, gas etc. are included.

EMPLOYEES include all workers defined above and persons receiving wages and holding supervisory or managerial positions engaged in administrative office, store keeping section and welfare section, sales department as also those engaged in purchase of raw materials etc. or purchase of fixed assets for the factory and watch and ward staff.

MAN-HOURS represent the total number of hours worked and the number of hours paid for, during the accounting year. It is obtained by summing-up the number of persons of specified categories attending in each shift-hour over all the shifts worked on all days.

WAGES AND SALARIES are defined to include all remuneration in monetary terms and also payable more or less regularly in each pay period to workers as compensation for work done during the accounting year. It includes (a) direct wages and salary (i.e., basic wages/salaries, payment of overtime, dearness, compensatory, house rent and other allowances); (b) remuneration for the period not worked (i.e., basic wages, salaries and allowances payable for leave period, paid holiday, lay off payments and compensation for unemployment, if not paid from sources other than employers); (c) bonus and ex-gratia payment paid both at regular and less frequent intervals (i.e., incentive bonuses, good attendance bonuses, productive bonuses, profit sharing bonuses, festival or year-end bonuses etc.). It excludes lay off payments, which are made (1) from trust or other special funds set up exclusively for this purpose i.e. payment not made by the employer. It also excludes imputed value of benefits. (2) In kind, Employer's contribution to old age benefits and other Group benefits. Travelling and other expenditure incurred for business purposes and reimbursed by the employer are excluded. The wages are expressed in terms of gross value i.e., before deduction for fines, damages, taxes, provident fund, employee's state insurance contribution etc.

TOTAL EMOLUMENTS is defined as the sum of wages and salaries, employers contribution as provident fund and other funds and workmen and staff welfare expenses as defined above.

<u>FUELS CONSUMED</u> represents total purchase value of all items of fuels such as coal. Liquefied petroleum gas, petrol, electricity, lubricants, water etc. consumed by the

factory during the accounting year but excluding the items which directly enter into the manufacturing process.

materials, components, chemicals, packing materials and stores which actually enter into the production process of the factory during the accounting year. It also includes the cost of all materials used for the construction of building etc. for the factory's own use. It, however, excludes all intermediate products consumed during the accounting year. Intermediate products are those products, which are produced by the factory but are subject to further manufacturing.

TOTAL INPUT comprises total value of fuels, materials consumed as well as expenditure such as cost of contract and commission work done by others on materials supplied by the factory, cost of materials consumed for repair and maintenance of factory's fixed assets including cost of repairs and maintenance work done by others to the factory's fixed assets, inward freight and transport charges, rate and taxes (excluding income tax), postage, telephone and telex expenses, insurance charges, banking charges, cost of printing and stationery and purchase value of goods sold in the same condition as purchased.

EX-FACTORY VALUE of all products and by-products manufactured is attained at the rate of net sale-value which is obtained by deducting sale-tax, excise duties and other distributive expenses from actual sale value (inclusive of subsidies etc.) with respect to each of the items.

TOTAL OUTPUT comprises total ex-factory value of products and by-products manufactured as well as other receipts such as receipts from non-industrial services rendered to others, work done for others on material supplied by them, value of electricity produced and sold, sale value of goods sold in the same condition as purchased, addition in stock of semi-finished goods and own construction.

<u>DEPRECIATION</u> is consumption of fixed capital due to wear and tear and obsolescence during the accounting year and is taken as provided by the factory owner or is estimated on the basis of cost of installation and working life of the fixed assets.

semi-finished Goods refer to the imputed value of all materials which have been partially processed by the factory but which are not usually sold without further processing. It includes the work in progress for materials supplied by others, but excludes the value of semi-finished fixed assets produced for factory's own use

NET VALUE ADDED is arrived by deducting total input and depreciation from total output.

CONCENTRATION OF FACTORIES

The summary results revealed that during the reference period of ASI 2006-2007, the larger number of factories were engaged in manufacturing of Wearing Apparel Dressing and Dying of Fur (17.11%) followed by manufacture of Fabricated Material Product (8.72%), manufacture of Machinery and Equipment (8.29%), Publishing, Printing and Reproduction of Recorded media (7.96%) and manufacture of Electrical Machinery and Apparatus (6.52%). These five industries together have accounted 48.57 percent of the total working factories, provided employment to 54.79 percent of the total employees and utilized 49.74 percent of fixed capital stock. Their share in the gross value of output and net value added by manufacture were 37.09 and 45.75 percent respectively.

DISTRIBUTION OF FACTORIES BY TYPE OF ORGANISATION, OWNERSHIP, POWER & YEAR OF INITIAL PRODUCTION

In the following paragraphs, some of the characteristics of the factories covered in the survey, like, organisation, ownership and the year of initial production have been discussed.

99.83% of the total belonged to wholly Private Enterprises. On the other hand only 5 units (i.e. 1 unit in Census Sector and 4 in the Sample sector) belonged to the Joint sector Private.

(c) Year of Initial Production

The distribution of factories classified according to their year of initial production has been presented in the table as follows

CAPITAL STRUCTURE

During the reference period 2006-2007, the fixed capital invested in the factories covered under the survey was estimated at Rs. 2913.70 crores, productive capital Rs. 6416.33 crores and invested capital Rs.6467.41 crores. These were higher by 12.51, 2.5 and 8.98 percent respectively compared to those estimated during the corresponding period of 2005-2006. From the investment angle industries such as Mfg. of Wearing Apparel, Dressing and Dying of fur, Mfg. of Food Products and Beverage, Publishing and printing ,Mfg. of Chemical & Chemical Products, Mfr. Of Fabricated Metals products were the most important ones. These industries among themselves shared 63.26 percent of fixed capital, 59.26 percent of invested capital and 50.84 percent of working capital deployed in all the industries taken together.

Table-5 given below depicts the relative share of the census and sample sector in the capital structure, as also certain important ratios, and derived ratios.

The study of the table reveals that:

The 787 Census Sector Factories constituting 24.08 percent of factory sector deployed a major chunk of the capital resources of factory sector viz. Rs. 3271.44 crores or 50.58 percent of the Total Invested Capital, Rs.3114.56 crores or 48.54 percent of the total 'Productive Capital' and Rs.1395.99 crores or 47.91 percent of the total 'Fixed Capital'

The invested capital per unit' worked out to Rs.4.16 Crore in the census sector and 1.29 Crore in the sample sector as against Rs. 1.98 Crore in the factory sector. This indicates that employment potential, with limited resources is more in the small size units than in the large size units.

Details of 'Invested',' Productive' and 'Fixed Capital' their percentage distribution and certain important derived ratios at the Major Industry groups and Industry Groups at 2 digit level of National Industrial Classification (NIC-1998) have been shown in Table II given in Part II of the report.

The study of these tables reveals that:

(i) Among the Major Industry Groups, the highest contribution amounting to Rs. 1340.98 Crores (20.73%) in the invested capital and Rs. 550.50 Crores (18.89%) in the fixed capital in the factory sector was that of Major Industry Group 18- Mfg. of Wearing Apparel Dressing and Dying of Fur.

- (ii) The lowest contribution on the other hand was that of Major Industry Group 20- Mfg. of Woods &Wood Products contributing Rs. 228.2 lakhs (0.04%) in the invested capital and 39 lakhs (0.01%) in the fixed capital in the factory sector.
- (iii) The Fixed Capital and Invested Capital ratio at 5.74 in the Major Industry Group 20 Mfg of wood & wood products was the highest, while in the Major Industry Group 63-Supporting and Auxiliary Transfer Activities, 1.00 was the lowest.

Table –6 below depicts the distribution of factories according to capital size (Gross value of plant and machinery) being adopted for classification of industrial units into small and large units, separately for the census, sample and factory sectors.

The perusal of table-6 reveals that 2550 (78.03%) units have an investment of less than Rs.1.00 crore in the Plant and Machinery. while there were only 718 (21.97%) unit have an investment of over Rs.1.00 crore in the Plant & Machinery.

EMPLOYMENT

The number of persons employed in the Factory Sector during 2006-2007 worked out to 129952 of these 89431 (68.82%) were workers engaged exclusively in the production and/or repair services and the remaining 40521 (31.18%) were other employees including supervisory, managerial, clerical and auxiliary staff, working proprietors and unpaid family workers. As against this, the corresponding figures for the year 2005-2006 were 87588 and 40015 indicating an increase of 2.1 percent and 1.26 percent respectively in the year 2006-2007.

The total number of 'mandays worked', by all employees during the current year was 388 lakhs compared to 383 lakhs during 2006-2007 showing thereby, increase of 1.31 percent over two years.

Table –7 below shows employment, mandays worked and certain important ratios derived therefrom separately for the census, sample and factory sectors.

The study of the table –8 reveals that:

- (i) The maximum number of 935 units forming 28.61 percent of the factory sector, employed 50-99 workers. The employment size group 20-49 workers with 734 units (22.46%) came next followed by employment size group 100-199 workers with 631 units (19.31%).
- (ii) Within the census sector, 351 out of 787 units have less than 50 workers each. 202 units between 1 –19 workers. Again 158 out of 787 (20.08 %) of the census sector employed 50-99 workers, 99 out of 787 (12.58 %) between 100-199 workers.
- (iii) In the sample sector, 68.60 percent of the units (1702 out of 2481) employed over 50 workers each. As many as 194 units forming 7.82 percent of total units in the sample sector employed less than 20 workers each. Further, 585 units constituting 23.58 percent of the sample sector reported employment between 20 to 49 workers.

EMOLUMENTS

A total sum of Rs. 1485.68 crores was paid as emoluments to all employees during 2006-2007 of which Rs.483.75 crores were paid as wages to workers and remaining Rs.1001.93 crores represented payment to other employees bonus and value of benefits in kind etc. The share of census and sample sector factories in the case of the total emoluments to all employees was Rs. 865.58 crores (58.26%) and Rs.620.10 crores (41.73%) respectively. whereas in the case of wages to workers it was Rs.260.40 crores (53.82%) and Rs. 223.35 crores (46.17%) respectively.

The total emoluments paid to all employees, wages to workers and some important derived ratios have been indicated in the table 9 given below:-

TABLE 9 : EMOLUMENTS, WAGES AND SOME IMPORTANT DERIVATIONS(Value in Rs. Lakh)

(Figures in parenthesis indicate percentages to the total)

The above table reveals that the employees as well as workers in the census sector were better paid than those in sample sector. The census sector constituted only 24.08 percent of the factory sector, claimed 58.26 percent of the wages paid to employees. The average emoluments per employee per man-day for the census sector worked out to Rs.441.96 as against Rs. 322.67 for the sample sector and Rs.382.88 for the factory sector. The reasons for the difference in the emoluments in the two sectors are obvious. The factories in the census sector are generally highly mechanised and employ a greater percentage of skilled persons who are better paid than others.

The comparative position in respect of total emoluments paid to all employees, salaries and wages paid to workers etc., the major industry groups has been indicated in table II, given in part – II of the report. Some of the salient features revealed from the study of this table are:

- (i) The total emoluments paid to all employees were the maximum at Rs.37405.16 lakhs (25.18%) in the Major Industry Group 18- Mfg. of Wearing Apparel Dressing and Dying of Fur followed by 17524.59 lakhs (11.80%) in the Major Industry Group 22-Publishing Printing and Reproduction of Recorded Media, The two groups together shared over 36.97% of the total emoluments paid in the factory sector.
- (ii) The average emoluments per employee per annum Rs. 201299 were the maximum in the Major Industry Group 24- Mfr. of Chemicals & Chemical Products, while these were lowest at Rs. 62404 in the Major Industry Group,23- Mfr. of Coke, Refined Petroleum Product. However, the average emoluments per employee per year for the factory sector worked out to Rs.114325.
- (iii) The total wages of Rs.14964.15 lakhs (30.93%) paid to the workers in the Major Industry Group 18-Mfg. of Wearing Apparel Dressing and Dying of Fur were the maximum. The Major Industry Group 28-Mfg. of Fabricated Metal with Rs.4014.16 lakhs (8.30%) came next. The two groups together accounted for 39.23% of the total wages paid in the factory sector.

INPUTS

Inputs, in any industrial activity mainly consists of consumption of raw materials and stores (used for manufacture, repair and maintenance purposes), 'fuels' purchase for industrial and non-industrial services, consumption of products reported for sale during the previous year but used for further manufacture in the current year, 'consumption of fixed capital' (i.e. depreciation) and the 'value of labour inputs' (i.e. payment made to various categories of employees).

The total value of the inputs, other than labour input and depreciation in the factory sector worked out to Rs.20757.90 crores. Out of this, consumption of materials being the principal components accounted for Rs 12889.82 (62.10%) crores of the total value of input. The remaining 7868.08 crores were shared by 'fuels' and 'other inputs' their relevant values being Rs.644.04 crores (3.10%) and Rs.7224.04 crores (34.80%) respectively.

The table below indicates the percentage consumption of different components of inputs in the census, sample & factory sectors.

The perusal of the table-10 reveals some of interesting facts which are as under:-

- (1) The census sector factories, constituting 24.08 percent of the total factories covered shared 43.37 percent of the total inputs, while the sample sector, forming 75.92 percent of the factories accounted for only 56.63 percent of the total inputs.
- (2) The percentage share in the total consumption of 'materials' 'fuels' and 'other inputs' in the case of census sector was 41.02 percent, 40.65 percent and 47.80 percent respectively. The

- relevant percentages in the case of sample sector were 58.98 percent, 59.35 percent and 52.20 percent in that order.
- (3) Within the two sectors, the percentage share of the constituents of 'total inputs' varied considerably. In the census sector 'material consumed', 'fuel consumed' and 'other inputs' accounted for 58.74 percent. 2.91 percent and 38.35 percent respectively compared to 64.67 percent, 3.25 percent and 32.08 percent respectively for the sample sector as against 62.10 percent, 3.10 percent and 34.80 percent respectively for the factory sector.

Some of the salient features revealed by the study of the results of the survey detailed in table II given in part II of the report are as follows:-

- (i) Major Industry Group 31-Mgf of Electrical Machinery and Apparatus shares 17.94 percent of the total inputs in the factory sector followed by Group 18 –Manufacturing of Wearing Apparel Dressing and Dying of Fur, Group 15-Manufacturing of Food Products and Beverages, Group 22-Publishing, Printing and Reproduction of Recorded Media, Group 24 Manufacturing of Chemical and Chemical Product, share 16.04%, 4.80 percent, 9.98 percent, and 6.03 percent respectively of total inputs. These five industry groups together accounted for 55 percent of the total inputs in the factory sector.
- (ii) Within the Major Industry Groups, the percentage share of 'Material Consumed' to total input of the Major Industry Groups varied considerably. It was the highest in the Major Industry Group 15-Mfg. of Food Products and Beverages at 71.19% and the lowest at 0.01% in the Major Industry Group 63-Supporting and Auxiliary Transport activities.

DEPRECIATION

Depreciation means 'consumption of fixed capital' during the manufacturing process. It is estimated on the basis of coast and 'productive life' of the fixed assets concerned.

As shown in table II of part II the total estimated value of depreciation for all the fixed assets in the factory sector, as per ASI 2006-2007 worked out to Rs. 34430 lakhs. Of this Rs.17018 lakhs or 49.43 percent was in the census sector while the sample sector factories, constituting 17412 lakhs or 50.57 percent of the total factories covered. The average rate of depreciation calculated on the basis of 'total fixed capital engaged in the production activity during the survey year, worked to 11.82 percent in the factory sector, 12.19 percent in the census sector and 11.47 percent in the sample sector.

The table-11 given below depicts the average rate of depreciation as percentage of fixed capital in some major industry groups.

OUTPUT

Output in an industry includes products, by-products and services generated during the industrial process. The value of total output worked out to Rs.24228.05 crores as compared to Rs.20555.38 crores in 2005-2006 indicating thereby an increase of 17.87 percent over the previous year. The worth of products and by-products is 17293.51 crores whereas Rs.6934.54 crores is worth of 'other output' including services rendered to others and sale value of goods sold in the same condition, as purchased.

- (iii) The average 'value of output per worker' was higher in the Sample sector than in factory and sample sector. The relevant figures for Census Sector, Sample Sector and Factory Sector are Rs. 23.82 lakh, Rs. 30.55 lakh and Rs. 27.09 lakh respectively.

- (iv) 'Production per manday', being the measure of the productivity in an industrial activity, 'Productivity' in the Sample Sector at Rs. 6904.56 was higher compared to Rs. 5595.54 in the Census Sector and Rs. 6243.86 in the Factory Sector.
- (v) Output-Input ratio, on the other hand, was 1.22 in census sector, 1.13 in Sample sector and 1.17 in Factory sector.

The details of 'output', 'Products and by-Products', and 'other output', etc. within Major Industry Groups are indicated in table-II of Part II of the Report. The study thereof reveals that:-

(i) The contribution of Major Industry Group 18-Mfr. of Wearing Apparel: Dressing and Dyeing of Fur, approx. at Rs.4010.23 crore worth of output accounting for 16.55 percent of the total products was the maximum. Major Industry Groups, 15-Mfg. of Food Products and Beverages 16.52 percent, Sale, Maintenance and Repair 12.64 percent, Mfr. of Chemical and Chemical Products 11.05 percent came next in that order. These four Major Industry Groups together attributes 56.76 percent of the total output in the factory sector.

The study of table 13 reveals that:-

- (1) The 'pattern of the cost of production' in factories in the census and the sample sectors differed substantially particularly in respect of share of fuels, emoluments, depreciation and factor payments in their respective total cost structure in the two sectors.
- (2) The 'total value of inputs' (materials, fuels and other inputs taken together) constituted 82.15 percent of the 'total value of output' in the census sector, 88.59 percent in the sample sector and 85.68 percent in the factory sector.
- (3) The contribution of materials and stores components of inputs was 53.20 percent of the total output in the factory Sector. The relevant figures were 48.25 percent for the census sector and 57.29 percent for the sample sector.
- (4) The share of 'fuels' also varied substantially in the three sectors. It was only 2.39 percent of the value of output in the census sector, 2.88 percent in the sample sector and 2.66 percent in the factory sector.
- (5) The other important factor of the cost viz. 'emoluments' formed only 7.90 percent of 'total output' in the census sector,4.67 percent in the sample sector and 6.13 percent in the factory sector.
- (6) The percentage contribution of factor payments was 2.03 percent of 'total value of output' in the census sector, 1.98 percent in the sample sector and 2.01 percent in the factory sector.

VALUE ADDED BY MANUFACTURER

Value added by manufacture is a measure of the relative importance of the industrial sector in State / National economy as well as a measure of the relative importance of a particular industry within the industrial sector itself. It is used to measure the contribution of Industrial Sector in the State / National domestic product. Measured in term of 'value added by manufacture' the contribution of the organised Industrial sector (factory sector) in the state domestic product of Delhi during the year 2006-2007 worked out to Rs. 3125.84.
