SECTION ONE

INTRODUCTION

Business Register essentially means the list of all establishments pursuing various economic activities relating to production and/or distribution of goods and/or services at a place. Such a list when complete in all respect will provide an ideal frame for conducting sample surveys and undertaking studies of various economic activities for finding their pattern and trend in the country.

At present an up-to-date frame of enterprises at the national level is available only in respect of the units/ factories covered under the Annual Survey of Industries (ASI). The ASI presently covers the relatively bigger units belonging to manufacturing and repair subsectors that are registered under sections 2m (i) and 2m (ii) of the Factories Act 1948 or under the Bidi & Cigar Workers (Condition of Employment) Act. For the other sectors, no such updated and satisfactory frame of bigger units/ enterprises exists at present. For planning any survey of such units, like the Survey of Non-Manufacturing Industries (SNMI), it would be desirable to develop a frame of establishments along with certain basic items of information for all sub-sectors such as trade, hotels and restaurants, transport, storage, communication, real estate, legal & business services etc. popularly known as Business Register.

The Business Register would reduce burden on respondents and in turn induce respondents to provide proper information on items not yet collected under various registers, reduce survey cost, and also provide useful information at the lowest level of administration, which is needed for inclusive development of the country.

Definitions of Business and Business Register

Business may be defined as an enterprising entity of a person, partnership or corporation/organisation etc., engaged in commerce, manufacturing, or service whereas, Business Register (BR) is a list of such business establishments and enterprises. It serves as a statistical tool for the preparation and coordination of surveys. It is an important source of information for the statistical analysis of the business population and its demography.

Scope and Coverage

In theory, Business Register records all enterprise groups, enterprises and local units that are active in the national economy. Geographically, it covers all the States and Union territories of the country within the domain of Economic Census. It follows by and large the concepts and definitions of Economic Census.

Benefits of BR

The benefits of the BR to various users are as under:

For the Private entrepreneurs

(a) Establishing business profile for a specific area;

- (b) Reduction in response burden by designing a standard format and advising the enterprises to fill up the same so that the number of existing returns can be reduced to a bare minimum;
- (c) Analyzing existing potential business markets; and

For the Government

- (a) Reducing administrative burden; and
- (b) Improving efficiency in registration system.
- (c) National Accounting and effective policy formulation, monitoring and planning.

Business Register Vs. Economic Census

Economic Census captures the information on all the enterprising activities in the country at a given point of time. However, the entities represented by the units held in business registers are not static. Entities are created, they may change form and they eventually disappear. Over a period of time, their characteristics may also change. Therefore BR should have procedures for recording these demographic events .The BR may be updated at least annually to record creations and deletions of units, as well as changes in their activity, address and characteristics/ stratification variables.

SECTION TWO

Methodology for preparation of Business Register

STEP-1:

For preparation of Business Register, the Delhi State undertook the following steps in respect of existing registered enterprises:

- i) Identification of State/District level Registering Authorities meant for registration of legal entities with complete official addresses and designation of the officer responsible for providing information; and
- ii) Listing of items of statutory information at the time of registration separately for each type of institution
- iii) Development of database in electronic form for consolidation of all such information available.

STEP-2:

Ideally the Business Register is exhaustive and should include all enterprises and establishments. Due to the presence of vast informal sector, in the initial effort, the following Acts and the Registering Authorities have been identified and kept in focus. However a few more relevant Acts were also considered

S. No.	Acts/Authorities considered	Corresponding Registering Authorities	Coverage
1	Companies Act,1956	Registrar of Companies	All companies
2	Factories Act,1948	The Director, Directorate of Industrial, Safety & Health, labour Department, GNCTD	Factories in which at least ten workers were employed on any day of the preceding twelve months and were engaged in manufacturing process being carried out with the aid of power or in which twenty or more than twenty workers were working on any day of the preceding twelve months in manufacturing process being carried out without the aid of power
3	Shops and Commercial establishments Act	Labour Commissioner	Shops and commercial establishments
4	Societies Registration Act	Commissioner/ Deputy Commissioner	Societies/ NGO/SHG (Note: Business Register for NPI has been prepared, it needs to be updated only)
5	Cooperative Societies Act	Registrar of Cooperative Societies, GNCTD	Cooperative Societies may be credit or consumer cooperatives.
6	Khadi and Village Industries Board	Deputy Director/HOO, Delhi Khadi & Village Industries Board	Khadi and cottages industrial units
7	Directorate of Industries(District Industries Centre)	General Manager/Joint or Deputy Commissioner, District Industries Centre	Industrial units or firms: private limited or public limited, micro, small or medium.
8	Food & Safety Standards Regulations, 2011	The Commissioner (Food Safety) Department of Food Safety,	Food Business Operators

1. The list of establishments was prepared in respect of each of the above Act/ Authority.

STEP-3:

- 1. All the district level lists were segregated up to the lowest administrative unit for easy identification in the field. Names of districts, towns, villages, pin codes were used for segregation of list of a geographical unit.
- 2. After the segregation, 11 districts of Delhi were divided among 5 Teams comprising of Team Leaders (officers of DES) and team members (officials of DES) for guidance and control of field work of Business Register.
- 3. Enumerators were appointed on Honorarium basis to canvas the Business Register Schedule placed at Annex-I.
- 4. During the field survey, enumerators checked the existence of the establishments with fixed site by visiting each establishment and corrected the particulars like address etc. if required, and marked those establishments which were not found in existence or found untraceable in the list of enterprises.

STEP-4:

After canvassing the Business Register Schedule, enumerators handed over the schedules to the respective Team Leaders. The assignment of NIC 2008 codes of the activities at 3 digit level was undertaken by the respective team .Thereafter, the filled-in scrutinized

schedules were handed over to the EDP unit of DES for data entry work. After the data entry of these lists, the System Analyst (DES) generated the Authority/Act-wise final lists of existing enterprises.
