TERRITORY OF DELHI**

*ANNUAL REPORT  
ON  
REGISTRATION OF BIRTHS & DEATHS  
IN DELHI - 2008*

**DIRECTORATE OF ECONOMICS & STATISTICS  
&  
OFFICE OF THE CHIEF REGISTRAR  
(BIRTHS & DEATHS)  
OLD SECRETARIAT, DELHI -110 054**

## **PREFACE**

The Annual Report on Registration of Births and Deaths in N.C.T. of Delhi for the year 2008 is twenty seventh issue brought out by the Directorate of Economics and Statistics & Office of Chief Registrar (Births & Deaths). Registration of Births & Deaths Act, 1969, sections 4(4) and 19(2) makes it mandatory to bring out the Annual Report on Registration of Births and Deaths.

This report provides valuable indicators like birth rate, death rate, trends in birth order and its relation with level of literacy of parents, type of medical attention at the time of birth, deaths by age group, leading medically certified causes of deaths and a host of many features in an exhaustive manner which can serve as a firm basis in evolving policies for the improved health management of our society. The report is presented in five sections. The first section covered aspects like the administrative set up of the civil registration system in vogue, levels of registration initiatives taken for the effective implementation of the provisions of the Registration of Births & Deaths Act, 1969' and other related aspects where as sections three and four covered Birth Profile and death profile respectively. Detailed statistical tables are given in section five.

The Annual Report has been prepared by Vital Statistics Unit of DES under the able guidance of Shri N. T. Krishna, Deputy Director. This office acknowledges the consistent efforts of all the functionaries of the local bodies (MCD, NDMC & DCB) engaged in the actual function of Civil Registration work and in providing the basic data on registration of births & deaths in Delhi. The pains taken by the EDP units in MCCD coding and processing of data under the close guidance of Shri S.K.Behra, System Analyst deserves special appreciation. The initiatives taken by S/Sh. D.B.Gupta, Asstt. Director and AShok Kumar, Statistical Officer in the procurement of requisite information from local bodies and the extraordinary efforts put in checking of consistency of the data and its analysis deserves special mention. The suggestions and guidelines received from the office of Registrar General India, are acknowledged

# **ANNUAL REPORT (Births & Deaths) -2008**

## **EXECUTIVE SUMMARY**

The following are the main highlights of the “Annual Report on Births & Deaths in Delhi 2008”.

### **A. PRIME VITAL INDICATORS:**

- i) **Birth Rate:** The birth rate worked out to 19.51 per thousand Population during 2008 as against 19.35 for the year 2007.
- ii) **Death Rate:** The Death Rate per thousand of population worked out to 6.29 during 2008 as against 6.07 in 2007.
- iii) **Infant Mortality Rate:** The infant mortality rate per thousand live births was 18.38 during 2008 as against 25.44 during 2007.
- iv) **Maternal Mortality Rate:** Maternal mortality rate per thousand live births was 0.20 in 2008 while it was 0.26 in 2007.

### **B. BIRTH REGISTRATION:** The brief profile of birth registration is as under .

- i) The total number of births registered during 2008 was 3.34 lakhs as against 3.22 lakhs during 2007 there by recording marginal increase over the previous year.
- ii) Average number of births per day in Delhi worked out to 915 in 2008 as against 882 in 2007.
- iii) Of the total births registered 166583 (49.89%) were male and 167325 (50.11%) female.
- iv) Out of the total births 2.45 lakhs (73.45%) were institutional and 0.89 lakhs (26.55%) were domiciliary in nature.
- v) Among the institutional births 150227 (61.25%) were in govt., hospitals and out of the institutional births 117159 (47.77%) were female.

- vi) Among the non institutional births, 50166 ( 56.59% ) were female. This can be attributed to implementation of LADLI scheme by Delhi Govt.
- vii) MCD accounted for 2.82 lakhs (84.36%) of total births where as 0.49 lakhs (14.60%) occurred in NDMC areas and 0.03 lakhs (1.04%) in DCB.
- viii) 4.55% of births were registered in rural area and 95.55% in urban area in Delhi.
- ix) Among the total births registered 55.12% were of first order 31.24 % second order and 10.15% third order during 2008 and only 3.49% were of subsequent order.
- x) Analysis of domiciliary birth events with respect to the type of medical assistance available at the time of delivery revealed that in 31.28% of cases either a doctor/trained nurse or mid-wife were present and in 41.78% of cases attendance of un-trained mid-wife was available.
- xi) Age-group of the mother at the time of delivery was analyzed and it was observed that in 49.86% cases it was 20-24 years and the age group in 36.23% cases was 25-29 years.
- xii) An inverse relationship between the level of education attainment of mother and birth order was observed. Higher the birth order lesser will be the level of educational attainment. In case of third birth order, the education attainment of mothers in 70.95% of the cases was below matriculation while in case of beyond third birth order, this proportion was 81.21%.

**C.DEATH REGISTRATION:** The brief profile of death registration is as under.

- i) In Delhi, 107600 deaths were registered during 2008 as compared to 100974 deaths registered during 2007.
- ii) Out of the total deaths registered 68033 (62.23%) were male and 39567 (36.77%) female.

- iii) MCD accounted for 79.91% of total registered deaths while the share of NDMC was 18.53% and DCB registered only 1.56% in the total .
- iv) The average number of deaths per day in Delhi worked out to 295 in 2008 as against 277 during 2007.
- v) 53.09% of the total deaths were reported by the medical institutions and the remaining 46.91% were domiciliary deaths during 2008.
- vi) Out of total 107600 deaths registered during the year 2008 as many as 6138 were infant deaths.
- vii) Deaths by age group revealed that 38.47% occurred in 61& above age group followed by 27.04% in 45-60 age group and 18.67% in 25-44 age group.
- viii) Institutional deaths by leading causes during 2008 (As per International Classification of Diseases –10<sup>th</sup> Revision) include 16.00 % due to disease of pulmonary circulation and other forms of heart diseases, 8.15% due to septicaemia, 6.98% due to diabetes mellitus, 4.60% due to shock, 3.74% due to T.B. etc.

## **SECTION ONE**

### **INTRODUCTION**

Review of the working of Act

## **SECTION ONE INTRODUCTION**

The Civil Registration System(CRS) aimed at proper accounting of vital events for the issuance of certificates as well as generation of valuable data for plan & policy formulation on health sector, received a big boost with the promulgation of The Registration of Births and Deaths Act 1969 (RBD Act 1969) in all states/ UTs in the country. This Act came into force in Delhi w.e.f. 1<sup>st</sup> July, 1970 and accordingly The Delhi Registration of Births and Deaths Rules 1970 have also been notified w.e.f. 1<sup>st</sup> January, 1971. These rules have been modified and made more people friendly in December 1999 and came into force w.e.f. 1<sup>st</sup> January, 2000. Prior to the implementation of the Registration of Births and Deaths Act, 1969 (18 of 1969), Registration of Births and Deaths in Delhi was governed by multiple Acts/Rules. The urban area of Municipal Corporation of Delhi (MCD) area was covered under the provisions of the Delhi Municipal Corporation Act, 1957 (Section 394-96) and bye laws made there under, whereas this function in the rural area of MCD was carried out under Panchayat Raj Act, 1959. On the other hand, the registration within the limits of New Delhi Municipal Committee (NDMC) was governed by section 188(c) and subsection (1) of section 199 of the Punjab Municipal Act, 1911. In the area under Delhi Cantonment this function was performed under clause (1) of section 281 of Cantonment Act, 1924.

### **MEANING &SCOPE OF CRS**

Civil Registration System may be defined as the legal recording of the occurrence of vital events (birth and death) through a network of government offices and designated officials, together with certain identifying or descriptive characteristics of the events on a continuous, permanent and compulsory basis. Civil Registration System also serves as the tool for measuring the changes in the population. In other words population census held once in a period of 10 years gives stock of population at a point of time where as, Vital statistics presents the flow of population.

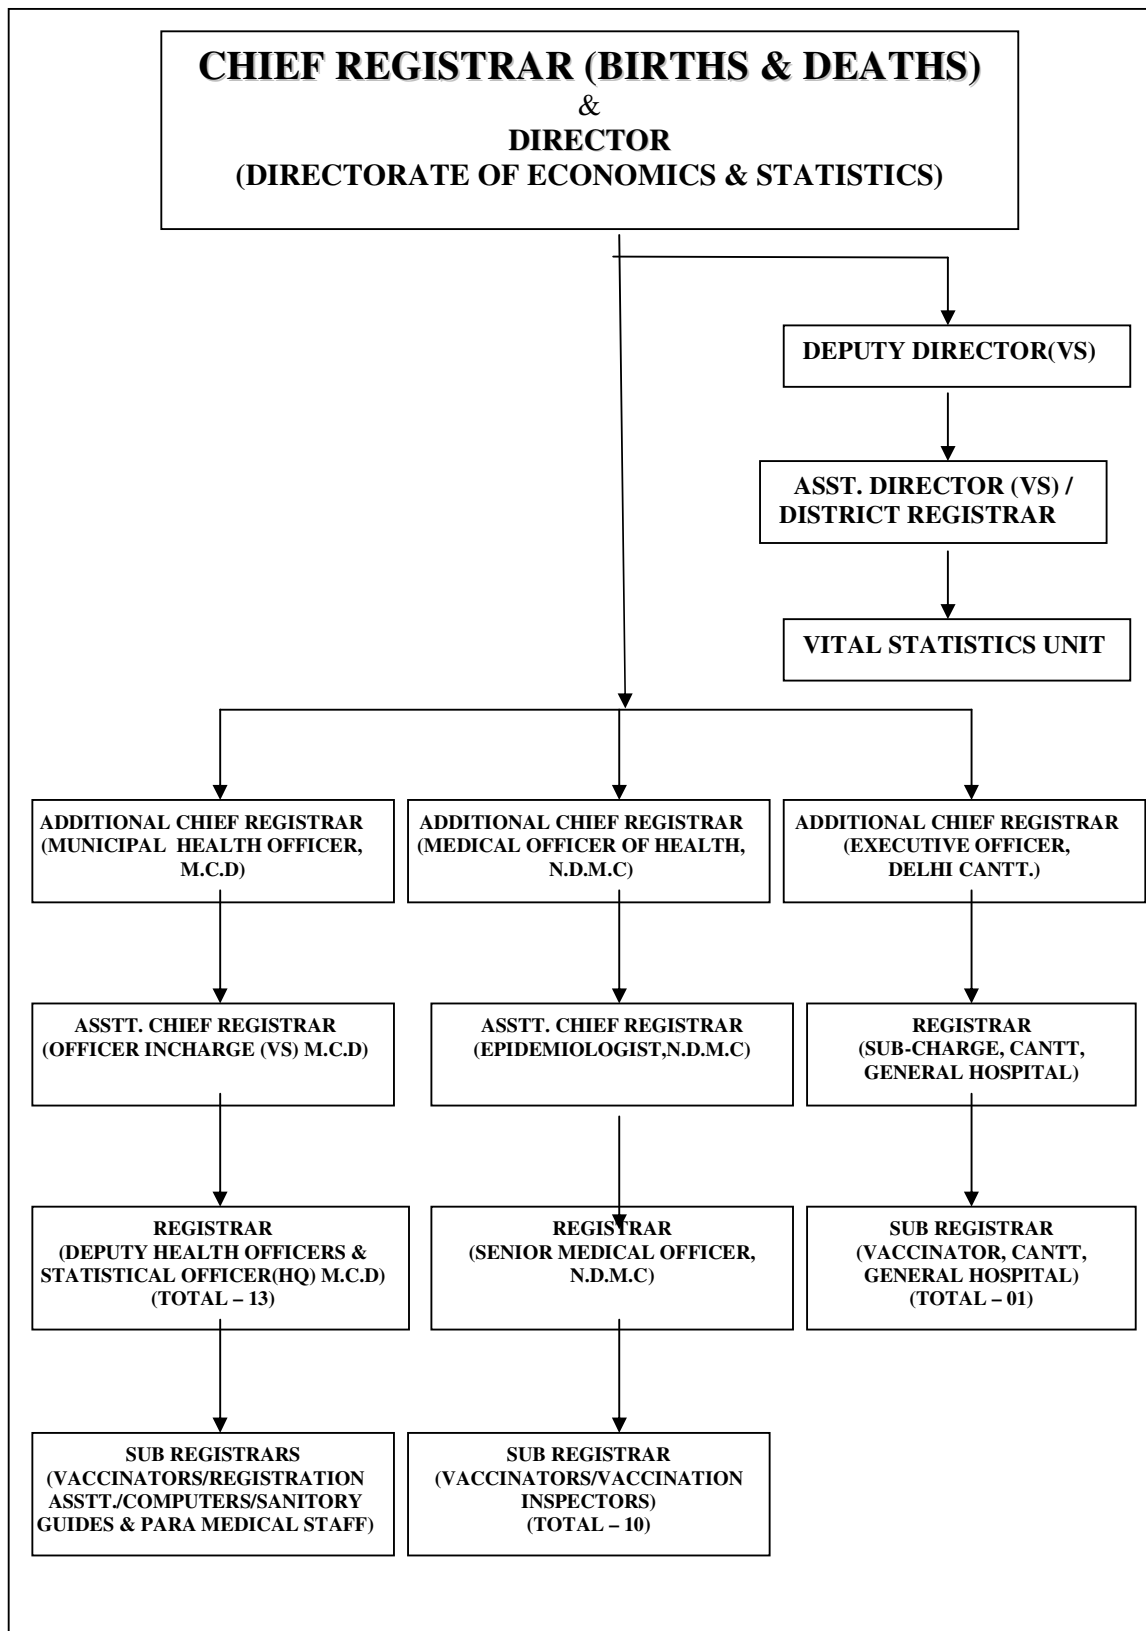

## **ADMINISTRATIVE SET UP**

Director, Directorate of Economics and Statistics, Govt. of NCT of Delhi also functions as the **Chief Registrar (Births & Deaths)** for the NCT of Delhi. The Chief Registrar is responsible for the proper implementation of the RBD Act, 1969 and the rules made there under and keeps a close liaison with the Registrar General of India, Ministry of Home Affairs, which is the nodal agency for such matters at the national level. The Chief Registrar is assisted by a secretariat in the form of vital statistics unit of the Directorate. The actual registration of births and deaths in Delhi is done by three local bodies viz MCD, NDMC and Delhi Cantonment Board through the network of centres spread all over Delhi. Each local body has a notified Additional Chief Registrar to coordinate the functions in the designated geographical area. The administrative set up of the civil registration system in Delhi may be seen from the organization chart:

## **REGISTRATION PROCEDURE**

Registration of births, still births and deaths is compulsory under the Registration of Births & Deaths Act, 1969 and rules framed thereunder. According to the Act, it is the duty of the head of the household and if he is not present in the house the nearest relative of the head present in the house and in the absence of any such person, the oldest adult person present in the house to report the occurrence of any live birth or still birth or death. For births and deaths in hospitals/health centres/maternity homes/nursing homes, other similar institutions or in jail or in dharmashala or in hostels etc., it is the responsibility of the In-charge of the institution to report birth, still birth and death to the Registrar (B&D) in their respective area within the prescribed time limit. Further, if it is brought to the notice of the Registrar that a particular event of birth or death occurred but not reported by the parents/relatives or medical institution, he shall issue notice in form No.21 to the head of the household or In-charge of the Institution, as the case may be for taking necessary action in the matter

As per Delhi Registration of Births & Deaths Rules, 1999 (w.e.f 1.1.2000), all births, still births and deaths within 21 days of the occurrence are to be reported to the Registrar/ Sub-Registrar of the concerned local area. The information is to be given in live birth report (Form-1) still-birth report (Form-3) and death report (Form-2).. As soon as registration of birth or death is completed a certificate in form No.5 or 6 respectively containing essential particulars of the event is given free of cost to the applicant under Section 12 of the R.B.D. Act 1969. Additional copies of the birth/death certificates may be obtained by the applicant by paying the prescribed fee under section 17 of the RBD Act.

In case, where the birth of any child had been registered without a name, the parents or guardian of such a child may approach the Registrar (B&D) for addition of the name of the child in the birth certificate free of cost within 12 months from the date of registration of the birth of a child. After one year but within a period of 15 years the name can be entered on the payment of the prescribed late fee.

### **DELAYED REGISTRATION**

Any vital event not reported to the appropriate authority within a period of 21 days from date of occurrence constitutes delay. The following procedure is to be followed in such situations.

- (a) Any birth or death of which information is given to the Registrar after the expiry of the specified period of **21 days** but within thirty days of its occurrence shall be registered on payment of a late fee Rs.2/-.
- (b) Any birth or death of which information is given to Registrar after **30 days**, but within one year of its occurrence shall be registered only with the written permission of the concerned Registrar on payment of late fee of Rs.5/-.
- (c) Any birth or death which has not been registered **within one year** of its occurrence, shall be registered only on an order of Area Sub- Divisional Magistrate and payment of late fee of Rs. 10/-.

## **MEDICAL CERTIFICATION OF CAUSE OF DEATH**

Medical Certification of Cause of Death (MCCD) provides reliable data on cause of mortality. This data serves as a valuable tool by public health planners, administrators, medical professionals and research workers to study cause of death in the population. Keeping in view the importance of this information a provision has been made u/s 10(2) and 10(3) of the Registration of Births & Deaths Act, 1969 for certification by the medical practitioner last attended the deceased and also issue a certificate, free of cost, to the family for transmission to the Registrar's office at the time of registration of the event of death.

At present the scheme of Medical Certification of Cause of Death in Delhi has been made compulsory in respect of institutional deaths occurred in the hospitals/nursing homes and other private institutions only. The domiciliary deaths have not been brought under the ambit of MCCD due to various practical problems such as lack of awareness among the citizens, economic conditions and also due to non-availability of adequate health infrastructure.

## **DEATH REGISTRATION AT CREMATION GROUNDS**

The facility of on the spot registration and issuance of Death Certificates has been provided by MCD in respect of domiciliary deaths occurred in MCD area at 12 cremation grounds VIZ.,(1) Nigam bodh Ghat Cremation Ground (2)Electric Crematorium, Nigam Bodh Ghat (3) Sat Nagar Cremation Ground.(4)Punchkuian Road Cremation Ground (5)Children Ghat Cremation Ground(6)Electric Cremation Ground, Punjabi Bagh(7)Punjabi Bagh Cremation Ground(8)Subhash Nagar Cremation Ground(9)Wazirpur Cremation Ground(10)Paschim Puri Cremation Ground.(11) Green Park Cremation Ground.(12)Sarai Kale Khan Cremation Ground

## **LEVEL OF COMPUTERISATION & FLOW OF DATA**

The level of computerisation in each of the local body was not uniform. In MCD it is at an advanced stage and about 352 hospitals/nursing homes both govt./ private are hooked to MCD server and they submit vital events on line there by avoiding manual handling of data leading to delays, omissions etc. However ,efforts shall continued to be made to fine tune the system to rectify short falls if any that surfaced in the light of the

experience of implementation of this model.. Data for preparation of Annual Report is supplied in soft form . However MCCD coding is done in Chief Registrar's Office as these codes as per ICD 10<sup>th</sup> revision was not loaded along with description in the software . In NDMC computerisation has picked up momentum and they have introduced online system with reporting units, however they are facing co-ordination problem with reporting units. CRS data is supplied in CD form along with MCCD coding to Chief Registrar's Office. . DCB which has a meager work load of vital events registration lagged behind in respect of computerisation with reference to CRS data management and this aspect is being taken care of by Chief Registrar's Office.

### **FUNDS FOR CRS**

During the year 2008-09 a total amount of Rs.8.33 lakhs was spent for the improvement of civil registration system in Delhi. Out of this the amount spent from the State Budget was Rs 6.71 lakhs and central assistance through RGI is Rs. 1.62 lakhs. The item wise expenditure is as under.

#### **Statement 1.1: Expenditure incurred on CRS in Delhi**

S.No.	Items	Expenditure incurred from State Budget(Rs)		Central Assistance(Rs)	
		2007-08	2008-09	2007-08	2008-09
1	Printing of forms & registers	233197	537468	-	-
2	Publicity	150038	133701	-	-
3	Training programmes (CRS/MCCD)	-	-	19250	12400
4	Infra structure support to local bodies like supply of computers/ Almirah etc.	-	-	-	149258
	Total	383235	671169	19250	161658

### **LEVEL OF REGISTRATION**

The health of CRS in quantitative terms can be gauged primarily from the level of registration achieved consistently in a given region/state The level of registration may be taken to mean as the ratio of actual number of births registered as per CRS to the estimated births (SRS) in a calendar year .The provisional data for level of registration at the national level was about 68.5% in case of births and 63.5% that of deaths in year 2006.

**Statement 1.2: Level of Registration in Delhi**

Year	Mid Year Population as per RGI ('000)	Registered Under Civil Registration System		Estimated under Sample Registration Scheme		Level of Registration	
		Births	Deaths	Births	Deaths	Births	Deaths
2000	13461	317376	79858	273258	68651	116	116
2001	13950	296287	81100	260865	69750	114	116
2002	14383	300659	86176	247388	73353	122	117
2003	14843	301165	87743	256784	74215	117	118
2004	15279	305974	85378	281134	71811	109	119
2005	15718	324336	94187	292355	72303	111	130
2006	16175	322750	98908	297620	76022	108	130
2007	16641	322044	100974	301202	79872	107	126
2008	17115	333908	107600	N.A.	N.A.	-	-

Delhi figures among the few states/UTs which have achieved 100% level of registration. Apart from Delhi, this list includes major states like H.P, Kerala, Punjab, W.B. The level of registration of births/deaths in Delhi over a period of time is indicated in the above statement. It is evident from the above statement that the level of registration in Delhi was more than hundred percent mainly because of the existence of good health infrastructure resulting in the inflow of population to Delhi from neighboring States for the purpose of better treatment .

**MEASURES FOR IMPROVEMENT OF CIVIL REGISTRATION SYSTEM**

- (i) A Citizen's Charter for Registration of Births & Deaths has been circulated to general public, Public representatives, Residents Welfare Associations (RWAs) and Non-Governmental Organizations (NGOs) etc. to spread awareness regarding the compulsory provisions for registration of births and deaths and the multiple advantages that will accrue by obtaining birth & death certificates promptly. The citizen charter indicates brief procedure and guidelines to be followed by the citizens of Delhi and Local Bodies for registration of Births & Deaths.
- (ii) The posters & stickers indicating the message of importance of registration of births and deaths were distributed in hospitals, nursing homes & registration centers of births and deaths with a view to give publicity and to educate the public regarding registration of births & deaths.

- (iii) Advertisements are being released in leading news papers on important occasions like Children Day, World Population Day etc. to educate general public about of the registration of birth and death. All other advertisements released by the Directorate also contains message pertaining to birth/death registration
- (iv) The Chief Registrar's Office is operating a website [www.des.delhigovt.nic.in](http://www.des.delhigovt.nic.in) giving details of registration procedure, area wise registration centre, administrative machinery for redressal of grievances etc. Provision has also been made for the general public to give their suggestions for the improvement of the system through e-mail.
- (v) The first phase of National Campaign for the distribution of birth certificates (backlog) in respect of children below 10 years was also launched in Delhi during 2003-04. All the local bodies have been sensitized to implement the mandate of the National Campaign vigorously. Like wise in the second phase the tempo was maintained through sustained efforts.
- (vi) MCD, NDMC have computerized their operations resulting in improvement in the quality of service rendered to the public. All major hospitals government/private have been provided the facility of online reporting of the events and this has speeded up the process of reporting/registration of events.
- (vii) Inspection of Registration centres: Inspections of registration centres, Zonal offices and major hospitals were done from time to time by the officers/officials of Office of Chief Registrar to examine the working of registration centres and ascertain the difficulties of public in registration and obtaining birth and death certificates and suitable remedial action is initiated.
- (viii) Supply of Registration stationary : The office of Chief Registrar (B & D) provides registration stationary i.e. Birth reporting forms, Death reporting forms, Still birth reporting forms, blank certificates of births and deaths, Forms for

MCCD etc. free of cost to the local bodies, Govt. and private hospitals, Nursing homes and maternity centres.

- (ix) NGOs and other voluntary organizations were involved in the propagation of benefits of registration of births/death and identification of unregistered cases if any in slum areas.

### **Monitoring and Coordination**

A high level Interdepartmental Co-ordination Committee has been constituted in Delhi under the Chairmanship of Pr. Secretary (Plg.) and Chief Registrar (B&D) as Member Secretary. This committee consists of representatives from Directorate of Health, Education, Police & local bodies etc. to sort out the matters relating to the subject without much delay. This platform is expected to ensure close coordination and effective monitoring of the implementation of the provisions of the Act. The committee met on 21st Nov., 2008.

### **Monitoring of Sex Ratio in Delhi**

The national conference of Chief Registrars Births & Deaths, held in 2003 unanimously recommended for the monitoring of sex ratio on a regular basis at the State/UT level taking into account the alarming decline in the sex ratio which has become a cause of concern for the policy makers and the administrators. The source for bringing out this vital indicator is Population Census data and CRS data. The population data gives universal sex ratio for every 10 years. This data suffers from two major limitations viz. time lag and does not give the realistic situation as it gets affected by the in and out migrations. Therefore, the records of registration of births & deaths become the primary source for compilation of sex ratio at State/District etc. levels. The CRS data will provide short term and very effective inputs on this burning problem so that remedial measures can be initiated without loss of time.

The sex ratio is expressed as the number of female births to thousand male births for a particular period of time says one year/month etc. As per the International practice, sex ratio is worked out as number of male births per 100 female births. As per the

International standard, sex ratio around 105 males per 100 females is considered as an acceptable level.

### **Sex Ratio as per Population Census**

The universal sex ratio of Delhi as per population census for all age groups taken together was 827 females per 1000 males in 1991 came down to 821 females by the time of 2001 census. Child sex ratio (0-6 years) of Delhi also went down from 915 in 1991 to 868 during 2001. As can be seen from statement 1.3, at both points of time the figures of Delhi were below All India average. Even the district-wise scenario for the children of 0-6 years, was very grim during 1991-2001 census as the ratio declined across all districts without exception.

**Statement 1.3: Sex ratio of Delhi/All India as per population Census Data**

<b>S.No</b>	<b>Item</b>	<b>Census year</b>	
<b>A</b>	<b>District wise sex ratio (children of 0-6 years)</b>	<b>1991</b>	<b>2001</b>
	South	912	888
	South West	904	846
	North West	913	857
	North	920	886
	Central	937	903
	New Delhi	919	898
	East	918	865
	North East	917	875
	West	913	859
<b>B</b>	<b>Delhi</b>		
	Children of 0-6 years	915	868
	All ages	827	821
<b>C</b>	<b>All India</b>		
	Children of 0-6 years	945	927
	All ages	927	933

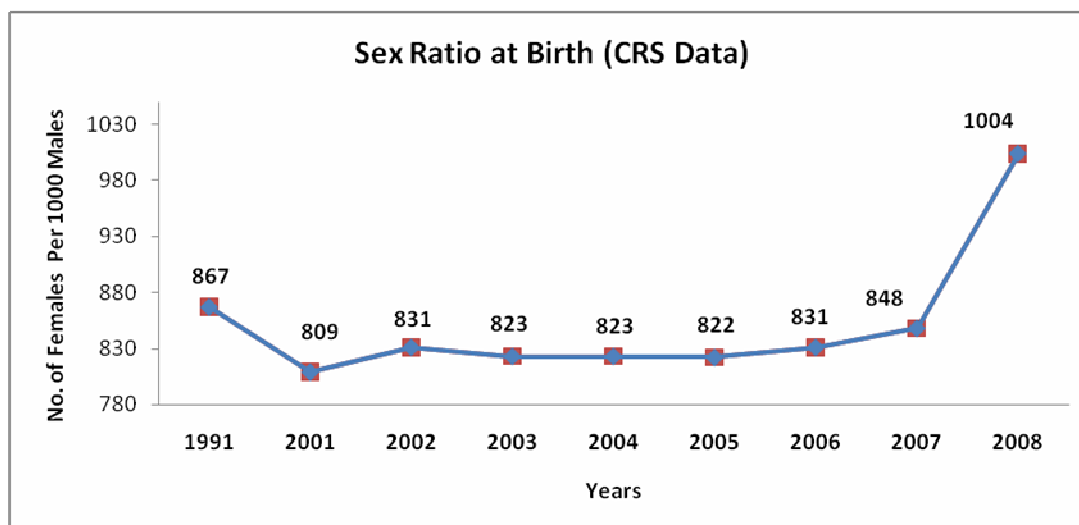

### **Sex Ratio as per CRS Data**

The data available from civil registration system indicates sex ratio at birth (refer statement 1.4) which was 867 females per 1000 males came down to 809 females by 2001.

**Statement 1.4: Sex ratio of Delhi at birth as per population CRS Data**

Year	Sex Ratio at Birth (CRS Data)	
	No. of Females per 1000 males	No. of Males per 100 females
Year	No. of Females per 1000 males	No. of Males per 100 females
1991	867	115
2001	809	124
2002	831	120
2003	823	121
2004	823	122
2005	822	122
2006	831	120
2007	848	118
2008	1004	100

However, positive signs of improvement in this respect are visible since then due to the effective administrative actions. However, during 2008 the position got reversed as it recorded an un-precendented growth of 1004 females per 1000 males due to implementation of girl child related welfare scheme. District-wise information is not available under the Civil Registration System as district-wise pattern is not followed in this case.

Apart from the above, data is collected on monthly basis from 50 major hospitals during 2008 accounting for 50.70% of total births that occur in Delhi for review of sex ratio at the highest level in the shortest possible time without waiting for the yearly indicators.. Efforts will continue to be made to increase the coverage of health institutions under the monthly monitoring system to make this exercise meaningful and truly representative of the ground reality. Comparison of Sex-Ratio among States/U.Ts. may be seen at Statement 1.5. However, it is essential to keep in mind that Level of Registration is not uniform in all States/U.Ts.

**Statement 1.5: Comparison of Sex-ratio among State/U.T. for the year 2005**

Sr.No.	India/ State/U.T.	2003	2004	2005	Rank
	<b>India</b>	<b>868</b>	<b>872</b>	<b>876</b>

## **SECTION TWO**

### **ANNUAL RESULTS AT A GLANCE**

## SECTION TWO RESULTS AT A GLANCE

This section is devoted to the brief analysis of the vital events registered under the civil registration system in Delhi during the calendar year 2008. The main focus will be on number of events, sex-wise distribution, type of event, geographical distribution etc., The total number of vital events registered in Delhi during 2008 were **441508**. Out of them **333908** were births and **107600** deaths. Gross natural addition to the population of Delhi during 2008 comes to about 2.26 lakh persons.

### Statement 2.1.: Distribution of Vital Events by Type And Sector

S. No.	Item	Male	Female	Total
<b>A</b>	<b>Type of Event</b>			
(i)	Births	166583	167325	333908
	<i>Percentage</i>	49.89	50.11	100.00
(i i)	Deaths	68033	39567	107600
	<i>Percentage</i>	63.23	36.77	100.00
.	Gross natural addition to the population (i) - (i i)	98550	127758	226308

Sex wise distribution of births revealed that 49.89% were male and 50.11% female during 2008. Break up of deaths registration in terms of sex indicated that 63.23% were male where as 36.77% female.

Births and Deaths registered in Delhi during 2008 is presented sector wise in statement 2.2. In case of births, urban areas accounted for 95.45% and share of rural was only 4.55%. Sector wise distribution of deaths registered comes to 6.86% for rural and 93.14% urban.

### Statement 2.2.: Distribution of Vital Events by Sector

S. No.	Item	Number			Percentage
		Male	Female	Total	
<b>A</b>	<b>Births</b>				
(i)	Rural	7273	7931	15204	4.55
(i i)	Urban	159310	159394	318704	95.45
<b>B</b>	<b>Deaths</b>				
(i)	Rural	4815	2561	7376	6.86
(i i)	Urban	63218	37006	100224	93.14

Institutional events in case of births accounted for 73.45% and 26.55 % were domiciliary/non-institutional in nature. On other hand similar distribution in case of deaths was 53.09% institutional and 46.91% non-institutional

**Statement 2.3: Distribution of Vital Events by Type**

S. No.	Item	Number			Percentage
		Male	Female	Total	
<b>A</b>	<b>Births</b>				
(i )	Institutional	128095	117159	245254	73.45
(i i)	Non-institutional	38488	50166	88654	26.55
<b>B</b>	<b>Deaths</b>				
(i )	Institutional	37071	20051	57122	53.09
(i i)	Non-institutional	30962	19516	50478	46.91

**Registration of Vital Events by Local body**

The responsibility for proper registration of all types of vital events occurred in institutions and non institutions rest with the three local bodies in Delhi. A major chunk of their accounting was done under MCD followed by NDMC and DCB. This is clearly reflected in statement 2.4 as MCD covered 84.36% of births and 79.91% deaths registration in the total .The share of NDMC was 14.60% and 18.53% in respect of births and deaths respectively. DCB covered only 1.04% of births and 1.56% deaths during 2008.

**Statement 2.4: Distribution of Vital Events by Local body**

S. No.	Local Body	Number		Percentage	
		Births	Deaths	Births	Deaths
<b>A</b>	Municipal Corporation of Delhi	281672	85978	84.36	79.91
<b>B</b>	New Delhi Municipal Committee	48747	19940	14.60	18.53
<b>C</b>	Delhi Cantonment Board	3489	1682	1.04	1.56

## Main Vital Indicators of Delhi and India

The vital indicators emerged out of the CRS of Delhi is presented in statement 2.5. For the benefit of data users indicators of national level are also included.

### Statement 2.5.: Main Vital Indicators of Delhi and India

S.No	Item	Delhi @	India*
<b>A</b>	<b>Vital Rates(per 1000)</b>		
1	Birth Rate	19.51	23.1
2	Death Rate	6.29	7.4
	Natural growth rate	13.22	15.7
3	Infant Mortality Rate	18.38	55
4	Maternal Mortality Rate	0.20	-
<b>B</b>	<b>No.of events per day</b>		
1	Births	915	71770
2	Deaths	295	22991

@ Data of Delhi pertains to CRS 2008

\*Data of India pertains to SRS 2007

Religion wise data of births and deaths is presented in statement 2.6 sex wise and it can be observed that more or less same pattern was noticed with regard to sex composition.

### Statement 2.6: Distribution of Vital Events by Main Religion

S. No.	Religion	Births			Deaths		
A	Number	Male	Female	Combined	Male	Female	Combined
1	Hindu	143183	143414	286597	60500	35600	96100
2	Muslim	20762	21590	42352	5275	2893	8168
3	Sikh	1662	1451	3113	760	493	1253
4	Christian	546	478	1024	235	136	371
5	Others	430	392	822	1263	445	1708
	ALL	166583	167325	333908	68033	39567	107600
<b>B</b>	<b>Percentage</b>						
1	Hindu	49.96	50.04	100.00	62.96	37.04	100.00
2	Muslim	49.02	50.98	100.00	64.58	35.42	100.00
3	Sikh	53.39	46.61	100.00	60.65	39.35	100.00
4	Christian	53.32	46.68	100.00	63.34	36.66	100.00
5	Others	52.31	47.69	100.00	73.95	26.05	100.00
	ALL	49.89	50.11	100.00	63.23	36.77	100.00

Statement 2.7 gives medically certified causes of deaths (institutional) as per broad group of causes. Major group XVIII, IX and I taken together accounted for more than half of MCCD.

**Statement 2.7: Broad Classification of MCCD by sex**

ICD 10 Chapter No.	Name of Broad Disease Group	No.of Persons			% to total
		Male	Female	Total	
<b>I</b>	Infectious and Parasitic Diseases (A00-B99)	5482	3031	8513	14.90
<b>II</b>	Neoplasms(C00-D48)	1502	702	2204	3.86
<b>III</b>	Diseases of the Blood & blood forming organs and certain disorders involving the immune mechanism (D50-D89)	201	149	350	0.61
<b>IV</b>	Endocrine, Nutritional and Metabolic Diseases (E00-E89)	2406	1595	4001	7.00

### **CRS vis-à-vis SRS Results**

Any attempt aimed at making a comparison between SRS estimates and CRS Results strictly speaking is not tenable as they follow different approaches to determine the basic parameters. However they can be taken as two alternatives to complement/supplement each other. SRS estimates which are based on sampling approach serves as a short term tool in the management of health scenario as CRS results are not available at short notice. More over SRS covers events pertaining to domicile population where as CRS is inclusive of vital events of migratory population as events are registered as per place of occurrence under RBD Act. That is the reason why CRS results are usually on the higher side when compared to that of SRS. Further, if CRS results could be brought about in shortest possible time frame it can supplant the SRS in the times to come. Therefore the following statements are included to serve academic purpose at present

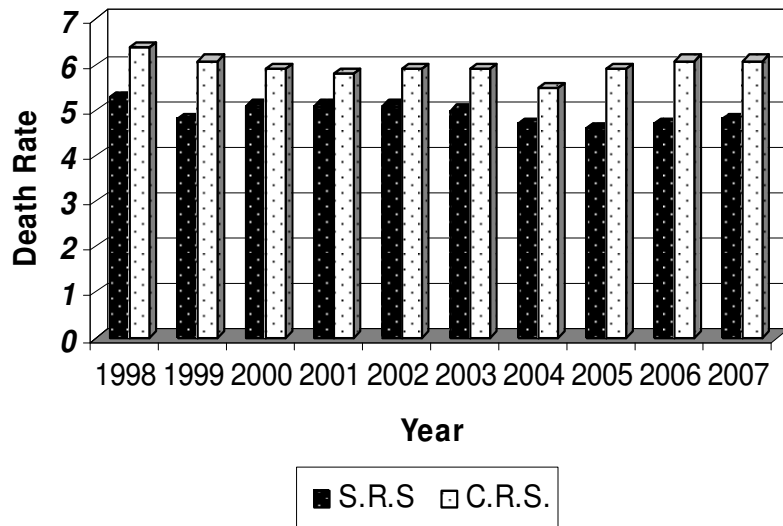

#### **Statement 2.8 : Comparison of SRS and CRS Results**

Year	Birth Rate		Death Rate		Infant Mortality Rate	
	S.R.S.	C.R.S.	S.R.S	C.R.S.	S.R.S.	C.R.S.
1998	19.4	28.7	5.3	6.4	36	31
1999	20.3	22.2	4.8	6.1	31	23
2000	20.3	23.5	5.1	5.9	32	23
2001	18.9	21.2	5.1	5.8	29	24
2002	17.2	20.9	5.1	5.9	30	16
2003	17.3	20.3	5.0	5.9	28	17
2004	18.4	20.0	4.7	5.5	32	13
2005	18.6	20.6	4.6	5.9	35	13
2006	18.4	20.0	4.7	6.1	37	18
2007	18.1	19.3	4.8	6.1	36	25
2008	N.A.	19.5	N.A.	6.3	N.A.	18

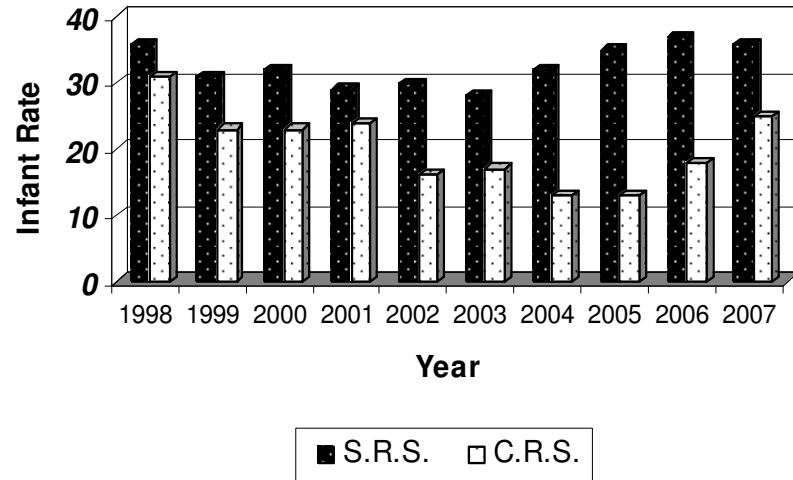

**Comparison of Birth Rate on SRS & CRS Data**

**Comparison of Death Rate on SRS & CRS Data**

### Comparison of Infant Mortality Rate on SRS & CRS Data

☒☒☒

## **SECTION THREE**

### **BIRTH REGISTRATION PROFILE**

## SECTION THREE

### PROFILE OF BIRTHS REGISTRATION

In this section various aspects of birth registration that had taken place during 2008 under Civil Registration System are analyzed with special reference to the number of events registered across years, male- female composition, matters relating to birth order and literacy, age of the mother at the time of child birth, the type of medical attention available in case of domiciliary events, local body-wise registration of events etc. The level of birth registration was found to be more than 100% consistently over a period of time thereby indicating the sound health of Civil Registration System in Delhi.

#### Birth Registration under Civil Registration System

During 2008, a total of **333908** birth events were registered by all the local bodies taken together. Out of them, 1.666 lakhs (49.89%) were male and 1.673 lakhs (50.11%) were female.

#### Statement 3.1 : Total Number of Births registered under CRS sex-wise

Year	Total Births	Male	Female	Sex Ratio
1991	272020	145694 (53.56)	126326 (46.44)	867
2001	296287	163816 (55.29)	132471 (44.71)	809
2002	300659	164184 (54.61)	136475 (45.39)	831
2003	301165	165173 (54.84)	135992 (45.16)	823
2004	305974	167849 (54.86)	138125 (45.14)	823
2005	324336	178031 (54.89)	146305 (45.11)	822
2006	322750	176242 (54.61)	146508 (45.39)	831
2007	322044	174289 (54.12)	147755 (45.88)	848
2008	333908	166583 (49.89)	167325 (50.11)	1004

It may be observed from the statement 3.1 that the composition of male and female births in the total births was consistently 54 - 55% and 45 - 46% respectively across the years. However, during 2008 number of male and female births are approx. at par i.e. 50%.

The sex ratio at birth had galloped from 848 females per thousand males during 2007 to 1004 in 2008. Such a sudden jump in this vital parameter appeared to be unusual. Therefore, a further analysis of births that occurred in institutional and non institutional areas was analysed and found that sex ratio in respect of institutional events increased from 860 in the year 2007 to 915 only in 2008. On the contrary in case of domiciliary events it has jumped from 813 to 1303 during 2007 and 2008 respectively.

**Statement 3.1 (A) COMPARATIVE POSITION OF SEX RATIO IN INSTITUTIONAL AND NON-INSTITUTIONAL BIRTHS.**

Year	Institutional Births			Domiciliary Births		
	Male	Female	Sex Ratio	Male	Female	Sex Ratio
2007	129124	111030	860	45165	36725	813
2008	128095	117159	915	38488	50166	1303

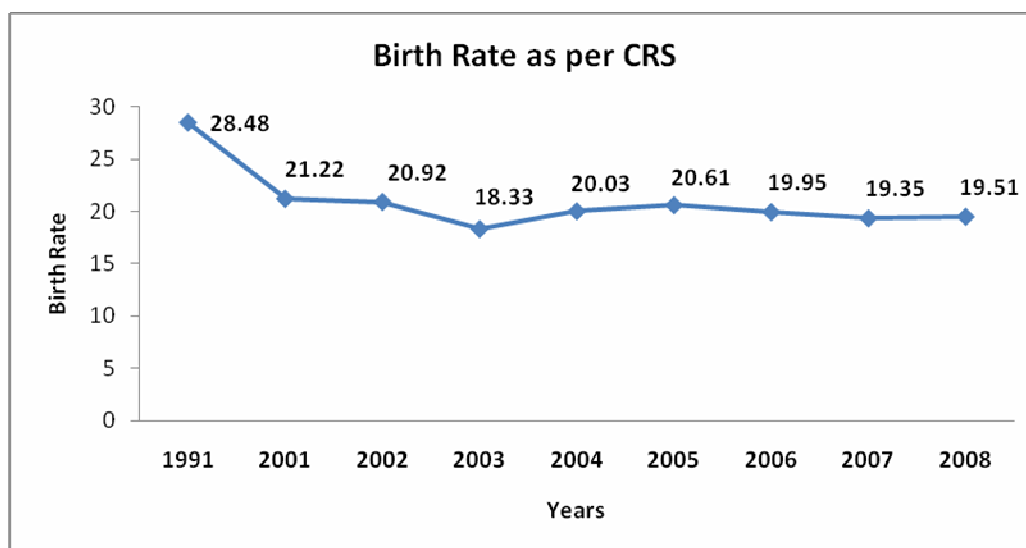

This trend can perhaps be attributed mainly to the implementation of the different girl child welfare related schemes including **Ladli Scheme**. In view of this, it is too early to jump to any conclusion that the sex ratio in Delhi had made progress in favour of girls and the data of coming years needs to be examined carefully before coming to any conclusion.

### **Birth Rate**

One of the important indicators that emerge out of Civil Registration System is the birth rate. Statement number 3.2 provides the time series data from 2001-08. Information pertaining to 1991 is also placed in the statement to have a decadal comparison. The birth rate which was 28.48 per thousand population plummeted to 19.51 per 1000 population by 2008. In the intervening period, the birth rate was around 20 per 1000 population. Therefore, the reduction in the birth rate is a progressive indicator as far as Delhi's economy is concerned. The graph plotting the birth rate from 1991 to 2008 clearly exhibits this fact.

**Statement 3.2: Birth Rate as per CRS**

Year	In Lakhs		
	Mid Year Population as on 1 <sup>st</sup> July	No. of Births	Birth Rate
1991	95.50	2.72	28.48
2001	139.50	2.96	21.22
2002	143.83	3.01	20.92
2003	148.43	3.01	18.33
2004	152.79	3.06	20.03
2005	157.18	3.24	20.61
2006	161.75	3.23	19.95
2007	166.41	3.22	19.35
2008	171.15	3.34	19.51

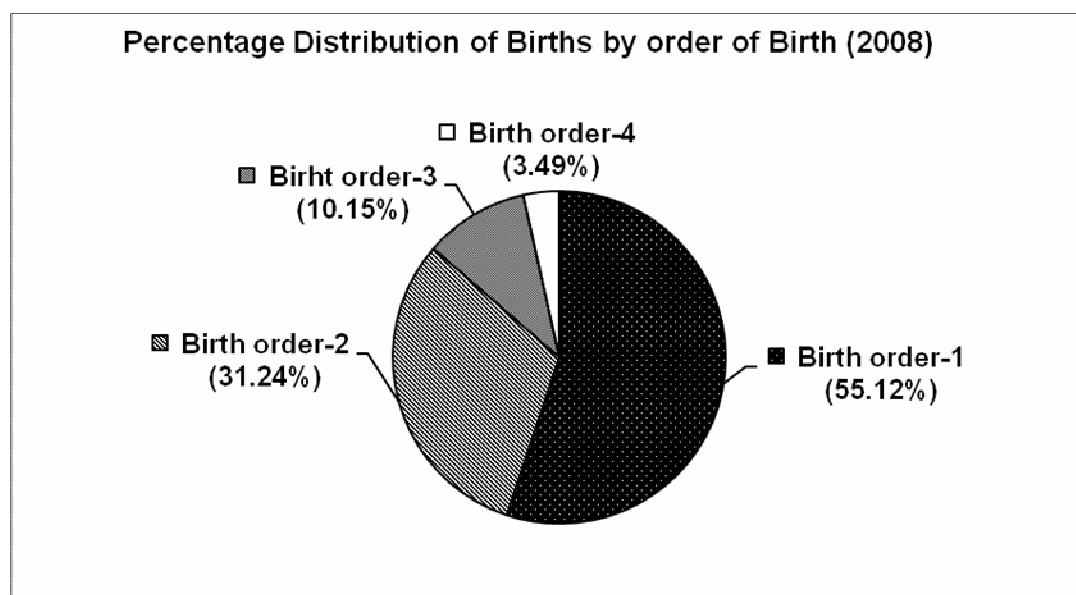

### **DISTRIBUTION OF LIVE BIRTHS BY BIRTH ORDER**

Birth order statistics are important indicators for measuring the progress and effectiveness of family welfare activities. Time series data on Percentage distribution of births by birth order is given in statement 3.3.

**Statement 3.3: Percentage Distribution Births by Order of birth**

Year	Birth Order			
	1	2	3	4 & above
1991	34.88	27.37	17.81	19.94
2001	40.94	27.33	11.17	20.56
2002	36.90	25.81	10.40	26.89
2003	44.53	33.80	12.88	8.79
2004	47.14	34.28	13.12	5.46
2005	50.59	32.42	12.45	4.54
2006	56.79	28.97	11.08	3.16
2007	58.98	27.47	9.79	3.76
2008	55.12	31.24	10.15	3.49

It is obvious from above statement and that the first order of births account for 55.12% of the total births registered during 2008. The decreasing proportion of second, third and subsequent order of births over a period of time can be attributed to the progressive attitudes of the people and success of successive campaigns of family welfare programs. The proportion of first and second birth order taken together accounted for 86.36% in the total birth of 2008. The share of births beyond third order was only 3.49%.

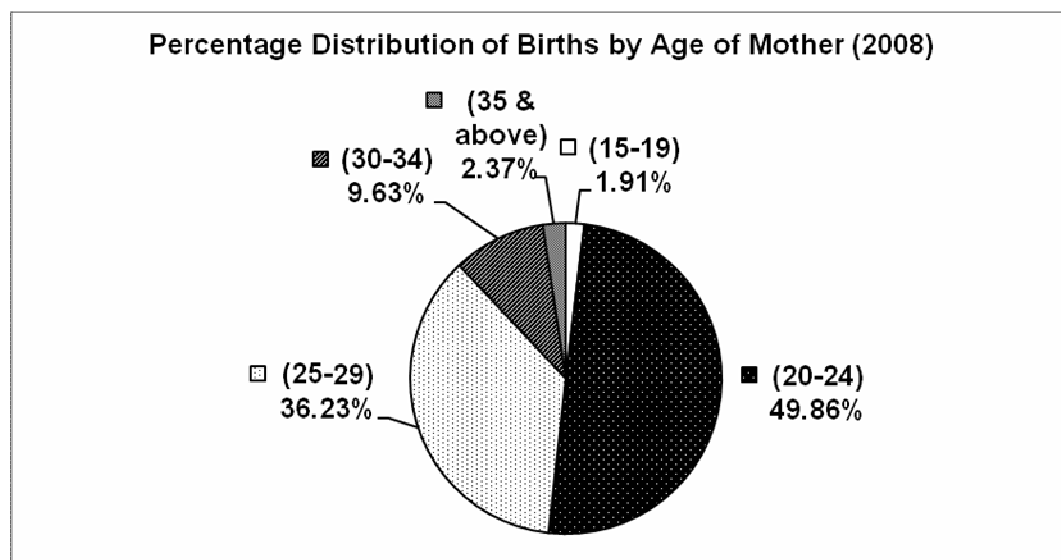

## DISTRIBUTION OF LIVE BIRTHS BY AGE OF MOTHER

The age of the mother at the time of attainment of motherhood will have an influence on the over all health of the child and the safety of mother during the time of delivery .Attainment of motherhood below the age of 18years is considered to be undesirable in interest of mother as well as the newly born child. Out of the total registered births during 2008 only 1.91% are from the mothers in the age group 15 - 19 years as against 4.41% in 1991. The need of the hour is to undertake sustained campaign by Govt., and NGOs agencies, focused towards eligible couples in the age group up to 18 years and living in slums, advising to avoid attainment of motherhood at such an early age

**Statement 3. 4: Percentage Distribution of Births by age of Mother**

Year	Age Group of Mothers in Years				
	15-19	20-24	25-29	30-34	35 & above
1991	4.41	44.45	34.94	10.70	5.50
2001	1.84	31.84	40.89	8.28	17.15*
2002	1.58	29.46	37.69	8.28	22.99*
2003	2.58	44.78	36.66	9.82	6.16
2004	2.34	46.34	38.37	10.06	2.89*
2005	2.25	46.62	38.56	9.86	2.71*
2006	1.97	45.56	39.67	9.37	3.43
2007	1.97	48.71	37.39	9.61	2.32
2008	1.91	49.86	36.23	9.63	2.37

Statement 3.4 further reveals that 86.09% of births were given by the mothers in the age group of 20 - 29 years followed by 9.63% by the mothers in the age group of 30 - 34 years, while mothers in the age group of 35 & above gave birth to only 2.37% of the total birth events.

## TYPE OF MEDICAL ATTENTION RECEIVED AT DELIVERY

The type of medical attention received at the time of birth in case of domiciliary events is an important factor in controlling the level of infant mortality. Further it will have a bearing on the quality of service rendered by health workers involved in the field.

**Statement 3. 5: Percentage Distribution of Births by type & medical attention**

Year	Percentage of Births			
	Institutional Births	Non Institutional & Type of medical attention		
		Physician/Nurse/ Trained Midwife	Untrained Midwife	Others
(1)	(2)	(3)	(4)	(5)
1991	54.56	8.69	36.49	0.26
2001	62.11	34.69	3.19	0.01
2002	66.85	30.1	3.04	0.01
2003	71.38	24.67	3.45	0.50
2004	71.54	17.98	9.99	0.49
2005	73.72	0.32	19.16	6.8
2006	77.92	4.56	13.01	4.51
2007	74.57	5.27	13.86	6.30
2008	73.45	8.31	11.09	7.15

Statement 3.5 gives percentage wise distribution of live births by type of medical attention at the time of child birth. It may be seen from the above statement that medical institutions have accounted for more than two thirds (73.45%) of the delivery cases during 2008. The share of institutional births has gone up significantly during the recent past. To start with it was only 54.56% in 1991, increased to 62.11% by 2001 and thereafter crossed 70% mark within a short period of time. On an average, medical institutions, both in govt./non govt., in Delhi are handling about 672 cases of delivery per day.

### **Birth Events by Local Body wise**

Statement 3.6 reveals the distribution of birth events of 2008 among local bodies of Delhi. Out of the total births, 84.36% were registered in the MCD whereas NDMC accounted for 14.60%. The total registration under DCB constitutes only 1.04% of the total. Further, break-up of registration by sectors revealed that only 4.55% of the births were registered in the rural areas of Delhi which falls under the exclusive domain of MCD.

**Statement 3.6: Distribution of Births registered by sector and Local Body**

S.No	Name of Local Body	No. of Births		
		Rural	Urban	Combined
A	Municipal Corporation of Delhi	15204	266468	281672 (84.36)
B	New Delhi Municipal Committee	-	48747	48747 (14.60)
C	Delhi Cantonment Board	-	3489	3489 (1.04)
	ALL	15204	318704	333908 (100.00)

**Births by birth order vis-à-vis Level of mother's education**

It is widely known that there exists a close relationship between the level of educational attainment of mother and order of births. It is based on the premise that higher the level of education of mother lower will be the birth order. The data presented in statement 3.7 supports this contention as in case of third birth order, the education attainment of mothers in 70.95% of the cases was below matriculation while in case of beyond third birth order, this proportion was 81.21%. On the contrary in case of third order births mothers who were Graduate & above were 6.43% only. The proportion of mothers with this qualification constituted for about 2.0% of births order beyond third.

**Statement 3.7: Distribution of Births by birth order cum level of education of mother**

Birth order	Levels of Literacy						Total
	Illiterate	Below Primary	Primary but Below Matric	Matric but below Graduate	Graduate and above	Not Stated	
1	2	3	4	5	6	7	8
1	19890 (10.81)	39105 (21.25)	44749 (24.32)	27452 (14.92)	33797 (18.36)	19039 (10.34)	184032 (100.00)
2	16434 (15.75)	12433 (11.92)	27326 (26.19)	18252 (17.50)	18387 (17.63)	11485 (11.01)	104317 (100.00)
3	9532 (28.12)	4793 (14.14)	9724 (28.69)	4985 (14.71)	2180 (6.43)	2683 (7.91)	33897 (100.00)
4&Above	4960 (42.53)	1548 (13.27)	2963 (25.41)	1075 (9.22)	233 (2.00)	883 (7.57)	11662 (100.00)
ALL	50816 (15.21)	57879 (17.33)	84762 (25.38)	51764 (15.50)	54597 (16.35)	34090 (10.21)	333908 (100.00)

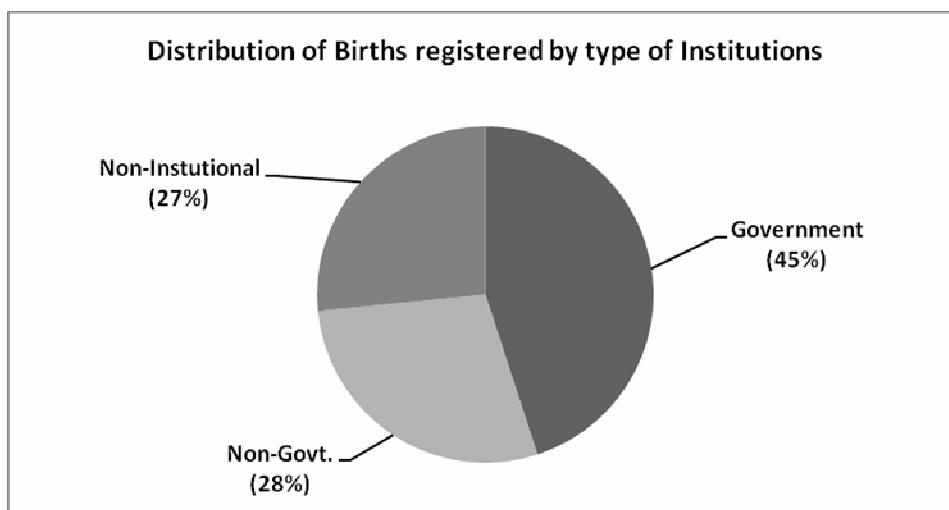

Figures in ( ) indicate % to total

### Distribution of Institutional Births

Statement 3.8 gives the distribution of institutional births in terms of govt., and non government to ascertain the burden on these institutions in this respect. Govt., hospitals in Delhi are handling on an average 412 cases per day (398 per day during 2007) as against 260 by all types of private hospitals (291 per day during 2007) taken together. The sex composition in birth events in both type of institutions were more or less same. As already explained the position is contrary in non-institutional events.

**Statement 3.8: Distribution of Birth events by type and sex**

## **SECTION FOUR**

### **DEATH REGISTRATION PROFILE**

## SECTION FOUR

### PROFILE OF DEATHS REGISTRATION

The focus of this section is on different aspects of death registration that had taken place during 2008 under Civil Registration System with special reference to the number of events registered across years, male- female composition, matters relating to age at the time of death, main causes of deaths, infant and maternal mortality rates, local body-wise registration of events etc. The level of death registration was found to be more than 100% consistently over a period of time thereby indicating the health of Civil Registration System in Delhi.

#### Death Registration under Civil Registration System

During 2008, a total of **107600** deaths were registered by all the three local bodies taken together. Out of them, 68033 (63.23%) were male and 39567 (36.77%) were female. Sex ratio of deaths revealed that for every 1000 male deaths only 582 female deaths have occurred during 2008. On an average **295** number of registered deaths occurred per day during 2008.

#### Statement 4.1: Total Number of Deaths registered under CRS sex-wise

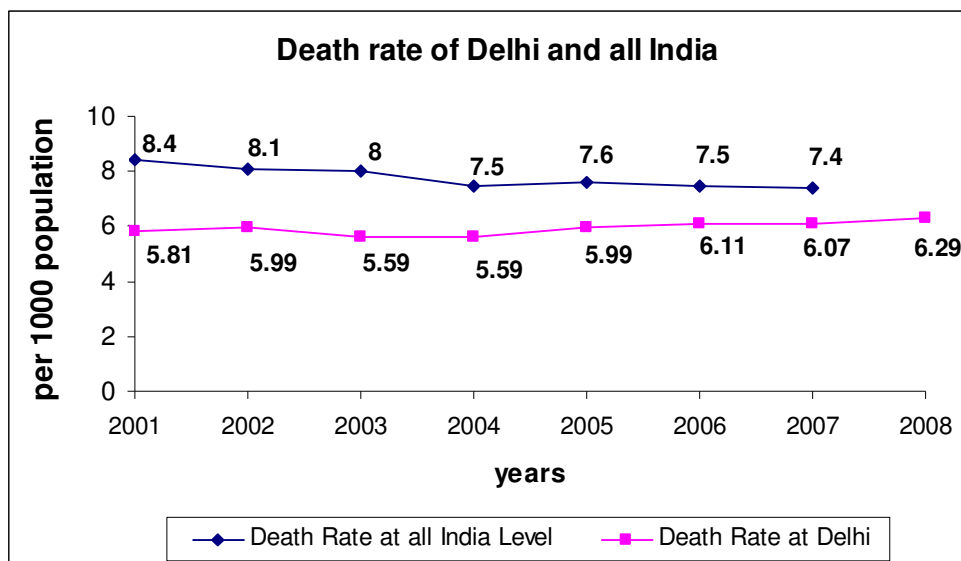

Year	Number of Deaths					Average registered deaths per day	Sex Ratio
	Male	Percentage	Female	Percentage	Total		
1991	37828	62.42	22772	37.54	60600	166	602
2001	51238	63.18	29862	36.79	81100	222	583
2002	53405	61.97	32771	38.00	86176	236	614
2003	54561	62.18	33182	37.79	87743	240	608
2004	53016	62.10	32362	37.88	85378	234	610
2005	58554	62.17	35633	37.81	94187	258	609
2006	64028	64.73	34880	35.27	98908	271	545
2007	63461	62.85	37513	37.15	100974	277	591
2008	68033	62.23	39567	36.77	107600	295	582

## DEATH RATE

The time series data on death rate from 2001-08 is placed in the statement 4.2 and to have a comparison with the previous decade, information of 1991 is also included in this statement. The death rate hovered around 6 per 1000 persons in the population during 2001-2005. It had crossed 6 during 2006. However it decreased from 6.11 to 6.07 during 2007 and then increased to 6.29 in the year 2008. Death rate in Delhi is still less than national level rate of 7.4 per 1000 persons in the population (SRS 2007). The comparative position of Delhi & All India is also presented in graphic form. Due to the non availability of CRS data at national level SRS results were taken for this purpose.

**Statement 4.2: Death Rate of Delhi (as per CRS) & All India SRS)**

Year	In Lakhs		Death Rate (per 1000 population)	
	Mid Year Population as on 1st July	Total number of Deaths		
			Delhi(CRS)	All India(SRS)
1991	95.5	0.61	6.39	-
2001	139.5	0.81	5.81	8.4
2002	143.83	0.86	5.99	8.1
2003	148.43	0.88	5.59	8.0
2004	152.79	0.85	5.59	7.5
2005	157.18	0.94	5.99	7.6
2006	161.75	0.99	6.11	7.5
2007	166.41	1.01	6.07	7.4
2008	171.15	1.08	6.29	N.A.

### Local Body –wise Deaths Registration

Distribution of registration of deaths local body-wise is presented in statement 4.3. Municipal Corporation of Delhi accounted for 79.91% where as NDMC 18.53% and DCB 1.56%. 93.14% of total were registered in urban areas of Delhi.

**Statement 4.3: Distribution of Deaths registered by sector and Local Body**

S.No	Name of Local Body	No.of Deaths			%to total
		Rural	Urban	Combined	
<b>A</b>	Municipal Corporation of Delhi	7376	78602	85978	79.91
<b>B</b>	New Delhi Muncipal Committee	-	19940	19940	18.53
<b>C</b>	Delhi Contonment Board	-	1682	1682	1.56
	ALL	7376	100224	107600	100.00
%to total		6.86	93.14	100.00	

### Type of Registration

Registered deaths can be grouped under institutional and non institutional categories. Broadly 53:47 ratios was observed between institutional and otherwise type during 2008.The proportion of non institutional events is on the decline over a period of time.

**Statement 4.4: Distribution of Deaths by type of Registration**

Year	Total No. of Deaths	Institutional		Domiciliary	
		Number	%	Number	%
1991	60600	36881	60.86	23719	39.14
2001	81100	45034	55.53	36066	44.47
2002	86176	44965	52.18	41211	47.82
2003	87743	48473	55.24	39270	44.76
2004	85378	48559	56.88	36819	43.12
2005	94187	56390	59.87	37797	40.13
2006	98908	60254	60.92	38654	39.08
2007	100974	59256	58.68	41718	41.32
2008	107600	57122	53.09	50478	46.91

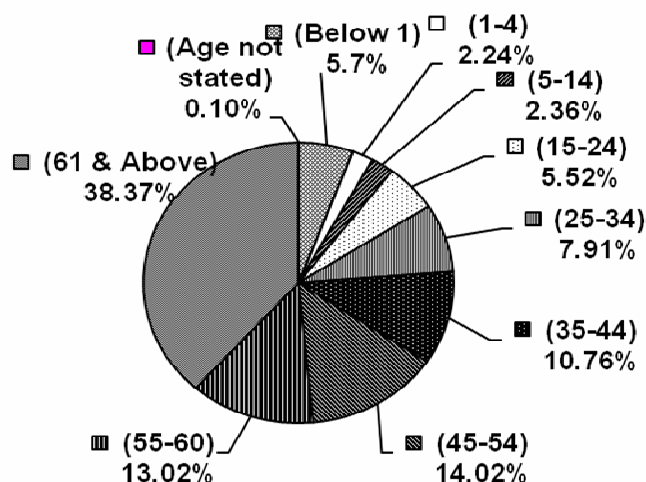

**Deaths by Age group**

Distribution of registered deaths in terms of age group is presented in statement 4.5. As per the statement out of the total deaths 38.37% of them were in the age group of 61 years & above, 27.04% in 45-60 years age group, 10.76% in age group of 35-44 years and 7.91% deaths occurred in 25-34 years age group. It is observed that 5.70% deaths occurred in the age group of below one year.

**Statement 4.5: Distribution of Deaths by Age groups and sex**

Age Group years	Male	Percentage	Female	Percentage	Total	Percentage
Below 1	3751	5.51	2387	6.03	6138	5.70
01-04	1346	1.98	1062	2.68	2408	2.24

ALL	68033	100.00	39567	100.00	107600	100.00

### Death by age Group 2008

### Infant Deaths

It is evident from statement 4.5 that out of the total deaths registered during the year 2008 as many as 6138 were infant deaths. Out of them 5710 were institutional and only 428 non institutional in nature. The Infant Mortality Rate per thousand live births during 2008 worked out to be 18.38. The Neo-Natal Mortality rate decreased from 15.27 to 13.43 per thousand live births and Post-Natal Mortality rate decreased from 10.18 to 4.95 per thousand during this period.

**Statement 4.6: Distribution of infant Deaths**

Year	Neonatal Deaths (Infants below 1 month)	Neonatal Mortality rate	Post-natal deaths (infant 1-12 months)	Post-natal Mortality Rate	Infant deaths (infant 0-12 months)	Infant mortality rate	% Infant deaths to total deaths
1991	5728	21.06	3078	11.32	8806	32.37	14.53
2001	4213	14.22	2878	9.71	7091	23.93	8.74
2002	3115	10.36	1776	5.91	4891	16.27	5.68
2004	2774	9.07	1229	4.02	4003	13.08	4.69
2005	3183	9.81	999	3.08	4182	12.89	4.44
2006	3756	11.64	2069	6.41	5825	18.05	5.89
2007	4917	15.27	3277	10.18	8194	25.44	8.11
2008	4485	13.43	1653	4.95	6138	18.38	5.70

**Statement 4.7: Infant mortality rates of Delhi & India**

Year	DELHI (CRS)			INDIA (SRS)
	Neonatal Mortality rate	Post-natal Mortality Rate	Infant mortality rate	Infant mortality rate

## Cause analysis of deaths

Statement provides MCCD data pertaining to institutional deaths as per ICD-10. ICD is used to translate diagnosis and other health related problems from words into alphanumeric code and thereby facilitates the classification and analysis of data. The 10 major causes account for about 67 % of total institutional registered deaths during 2008 are given in statement 4.9. More details are presented in Table 9 of Statistical tables section.

**Statement 4.9: Main causes of Death under MCCD by sex**

S.No.		No. of Persons			% to total
		Male	Female	Total	
1	All other symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified (R00-R09, R11-R17, R19-R39, R41-R49, R51-R53, R58-R99)	7224	3613	10837	18.97

**SECTION SIX**  
**ANNEXURE**

## CONCEPTS & DEFINITIONS

Some important concepts used in this Annual Report are defined as follows:

1. **Birth:** “birth” means live-birth or still birth.
2. **Live Birth:** “live-birth” means the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which after such expulsion or extraction, breathers or shows any other evidence of life, and each product of such birth is considered live-born.
3. **Still-Birth:** “still-birth” means foetal death where a product of conception has attained at least the prescribed period of gestation.
4. **Death:** “death” means the permanent disappearance of all evidence of life at any time after live-birth has taken place.
5. **Foetal Death:** “foetal death” means absence of all evidence of life prior to the complete expulsion or extraction from its mother of a product of conception irrespective of the duration of pregnancy.
6. **Birth Rate:** Birth Rate acts as an index of the relative speed at which additions are being made to the population through child-birth. It is only a live birth that signifies an addition to the existing population, excluding still births.

The annual birth rate is defined as:

$$\text{Birth Rate} = \frac{\text{No. of Births in a year}}{\text{Mid-year Population}} \times 1000$$

7. **Death Rate:** The death rate for a given year tells us at what rate deaths have depleted the population over the course of the year.

The death rate, which measures the decrease in a population due to deaths, is perhaps the most widely used of any vital statistics rate because of its value as an index in numerous demographic & public health problems.

The Annual Death Rate is defined as :

$$\text{Death Rate} = \frac{\text{No. of Deaths in a Year}}{\text{Mid-year Population}} \times 1000$$

8. **Infant Mortality Rate:** Infant mortality rate serves as one of the best indices to the general “healthiness” of a society. It is similar to age-specific death rate for infants under 1 year of age.

The annual infant mortality rate is defined as :

$$\text{Infant Mortality Rate} = \frac{\text{No. of deaths under 1 year of age which occurred among the population}}{\text{No. of live births which occurred among the population}} \times 1000$$

9. **Maternal Death Rate:** Maternal death rate is defined as maternal deaths per thousand live births.

$$\text{Maternal Death Rate} = \frac{\text{No. of Maternal Deaths}}{\text{No. of live births}} \times 1000$$

10. **Neo Natal Mortality Rate:** The neo-natal mortality rate, like the infant mortality rate, is similar to an age specific rate. It is a rate used to measure the risk of death during the first month of life and is defined as :

$$\text{Neo-Natal Mortality Rate} = \frac{\text{No. of deaths of infants under the age of 1 month which occurred among the population}}{\text{No. of live births which occurred among the population}} \times 1000$$

11. **Average Age at Death :** Average age at death is defined as :

$$\text{Average age at death} = \frac{\sum fx}{N}$$

Where f = frequency of each age-group  
 x = mid-point of the various age-groups  
 N = total frequency

**Note:**     \_\_\_     Indicates not available
