## **PREFACE**

The Estimates of State Domestic Product representing the value of all goods and services produced within the State is one of the important indicators used to measure the growth of the State's Economy in a nutshell. These estimates provide a broader picture of outcomes due to various policy interventions, investments made opportunities opened-up in the state. State Domestic Product is a reflection of economic development of the State and its derivative Per Capita Income is a suitable measure of the well-being of its people. The Directorate of Economics & Statistics, Delhi has been bringing out estimates of State Domestic Product since 1970, and making them up to date from time to time as per the guidelines and methodology provided by the National Accounts Division, Central Statistics Office, M/o Statistics & Programme Implementation, Govt. of India.

In January 2015, CSO introduced the new series of national accounts statistics with base year 2011-12, replacing the previous series with base year 2004-05. These estimates are based on the latest available data on agricultural production, industrial production, government expenditure, departmental and non-departmental enterprises, private corporate sector, etc. In the new series, the latest recommendations of SNA 2008 have been implemented. Further, the new series, besides the shifting of the base year from 2004-05 to 2011-12, incorporates improvements in terms of coverage of corporate sector, financial corporations and local bodies, results of latest surveys and studies and important procedural changes. Accordingly, changes have also been incorporated in the Estimates prepared at State level. This issue presents Revised Estimates of Gross/Net State Domestic Product of Delhi from 2011-12 to 2014-15, Second Revised Estimates for 2015-16, First Revised Estimates for 2016-17 along with Advance Estimates for 2017-18 with new series at current and constant prices with the base year 2011-12.

The publication has been prepared in the "State Accounts Division" of this Directorate due to the sincere efforts made by the officers/ officials of the Division. I also take this as an opportunity to pay my sincere gratitude to the officers/ officials of the National Accounts Division, Central Statistics Office for their unstinted guidance, help and support. The cooperation extended by various departments and organizations functioning in the National Capital Territory of Delhi, in the preparation of these estimates by providing required data is gratefully acknowledged.

It is earnestly hoped that this publication would meet the requirements of all those concerned with the economic development of the state and prove a strong tool in the hands of academicians for research work and administrators for policy formulations. It is our constant endeavor to improve the utility of the publication.

Suggestions, if any, for improvement of the coverage and contents of this brochure, are welcome.

<b>ANNEXURE : Methodology recommended by CSO for the new series of GSDP with base year 2011-12</b>		

**Estimates of State Domestic Product  
2011-12 to 2014-15 (Revised Estimates),  
2015-16 (2<sup>nd</sup> Revised Estimates), 2016-17 (1<sup>st</sup> Revised Estimates)  
and 2017-18 (Advance Estimates)  
(Base year: 2011-12)**

**EXECUTIVE SUMMARY**

The salient features of the Report on Estimates of State Domestic Product 2017-18 (Advance Estimates) with Base year 2011-12 are as under:

**A. GROSS STATE DOMESTIC PRODUCT (GSDP)**

- ❖ The GSDP of Delhi at Current Prices is expected to increase from ₹ 343798 Crore in 2011-12 to ₹ 616826 Crore in 2016-17 and ₹ 686017 Crore in 2017-18 signifying an annual average growth rate of 12.21% (2011-12 to 2017-18).
- ❖ Annual increase for 2016-17 and 2017-18 was 12.54% and 11.22% over previous years respectively as compared to all India growth of 10.8% and 9.8% for the same years.
- ❖ In real terms, GSDP at constant (2011-12) prices is expected to increase from ₹ 343798 Crore in 2011-12 to ₹ 514871 Crore in 2016-17 and ₹ 556800 Crore in 2017-18 with annual average growth rate of 8.38% (2011-12 to 2017-18).
- ❖ Economy of Delhi will grow at the rates of 8.61% and 8.14% as compared to All India growth of 7.1% and 6.6% respectively.

**B. NET STATE DOMESTIC PRODUCT (NSDP)**

- ❖ State Income / NSDP of Delhi, at current prices, is expected to touch a level of ₹ 561400 Crore in 2016-17 and ₹ 626002 Crore in 2017-18 as compared to ₹ 314650 Crore during 2011-12, registering annual average growth rate of 12.16% (2011-12 to 2017-18).
- ❖ The annual growth for the year 2016-17 and 2017-18 was 12.99% and 11.51% over the previous year as compared to all India growth of 11.0% and 9.8% respectively.
- ❖ In real terms, NSDP at base year (2011-12) stood at ₹ 314650 Crore whereas 1<sup>st</sup> Revised Estimates and Advance Estimates for the years 2016-17 & 2017-18 at constant prices is estimated to be ₹ 465770 Crore and ₹ 503507 Crore respectively.
- ❖ The annual growth of NSDP at constant prices was recorded at 8.53% and 8.10% during the year 2016-17 and 2017-18 respectively in Delhi, whereas the increase at national level was 7.0% and 6.7% respectively.

**C. PER CAPITA INCOME**

- ❖ 1<sup>st</sup> Revised and Advance Estimates of Per Capita Income for the year 2016-17 and 2017-18 at current prices are estimated at ₹ 300793 and ₹ 329093, respectively with the respective annual growth rates of 10.87% and 9.41% over the previous years. It is also to be noted that the Per Capita Income at current prices recorded annual average growth rate of 10.05% for the period 2011-12 to 2017-18. At the national level, Per Capita Income

for the year 2016-17 and 2017-18 were ₹ 103870 and ₹ 112764 respectively with the respective annual growths of 9.6% and 8.6%.

- ❖ Per capita Income at constant prices for the years 2016-17 and 2017-18 is expected to touch a level of ₹ 249555 and ₹ 264697 as compared to ₹ 185361 during the base year 2011-12 indicating the annual growth rates of 6.50% and 6.07% respectively over the previous years. It is also to be noted that the Per Capita Income in real terms recorded annual average growth rate of 6.13% for the period 2011-12 to 2017-18. At national level, Per Capita Income for the year 2016-17 and 2017-18 is estimated at ₹ 82229 and ₹ 86689 respectively showing respective annual growth rates of 5.7% and 5.4%.

#### **D. SECTORAL COMPOSITION**

- ❖ 1<sup>st</sup> Revised Estimates and Advance Estimates of GSVA at current prices for the year 2016-17 and 2017-18 shows that contribution of Primary Sector (comprising of Crops and Livestock, Forestry and logging, Fishing, Mining and Quarrying) in the economy of Delhi has decreased to 2.16% and 2.04% for both years respectively from 3.49% share in the base year 2011-12. At constant prices, same situation appears that contribution has declined to 3.21% and 3.20% in the year 2016-17 and 2017-18 respectively. NSVA at current prices shows that contribution of primary sector in the economy of Delhi has declined from 3.50% in the base year 2011-12 to 2.16% and 2.10% respectively during the year 2016-17 (1<sup>st</sup> Revised Estimates) and 2017-18 (Advance Estimates) respectively. In real terms, the contribution has decreased to 3.37% in 2016-17 (1<sup>st</sup> Revised Estimates) and then increased to 3.43% in 2017-18 (Advance Estimates) respectively.
- ❖ GSVA at current prices reveals the fact that contribution of Secondary Sector (comprising of Manufacturing, Electricity, Gas, Water Supply & Other Utility Services and Construction) in the economy has decreased from 13.09% during the base year 2011-12 to 12.12% and 12.04% and at constant prices it has decreased to 11.79% and 11.67% in the years 2016-17 (1<sup>st</sup> Revised Estimates) and 2017-18 (Advance Estimates) respectively. 1<sup>st</sup> Revised and Advance Estimates of NSVA at current prices for the years 2016-17 and 2017-18 shows that contribution of this sector has decreased from 12.54% during the base year to 11.48% and 11.40% and at constant prices it has decreased to 10.98% and 10.84% respectively.
- ❖ Contribution of Tertiary Sector (comprising of Trade, Hotels & Restaurants, Railways, Transport, Storage, Communication, Financial Services, Real Estate, Ownership of Dwellings & Other Professional Services, Public Administration and Other Services) in the economy is increasing marginally. GSVA at current prices shows that the contribution of tertiary sector in the economy was 83.42% during the base year 2011-12 that has increased to 85.72% and 85.92% , at constant prices, it has increased to 85.00% and 85.13% in the years 2016-17 (1<sup>st</sup> Revised Estimates) and 2017-18 (Advance Estimates) respectively. NSVA Estimates at current and constant prices shows that contribution of this sector in the economy of Delhi has increased from 83.96% during base year to 86.36% in the year 2016-17 and further increased to 86.50% in the year 2017-18, and at constant prices, it has increased to 85.65% and 85.73% for the years 2016-17 (1<sup>st</sup> Revised Estimates) and 2017-18 (Advance Estimates) respectively.

# **Chapter 1:**

## **State Domestic Product (Base Year: 2011-12)**

**S**tate Domestic Product is a measure in monetary terms of the volume of all goods and services produced by an economy during a given period of time accounted without duplication. SDP is a reflection of economic development of the State and its determinate Per Capita Income is a suitable measure of the well-being of its people. The measure obviously has to be in value terms as the different units of production and different measures of services are not directly additive. The estimates of State Domestic Product (SDP) of the National Capital Territory of Delhi are prepared at current and constant prices by the Directorate of Economics & Statistics, Delhi. The estimates of SDP at current prices are obtained by evaluating the product at current prices prevailing during the year. The estimates of SDP at current prices, over the time do not reveal actual economic growth because these contain the combined effect of (i) the changes in volume of goods and services and (ii) the changes in the prices of goods and services. In order to eliminate the effect of price changes/inflation, the estimates of SDP are also prepared by evaluating the goods and services at the prices prevailing in the fixed year known as base year and are known as the estimates of State Domestic Product at constant prices.

The estimates of State Domestic Product are prepared for all the sectors of economy both in terms of Gross and Net basis. The difference between the two is that in the gross estimates, no deduction is made for Consumption of Fixed Capital (CFC) which takes place in the process of production, whereas in the net estimates, CFC is subtracted from the gross value figures. Net State Domestic Product is also called State Income. Again, capital is one of the primary factors used in production and this results in the consumption of the fixed capital and hence, a reduction in the economic life of the capital. In other words, the capital depreciates as a result of its use in the process of production. The CFC measures the replacement value of that part of the capital stock, which has been used up in the production process during the year.

The SDP estimates are prepared with respect to a base year and this base year gets revised from time to time to take into account the structural changes which have been taking place in the economy and to depict a true picture of the economy through macro aggregates like GSDP, consumption expenditure, capital formation, etc. For examining the performance of the economy in real terms through the macro economic aggregates like Gross State Domestic Product (GSDP), State Income, consumption expenditure, capital formation etc., estimates of these aggregates are prepared at the prices of selected year known as base year.

First series of estimates was compiled for the period 1960-61 to 1977-78 with base year 1960-61. Second series covers the period from 1970-71 to 1986-87 with base year 1970-71. The third series was w.e.f. 1980-81 to 1996-97 with base year 1980-81. Fourth revision took place in nineties with base year 1993-94 and continued up to 2004-05. Fifth revision took place in 2006 with base year 1999-00 and continued up to 2008-09. Sixth revision took place in 2010 with the base year 2004-05. For the present series the base year has been revised to 2011-12. The estimates at the prevailing prices of the current year are termed “at current prices”, while those prepared at base year prices are termed “at constant prices”. The comparison of the estimates at

constant prices, which means “in real terms”, over the year gives the measure of real growth. Therefore, the base year of the present SDP series has been shifted to 2011-12.

Three major components influencing the present revision exercise include (i) revision to the base year to a more recent year (for meaningful analysis of the structural changes in the economy), (ii) complete review of the existing data base and methodology employed in the estimation of various macro-economic aggregates including choice of the alternative databases on individual subjects and (iii) to the extent feasible, implementing the recommendations of the System of National Accounts (1993 and 2008) prepared under the auspices of the Inter Secretariat Working Group on National Accounts comprising of the European Communities (EUROSTAT), International Monetary Fund (IMF), Organisation for Economic Cooperation and Development (OECD), United Nations and World Bank.

In the new series, efforts have been made to make use of as much current data as possible. Further, the results of latest available surveys have also been made use of. Some of the important sources of data, which have been used in the new series, are as follows:

### **Improvements in coverage**

**Corporate Sector** - In the 2004-05 series, the Private Corporate Sector in 2004-05 series was being covered using the RBI Study on Company Finances, wherein estimates were compiled on the basis of financial results of around 2500 companies. In the new series, comprehensive coverage of Corporate Sector has been ensured in mining, manufacturing and services by incorporation of annual accounts of companies as filed with the Ministry of Corporate Affairs (MCA) under their e-governance initiative, MCA21. Accounts of about 5 lakh companies have been analysed and incorporated for the years 2011-12 and 2012-13, while the number of common companies (companies for which accounts are available for the year 2012-13) is around 3 lakh for the year 2013-14.

**Financial Corporations** - Financial corporations in the private sector, other than banking and insurance, in the earlier series was limited to a few mutual funds and estimates for the Non-Government Non-Banking Finance Companies as compiled by RBI. In the new series, the coverage of financial sector has been expanded by including stock brokers, stock exchanges, asset management companies, mutual funds and pension funds, as well as the regulatory bodies, SEBI, PFRDA and IRDA.

**Local Bodies and Autonomous Institutions** - Earlier at National Level, estimates for local bodies and autonomous institutions were prepared on the basis of information received for seven autonomous institutions and local bodies of four States – Delhi, Himachal Pradesh, Meghalaya and Uttar Pradesh. In the new series, there has been an improved coverage of local bodies and autonomous institutions, covering around 60% of the grants/transfers provided to these institutions.

**Use of results of recent surveys and censuses and type studies** - In the new series, efforts have been made to make use of as much current data as possible. Further, the results of latest available surveys have also been made use of. Some of the important sources of data, which have been used in the new series, are given below:

- (i) NSS 68th round (2011-12) - Survey on employment and unemployment and consumer expenditure;
- (ii) NSS 67th round (2010-11) - Survey on Unincorporated Non-agricultural Enterprises (Excluding Construction);
- (iii) All India Livestock Census, 2012;
- (iv) NSS 70th round (2013) - All India Debt and Investment Survey and Situation Assessment Survey; and
- (v) Population Census, 2011.
- (vi) Study on yield rates of meat products & by-products of different livestock species conducted by National Research Centre on Meat, Hyderabad.
- (vii) Study on the inputs in the Construction sector by Central Building Research Institute (CBRI), Roorkee.
- (viii) Study on 'Harvest and Post-harvest losses of major crops and livestock products in India' conducted by Central Institute of Post-Harvest Engineering and Technology (CIPHET), Ludhiana.

## **Implementation of 2008 SNA**

While revising the base year, efforts have also been made by the CSO, MOSPI, Govt. of India, to implement the recommendations of the System of National Accounts (SNA) 2008 to the extent data are available. Some of the recommendations which presently form part of the new series are:

- (i) **Valuation of various GVA, NVA and related aggregates at basic prices and GDP at market prices instead of factor cost.**
- (ii) Estimates of the institutional sectors - Non-financial and financial Corporations, General Government and households are shown separately, in view of their 'intrinsic difference in their economic objectives, functions and behaviour'.
- (iii) Distinction between General Government and public corporations has been made and units have been allocated to institutional sectors so that general government and other public units can be identified separately.
- (iv) Unincorporated enterprises belonging to households, which have complete sets of accounts, tend to behave in the same way as corporations. Therefore, as recommended by SNA 2008, such enterprises have been treated as quasi-corporations. Some examples of quasi-corporations in the Indian context are proprietorship and partnership enterprises, maintaining accounts.
- (v) The head office has been allocated to the non-financial corporations sector unless all or most of its subsidiaries are financial corporations, in which case it is treated as a financial auxiliary in the financial corporations sector. In the 2004-05 series, the recommendation had been adopted for service sector wherein GVA estimates were compiled from enterprises in this sector. In the new series, this approach has been adopted for the mining and organized manufacturing sectors also.
- (vi) Sub-sectoring of Non-Profit Institutions (NPIs) in the corporate and government sectors has been done in respect of autonomous bodies and Section 25 companies.
- (vii) Expenditure on Research & Development (R&D) has been capitalised in Government, Public Corporations and Private Corporations and hence has become part of capital formation.

- (viii) Output of Financial Intermediation Services Indirectly Measured (FISIM) has been calculated using a reference rate for the financial sector, except in the case of central bank (Reserve Bank of India).
- (ix) Output of central bank (RBI) is measured at cost.
- (x) Non-financial assets in the earlier series were classified as 'construction' and 'machinery'. In the new series, as recommended by SNA 2008, non-financial assets have been classified as 'dwellings, other buildings and structures', 'machinery and equipment', 'cultivated biological resources' and 'intellectual property products'.
- (xi) Consumption of fixed capital has been measured at the average prices of the period with respect to a constant-quality price index of the asset concerned.

**FISIM** - In the earlier series, output of Financial Intermediation Services Indirectly Measured (FISIM), which gives an estimate of the 'net interest margin' of the financial corporations, was based on the difference between total property receipts (dividend+ interest+ net profit on sale of investments) and total interest payments by the financial corporations. In the new series, as recommended in the SNA 2008, the estimates of FISIM have been compiled, using the Reference Rate (RR) approach.

**Use of Consumer Price Indices – Rural/Urban/Combined** - Price indices are used for compiling the estimates in two cases – (i) as a deflator when current price estimates are available through firm data sources (e.g. annual financial reports) and (ii) for converting the constant price estimate to that at current prices, when quantum indicators are used in compilation. In the earlier series, CPI-AL/IW was being used as an indicator for the movement in retail prices. In the new series, these have been replaced by the more broad based CPI-Rural/Urban/Combined, which have since become available.

Further, the results of various studies undertaken by the CSO through the Ministry of Agriculture, Ministry of Environment and Forestry and also CSO's input output transaction tables and the Ministry of Agriculture's Cost of Cultivation Studies have been used in the new series for updating the rates and ratios used to estimate the production/consumption of fodder, market charges paid by the farmer, yield rates of meat, meat products and meat by products for different categories of animals, input rates for agriculture and forestry and the trade and transport margins.

Under the present series, estimates of State Domestic Product of Delhi are compiled with effect from 2011-12 to 2017-18. The Estimates of State Domestic Product of Delhi for the years 2011-12 to 2014-15 have been prepared on the basis of revised data received from Central Statistics Office and other data sources. The Second Revised Estimates for the year 2015-16 have been prepared on the basis of actual data culled out from the analysis of budget documents of State Govt., Local Bodies, Delhi Jal Board, Delhi Development Authority, Annual Accounts of State Autonomous Institutions, actual data on production in r/o Agriculture and allied activities received from different data sources and provisional data received from Govt. of India. The First Revised Estimates for the year 2016-17 and Advance Estimates for 2017-18 have been projected by using extrapolation techniques / national trends at sub-sector level and using budget data of RE & BE.

As per the press note on new series of national income dated 30<sup>th</sup> January, 2015 issued by the Ministry of Statistics & Programme Implementation, it is to be noted that Gross Domestic Product (GDP) at factor cost will no longer be discussed in the press releases. As is the practice internationally, industry-wise estimates will be presented as Gross Value Added (GVA) at basic prices, while “GDP at market prices” will henceforth be referred to as GDP. Estimates of GVA at factor cost (earlier called GDP at factor cost) can be compiled by using the estimates of GVA at basic prices and production taxes less subsidies. Like-wise, estimates of SDP are also prepared and presented in this report in conformity with the procedure followed at the national level.

## **ESTIMATION OF SDP**

For the purpose of estimation of SDP, the whole economy of the state has been divided into eleven (11) sectors and twenty one (21) sub-sectors in conformity with the procedure followed at the national level to estimate the National Income estimates. The procedure is followed by each state and union territory of the country to make the estimates comparable. The twenty one sub-sectors have been further categorized into three broad sectors as shown in the following table:

<b>PRIMARY SECTOR</b>	
1.	Agriculture, forestry & fishing
1.1	Crops
1.2	Livestock
1.3	Forestry & Logging
1.4	Fishing
2.	Mining & Quarrying
<b>SECONDARY SECTOR</b>	
3.	Manufacturing
4.	Electricity, Gas, Water Supply & other Utility Services
5.	Construction
<b>TERTIARY SECTOR</b>	
6.	Trade, hotels & restaurants
6.1	Trade & Repair Services
6.2	Hotels & Restaurants
7.	Transport, Storage & Communication
7.1	Railways
7.2	Road transport
7.3	Water transport
7.4	Air transport
7.5	Services incidental to transport
7.6	Storage
7.7	Communication & Services related to broadcasting
8.	Financial Services
9.	Real estate, ownership of dwellings & professional services
10.	Public Administration
11.	Other Services

Estimates of these sectors are prepared individually by adopting one or more of the following approaches.

(i) **Production Approach:** In this method, the sum of economic value of all goods and services produced within the State during the year is considered after deducting the inputs consumed in the process of production.

(ii) **Income Approach:** The income accrued to the factors of production namely land, labour, capital and entrepreneurship in form of rent, salaries and wages, interest and profit is taken into consideration in estimation of value added.

(iii) **Expenditure Approach:** This method is based on the measurement of income at the stage of disposal. All that is produced is either ultimately consumed or part of it is saved for further consumption or future production of goods and services. Thus, the money value of consumption expenditure plus the savings gives the income.

## 2. SECTORAL COMPOSITION

**Statement 1.1: Sector wise Contribution of GSVA at Current Prices**

(In %)

SECTOR	2011-12 (R)	2012-13 (R)	2013-14 (R)	2014-15 (R)	2015-16 (2 <sup>nd</sup> RE)	2016-17 (1 <sup>st</sup> RE)	2017-18 (AE)
Primary	3.49	2.93	3.29	2.79	2.06	2.16	2.04
Secondary	13.09	14.17	14.07	12.27	12.19	12.12	12.04
Tertiary	83.42	82.90	82.64	84.94	85.75	85.72	85.92

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

Sector-wise percentage share in the total Gross State Value Added (at current prices) are presented in Statement 1.1. The analysis of sectoral composition of Gross State Value Added (GSVA) at current prices reveals that the progressive decline in the contribution of Primary Sector in the economy of Delhi (viz: Crops, Livestock, Forestry & Logging, Fishing, Mining & Quarrying) has become a regular feature. The contribution of the Primary Sector, which was 3.49% during 2011-12, is likely to be declined to 2.04% in 2017-18. The Secondary Sector comprising of Manufacturing, Electricity, Gas, Water Supply & Other Utility Services and Construction contributed 13.09% in the total GSVA during 2011-12, which is likely to be decreased to 12.04% during 2017-18. The Tertiary Sector, also known as Service Sector, comprising of Trade, Hotels & Restaurants, Transport, Storage & Communication, Financial Services, Real Estate, Ownership of Dwellings & Professional Services, Public Administration and Other Services is the major contributor in the economy of Delhi with the contribution of 83.42% in the total GSVA during 2011-12 and its contribution is expected to be 85.92% during 2017-18.

The overall view of sectoral composition of State Economy (GSVA) at current prices since 2011-12 to 2017-18 has been depicted in the following graphical presentation:

**Statement 1.2: Sector wise Contribution of GSVA at Constant Prices**

(In %)

Sector	2011-12 (R)	2012-13 (R)	2013-14 (R)	2014-15 (R)	2015-16 (2 <sup>nd</sup> RE)	2016-17 (1 <sup>st</sup> RE)	2017-18 (AE)
Primary	3.49	2.82	3.10	2.95	2.81	3.21	3.20
Secondary	13.09	14.06	13.99	11.99	11.84	11.79	11.67
Tertiary	83.42	83.12	82.91	85.06	85.35	85.00	85.13

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

Analysis of sectoral composition of GSVA at constant (2011-12) prices is also revealing the same trend as that of current prices in primary sector but with slight variations in percentages. The Secondary Sector contributed 13.09% in the total GSVA during 2011-12, which is likely to be decreased to 11.67% during 2017-18, whereas the Tertiary Sector contributed 83.42% in the total GSVA at constant prices during 2011-12 and its contribution is expected to be 85.13% during 2017-18.

The reasons for change in the trend of sectoral composition of the Delhi's Economy may be attributed to the rapid urbanization of Delhi and consequential reduction in agricultural and allied activities.

### 3. GROSS STATE DOMESTIC PRODUCT

**Statement 1.3: GSDP at Current and Constant Prices**

(₹ Crores)

Price	2011-12 (R)	2012-13 (R)	2013-14 (R)	2014-15 (R)	2015-16 (2 <sup>nd</sup> RE)	2016-17 (1 <sup>st</sup> RE)	2017-18 (AE)
Current	343798	391388	443960	494885	548081	616826	686017
Constant	343798	366628	392908	428899	474058	514871	556800

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

GSDP at current prices has increased with annual average growth rate of 12.21% from ₹ 343798 Crores in 2011-12 to ₹ 686017 Crores in 2017-18. However, annual increase for 2017-18 was 11.22% over previous year as compared to all India growth of 9.8%.

At constant (2011-12) prices, GSDP has increased from ₹ 343798 Crores in 2011-12 to ₹ 556800 Crores in 2017-18 registering annual average growth rate of 8.38%. For 2017-18, annual increase of 8.14% is likely to be recorded in GSDP at constant prices. At national level, annual increase in GDP for 2017-18 is 6.6% at constant prices.

#### 4. NET STATE DOMESTIC PRODUCT/STATE INCOME

**Statement 1.4: NSDP at Current and Constant Prices**

(₹ Crores)

Price	2011-12 (R)	2012-13 (R)	2013-14 (R)	2014-15 (R)	2015-16 (2 <sup>nd</sup> RE)	2016-17 (1 <sup>st</sup> RE)	2017-18 (AE)
Current	314650	357400	404841	448568	496868	561400	626002
Constant	314650	334193	356528	388183	429149	465770	503507

State Income/NSDP of Delhi at current prices was estimated at ₹ 626002 Crores during 2017-18 compared to ₹ 314650 Crores during 2011-12, registering average annual growth rate of 12.16% per annum. During the same period, average annual growth rate of National Income at current prices was recorded to the tune of 11.5% per annum. Comparison of the estimates of NSDP 2017-18 with that of 2016-17 reveals an annual growth of 11.51%. However, annual increase in National Income for 2017-18 was 9.8%.

At constant (2011-12) prices, State Income of Delhi was estimated at ₹ 503507 Crores in 2017-18 compared to ₹ 314650 Crores during 2011-12 with average annual growth rate of 8.16%. For the same period, annual average growth of 6.7% was recorded in National Income. Annual growth of State Income was 8.10% in 2017-18 over the previous year as compared to that of 6.7% in National Income.

## 5. PER CAPITA INCOME (Delhi Vs All India)

**Statement 1.5: Per Capita Income of Delhi and All India**

(Amount in ₹)

YEAR	CURRENT PRICES		CONSTANT PRICES	
	DELHI	ALL INDIA	DELHI	ALL INDIA
2011-12	185361	63462	185361	63462
2012-13	206590	70983	193175	65538
2013-14	229619	79118	202216	68572
2014-15	249635	86647	216029	72805
2015-16	271305	94731	234328	77826
2016-17	300793	103870	249555	82229
2017-18	329093	112764	264697	86689

Delhi's Per Capita Income for 2017-18 at current prices has been worked out to ₹ 329093 as against ₹ 300793 during 2016-17 showing annual increase of 9.41%. At All India level per capita income in 2017-18 at current prices has been worked out by CSO to the tune of ₹ 112764 with 8.6% annual growth over previous year. The annual average growth rate of Per Capita Income of Delhi over the period 2011-12 to 2017-18, was registered at 10.05% per annum at current prices. In real terms, Per Capita Income of Delhi was calculated at ₹ 264697 in 2017-18 as against ₹ 185361 in 2011-12, revealing an average annual growth rate of 6.13%. At constant prices, annual growth during 2017-18 over the previous year was recorded at 6.07%. In real terms, per capita income at National Level has increased from ₹ 63462 in 2011-12 to ₹ 86689 in

2017-18 with average annual growth rate of 5.4% while the annual increase in terms of percentage for 2017-18 over previous year was found to be 5.4%.

Here, it may be noted that per capita income of Delhi has always been around three times higher when compared to National averages both at Current and Constant prices.

## 6. GSDP TO GDP RATIO:

The ratio of GSDP Delhi to All India GDP both at current and constant prices has been increasing consistently as appeared in the two comparative statements 1.6 and 1.7. It is revealed from the statements that share of GSDP Delhi in All India GDP at current prices in the year 2011-12 was 3.94% and it is expected to reach at 4.10% during 2017-18, while ratio of

population of Delhi to All India is estimated to be 1.44% during 2017-18 . The figure of GSDP Delhi to All India GDP for constant prices is expected to reach at 4.28% during 2017-18.

**Statement 1.6: GSDP (Delhi) to GDP (All India) Ratio (Current Prices)**

(₹ Crores)

Year	2011-12 (R)	2012-13 (R)	2013-14 (R)	2014-15 (R)	2015-16 (2 <sup>nd</sup> RE)	2016-17 (1 <sup>st</sup> RE)	2017-18 (AE)

## **Chapter 2:**

# **Primary Sector**

**T**he Primary Sector of the economy extracts or harvests products from the earth. The primary sector includes the production of raw materials and basic foods. Activities associated with the primary sector include agriculture (both subsistence and commercial), mining, forestry, farming, grazing, hunting and gathering, fishing and quarrying. The packaging and processing of the raw materials associated with this sector is also considered to be part of this sector. The Primary sector includes the following activities:-

- ❖ Agriculture, Forestry & Fishing.
- ❖ Mining & Quarrying.

### **AGRICULTURE, FORESTRY AND FISHING**

#### **1. Crops**

The economic activities included in agriculture proper are (i) growing of field crops, fruits, nuts, seeds, and vegetables, (ii) management of tea, coffee and rubber plantations, (iii) agricultural and horticultural services on a fee or on contract basis such as harvesting, baling and thrashing, operation of tobacco for marketing, pest control, spraying, pruning, picking and packing and (iv) ancillary activities of cultivators such as gur making, transportation of own produce to primary markets, activities yielding rental income from farm building and farm machinery. The estimates of GSVA for this activity are compiled by the production method except for the operation of government irrigation system, for which the income method is followed.

#### **2. Livestock**

Livestock and livestock products include breeding and rearing of animals and poultry besides private veterinary services, production of milk slaughtering, preparation and dressing of meat, production of raw hides and skins, eggs, dung, raw wool, honey and silkworm cocoons etc.

#### **3. Forestry & Logging**

The economic activities considered in this activity include (i) forestry (e.g., planting and conservation of forests, gathering of forest products, charcoal burning carried out in the forests), (ii) logging (e.g. felling and rough cutting of trees, hewing or rough shaping of poles, blocks etc.) and transportation of forest products to the sale depots/assembly centers and, (iii) farmyard wood (industrial wood and fuel wood collected by the primary producers from trees outside regular forests). The forest products are classified into two broad groups viz., (a) major products comprising industrial wood (timber, round wood, match and pulpwood) and fuel wood (firewood

and charcoal wood) and (b) minor products comprising a large number of heterogeneous items such as bamboo, fodder, lac, sandalwood, honey, resin, gum, tendu leaves etc.

Estimates of GSVA are prepared following the production method. Gross value of output is estimated separately for (a) Industrial wood, (b) Fuel wood and (c) minor forest products. Estimates of Industrial wood are based on data pertaining to Tree Outside Forest (TOF) received from the Forest Survey of India (FSI).

#### 4. Fishing

The activities covered in the fishing are (i) commercial fishing in (a) ocean, coastal and offshore waters and (b) inland waters, that include catching, tackling and gathering of fish from rivers, irrigation and other canals, lakes, tanks, fields inundated tract etc., (ii) subsistence fishing in inland waters and artificial ponds, (iii) gathering of sea weeds, sea shells, pearls, sponges and other ocean and coastal water products and (iv) fish curing viz., salting and sun-drying of fish.

Estimates of GSVA of this activity are prepared by following the production method.

**Statement 2.1: Agriculture, Forestry & Fishing**

(₹ Crores)

Year Item	2011-12 (R)	2012-13 (R)	2013-14 (R)	2014-15 (R)	2015-16 (2 <sup>nd</sup> RE)	2016-17 (1 <sup>st</sup> RE)	2017-18 (AE)
<b>GSVA Current</b>	2857	2583	2586	2478	2238	2446	2747
<b>GSVA Constant</b>	2857	2236	2085	1815	1658	1765	1921
<b>NSVA Current</b>	2799	2524	2520	2404	2160	2363	2659
<b>NSVA Constant</b>	2799	2181	2028	1754	1594	1698	1852

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

The change in trend of this sub-sector is presented in the line graph given below:

GSVA of Delhi from Agriculture and allied activities was ₹ 2857 Crores during the base year 2011-12 at current prices. As per 2<sup>nd</sup> revised estimates for 2015-16, GSVA was calculated at ₹ 2238 Crores while the figure is likely to touch ₹ 2446 Crores during 2016-17 with annual growth of 9.30% and ₹ 2747 Crores during 2017-18 with annual growth of 12.31%, whereas at constant prices GSVA has increased to ₹ 1765 Crores and ₹ 1921 Crores during 2016-17 and 2017-18 respectively from ₹ 2857 Crores in the base year (i.e. 2011-12). Year-wise growths in terms of percentages were as (-)9.59% (2012-13), 0.13% (2013-14), (-)4.20% (2014-15), (-)9.66% (2015-16), 9.30 (2016-17), 12.31% in 2017-18 and at constant prices, annual growths were found to be (-)21.73% (2012-13), (-)6.74% (2013-14), (-)12.95% (2014-15), (-)8.66% (2015-16), 6.46 (2016-17) and 8.85% in 2017-18.

Analysis also reveals that by and large same trend was maintained by NSVA estimates as that of GSVA with slightly changed percentages. NSVA from Agriculture, Forestry & Fishing was recorded at ₹ 2799 Crores in 2011-12, which has increased to ₹ 2363 Crores at current prices during 2016-17 and ₹ 2659 Crores during 2017-18 while at constant prices it is expected to be at ₹ 1698 Crores and ₹ 1852 Crores during 2016-17 and 2017-18 respectively.

## **MINING & QUARRYING**

The economic activities covered in this activity, comprise extraction of minerals which occur in nature as solids, liquids or gases; underground and surface mines, quarries and oil wells, with all supplementary operations for dressing and beneficiating ores and other crude minerals such as crushing, screening, washing, cleaning, grading, milling, floatation, melting, pelletising, topping and other preparations needed to render the material marketable.

Estimates of GSVA in this industry are compiled from the annual financial statement of the companies for non-departmental enterprises and private corporate enterprises, extracted from MCA21 database.

**Statement 2.2: Mining and Quarrying**

(₹ Crores)

<b>Year Item</b>	<b>2011-12 (R)</b>	<b>2012-13 (R)</b>	<b>2013-14 (R)</b>	<b>2014-15 (R)</b>	<b>2015-16 (2<sup>nd</sup> RE)</b>	<b>2016-17 (1<sup>st</sup> RE)</b>	<b>2017-18 (AE)</b>
<b>GSVA Current</b>	7729	7466	10155	9638	7553	9043	9217
<b>GSVA Constant</b>	7729	6825	8536	9314	9858	12370	13166
<b>NSVA Current</b>	6796	6560	8696	8182	6299	7992	8369
<b>NSVA Constant</b>	6796	5963	7200	8060	8801	11511	12505

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

The change in trend of this sub-sector is presented in the line graph given below:

As per base year estimates for 2011-12, GSVA from Mining & Quarrying sub-sector was calculated at ₹ 7729 Crores while the figure is likely to touch ₹ 9043 Crores during 2016-17 with annual growth of 19.73% and ₹ 9217 Crores during 2017-18 with annual growth of 1.92%, whereas at constant prices GSVA has increased to ₹ 12370 Crores and ₹ 13166 Crores during 2016-17 and 2017-18 respectively from ₹ 7729 Crores in the base year (i.e. 2011-12). Year-wise growths in terms of percentages were as (-)3.41% (2012-13), 36.03% (2013-14), (-)5.10% (2014-15), (-)21.63% (2015-16), 19.73% (2016-17), 1.92% in 2017-18 and at constant prices, annual growths were found to be (-)11.69% (2012-13), 25.07% (2013-14), 9.10% (2014-15), 5.84% (2015-16), 25.48% (2016-17) and 6.44% in 2017-18.

Similarly, NSVA from this activity, which was estimated at approximate ₹ 6796 Crores during base year 2011-12 both at current and constant prices, has also been calculated as ₹ 7992 Crores and ₹ 8369 Crores for the years 2016-17 and 2017-18 respectively, while at constant prices it is estimated to be ₹ 11511 Crores and ₹ 12505 Crores for the years 2016-17 and 2017-18 respectively.

The analysis of GSVA at current prices reveals that contribution of Primary Sector in the economy of Delhi (viz. Agriculture, livestock, Forestry, Fishing, Mining & Quarrying) was 3.49% during the base year i.e. 2011-12 and it is found to be 2.04% during the year 2017-18 whereas, at constant prices, it was found to be 3.20% during 2017-18.

\*\*\*\*\*

# Chapter 3:

## Secondary Sector

The Secondary Sector of the economy includes those economic sectors that create a finished, usable product: manufacturing, construction and electricity, gas & water supply. This sector generally takes the output of the primary sector and manufactures finished goods or where they are suitable for use by other businesses, for export, or sale to domestic consumers.

The Secondary sector includes the following activities:-

- ❖ Manufacturing,
- ❖ Electricity, Gas, Water Supply and Other Utility Services,
- ❖ Construction.

### MANUFACTURING

Manufacturing process, in general, is defined as any process for making, altering, repairing, finishing, packing, oiling, washing, cleaning, breaking up, demolishing or otherwise treating or adapting any article or substance with a view to its use, sale, transport, delivery or disposal. For the purposes of estimation of GSVA, the entire manufacturing activities are classified into two broad segments, namely, **Manufacturing-‘Organised Manufacturing’ and ‘Unorganised Manufacturing’**.

1. **Organised Manufacturing:** Estimates have been derived using the annual accounts of Non-Departmental Enterprises (NDE), Private corporate sector from MCA database and quasi-corporations as covered by ASI, apart from the Departmental Enterprises (DEs), like Railway Workshops, GOI Printing Press and Ordnance Factories. ASI captures the data by type of organisation such as private and public limited companies, NDEs, proprietary and partnership factories, Hindu Undivided Family, KVIC etc. Annual accounts of DEs, NDEs and Private Corporate Sector being already available, the estimates relating to the Non-Government unincorporated enterprises, which include partnership and proprietorship enterprises in ASI have been estimated and are classified as quasi-corporations. These enterprises being small in size, their coverage from ASI has been treated as of enterprise even if the data is collected through establishment approach. In addition, in accordance with the recommendation of SNA 2008, unincorporated manufacturing enterprises maintaining accounts are quasi-corporations and therefore, their estimates have been included in organised manufacturing. For obtaining estimates of GVO/GVA by compilation category in the case of private corporate sector, the estimates as obtained as the sum of all enterprises have been apportioned using the corresponding share in ASI.
2. **Unorganised Manufacturing:** The unorganised manufacturing consists of the household enterprises. The effective labour input method has been used for compilation category wise estimation of GVA of unincorporated manufacturing enterprises from the NSS 67th

round Survey on Unincorporated Enterprises, 2010-11 and NSS 68<sup>th</sup> round Employment Unemployment Survey, 2011-12.

### Statement 3.1: Manufacturing

(₹ Crores)

Year Item	2011-12 (R)	2012-13 (R)	2013-14 (R)	2014-15 (R)	2015-16 (2 <sup>nd</sup> RE)	2016-17 (1 <sup>st</sup> RE)	2017-18 (AE)
<b>GSVA Current</b>	18907	23350	25338	23385	24612	25840	27756
<b>GSVA Constant</b>	18907	22035	22939	20591	21916	22709	23697
<b>NSVA Current</b>	15911	20085	22060	19862	21083	22306	24216
<b>NSVA Constant</b>	15911	18921	19920	17441	18731	19489	20443

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

Manufacturing sub-sector is the largest contributor in the secondary sector in the economy of Delhi. GSVA from manufacturing is estimated at ₹ 25840 Crores and ₹ 27756 Crores at current prices during 2016-17 and 2017-18 respectively with respective annual growths of 4.99% and 7.41% over previous year's estimates. Similarly, GSVA at constant prices is to the tune of ₹ 22709 Crores and ₹ 23697 Crores during 2016-17 and 2017-18 respectively registering annual growths of 3.62% and 4.35% over previous years.

NSVA estimates, by and large, are showing positive growth trend at current prices and at constant prices. As per estimates for 2016-17, NSVA is to the tune of ₹ 22306 Crores with an annual growth of 5.80% over previous year at current prices and ₹ 19489 Crores with an annual growth of 4.05% over previous year at constant prices. As per advance estimates for 2017-18, NSVA was to the tune of ₹ 24216 Crores with annual growth of 8.56% over previous year at current prices and ₹ 20443 Crores with annual growth of 4.89% over previous year at constant prices respectively.

The change in trend of this sub-sector is presented in the line graph given below:

## **ELECTRICITY, GAS & WATER SUPPLY AND OTHER UTILITY SERVICES**

The economic activities relating to generation, transmission and distribution of electric energy are covered under the electricity sub-sector, the manufacturer of gas in gas works including gobar gas and distribution through mains to household, industrial, commercial and other users are covered under the gas sub-sector and the activities associated with collection, purification and distribution of water excluding the operation of irrigation system are covered under water supply sub-sector. The production of LPG has been included under manufacturing and only supply of gas through pipelines, where it can not be alienated from the activity of its manufacturing is included in the gas sub-sector.

The GSVa estimates in Electricity sub-sector are prepared using the income method. The estimates are based on the analysis of annual accounts of State Electricity Boards and other electricity undertakings located in the State.

The estimates of GSVa in respect of Gas are compiled through the enterprise approach, by aggregating the estimates for NDEs, companies in the Private Corporate Sector and the estimates for manufacture of gas in households through bio-gas plants (Gobar Gas). The estimates for Gobar Gas have been classified under the 'Households' sector. Further, as in the other cases, companies in the Private Corporate Sector are being captured through the MCA21 database.

The estimates of GSVa for water supply are compiled for the public and private sectors separately following the income method. The estimates of public sector in respect of State Government and Local Bodies are culled out from the Budget documents. Estimates for private sector are compiled by aggregating those for Companies in the Private Corporate Sector and water supply in the unorganised sector. Estimates for the unorganised sector have been compiled using the wages and the number of workers from the NSS 68th round Employment Unemployment Survey, duly adjusted for the population as per Census 2011.

The estimates of GSVa for Remediation and Other Utility Services have been compiled by aggregating the estimates for recycling, remediation, sewerage and other waste management services. The estimates for recycling in the organised sector have been obtained from ASI, while those for the remaining services have been estimated by aggregating the estimates of DEs and Enterprises of the Private Corporate Sector. Estimates for the Unincorporated Enterprises have been estimated using the NSS 67th round Survey on Unincorporated Enterprises, 2010-11 and NSS 68th round Employment Unemployment Survey, 2011-12. As in the case of unincorporated manufacturing, the unincorporated enterprises are classified as quasi-corporations, if they are maintaining accounts and otherwise, as household enterprises.

<b>NSVA Constant</b>	2614	4261	5066	5300	6910	7819	8196

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

GSVA from this industry was estimated at ₹ 16131 Crores and ₹ 18046 Crores at current prices for the years 2016-17 and 2017-18 respectively with respective annual growths of 22.60% and 11.87% over the previous years. Similarly, it is estimated at ₹ 12384 Crores and ₹ 13461 Crores at constant prices for the years 2016-17 and 2017-18 respectively with respective annual growths of 14.93% and 8.69% over the previous years.

By and large NSVA is also showing the same trend as that of GSVA. The estimates for 2016-17 with annual growth of 24.92% were noted at ₹ 11054 Crores at current prices while the advanced estimates for 2017-18 were noted at ₹ 12201 Crores with an annual growth of 10.37%. At constant prices, the annual growths were 13.16% and 4.82% in 2016-17 and 2017-18 respectively.

The change in trend of this sub-sector is presented in the line graph given below:

## CONSTRUCTION

The construction sector comprises two components namely (i) accounted construction (pucca construction) and (ii) unaccounted construction (kutchra construction). The GVA of former is measured through the commodity flow approach, while the later through the expenditure approach).

The estimates of accounted construction for the entire economy are compiled first through the commodity flow approach on the basis of availability of basic construction materials and factor inputs; this forms the control figure of overall output of accounted construction for the country. From this estimate, output of construction in public sector, private corporate sector and household sector (compiled independently utilizing the data sources of budget documents, profit & loss accounts, balance sheets and results of AIDIS) is separately estimated. The estimates for private corporations are prepared using information on financial parameters of non-government companies from MCA21 database provided by Ministry of Corporate Affairs.

The unaccounted construction included kutchra construction undertaken in public sector, households sector and civilian construction in installing wind energy systems and capital expenditure in cultivating seventeen plantation crops. The capital expenditure incurred on cultivation of plantation crops during the gestation period is treated as output of the 'Construction Industry' for that year. The coverage of capital expenditure in cultivation of plantation crops now include cardamom based on data available from NHB and NABARD for the year 2014-15. Using information on the asset 'Tree, crop and plant resources yielding repeat products' available from the MCA21 database for private corporations and from budgets, annual reports for public corporations, the capital expenditure for the Households Sector is worked out as a residual.

<b>NSVA Constant</b>	15882	15416	15671	14993	14713	15761	16770

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

Construction sector is also one of the major contributors within Secondary Sector of the economy of Delhi. Estimates of GSVA for Construction Sector at current prices have been increasing every year. It has increased from ₹ 16669 Crores in 2011-12 to ₹ 22586 Crores and ₹ 24723 Crores in 2016-17 and 2017-18 respectively. The growth rates for different years were 7.18% (2012-13), 10.99% (2013-14), 0.18% (2014-15), 2.21% (2015-16), 11.24% (2016-17) and 9.46 (2017-18). In real terms, GSVA increased from ₹ 16669 Crores in 2011-12 to

₹ 16884 Crores in 2016-17 and ₹ 17913 Crores in 2017-18. The simple annual growth over previous years in terms of percentage were (-)2.12% (2012-13), 3.01% (2013-14), (-)4.34% (2014-15), (-)1.62% (2015-16), 6.75% (2016-17) and 6.10% (2017-18).

NSVA at current prices from Construction Sector recorded at ₹ 15882 Crores in 2011-12 is expected to touch ₹ 23571 Crores in 2017-18. However, annual growths over previous years in 2016-17 and 2017-18 were to the tune of 12.04% and 10.03% for 2016-17 and 2017-18 respectively. In real terms, however, annual increase in terms of percentages during 2016-17 and 2017-18 over previous years were found to be 7.12% and 6.40% respectively.

The change in trend of this sub-sector is presented in the line graph given below:

Unlike the Tertiary Sector, the contribution of Secondary Sector in GSVA has decreased to 12.04% in 2017-18 from 13.09% in the base year i.e. 2011-12, rendering the overall positive growth of the economy intact.

\*\*\*\*\*

## Chapter 4:

# Tertiary Sector

**T**he Tertiary Sector (also known as the Services Sector) has a pivotal role in the Delhi's economic development and constitutes a major part of the economy of the State both in terms of employment potential and its contribution to the State Income. The sector covers a wide range of activities from the most sophisticated in the field of Information and Communication Technology to simple services pursued by the unorganized/informal sector workers, such as, vegetable sellers, hawkers, rickshaw pullers, etc. In terms of industrial categories, this sector inter-alia includes sub-sectors like Trade; Hotels and Restaurants; Transport; Storage; Communication; Financial Services; Real Estate, Ownership of Dwelling & Professional Services; Public Administration; and Other Services including Education, Medical and Health.

A comprehensive overview of the said composition may be obtained with the help of following text:

### **TRADE, HOTELS & RESTAURANTS**

#### **1. Trade & Repair Services:**

Trade includes wholesale and retail trade in all commodities. It covers activities of purchase and selling agents, brokers and auctioneers. Wholesale trade covers units, which resell without transformation, new and used goods generally to the retailer and industries, commercial establishments, institutional and professional users or to other wholesalers. Retail trade covers units, which mainly resell without transformation new and used goods for personal and household consumption. Repair services of computers, household goods, motor vehicles (including motor cycles) are also included in this Section. In the earlier series, repair of computers was a part of computer related activities. It has been made a part of this category as per NIC 2008.

#### **2. Hotels & Restaurants:**

The hotels & restaurants sector covers services rendered by hotels and other lodging places, restaurants, cafes and other eating and drinking places.

Trade, Hotels & Restaurants is the one of the major contributors in the state economy and contributing about 13% annually. We may have a glance at the following statistical facts:

### Statement 4.1: Trade, Hotel & Restaurants

(₹ Crores)

Year Item	2011-12 (R)	2012-13 (R)	2013-14 (R)	2014-15 (R)	2015-16 (2 <sup>nd</sup> RE)	2016-17 (1 <sup>st</sup> RE)	2017-18 (AE)
<b>GSVA Current</b>	42121	49051	56532	58233	63786	70814	76303

<b>NSVA Constant</b>	39278	42635	46562	47140	53692	58539	60703

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

GSVA for this sector at current prices in 2011-12 was recorded at ₹ 42121 Crores. As per 2016-17, GSVA was calculated at ₹ 70814 Crores while as per advanced estimates, the figure is likely to touch ₹ 76303 Crores in 2017-18. The annual increase for 2016-17 and 2017-18 over the previous years were 11.02% and 7.75% respectively. GSVA at constant prices increased from ₹ 42121 Crores in 2011-12 to ₹ 63572 Crores and ₹ 66229 Crores in 2016-17 and 2017-18 respectively. However, annual growths of 9.17% and 4.18% were observed during 2016-17 and 2017-18 respectively over the previous years.

NSVA at current prices from Trade, Hotels & Restaurants has also been increasing regularly from ₹ 39278 Crores in 2011-12 to ₹ 65283 Crores and ₹ 70314 Crores in 2016-17 and 2017-18, respectively. However, annual increase was observed as 11.19% and 7.71% in 2016-17 and 2017-18. NSVA at constant prices increased from ₹ 39278 Crores in 2011-12 to ₹ 58539 Crores and ₹ 60703 Crores in 2016-17 and 2017-18 respectively, whereas annual growth during 2016-17 and 2017-18 were observed at 9.03% and 3.70% respectively over the previous year.

The change in trend of this sub-sector is presented in the line graph given below:

## **TRANSPORT, STORAGE & COMMUNICATION**

The economic activities covered in this sector are:

### **a. Railways**

- Estimates of GSVA for railways are considered as part of supra-regional sectors and hence are provided by the CSO to the states. The GVA generated by the Delhi Metro Rail Corporation (DMRC) is also included.

### **b. Road Transport**

- The GSVA for the mechanized road transport (Public Sector) segment are obtained through economic analysis of annual reports/accounts for non-departmental transport undertakings in the state i.e. Delhi Transport Corporation. The estimates of Private corporate sector have been compiled using MCA21 database.
- The GSVA for the non-mechanized road transport segment, the estimates have been prepared by multiplying the workforce with Gross Value Added (GVA) per worker available from the prescribed sources.

### **c. Air Transport**

- The GVA estimates of air transport are prepared separately for the two parts i.e. public and private corporate sector. Estimates for the public sector were obtained by analyzing the budget documents and the annual accounts of public sector undertakings. The estimates of the private organised part have been compiled using MCA21 database.

### **d. Water Transport**

- The public sector GVA estimate was prepared by analyzing the budget documents and annual accounts of Public Shipping Companies and Inland Water Shipping Companies. The estimates of the private corporate part have been compiled using MCA21 database. The GVA estimates for unorganised sector have been prepared using effective LI method.

### **e. Services Incidental to transport**

- For this industry, the public sector estimates of GVA are prepared by analysing the budget documents for information on lighthouses and lightships and annual accounts of companies engaged in services incidental to water and air transport like Port Trusts, Inland Water Authority, Dredging Corporation and Airport Authority of India. The estimates of the private corporate part have been compiled using MCA21 database. The GVA estimates for unorganised sector have been prepared using effective LI method.

**f. Storage**

- For Warehousing Corporations, the GVA estimate was based on the analysis of annual accounts of state and central warehousing corporations. The estimates of the private corporate part have been compiled using MCA21 database. The GVA estimates for unorganised sector have been prepared using the effective LI method.

**g. Communication & Services related to broadcasting**

- **Public Communications:** The estimates of GSDP for Public communication are considered as part of Supra regional Sectors and hence are provided by the CSO to the States. Central Statistics Office, Govt. of India is estimating the GVA to Supra Regional Sectors at the national level since operation of these sectors are not co-terminus with the geographical boundaries of the State, and apportioning to the States.
- **Private Communication Services:** The economic activities covered under this are (i) Courier activities, (ii) Activities of the cable operators and (iii) Telecommunication. A new category - Recording, publishing and broadcasting services – has been included in this category. Estimates for the private corporate sector enterprises for all the categories have been compiled using MCA21 database. The estimates for the unincorporated sector (quasi-corporations and household enterprises) have been compiled using labour input method for ‘telecommunication’ and using effective labour input method for the remaining categories.

We may have a glance at the following statistical facts:

**Statement 4.2: Transport, Storage & Communication**

(₹ Crores)

<b>Year Item</b>	<b>2011-12 (R)</b>	<b>2012-13 (R)</b>	<b>2013-14 (R)</b>	<b>2014-15 (R)</b>	<b>2015-16 (2<sup>nd</sup> RE)</b>	<b>2016-17 (1<sup>st</sup> RE)</b>	<b>2017-18 (AE)</b>
<b>GSVA Current</b>	39286	45325	49966	65166	74101	82804	91224
<b>GSVA Constant</b>	39286	43195	46036	60839	71208	74769	80730
<b>NSVA Current</b>	34104	38689	42261	56188	64524	72752	80620
<b>NSVA Constant</b>	34104	36814	38742	52879	62731	65774	71218

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

GSVA from Transport, Storage & Communications sector at current prices were ₹ 82804 Crores and ₹ 91224 Crores during 2016-17 and 2017-18 depicting respective growths of 11.75% and 10.17% over previous years. In real terms, GSVA from this sector has been increasing regularly from ₹ 39286 Crores in 2011-12 to ₹ 74769 Crores and ₹ 80730 Crores in

2016-17 and 2017-18 respectively while the year-wise growth in terms of percentage were 9.95% (2012-13), 6.58% (2013-14), 32.16 % (2014-15), 17.04% (2015-16), 5.00% (2016-17) and 7.97% (2017-18).

NSVA at current prices was recorded at ₹ 72752 Crores and ₹ 80620 Crores in 2016-17 and 2017-18 respectively against ₹ 34104 Crores in 2011-12. However, year-wise growths in terms of percentages were 13.44% (2012-13), 9.23% (2013-14), 32.96% (2014-15), 14.84% (2015-16), 12.75% (2016-17) and 10.81% (2017-18). NSVA at constant prices from this sector was recorded at ₹ 65774 Crores and ₹ 71218 Crores in 2016-17 and 2017-18 respectively with respective growths of 4.85% and 8.28% annual increase over the previous years.

The change in trend of this sub-sector is presented in the line graph given below:

## FINANCIAL SERVICES

The following information has been incorporated for the first time-

- (i) Annual accounts of the Mutual Funds (excluding UTI MF) registered with the Securities and Exchange Board of India (SEBI);
- (ii) Annual accounts of the stock brokers and stock exchanges registered with SEBI (who are also registered under the Companies Act)
- (iii) Annual accounts of the financial regulatory authorities, like SEBI, IRDA and PFRDA; and
- (iv) Annual accounts of the Pension Funds registered with the Pension Fund Regulatory and Development Authority (PFRDA).

Further, the financial corporations have been sub-sectored as recommended by SNA 2008. The sub-sectors are:

- (i) Central Bank
- (ii) Deposit-taking corporations except the Central Bank
- (iii) Money market funds (MMF)
- (iv) Non-MMF investment funds
- (v) Other financial intermediaries except insurance corporations and pension funds (ICPF)
- (vi) Financial auxiliaries
- (vii) Captive financial institutions and money lenders
- (viii) Insurance corporations (IC)
- (ix) Pension funds (PF)

Adoption of sub-sectorisation has effected some changes in classification. These include, classifying the insurance agents under financial auxiliaries; disaggregation of the mutual funds into Money-Market Funds (MMF), non-MMF and Asset Management Companies (AMCs) and treating the AMCs as financial auxiliaries. In the earlier series, insurance agents were under the insurance sub-sector and entire NBFCs were treated together. Estimates pertaining to mutual funds in the earlier series were compiled using the annual accounts of the Unit Trust of India (UTI). In the new series, both public and private mutual funds have been comprehensively covered. Further, these have been segregated into Money Market Funds (MMF), non-MMF and Asset Management Companies (AMCs), as per the recommendations of SNA 2008.

Central Statistics Office, Govt. of India is estimating the GVA to Supra Regional Sectors at the national level since operation of these sectors are not co-terminus with the geographical boundaries of the State, and apportioning to the States. Therefore, GSVA of Financial Services Sector is provided by the Central Statistics Office, Govt. of India.

#### Statement 4.3: Financial Services

(₹ Crores)

<b>Year</b> <b>Item</b>	<b>2011-12</b> <b>(R)</b>	<b>2012-13</b> <b>(R)</b>	<b>2013-14</b> <b>(R)</b>	<b>2014-15</b> <b>(R)</b>	<b>2015-16</b> <b>(2<sup>nd</sup> RE)</b>	<b>2016-17</b> <b>(1<sup>st</sup> RE)</b>	<b>2017-18</b> <b>(AE)</b>
<b>GSVA Current</b>	53883	59928	64491	69749	75169	80589	86010
<b>GSVA Constant</b>	53883	59143	62185	66685	70137	73589	77871
<b>NSVA Current</b>	53032	58866	63417	68462	73749	79057	84349
<b>NSVA Constant</b>	53032	58114	61164	65544	68881	72219	76386

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

In terms of rupees, GSVA at current prices for 2011-12 was recorded at ₹ 53883 Crores against ₹ 80589 Crores and ₹ 86010 Crores in 2016-17 and 2017-18 respectively whereas annual growth for 2016-17 and 2017-18 were noted at 7.21% and 6.73% respectively. In real terms, GSVA from this activity increased from ₹ 53883 Crores in 2011-12 to ₹ 73589 Crores and ₹ 77871 Crores in 2016-17 and 2017-18 with simple annual growth for 2016-17 and 2017-18 were recorded at 4.92% and 5.82% respectively over previous years at constant prices.

NSVA at current prices was recorded at ₹ 53032 Crores in 2011-12 which has increased to ₹ 79057 Crores and ₹ 84349 Crores in 2016-17 and 2017-18, respectively. However, annual increase in NSVA in terms of percentages for 2016-17 and 2017-18 were found to be 7.20% and 6.69% respectively. In real terms, NSVA has increased from ₹ 53032 Crores in 2011-12 to ₹ 72219 Crores and ₹ 76386 Crores in 2016-17 and 2017-18 with simple annual growth for 2016-17 and 2017-18 at constant prices were to the tune of 4.84% and 5.77% respectively over previous years.

The change in trend of this sub-sector is presented in the line graph given below:

## REAL ESTATE, OWNERSHIP OF DWELLINGS AND PROFESSIONAL SERVICES

The economic activities covered in this sector in the new series are (i) Real estate activities; (ii) Computer & information related services; (iii) Professional, scientific and technical activities including R&D; (iv) Administrative and support service activities and other professional activities and (v) Ownership of Dwellings.

- a) **Real estate:** This sub-sector includes buying, selling, renting and operating of self-owned or leased real estate such as apartment building and dwellings, non-residential buildings, developing and subdividing real estate into plots, etc. Also included are developments and sale of land and cemetery lots, operating of apartment hotels and residential mobile home sites. Purchase, sale, letting and operating of real estate – residential and non-residential buildings, developing and subdividing real estate into lots, leasers of real property, Real estate activities with own or leased property, real estate activities on a fee or contract basis.
- b) **Computer & information related services:** ‘Repair of computers’ and ‘Software publishing’ are no longer a part of this category and have been moved to ‘Trade & Repair Services’ and ‘Communication & services related to broadcasting’ respectively.

- c) **Professional, scientific and technical activities including R&D:** The category 'research & development etc.' in the old series has been modified with inclusion of 'veterinary activities' and appropriately renamed.
- d) **Administrative and support service activities and other professional activities:** This is a new category culled out from the certain activities of the previous category- 'research & development etc.' and includes all administrative and support service activities. It also includes legal and accounting activities.
- e) **Ownership of dwellings:** As per the production boundary defined for national accounts, 'production of housing services for owner occupiers' own final consumption' has to be taken into consideration in the estimation of GDP. Therefore, this economic activity apart from capturing the housing services generated from rented residential houses, also includes the imputed value of owner occupied dwellings. Services rendered by non-residential buildings are considered to be a subsidiary activity of the industries, which occupy the buildings and therefore, are not included in this sector.

For all these services, other than 'ownership of dwellings' in this category, MCA21 database has been used for the private corporate sector, while effective labour input method has been used for compiling the estimates of the unincorporated sector. GVA estimates for the ownership of dwellings of urban areas were estimated as the gross rental (actual rent paid and imputed rent for owned dwellings) of the residential census houses less the cost of repairs and maintenance. The user cost approach was used for estimating the value added from rural dwellings, duly updated with the latest Data on dwellings and rent per dwelling for urban areas has been taken from the Population Census, 2011 and the results of NSS 68th round Consumer Expenditure Survey respectively. For estimating the services in the rural areas, the user cost approach has been updated using the AIDIS, 2013, Population Census 2011.

This sector is the highest contributor in the economy of Delhi and contributing nearly 28% of the total GSVA of Delhi. We may have a glance at the following statistical facts:

**Statement 4.4: Real Estate, Ownership of Dwellings and Professional Services**

(₹ Crores)

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

In terms of rupees, GSVA at current prices for 2011-12 was recorded at ₹ 72480 Crores against ₹ 150620 Crores and ₹ 169483 Crores in 2016-17 and 2017-18 respectively whereas

annual growth for 2016-17 and 2017-18 were noted at 13.84% and 12.52% respectively. In real terms, GSVa from this activity increased from ₹ 72480 Crores in 2011-12 to ₹ 108161 Crores and ₹ 117052 Crores in 2016-17 and 2017-18 with simple annual growth for 2016-17 and 2017-18 were recorded at 8.16% and 8.22% respectively over previous years at constant prices.

NSVA at current prices was recorded at ₹ 66595 Crores in 2011-12 which has increased to ₹ 131633 Crores and ₹ 147392 Crores in 2016-17 and 2017-18. However, annual increase in NSVA in terms of percentages for 2016-17 and 2017-18 were found to be 13.33% and 11.97% respectively. In real terms, NSVA has increased from ₹ 66595 Crores in 2011-12 to ₹ 91936 Crores and ₹ 98199 Crores in 2016-17 and 2017-18 with simple annual growth for 2016-17 and 2017-18 at constant prices were to the tune of 6.41% and 6.81% respectively over previous years.

The change in trend of this sub-sector is presented in the line graph given below:

## PUBLIC ADMINISTRATION

The estimates relating to States Governments are prepared by undertaking an economic and purpose classification analysis of the budgets of Delhi Government, MCD, NDMC, DCB, DDA and annual accounts of State Autonomous Institutions. For the Central share, Central Statistics Office, Govt. of India is estimating the GVA to Supra Regional Sectors at the national level by undertaking an economic and purpose classification analysis of the budgets documents of Central Government and sample annual accounts of Central Autonomous Institutions and apportioning to the States.

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates, (AE) - Advance Estimates.

In terms of rupees, GSVA at current prices for 2011-12 was recorded at ₹ 19568 Crores against ₹ 22700 Crores and ₹ 24753 Crores in 2016-17 and 2017-18 respectively whereas annual growth for 2016-17 and 2017-18 were noted at 10.94% and 9.04% respectively. In real terms, GSVA from this activity increased from ₹ 19568 Crores in 2011-12 to ₹ 17035 Crores and ₹ 17896 Crores in 2016-17 and 2017-18 with simple annual growth for 2016-17 and 2017-18 were recorded at 6.19% and 5.06% respectively over previous years at constant prices.

NSVA at current prices was recorded at ₹ 15119 Crores in 2011-12 which has increased to ₹ 18975 Crores and ₹ 21293 Crores in 2016-17 and 2017-18, respectively. However, annual increase in NSVA in terms of percentages for 2016-17 and 2017-18 were found to be 15.20% and 12.22% respectively. In real terms, NSVA has increased from ₹ 15119 Crores in 2011-12 to ₹ 13621 Crores and ₹ 14699 Crores in 2016-17 and 2017-18 with simple annual growth for 2016-17 and 2017-18 at constant prices were to the tune of 9.75% and 7.92% respectively over previous years.

The change in trend of this sub-sector is presented in the line graph given below:

## OTHER SERVICES

The economic activities covered under this sector are (i) education services; (ii) human health & care services; (iii) Private households with employed person and (iv) Others that includes, recreation, cultural and sporting activities; Activities of membership organisations and Personal services including washing, hair dressing, custom tailoring and other personal service activities. The activities of extra territorial organisations and bodies are not a part of GDP and have hence been excluded from this group. The categories 'Sewerage and refuse disposal' and 'Veterinary services' have been removed from this group and classified as a part of utility services in 'Electricity, gas, water supply and utility services' group and 'professional services' respectively. Private corporate sector is covered using the MCA21 database. For the private unincorporated enterprises (quasi-corporations and household enterprises), the estimates of all categories except 'private households employing persons' have been compiled using effective labour input method for the new series. In a few categories of the industry group, there have been changes in classification due to the adoption of NIC 2008. 'Social work with & without accommodation' which was part of 'activities of membership organisations' is now a part of 'human health & care services'. Further, 'broadcasting' which was earlier a part of 'recreation' is now covered in the group 'Communication & services related to broadcasting'. Data on private households with employed persons is usually not collected in the Survey on Unincorporated Enterprises, as it is not feasible to identify such households as enterprises. The value added generated by this activity relates to wages paid to 'employed persons' by the households. Therefore, the wages related information was estimated from the NSS 68th round Employment & Unemployment Survey, 2011-12.

We may have a glance at the following statistical facts:

(R) - Revised Estimates, (2<sup>nd</sup> RE) - Second Revised Estimates, (1<sup>st</sup> RE) - First Revised Estimates,  
(AE) - Advance Estimates.

In terms of rupees, GSVA at current prices for 2011-12 was recorded at ₹ 25627 Crores against ₹ 49082 Crores and ₹ 55698 Crores in 2016-17 and 2017-18 respectively whereas annual growth for 2016-17 and 2017-18 were noted at 14.72% and 13.48% respectively. In real terms, GSVA from this activity increased from ₹ 25627 Crores in 2011-12 to ₹ 37513 Crores and ₹ 42035 Crores in 2016-17 and 2017-18 with simple annual growth for 2016-17 and 2017-18 were recorded at 9.91% and 12.06% respectively over previous years at constant prices.

NSVA at current prices was recorded at ₹ 21955 Crores in 2011-12 which has increased to ₹ 44391 Crores and ₹ 50959 Crores in 2016-17 and 2017-18, respectively. However, annual increase in NSVA in terms of percentages for 2016-17 and 2017-18 were found to be 16.38% and 14.80% respectively. In real terms, NSVA has increased from ₹ 21955 Crores in 2011-12 to ₹ 33282 Crores and ₹ 37707 Crores in 2016-17 and 2017-18 with simple annual growth for 2016-17 and 2017-18 at constant prices were to the tune of 10.95% and 13.30% respectively over previous years.

The change in trend of this sub-sector is presented in the line graph given below:

The Tertiary Sector comprising of Trade & Repair Services, Hotels & Restaurants, Transport, Storage & Communication, Financial Services, Real Estate, Ownership of Dwellings & Professional Services, Public Administration and Other Services, the major contributor in the economy of Delhi and the contribution of this sector has increased to 85.72% and 85.92% in 2016-17 and 2017-18 respectively from 83.42% in the base year i.e. 2011-12 at current prices.

# **Annexure**

## **Methodology Recommended by CSO**

**GROSS VALUE ADDED AT BASIC PRICES**

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
<b>1. Agriculture (Crop Sector)</b>				
<b>(a) Value of output</b>				
(1) Major and minor crops				
(i) Major crops	<ul style="list-style-type: none"> <li>♦ Production: Directorate of Economics and Statistics, M/o Agriculture (DESAg)</li> <li>♦ Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(ii) Minor Crops	<ul style="list-style-type: none"> <li>♦ Production: Horticulture Statistics Division (DAC, M/o Agriculture) &amp; State DESs</li> <li>♦ Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(iii) Small Millets	<ul style="list-style-type: none"> <li>♦ Production: DESAg</li> <li>♦ Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	Price = 75% of weighted average price of jowar, bajra, barley, maize and ragi in the reference year
(iv) Other Pulses	<ul style="list-style-type: none"> <li>♦ Production: DESAg and State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	Price = 85% of weighted average price of arhar, urad, moong, masur and horsegram in reference year
(2) Commercial Crops				
(i) Tea	<ul style="list-style-type: none"> <li>♦ Production of processed tea: Tea Board</li> <li>♦ Prices: State DESs</li> </ul>	Value of output = current year production of Raw tea * current year price	Value of output = current year production of Raw tea * base year price	Production of Raw tea = processed tea / 0.225
(ii) Coffee	<ul style="list-style-type: none"> <li>♦ Production: Coffee Board</li> <li>♦ State DESs (prices)</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(iii) Rubber	<ul style="list-style-type: none"> <li>Production: Rubber Board</li> <li>Prices : State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(iv) Cashew Nuts And Cocoa	<ul style="list-style-type: none"> <li>Production: Directorate of Cashewnut and Cocoa Development Board</li> <li>Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(v) Horticulture Crops:	<ul style="list-style-type: none"> <li>Production: Horticulture Statistics Division (DAC, M/o Agriculture)</li> <li>Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(vi) Opium	<ul style="list-style-type: none"> <li>Production and Prices: Central Bureau of Narcotics</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(vii) Arecanut	<ul style="list-style-type: none"> <li>Production: Directorate of Arecanut and Spices Development</li> <li>Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(viii) Flowers (separately for cut flowers and spike)	<ul style="list-style-type: none"> <li>Production: Horticulture Statistics Division (DAC, M/o Agriculture)</li> <li>Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(3) Miscellaneous Crops				
(i) Other Cereals	<ul style="list-style-type: none"> <li>Area: LUS from DES Ag / State DESs</li> </ul>	Value of output = area * current year value per hectare (VPH)	Value of output = area * base year value per hectare	Value per hectare = weighted average of value per hectare of the crops: jowar, bajra, barley, maize and ragi in reference year
(ii) Other Sugars (excluding Palmyra)	<ul style="list-style-type: none"> <li>Area: LUS from DES Ag / State DESs</li> </ul>	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.90* VPH of the crop sugarcane in reference year

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(iii) Other Oilseeds (excluding Taramira)	♦ Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.85 * weighted average of value per hectare of linseed, sesamum, castorseed, nigerseed and safflower in reference year
(iv) Other Fibres	♦ Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.90* weighted average of value per hectare of sanheemp and mesta in reference year
(v) Other Drugs and Narcotics	♦ Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.90* weighted average of value per hectare of opium (Madhya Pradesh & Rajasthan) and tobacco & tobacco stem (other states) in reference year
(vi) Other Condiments and Spices	♦ Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.90* weighted average of value per hectare of dry chillies, dry ginger, cardamom and black pepper in reference year.
(vii) Other Fruits	♦ Production: Horticulture Statistics Division (DAC, M/o Agriculture)	Value of output = current year production * current year price	Value of output = current year production * base year price	Price = weighted average price of all fruits for which separate data is available in reference year.
(viii) Other Vegetables	♦ Production: Horticulture Statistics Division (DAC, M/o Agriculture)	Value of output = current year production * current year price	Value of output = current year production * base year price	Price = weighted average price of all vegetable for

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
				which separate data is available in reference year.
(ix) Tobacco stem	<ul style="list-style-type: none"> <li>♦ Production of tobacco leaves: DES Ag / State DESs</li> <li>♦ Prices of tobacco leaves: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	Production= 86.63% of production of tobacco leaves and Price=50% of the price of tobacco leaves
(x) Toddy	<ul style="list-style-type: none"> <li>♦ MPCE of Toddy: NSS 68<sup>th</sup> Round CES, 2011-12</li> <li>♦ Rural and urban population: Population Census 2011</li> <li>♦ WPI: M/o Commerce and Industry</li> </ul>	Value of output= estimate at constant price * (WPI (non-food articles) current/ WPI (non-food articles) base)	Value of output= value of consumption of toddy per annum per person in the base year * population in the current year	Value of consumption of toddy per annum per person in the base year = Monthly Per Capita expenditure of toddy in the base year (year of survey) *(365/30)
(xi) Fodder	<ul style="list-style-type: none"> <li>♦ Total and irrigated area under fodder crops: DES Ag and State DESs</li> <li>♦ Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	Production =irrigated area under fodder crops (in ha)* (50MT/ha) + un-irrigated area under fodder crops (in ha) *(25MT/ha) (Yield rates based on a study conducted by Socio-Economic Research Centre)
(xii) Grass	<ul style="list-style-type: none"> <li>♦ Area: LUS from DES Ag / State DESs</li> <li>♦ Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	Production = total area (4* area under permanent pastures +1* miscellaneous tree crops + 2* culturable waste + 2* fallow lands + 1* net area sown) * state-wise yield rates (based on NSS results)

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(xiii) Mulberry	♦ Production and prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(xiv) Miscellaneous food And non-food Crops	♦ Area: LUS from State DESs ♦ Value per hectare: State DESs	Value of output = area * Value per hectare in current year	Value of output = area * Value per hectare in the base year	
(4) By products	♦ Area: LUS from DES Ag / State DESs ♦ Value per hectare: CCS from DES Ag/State DESs (except for poppy husk and poppy seed). ♦ Value of poppy husk and poppy seed are made available by State DESs ♦ WPI: M/o Commerce and Industry	Value of output = area * Value per hectare in current year In case CCS is not available for the current year, Value per hectare of current year = Value per hectare of reported year from CCS * (WPI current/WPI reported year) of respective crop.	Value of output = area * Value per hectare in base year as per CCS 2011-12	
(5) Other products				
(i) Gur	♦ Production and Seed Rates: DESAg ♦ Quantity of sugar cane crushed by factories: Dte. of Sugar, M/o Consumer Affairs, Food and Public Distribution ♦ Quantity of sugarcane used in manufacture of khandsari in manufacturing sector: ASI & NSS Survey of	Value of output = current year production of Gur * current year price	Value of output = current year production of Gur *base year price	Rates assumed - ♦ State-wise percentage (9-10%) of quantity of sugar cane retained for gur making ♦ State-wise percentage of sugar cane used for chewing ♦ State-wise quantity of sugar cane used for seed based on latest CCS

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
	manufacturing enterprises (non-ASI) ♦ Prices: State DESs			♦ State-wise percentage of sugarcane used for manufacture of khandsari. Quantity of sugarcane retained for gur making = total sugarcane production – sugarcane used for chewing, seed, crushed by factories and Khandsari
(ii) Palmyra	♦ Production and prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(iii) Bagasse	♦ Prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	Based on a study conducted by Socio- Economic Research Centre, production of bagasse = 3.5% * sugar cane used for gur making
(iv) Foreyard and Backyard farming (kitchen garden i.e. Homestead land raising for crop and having area less than 0.01 H)	♦ Net sown area: LUS from DES Ag / State DESs	Value of output = Area under Foreyard and Backyard farming (kitchen garden) * value of output per hectare of fruits and vegetables in current year	Value of output = Area under Foreyard and Backyard farming (kitchen garden) * value of output per hectare of fruits and vegetable, in the base year	Based on NSS Survey on Land & Livestock Holdings, Area under Foreyard and Backyard farming (kitchen garden)= 0.21% of net sown area

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
<b>(b) Inputs (Crop Sector)</b>				
(1) Seed				
(i) Wheat, Jowar, Bajra, Barley, Maize, Ragi, Small Millets, Gram, Arhar, Urad, Moong, Masoor, Linseed, Sesamum, Groundnut, Rapeseed & Mustard, Castor, Black Pepper and Turmeric	<ul style="list-style-type: none"> <li>Seed rate, seed replacement rate, area: CCS from DESAg</li> <li>Area under the crop, prices: State DESs</li> <li>WPI: M/o Commerce and Industry</li> </ul>	Value of Seed = Value of improved variety of Seed at current year prices + Value of harvested Grains retained for Seed at current year prices	Value of Seed inputs= Value of improved variety of Seed at base year prices + Value of harvested Grains retained for Seed at base year prices	Value of improved variety of Seed=Seed Rate*(Irrigated Area*Seed Replacement Rate)*CCS Seed Price for current/base year; WPI is used for extrapolation till CCS becomes available Value of harvested Grains retained for Seed= Seed Rate*{Irrigated Area*(100-Seed Replacement Rate) + Un-irrigated area}*Farm Harvest Price of respective crop for current/base year
(ii) Paddy, Sugarcane and Potato	<ul style="list-style-type: none"> <li>Seed Rate, Seed Price: CCS from DESAg</li> <li>WPI: M/o Commerce and Industry</li> </ul>	Value of Seed = Area * VPH (Seed Rate*CCS Seed Price) for current year; In case CCS is not available for the current year, Value per hectare of current year = Value per hectare of reported year from CCS * (WPI current/WPI reported year) of respective crop.	Value of Seed inputs= Area * VPH (Seed Rate*CCS Seed Price) for base year.	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(iii) Other cereals, other condiments & spices, coconut, miscellaneous food crops	<ul style="list-style-type: none"> <li>◆ VPH of seed: Study conducted by Directorate of Marketing Inspection (DMI), M/o Agriculture</li> <li>◆ Area: State DESs</li> <li>◆ WPI: M/o Commerce and Industry</li> </ul>	Value of seed = Estimate in col. (4) * relevant WPI current/ WPI base	Value of seed = area under the crop in the current year* value of seed per hectare in the base year	
(iv) Misc. Non-Food Crops, Tapioca, Fodder, Guar Seed, Cotton, Dry Chillies, Other Vegetables & Dry-ginger	<ul style="list-style-type: none"> <li>◆ Value per Hectare (VPH): Benchmark study conducted by State DESs</li> <li>◆ Area: State DESs</li> <li>◆ WPI: M/o Commerce and Industry</li> </ul>	Value of inputs = Estimate in col. (4) * relevant WPI current/ WPI base	Value of inputs = (area * Value per Hectare as per Bench mark study)* relevant Wholesale Price Index (WPI) for 2011-12	Input cost per hectare has remained constant over years, with only price adjustments.
(2) Pesticides	<ul style="list-style-type: none"> <li>◆ Consumption and prices: Dte. of Quarantine &amp; Plant Protection</li> <li>◆ WPI: M/o Commerce and Industry</li> </ul>	Value of input = State-wise consumption * current year price; WPI used for extrapolation till current year prices are received	Value of input = State-wise consumption * base year price	
(3) Repair & Maintenance for Crop Sector	<ul style="list-style-type: none"> <li>◆ Average cost of Repair and Maintenance on (i) Orchards &amp; Plantation Resources, (ii) Wells &amp; Irrigation, (iii) Agricultural Machinery &amp; Implement and (iv) Transport Equipment: All India Debt and Investment Survey (AIDIS), 2013</li> </ul>	Benchmark/ Base year estimates (as derived from AIDIS, 2013) moved with the estimates of capital stock of farm business at current prices	Benchmark/ Base year estimates (as derived from AIDIS, 2013) moved with the estimates of capital stock of farm business at constant prices	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(4) Electricity	♦ Consumption of electricity for agricultural purposes and prices: Central Electricity Authority	Value of electricity inputs = electricity consumption in the current year * current year price	Value of electricity inputs = electricity consumption in the current year * base year price	
(5) Chemical Fertilisers	♦ Consumption and Prices: Fertiliser Association of India	Value of inputs = quantity consumed in the current year * current year price	Value of inputs = quantity consumed in the current year * base year price	
(6) Diesel oil	♦ Number of tractors: Agriculture Research Data Book, ICAR ♦ Number of diesel engines: ILC, 1997 and ILC, 2003 ♦ Consumption of diesel oil per diesel engine and per tractor: CCS from DESAg	Value of inputs = no. of diesel engines/tractors in the current year * consumption in value terms per diesel engine/tractor in the current year	Value of inputs = no. of diesel engines/tractors in the current year * consumption in value terms per diesel engine/tractor in the base year	Number of diesel engines/tractors for the years beyond the survey year has been calculated using inter-survey/inter-censal growth rate.
(7) Irrigation charges	♦ Receipts of Government from sale of water: State Government Budget ♦ Gross irrigated area: State DESs	Total receipts in the relevant head from sale of water	Gross Irrigated Area through government canals (ha) * Per Hectare receipt from sale of water in base year	
(8) Market charges for crops		Market charges = 3.22% of value of output of crops at current prices	Market charges = 3.22% of value of output of crops at base year prices	An estimated proportion of 3.22% of market charges to value of output has been derived using a survey on market margins conducted by the DESAg during 2004-05

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(9) Feed of livestock for Crop Sector	<ul style="list-style-type: none"> <li>◆ Age-wise Species-wise Population: ILC, 2003, 2007 and 2012 from DADF</li> <li>◆ Prices of Dry Fodder, Green Fodder and Concentrates: CCS from DESAg</li> <li>◆ WPI: M/o Commerce and Industry</li> </ul>	<p>Value of Feed = Per animal annual Consumption rates of Adult Male Cattle &amp; Adult Male Buffalo * Current Year price * population of these categories</p> <p>Current Year price = Base Year Prices of Roughages and Concentrates inflated with growth rate of WPI of Fodder and food grains respectively</p>	<p>Value of Feed = Per animal annual Consumption rates of Adult Male Cattle &amp; Adult Male Buffalo * Base Year price * population of these categories</p> <p>Price: Average price for Dry Fodder, Green Fodder and Concentrates by CCS</p>	Per animal annual Consumption rates of Adult Male Cattle & Adult Male Buffalo have been derived using the study on "India's Livestock Feed Demand: Estimates and Projection" by Centre of Economics and Social Research, New Delhi and National Centre for Agricultural Economics and Policy Research, New Delhi
<b>2. Irrigation System</b>				
Operation of Govt. Irrigation system	<ul style="list-style-type: none"> <li>◆ Budget documents of state governments</li> <li>◆ Annual Reports of NDEs</li> </ul>	Estimates of GVA at current prices estimated using production approach.	Base year estimates are moved with the index of area irrigated through government canals	
<b>3. Livestock Products</b>				
<b><i>(a) Value of Output</i></b>				
(i) Milk (Cattle, Buffalo and Goat), Eggs and Wool	<ul style="list-style-type: none"> <li>◆ Production: DADF (Integrated Sample Survey (ISS) for MLP)</li> <li>◆ Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	
(ii) Camel milk	<ul style="list-style-type: none"> <li>◆ Production: State DESs</li> <li>◆ Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(iii) Duck eggs	<ul style="list-style-type: none"> <li>Production: ISS from DADF, in cases where ISS covers duck eggs</li> <li>Prices: State DESs</li> </ul>	Value of output = current year production * current year price	Value of output = current year production * base year price	States where ISS does not cover hen eggs – Production= 3.5% of hen eggs in case of Gujarat; Production = 3% of hen eggs in case of Goa, Madhya Pradesh, Mizoram, Daman & Diu, Dadra & Nagar Haveli, Delhi
(iv) Meat (Registered + Unregistered)	<ul style="list-style-type: none"> <li>Production: ISS from DADF and State DESs</li> <li>Prices: State DESs</li> </ul>	Value of output = production (after adjusting the quantity produced in manufacturing sector)* current year price	Value of output = production (after adjusting the quantity produced in manufacturing sector)* base year price	
(v) Meat (Products and by-products) (includes fats, edible offals & glands, hides & skins, heads & legs of slaughtered animals)		Animal-wise Meat (Product and by-product) estimated as % of Value of Meat at current price	Animal-wise Meat (Product and by-product) estimated as % of Value of Meat at base year price	Proportion of meat taken as meat product and by-product - Cattle (16.0%), Buffalo (14.49%), Goat (21.59%) Sheep (23.05%) and Pig (9.4%) (Based on a study by NRCM on Meat Products and Meat by-products, 2013-14)
(vi) Poultry Meat	<ul style="list-style-type: none"> <li>Poultry population: ILC, 2003 and ILC, 2012 from DADF</li> <li>Production of eggs: ISS from DADF</li> <li>Prices: State DESs</li> </ul>	Value of output is estimated separately for four components (a) chicken and ducklings killed, (b) adult fowls killed, (c) adult ducks killed and (d) other poultry killed multiplied by the respective price per bird.	Same procedure as adopted for the current price estimates, but the prices used are the respective base year prices	<b>(a)chickens &amp; ducklings killed =</b> <b><i>total poultry of current year</i></b> (chicks survived + 50% of hens & cock population + 50 % of ducks & drakes population + population of chickens &

<b>Central Government</b>	♦ Budget document of central government	Estimates of GVA at current prices are allocated on the basis of number of central government employees across States	Current price estimates deflated by the CPI (General)	
<b>State Governments &amp; Local Bodies</b>	♦ Budget documents from state governments and annual accounts of local bodies	Estimates of GVA at current prices compiled using production approach	Current price estimates deflated by the CPI (General)	
<b>Autonomous Institutions</b>	♦ Annual Accounts of sampled Central Autonomous Institutions and State Autonomous Institutions	Estimates of GVA are compiled using production approach for the sample autonomous institutions for the base year and these benchmark estimates have been projected at the national level with the help of total grants given to all autonomous institutions. These are allocated to the States on the basis of indicators like location of these institutions and state wise public sector LI proportions as per NSS 68 <sup>th</sup> Round.  Estimates of GVA are compiled using production approach for the State autonomous institutions and allocated to the respective states.	Current price estimates deflated by the CPI (General)	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices

<b>18. Other Services</b>				
<b>Public Sector (General Government and Public Corporations, i.e., DEs &amp; NDEs)</b>				
<b>General Government: Administrative Departments and Public Corporations in</b> Education, Health and Recreation	<ul style="list-style-type: none"> <li>◆ Budget documents of state governments</li> <li>◆ Annual reports of NDEs</li> <li>◆ State-wise number of employees &amp; value of assets: Public Enterprises Survey of DPE</li> <li>◆ CPI from MOSPI</li> </ul>	Estimates of GVA at current prices are estimated by the production approach. In the case of Central NDEs, GVA is allocated to States. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS (OS = GVA - CE) is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Current price estimates are deflated using CPI for Education and Health in the case of GVA of Education & Health Services and CPI (Miscellaneous) in the case of GVA of Recreation	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
<b>General Government: Autonomous Institutions in</b> Education & health	<ul style="list-style-type: none"> <li>◆ Annual Financial Accounts of sampled Central Autonomous Institutions and State Autonomous Institutions</li> <li>◆ CPI from MOSPI</li> </ul>	Estimates of GVA are compiled using production approach for the sample autonomous institutions for the base year and these benchmark estimates have been projected at the national level with the help of total grants given to all autonomous institutions.
