

GOVERNMENT OF NCT OF DELHI

A REPORT ON UNORGANISED SERVICE SECTOR IN DELHI

**DIRECTORATE OF ECONOMICS & STATISTICS
ROOM NO. 148, OLD SECRETARIAT
DELHI - 110054**

PREFACE

The Present Report on “Service sector (Un-organised) in Delhi” is the first of it's kind brought out by this directorate on the basis of sample survey conducted under the 57th NSS (2001-02) round. This was a follow-up survey of fourth economic census held in 1998.

This report contains valuable data on operational and economic features of un-organised service sector enterprises (other than trade & finance) in Delhi with special reference to it's number, employment, value added and other important features of this sector . The data available from the report will be useful in the process of industrial planning, preparation of state income estimates and a host of other closely related purposes in both government departments and other public and private institutions.

This report was prepared by the Data Processing & Analysis Unit of this Directorate under the able guidance of Sh. N.T.Krishna, Assistant Director. The extraordinary efforts put in by Sh. Harmeet Singh Maddh, Statistical Investigator, in the data analysis and report making stages deserves special mention. The role played by socio-economic unit in collection of data from the field against all odds is appreciated. The data processing was done by the EDP unit under the close guidance of Sh. K.S. Bansal, System Analyst

The technical assistance provided by National Sample Survey Organisation, Government of India and the cooperation extended by the households and enterprises is acknowledged.

SERVICE SECTOR IN DELHI (UN-ORGANISED)

EXECUTIVE SUMMARY

The following are the main highlights of the survey conducted during NSS 57th round between July 2001 and June 2002.

Enterprises:

- ✠ The total numbers of enterprises operating in NCT of Delhi and falling with-in the purview of unorganised service sector were estimated as **244873**.
- ✠ Out of them **11467** (4.68%) were in rural areas while **233406** (95.32%) were operating in urban areas.
- ✠ **169577** (69.25%) were household enterprises (OAE) operating without any hired labour and **75296** (30.75%) establishments with at least one hired worker.
- ✠ In Delhi, Community, social and personal service activities including other transport accounted for 22.57% followed by Real estate, Renting and Business activities with 14.38% share while Restaurants contributed 14.06%. These three categories taken together contributed for more than 50 percent of the total number of enterprises.
- ✠ Delhi with 1.7% share in the total number of Enterprises had occupied 16th position among 35 States/UTs in the country.

Estimated Employment:

- ✠ The total employment provided by the un-organised service sector enterprises was about **5.92 lakhs**.
- ✠ Out of the total employment **15885 persons (2.68%)** were employed in rural enterprises while **575909 persons (97.32%)** in the enterprises operating in urban Delhi.

- ✠ About **2.21 lakh** persons (37.36%) were employed in household enterprises (OAE's) and **3.71 lakh** persons (62.74%) were gainfully employed in establishments.
- ✠ Sex-wise distribution of employment in this sector revealed that out of the total, 15.50% were females.
- ✠ Out of the total persons employed 47.86% were working owners, 47.03% hired workers and the rest of 5.11% fall in the category of other workers which includes un-paid house hold workers, helpers etc.
- ✠ The average employment per enterprise in rural areas was 1.39 persons and that of urban areas was 2.47 persons.
- ✠ In Delhi average employment of own account enterprises stood at 1.3 persons and in establishments this was as high as 4.93 persons.
- ✠ Enterprises dealing with Community/Social/Personal services etc accounted for 19.44% followed by Health & Social Work with 16.12 % and Restaurants contributed 15.62 % of the total employment. These enterprises taken together provide employment for more than 50 % of the persons employed in this Sector.
- ✠ Delhi with 2.3% share in the total employment had secured 14th position among 35 States/UTs in the country.
- ✠ Out of the total persons employed only 1.91% were employed on Part-time basis in these enterprises.
- ✠ The incidence of part-time employment among males was about 1.72% where as it was about 2.98% in case of females.
- ✠ The participation of females in the Establishments (18.71%) was found to be more, when compared to that of household enterprises (10.99%).
- ✠ Out of the total of 278335 hired workers, more than 70% were found to be skilled.

- ✠ Delhi had jointly shared the 5th position in the All India along with Chandigarh (UT) and Andaman Nicobar Island (UT) for average employment in the service sector enterprises.

Financial Indicators:

- ✠ Delhi has recorded the highest combined Gross Value Added per worker as well as per enterprise among 35 States/UTs in the country.
- ✠ The Gross Value Added per annum per enterprise in the unorganised service sector was Rs. 1.52 lakhs.
- ✠ The GVA per enterprise of Household enterprises (OAE) was estimated at Rs. 0.49 lakh as against Rs. 3.84 lakhs earned by establishments.
- ✠ The annual GVA of an enterprise in urban areas (1.57 lakhs) is more than three times that of the rural areas (Rs 0.49 lakh).
- ✠ The Value Added per worker in this sector was estimated as Rs. 62998 per year. Value added per worker in OAE's was Rs. 37844 and that of establishments was Rs. 77939 per annum.
- ✠ The Value Added per worker was relatively high in enterprises located in urban areas (Rs. 63770) when compared to that of (Rs.35011) in rural areas.
- ✠ The Market value of fixed capital per enterprise was worked out to about Rs. 2.96 lakh per enterprise. It was only about Rs. 1.00 lakh per OAE, and in case of establishments it was worked out to Rs. 7.35 lakhs.
- ✠ Land accounts about 59% of the total fixed assets of an enterprise in Delhi while Building, Plant, Transport and Tools had a share of 21%, 5%, 7% and 8% respectively.
- ✠ About 20.03% of these enterprises were expanding, 52.61% stagnant, 10.93% were contracting as per the assessment of the entrepreneurs.

Other Features:

- ✖ Out of the total enterprises, 99.26% were perennial in nature as they were operational throughout the year.
- ✖ About 25.30% of these enterprises were household based. 57.93% have independent premises outside household and 16.77% were mobile/hawkers type.
- ✖ Out of the total own-account enterprises 31.11% were located within household premises; however this proportion was only 12.22% for establishments.
- ✖ 53.88% enterprises were having only one person looking after the affairs of the enterprise. Enterprises employing 2 persons were to the extent of 20.62%, 16.81% employed in the range of 3-5 persons , 6.31% in 6-9 category while enterprises employing 10 or more persons were 2.38% only.
- ✖ 94.28% of these enterprises were proprietary in nature. 4.4% were partnership type and rest of the 1.32% were operating as cooperative society / limited company etc.
- ✖ About 9.75% of the enterprises were owned and managed by women.
- ✖ Social group of owner of private service sector enterprises indicated that 12.59% were held by SC, 13.94% by OBC and remaining 73.47% were headed by persons belonging to other social groups.
- ✖ Shortage of capital (16.42%), local problems (13.64%), competition from other units (13.35%) and Power cut (10.14%) were the notable problems faced by the entrepreneurs.
- ✖ Only 3.80% of these enterprises were found to be maintaining book of accounts.
- ✖ About 2.42% of the total enterprises were pursuing mixed activities.
- ✖ The share of enterprises found registered under some authority or act was 93.25% among Own Account enterprises and 91.17% among establishments.
- ✖ Only 3.14% of the enterprises in Delhi have availed any type of assistance.

SECTION ONE

INTRODUCTION

SECTION ONE

INTRODUCTION

Service sector is the backbone of the Delhi's economy as it contributes about 78% of the Gross State Domestic Product (GSDP) and 54% of gainfully employed in Delhi are in this segment. According to the 4th economic census (1998) nearly 79% of the enterprises were operating in this sector. The contribution of this sector in terms of state income (NSDP at Constant Prices) has been growing steadily year after year i.e. from 69% in 1980-81 to 78% during 2003-04. This includes both organised and un-organised segment of service sector.

The un-organized segment of the economic activities which are known for their high rate of growth as well as mortality makes the task of their coverage and quantification very complex, as they operate in multiple forms, sizes etc. At the same time it is inevitable to measure this sector from time to time as it makes significant contribution to the economy in terms of employment, value-added etc. Sample surveys under NSS rounds have been considered as the time tested method for assessing the contribution and magnitude of growth of this un-organized segment in India. The NSS 57th round conducted during July 2001 – June 2002 covered unorganized service sector (excluding trade and finance) as a follow-up of Fourth Economic Census held during 1998.

MEANING SCOPE & COVERAGE

The main objective of this survey of unorganised service sector enterprises is to ascertain the length and breadth of this segment, their economic & operational

characteristics, employment generated and above all its contribution to the economy of the state in terms of value added. The term “service sector” is interchangeably used with the term tertiary sector, denotes variety of services , mostly intangible form, generated to sustain the primary and the secondary sector of the economy. The term ‘unorganised ‘may broadly be taken to mean those enterprises whose activities are not regulated under any statute or Act. This survey covered un-incorporated proprietary, partnership firms, co-operative societies, trusts, public and private limited companies not registered under Section-2(m)(i) and 2(m)(ii) of the Factories Act 1948 (those employing 10 or more workers using power and those employing 20 or more but not using power). Further, enterprises run by Government/Public Sector are exempted from the coverage of the survey.

The own-account and establishments engaged in the following fields of activity were covered under the survey.

- i) Storage and Warehousing (NIC 6302)
- ii) Hotels & Restaurants (551 & 552)
- iii) Post and Telecommunication (64)
- iv) Transport : Passenger/Goods Transport by mechanized and non-mechanized means of transport (6021, 60221, 60231 ,601 ,60222 ,60232 , 61 ,6301 ,6303 ,6304 ,6309)
- v) Real estate, Renting and Business activities (70-74)
- vi) Health (85)
- vii) Education (80)
- viii) Other community, Social and Personal services (90-93).

The entrepreneurial activities in the field of trade and finance were excluded from this survey.

SCHEME OF THE REPORT

The report is presented in 5 sections. Section two and three deal with ‘sample design and estimation procedure’ and ‘conceptual framework’ respectively. The analysis of characteristics of service sector enterprises is presented in section four while section five contains detailed statistical tables.

SECTION TWO

SAMPLE DESIGN & ESTIMATION PROCEDURE

SECTION TWO

SAMPLE DESIGN AND ESTIMATION PROCEDURE

The fifty-seventh round was of one year duration starting from 1st July 2001 and ending on 30th June 2002. The one year survey period was further sub- divided into four sub-rounds as given below:

SUB ROUND	PERIOD
1	JULY – SEPTEMBER 2001
2	OCTOBER – DECEMBER 2001
3	JANUARY – MARCH 2002
4	APRIL – JUNE 2002

SAMPLE DESIGN

A stratified multi-stage sampling design was adopted. The first stage units were villages in rural areas and for the urban sector the first stage units (fsu's) were the Urban Frame Survey blocks (UFS). The Ultimate stage units were households/ enterprises in both rural and urban areas.

SAMPLE SIZE

A total of 24 villages and 408 blocks were surveyed under state sample as against the central sample of 8 villages and 136 blocks. The samples were divided equally into sub-sample 1 and sub-sample 2 in both the rural and urban sectors.

ALLOCATION OF SAMPLE FSU'S BETWEEN RURAL AND URBAN SECTORS

Total sample size (i.e. total number of villages and blocks to be surveyed) was allocated between the rural and urban sectors in proportion to population as per 1991 population with double weightage to urban sector.

SAMPLING FRAME FOR FIRST STAGE UNITS:

RURAL : List of villages as per 1998 Economic Census were used as the sampling frame for the selection of fsu's.

URBAN: The list of Urban Frame Survey (UFS) blocks as per 1998 Economic Census constituted the sampling frame.

STRATIFICATION: In this survey a special and general strata were devised . Special strata :One special strata(numbered as 9) for rural and urban sector each was formulated at state/ UT level consisting of one big unit of an activity under coverage on the basis of its number of workers or having large number of workers engaged in the same activity as presented below. All fsu's of this category were surveyed

S.No.	Activity	At least one big unit in an FSU with no. of workers	Total number of workers in an FSU
1.	Storage & warehousing	200	300
2.	Hotels	200	350
3.	Post & telecommunications	200	250
4.	Mechanized road transport	250	400
5.	Real estimate, renting and business activities	300	750
6.	Health and social work	500	550
7.	Restaurants	300	350
8.	Education	30	550
9.	Other community, social and personal service activities & other transport	400	700

General strata: This strata was formed from the FSU other than those categorized under special strata.

Rural : Delhi was taken as a single district and hence it constituted a single stratum.

Urban: Stratification adopted for state sample is given in table below:

STRATUM NO.	COMPOSITION OF STRATA (Population as per 1991 Census)
1	all towns with population less than or equal to 10 lakhs
2	Each city with population 10 lakhs or more

SUB-STRATIFICATION FOR RURAL & URBAN SECTORS :

The FSU's of general strata were grouped into 11 sub-strata as given below:

Sub-stratum 1; All fsu's having at least one establishment of storage and warehousing;

Sub-stratum 2; All fsu's (excluding those in ss1) having atleast one establishment of hotel

Sub-stratum 3; All fsu's (excluding the sub strata already formed) having atleast one establishment of post and telecommunication.

Sub-stratum 4; All fsu's (excluding the sub strata already formed) having atleast one establishment of mechanized transport;

Sub-stratum 5; All fsu's (excluding the sub strata already formed) having atleast one establishment of real estate, renting, & business activities

Sub-stratum 6; All fsu's (excluding the sub strata already formed) having atleast one establishment of health and social work.

Sub-stratum 7; All fsu's (excluding the sub strata already formed) having at least one establishment of restaurant.

Sub-stratum 8; All fsu's (excluding the sub strata already formed) having at least one establishment of education.

Sub-stratum 9; All fsu's (excluding the sub strata already formed) having at least one establishment of other community, social and personal service activities and other transport.

Sub-stratum 10; All fsu's (excluding the sub strata already formed) having at least one own account enterprise in any of categories under the coverage.

Sub-stratum 11; All other fsu's of the stratum.

ALLOCATION OF SAMPLE TO STRATA AND SUB-STRATA:

The total sample FSU's has been allocated to state/UT broadly in proportion to number of workers in unorganised sector enterprises under the coverage of this round as per Economic Census 1998. Rural/Urban samples were further allocated to various strata in proportion to the total workers. Allocations among sub-strata of a stratum was again been done in proportion to the total workers with weights 4 for SS1, 3 for SS 2,4,5,7 and 9; 2 for SS 3&6 ; and 1 for SS 8,10&11.

FORMATION OF HAMLET-GROUPS/SUB-BLOCKS

Large villages/blocks having

- i) Approximate present population 1200 or more, or
- ii) Approximate present number of non-agriculture enterprises more than 120 were divided into a suitable number (say, D) of hamlet-groups (h.g)/sub-blocks(s.b) as indicated below:

POPULATION CRITERIA		ENTERPRISE CRITERIA	
Approximate Present Population of fsu's	No. of Hamlet Groups/Sub-Blocks Formed (D)	Approximate Present No. of Non-Agricultural Enterprises in the fsu's	No. of Hamlet Groups/Sub-Blocks Formed (D)
0 -1200	1	0- 120	1
1201 – 1600	4	121 – 160	4
1601 – 2000	5	161 – 200	5
2001 – 2400	6	201– 240	6
2401 – 2800	7	241 – 280	7
And so on			

At the outset, the number of hamlet groups/sub-blocks (value of 'D') to be formed was decided on the basis of higher value of 'D' among the two criteria.

FORMATION OF SEGMENTS; SELECTION OF HAMLET GROUPS/ SUB-BLOCKS

The procedure for the formation of segments 9,1 and 2 is detailed below:-

Formation of segment 9 within FSU:

After determining the boundaries of the sample FSU, all big non-agricultural enterprises having 200 or more workers in the entire FSU and having operated at least

one day during last 365 days preceding the day of survey (hereinafter to be called as big enterprise or brevity) were listed. All the listed big enterprises constituted segment 9 of the selected FSU. All big enterprises under coverage listed in segment 9 were surveyed separately in addition to required number of smaller enterprises under coverage in the other segments of the selected FSU as per normal procedure.

Formation of segments 1 and 2:

After formation of hg/sb in the large FSUs, three hg's/sb's were selected for survey according to the procedure given below:

Case I: For FSUs belonging to sub-strata 1 to 9: The hg/sb having maximum number of establishments or OAEs belonging to the sub-stratum specific activity (e.g. storage & warehousing activity for sub-stratum 1, hotel activity for sub-stratum 2 and so on) in the FSU was selected with certainty (i.e. with probability 1) and designated as segment 1. If in a particular FSU the sub-stratum specific establishments/OAEs were not available, then formation of segment I was decided on the basis of maximum number of establishments or OAEs belonging to activities specified in sequential order of other sub-strata available in the FSU under consideration, then segment I was formed on the basis of these units. But if establishments/OAEs of the activity were also not available, then those belonging to the specific activity of the next higher numbered sub-strata was considered and so on till sub-stratum 9 is reached. If sub-stratum 9 specific activity was also not available, then the exercise was done with sub-stratum 1, sub-stratum 2 and so on. If no establishments/OAEs belonging to any of the activities to 9 under survey coverage was available in the FSU, then hg/sb with maximum percentage share of population was selected with certainty and marked as segment 1 .

Case II: For FSUs belonging to sub-strata 10 & 11: The hg/sb having maximum number of enterprises was selected with certainty and designated as segment 1. If no establishment/OAE belonging to any of the activities under survey coverage was available in the FSU, then hg/sb with maximum percentage share of population was selected for survey with certainty and marked as segment 1.

Two more hg's/sb's were to be selected for survey from the remaining (D-1) hg's/sb's of the sample FSU with equal probability following the method of circular systematic sampling. These two hg's/sb's together constituted segment 2. However,

FSUs not requiring hg/sb formation was identified as segment 1 for the purpose of processing.

However, segment 1 excluded enterprises belonging to segment 9. Formation of segment 9 was altogether different from that of segments 1 and 2.

SAMPLING OF ENTERPRISE / HOUSEHOLDS

Selection of enterprises;

Enterprises which operated for at least 30 days (15 days in case of seasonal enterprises) during the last 365 days were considered for sampling and selection was done from each combination with SRSWOR .

ESTIMATION PROCEDURE

NOTATIONS:

The following notations were used in the formulae for estimation.

s = subscript for s -th stratum ($s = 9$ for special study and $s \neq 9$ for general strata).

t = subscript for t -th stratum of a general stratum ($t = 1, 2, \dots, 11$)

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for i -th sample village/block (FSU).

u = subscript for a segment ($u = 1, 2$ or 9)

j = subscript for j -th Broad activity group (BAG) ($j = 1, 2, \dots, 9$)

k = subscript for k -th enterprise type ($k = 1, 2$)

l = subscript for l -th sample enterprise under a particular BAG X enterprise type for Sch 2.345 and l -th sample household for Sch 1.0

D = total number of hamlet-groups/sub-blocks formed in a sample FSU.

N = total number of FSUs in special stratum/stratum/sub-stratum

Z = total size of a general stratum /stratum/sub-stratum

z = FSU size used for selection.

n' = number of sample village/blocks allotted for a particular sub-sample.

n = number of sample FSUs surveyed including uninhabited and zero cases (used for tabulation) for a particular sub- sample.

π_1 = inclusion probability for the sample FSUs of sub sample 1

π_2 = inclusion probability for the sample FSUs of sub sample 2 given sub sample 1

E = total number of enterprises listed for a particular BAG x enterprise type in a segment of a sample FSU.

e = total number of enterprises surveyed for a particular BAG x enterprise type in a segment of a sample FSU.

$0/1$ = subscript for hamlet-group/sub-block number ('0, or '1, as the case may be)

x, y = observed value of characteristics x, y under estimation.

\hat{Y} = estimate of population total X, Y for the characteristics x, y .

FORMULAE FOR ESTIMATION

For Schedule 2345 (For both Rural & Urban):

a) Estimation formula for stratum 9:

For an enterprise selected in a particular BAG X Enterprise type:

$$\hat{Y} = \sum_{i=1}^N \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right]$$

b) Estimation formulae for general strata:

(i) For sub-stratum 1 to 10:

For an enterprise selected in a particular BAG X Enterprise type:

1) For sub-sample 1:

$$\hat{Y}_m = \sum_{i=1}^{n_m} \frac{1}{\pi_{mi}} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right]$$

.(m= 1)

2)

$$\hat{Y}_m = A + B$$

, (m=2)

where

$$A = \sum_{i=1}^{Nm} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right]$$

(m=1)

and

$$\hat{Y}_m = \sum_{i=1}^{Nm} \frac{1}{\pi_{mi}} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right]$$

, (m=2)

☒☒☒

SECTION THREE

CONCEPTUAL FRAMEWORK

SECTION THREE

CONCEPTUAL FRAMEWORK

The concepts and definitions adopted during the NSS 57th round are explained in this section.

Reference Period : Last month was used as the reference period for collecting most of the data, information on receipts and expenses as well as employment, emoluments, rent, interest and value added for the enterprises were collected for the last month only. Last month referred to the last 30 days (preceding the date of survey) for perennial and casual enterprises irrespective of the number of days of operation. For seasonal enterprises also, last month referred to the last 30 days (preceding the date of survey), if they worked continuously for the last 30 days or more (including scheduled holidays) in the current season. Only for seasonal enterprises, which worked for less than 30 days in the current season, last month referred to an average month in the last working season. If some enterprise was unable to give information for the last 30 days and was able to give information for the last 30 days and was able to give information for the last calendar month, figures for the same are taken. For enterprises which provided information from their books of accounts but were not able to provide information for the last month/last calendar month, average monthly values of the last accounting year were collected. In case of items "rent payable" and "interest payable", the monthly average based on yearly values were collected. For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period was 'as on the date of survey'. For other items like net additions to fixed assets, number of months operated, number of other economic activities pursued etc., the reference period was the 'last 365 days preceding the date of survey'.

Enterprise: An enterprise is an undertaking engaged in production and/or distribution of goods and/or services not for the sole purpose of own consumption. The workers in an enterprise may consist of members of the household or hired workers or both. The activity of the enterprise

may be carried out at one or more than one distinct location. The activity of the enterprise may also be carried out only for a part of the year but on a fairly regular basis; i.e. it is in operation for the major part of the season/year. An enterprise may be owned or operated by a single household or by several households jointly (on a partnership basis) or by an institutional body or by government.

In case where more than one entrepreneurial activity is carried on by the same person or by the same household but separate accounts are kept for each of these activities, they were treated as separate enterprise. However, in case where the activities cannot be distinguished from one another, then only one enterprise pertaining to the major activity was recorded and all items of information of all other minor activities were clubbed with that of major activity.

Unorganized Enterprise: The unorganized sector comprised the following types of enterprises:

- (i) All the enterprises except units registered under Section 2m(i) and 2 m(ii) of the Factories Act, 1948 and Bidi and Cigar Workers (condition of employment) Act, 1966.
- (ii) All enterprises except those run by Government (Central, State, local bodies)/Public Sector Enterprises.

Own Account Enterprise: An own account enterprise (OAE) is an enterprise which is run without any hired worker employed on fairly regular basis. If such an enterprise is engaged in service sector activities, it is termed as own-account enterprise.

Establishment: An establishment is an enterprise engaged in economic activities with the assistance of **at least one hired worker** on a fairly regular basis.

Fairly Regular Basis: The term “fairly regular basis” means the major part of the time when operation(s) of an enterprise are carried out during a reference period.

Household Enterprise : A household enterprise was one which was run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise was located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises were household enterprises.

Non-household Enterprise : Non-household enterprises were those which were institutional i.e. owned and run by the public sector (Central or State Government, local self-government, local bodies, government undertakings, etc.) corporate sector, co-operative societies, other types of societies, institutions, associations, trusts, etc.

Perennial/Seasonal Enterprise: An enterprise which runs more or less regularly throughout the year, is termed as perennial enterprise and the enterprise which runs in a particular season only is termed as seasonal enterprise. In case of persons/institutions engaged in different seasonal enterprises in different parts of the year, not more than two such major enterprises were taken into account during enumeration.

Enterprise With Premises And Without Premises: Enterprise operations in census house (or in front of a census house), was classified as with premises and on the other hand if the entrepreneurial activity is undertaken outside the census house (and cannot be linked to any census house) or by moving, it is termed as without premises.

Non-profit Institutions (NPIs) : Non-profit institutions are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but any surpluses they happen to make cannot be appropriated by other institutional units. The articles of association by which they are established are drawn up in such a way that the

institutional units which control or manage them are not entitled to a share in any profits or the other income which they receive. For this reason, they are frequently exempted from various kinds of taxes. The objectives of NPIs created by other institutional units - whether persons, corporations, or government - are varied. For example, NPIs may be created to provide services for the benefit of the persons or corporations who control or finance them; or they may be created for chargeable, philanthropic or welfare reasons to provide goods or services to other persons in need; or they may be intended to provide health or education services for a fee, but not for profit; or they may be intended to promote the interest of pressure groups in business or politics;' etc. Although they may provide services to groups of persons or institutional units, they are, by convention, deemed to produce only individual services and not collective service.

Co-Operative Enterprise: All those enterprises registered under the Act of Co- operative Societies fall under this category.

Government Enterprise: All enterprises which are owned by Centre/State Government including Public sector undertaking, Local Bodies are considered as Government Enterprises. Universities, Educational Bodies and such similar Institutions, which are autonomous but are getting grants from Central/State/Local Governments, are included under this category.

Workers: All persons, household and non-households, paid and unpaid, those who are directly or indirectly associated with or incidental to manufacturing and/or repairing activities of an enterprises are workers. Part-time workers are also taken as workers of the enterprises so long as they are engaged on a fairly regular basis.

The workers of an enterprise have been divided into three different categories, namely, (i)Working owner (ii) hired workers; and (iii) other workers.

Working Owner : The owner who personally worked in the proprietary or partnership enterprises on a fairly regular basis was termed working owner. In fact, in most of the own-account enterprises the owner himself/herself managed all activities of the enterprise without the help of anyone (on a fairly regular basis). In the case of partnership enterprises, if only one partner or some or all of the partners worked in the enterprise on a fairly regular basis then he/she/they were considered as 'working owners'.

Hired Worker : A hired worker was a person employed directly or through any agency on payment of regular wage/salary in cash or kind. Apprentices, paid or unpaid, were treated as hired workers. Paid household workers, servants and resident workers of the enterprise were also considered as hired workers.

Other Worker/Helper : This includes all persons belonging to the household of the proprietor or households of the partners who were working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages were also covered in this category. All unpaid household workers/helpers who were associated with the activities of the enterprise during the reference month placed in this category.

Mixed Activity : There were enterprises, which carried out a number of activities simultaneously. If the accounts were not separable then the data pertained to the enterprise as a whole was collected and the enterprise was classified as having mixed activities and the activities of such enterprises are mixture of NIC's. The appropriate NIC in such cases was determined on the basis of major activity. Major activity refers to the activity, which yielded maximum income/turnover/employment. The above criteria was applied in the given order, i.e. income first, then turnover and then employment, to determine the major activity. The activities may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activity if it had multiple (at least two) activities at 2-digit level of NIC 1998 during the last 365 days.

Hotels : A hotel was an enterprise that provides lodging services with or without arrangements for meals, other prepared food and refreshments. Dharamshala type lodging places, private guest/rest houses, mess, and hostels attached to educational institutions, students homes, hostels for working girls, tourist lodges, etc. were also covered under hotels.

Hotel activities have been classified under NIC group 551. All hotels were covered in the survey provided they were run by private organizations. Similar facilities provided through workers employed exclusively for these specific activities by organization like YMCA, Ramkrishna Mission etc., and also by other membership organizations like Lions

Club, Rotary Club etc., were also covered under hotels. However, similar facilities if provided by Govt. /PSU/local bodies/Statutory bodies (e.g. ISI, IIT, Universities, etc.) were excluded from the purview of this survey.

Restaurants : A restaurant was one which generally provided eating and drinking services where prepared meals, food, refreshments and other snacks were sold for immediate consumption without any provision for lodging. Such establishments are variously known as restaurants, cafes, cafeterias, snack bars, lunch counters, refreshment stands, milk bars, canteens, etc. Bars and other drinking places were also treated as restaurants.

Restaurants are classified under NIC group 552. For the purpose of survey, canteens located in offices, factories, etc., were treated as restaurants if they were operated by private contractors. But departmental canteens run by government were excluded from the purview of this survey.

Storage & Warehousing : The operation of storage and warehouses on hire to the farm producer, dealer or trader, processor and manufacturing enterprises, including the general public, as an independent business was termed as storage and warehousing enterprise. Storage and warehousing services in respect of grains, other food articles, oilseeds and other agricultural facilities on hire to other enterprises for potato, fruits, dairy products, fish and other food products and also refrigerated food locker on rental services chiefly delivered to individual households were included. While, storage of all manufactured products including textiles, machine tools apparatus and equipment were included, farm produce stored by the owner of the farm in his own godown or a dealer or a manufacturer storing his commodities in his own godown or warehouse were excluded.

Storage and Warehousing activities fall under NIC class 6302. In the present survey, establishments of Central Warehousing Corporation, State Warehousing Corporations and the warehouses of the Central and State Governments were not included. Lockers in commercial banks and in other type of enterprises for safe storage of precious belongings were also excluded.

Transport : Transport was defined as an activity that carried passengers and /or goods from one place to another as a business proposition. Supporting services incidental to transport such as packing, freighting, travel agency, etc. were included under transport enterprise.

Mechanized road transport classified under NIC class 6021 and sub-classes 60221 and 60231, meant passenger transport by bus (including tramways) passenger transport by other motor vehicles, freight transport by motor vehicles or any other road transport by mechanized vehicle to qualify the activity as mechanized road transport.

Other transport and related activities mean transport of passengers and/or goods in land, other than by mechanized road transport. Activity of travel agency and tour operators, activities of other transport agency, supporting services incidental to transport such as packing, freighting, travel agency etc., were also covered under other transport. The following activities were also covered : (i) hackney carriages, carriage by bullock-carts/ekka/tonga etc. (ii) transport by animals like horses, elephants, mules, camels, etc. , (iii) transport by man including rickshaw-pullers, cart-operators, etc. (iv) all kinds of water transport, (v) supporting services to land transport like operation of highway bridges, toll roads, parking lots, etc. and (vi) supporting services to water transport like operation and maintenance of piers, docks, light house, loading and discharging vessels, etc. A household renting out transport vehicles to others and not operating directly with hired or household labour to render service to others was not considered as having transport enterprise. Transport via pipeline and air transport were beyond the coverage of this survey. Thus, the activities covered in this survey fall under NIC codes 601, 60222, 60232, 61, 6301, 6303, 6304 and 6309.

Communication : All enterprises that provided communication services were communication enterprises. This included courier services, ISD/STD/PCO booths, Voice Mail Services through computer networking, Video/fax services, phone plus services, voiced and non-voiced leased circuits, telex/FAX/data services through computer network, radio paging, audio services and activity of cable operators etc.

Communication, falling under NIC group 64, not owned by government, Public Sector undertakings and local bodies were covered in this survey. However, activities of the

cellular service operators were outside the coverage of this survey, although their agencies were covered.

Real estate, Renting and Business Activities : Real estate activities included activities like : (i) purchase, sale letting and operating of real estate i.e. residential/non-residential building, (ii) developing and sub-dividing real estate into lots, (iii) lessors of real property and (iv) real estate agents, brokers and managers engaged in renting, buying and selling, managing and appraising real estate on contract or fee basis. Letting out of an accommodation was not included except in case of real estate agents such a business. Renting of machinery and equipment was covered. A household hiring out machinery and equipment or household durables was also treated as an enterprise. All business activities classifiable under NIC 1998 codes 70 to 74 were covered in this survey.

Education : All educational institutions were covered under this category. Research and scientific services rendered by institutions and laboratories were also covered provided they satisfied the above criterion. These might be engaged in research in biological, physical and social sciences. Meteorological institutes and medical research organisations were also included. Management training institutes, computer training centres, nursing schools, schools of music, drama, dance, fine arts, modelling, fashion designing, yoga and physical education and general coaching centres (e.g. for various competitive examinations) etc., were also covered under this activity.

In activities under education included in NIC group 80, all educational institutions not recognized by Central/State/Local Govts. /autonomous bodies like AICTE, IIT, University etc. were covered. Similar facilities provided through workers employed exclusively for these specific activities by organisations like YMCA, Ramkrishna Mission etc. and also by other membership organisations like Lions Club, Rotary Club etc. were also covered under education.

Health and Social Work : All enterprises engaged in health and medical services came under this activity, irrespective of the system of medicine. All dispensaries, clinics and consultation chambers run by doctors were included here. The activity also included activities of veterinary services including bird hospitals. For an employed doctor and para-

medical person (such as midwife, dai, etc.) engaging in private practice, his/her private practice alone was considered as an enterprise. All kinds of health clubs were included in this activity.

All health and social work activities falling under NIC group 85, other than those owned by government public sector undertakings, local bodies were under the purview of the present survey. Similar facilities provided through workers exclusively for these specific activities by organizations like YMCA, Ramkrishna Mission, etc. and also by other membership organizations like Lion Club, Rotary Club, etc. were covered under health and social work.

Other Community, social and Personal Services : This included the activities like sewage and refuse disposal, other service activities like washing and cleaning of textile products, hairdressing, beauty parlours, funeral and related activities, massage saloons, sauna baths, activities of shoe shiners, porters, car part agents, etc.; activities such as those of portrait and commercial photographic studios, etc. Palmists and astrologers were also included here.

The coverage of other community, social and personal service activities, covered under NIC groups 90 to 93, excluded the activities of trade union, religious organizations, political organizations and other membership organizations. It may be noted that individuals serving as housemaids, cooks, gardeners, governesses, babysitters, chowkidars, night watchmen, etc. were, in general, outside the coverage of the present survey. However, if such activities were provided by some agencies against prescribed fees, those agencies were treated as enterprises under respective NIC code. For example, an agency which supplies babysitters or nurses or night watchmen with some profit margin, was covered under this activity.

Gross Value Added: Value added represents that part of production which is the actual contribution of an enterprise to the economy. Value added is calculated by deducting total value of operating expenditure (including distributive expenditure) from the total value of receipts during a reference period.

Fixed Assets: Fixed assets mean assets of an enterprise in the form of land, building and other construction, plant and machinery, transport equipment, tools and other fixed assets (new or used) that have a normal economic life of more than one year from the date of acquisition i.e., through outright purchase/ hire purchase / loan/ mortgage/ and / or construction, irrespective of their use at the time of survey. Market value of the fixed assets owned by the enterprises as on last day of reference year has been considered for the purpose of this report. The hired component of fixed assets is present market value of the assets used by an enterprise but not owned by it.

SECTION FOUR

SUMMARY FINDINGS

SECTION FOUR

SUMMARY FINDINGS

This section is devoted to the analysis of the main features of the un-organised service sector enterprises in Delhi. These results are based on 5761 number of sample enterprises surveyed during 2000-2001. Out of total sample, 3673 were own-account enterprises and 2088 were establishments. The detailed statement containing sampled enterprises and workers is in section five. This sample survey was conducted on the basis of the frame available from the fourth economic census conducted during 1998. Main focus of analysis is on three important aspects namely physical features such as number of enterprises & employment, financial aspects like value added, capital structure, and other financial indicators. The other operational characteristics like type of ownership, nature of operation, problems faced by this sector, status of growth of this sector and other related aspects. Comparison was also made with the central sample results in respect of key parameters.

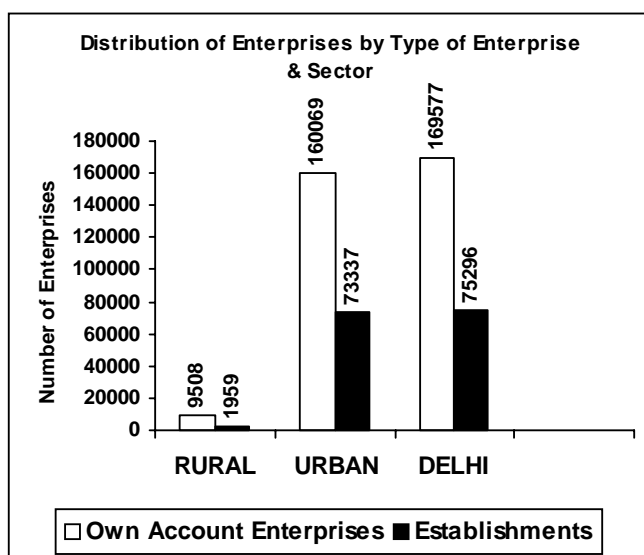

4.1. ESTIMATED NUMBER OF ENTERPRISES

The total numbers of enterprises operating in NCT of Delhi and falling with-in the purview of unorganised service sector covered by the 57th NSS round was estimated as **244873**. Out of them **11467** (4.68%) were in rural areas while **233406** (95.32%) were operating in urban areas.

Statement 4.1.1: Number of Enterprises

Sector	Own Account Enterprises	Establishments	All	Percentage To Total
RURAL	9508	1959	11467	4.68
URBAN	160069	73337	233406	95.32
DELHI	169577	75296	244873	100.00
Percentage to Total	69.25	30.75	100.00	

Further distribution of these enterprises brought to light that 169577 (69.25%) were household enterprises (OAE) operating without any hired labour and 75296 (30.75%) were establishments.

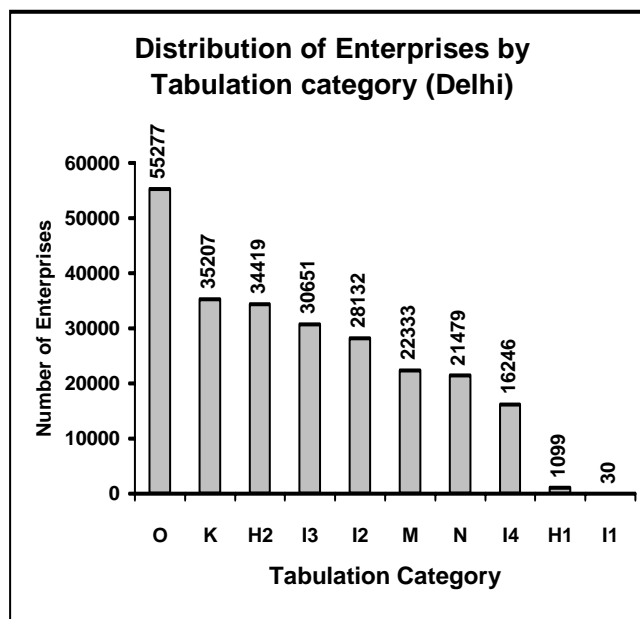

Distribution of these enterprises by sector, enterprise type and major activity group (NIC 1998) wise is presented in statements 4.1.2, 4.1.3, 4.1.4 for Delhi, rural and urban respectively. In Delhi among all enterprises, community, social and personal service activities including other transport accounted for 22.57% followed by Real estate, Renting and Business activities with 14.38% share

while Restaurants contributed 14.06%. Thus tabulation category H2, K and O taken together contributed for more than 50 percent of the total number of enterprises.

Statement 4.1.2: Distribution of Enterprises by Tabulation Category (Delhi)

TOTAL			169577	75296	244873		
Percentage to Total			69.25	30.75	100.00		

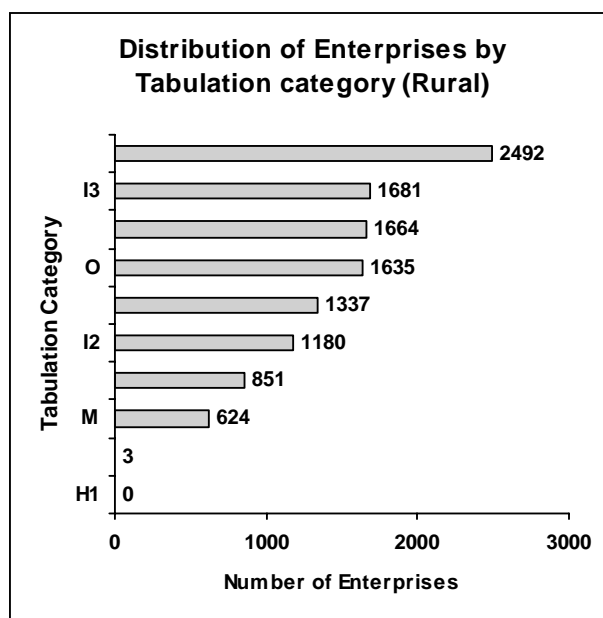

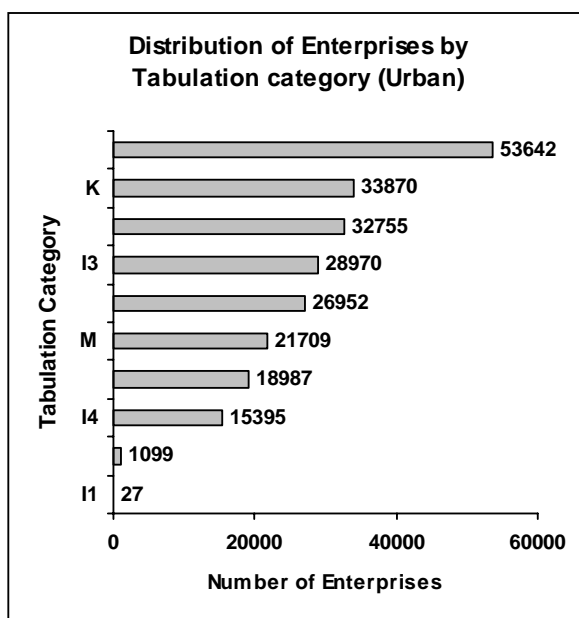

The other major activity that have a sizeable stake in the total number of enterprises include transport and education. Transport enterprises in all forms singularly account for 24.01% and in case of education it was 9.12%. The share of communication and Health Sector enterprises was in the order of 6.63% and 8.77%. The enterprise in warehousing & Storage was making negligible contribution of less than

one percent. Tabulation category wise ranking of enterprises (Delhi) is presented in the above graph.

Statement 4.1.3: Distribution of Enterprises by Tabulation Category (Rural)

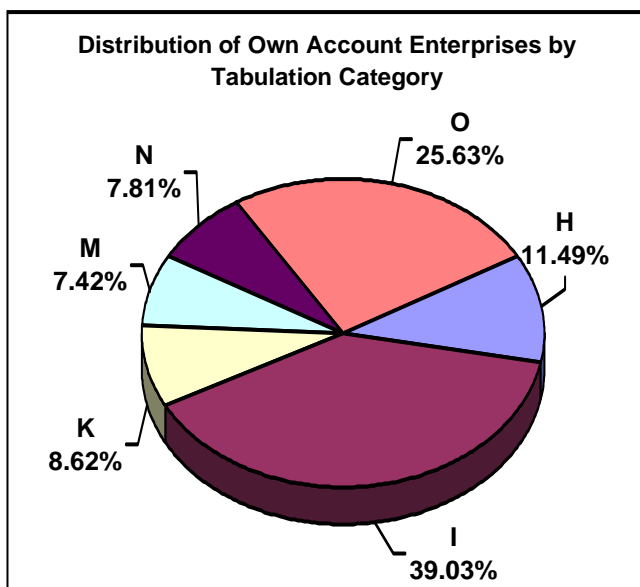

Tab. Cat.	NIC Code 1998	Description	Number of Enterprises			%	Rank
			OAE	ESTT	Total

M	80	Education	12269	9440	21709	9.30	6
N	85	Health and social work	10778	8209	18987	8.13	7
O	90, 911, 9191, 92, 93	Other community, social and personal service activities & other transport	42593	11049	53642	22.98	1
TOTAL			160069	73337	233406		
Percentage to Total			68.58	31.42	100.00		

Analysing the enterprises by their type revealed that among the own account unorganised service sector enterprises, tabulation category 'I' covering storage & warehousing, transport & other related activities and communication alone accounted for 39.03% whereas Tabulation Category 'O' consisting enterprises in the field of community, social & personal service activities and other transport contributed 25.63% in the total. Further

hotel and restaurants (TC – 'H') had a share of 11.49%, Real estate, Renting and Business activities (TC – 'K') 8.62% while Education (TC – 'M') and Health (TC – 'N') Sector accounted for more than 7% each in the total number of own-account enterprises.

Similarly, break-up of enterprises of establishment category indicated that tabulation category 'K' operating in the field of Real Estate, Renting and Business activities topped the table with 27.35% (i.e. more than 1/4th share) Share. Hotels & Restaurants of tabulation category 'H' followed the suit with 21.29% and enterprises under the tabulation 'O' viz. Communities, Social, Personal Services etc. had cornered a share of 15.69% in the total. Further Tabulation Category 'M, I and N' accounted for 12.96%, 11.78% and 10.93% ratio respectively.

	All India	12087359	2382161	14469520	100.00	

Statement 4.1.5 provides State/UT wise comparison of Service Sector Enterprises by Enterprises Type. At the All India level there were about 144.70 Lakh Enterprises operating during 2000-2001. The States of Uttar Pradesh and West Bengal ranked 1st & 2nd with 17.19% and 10.79% share respectively. Delhi with 1.7% share in the total number of Enterprises had occupied 16th position among 35 States/UTs in the country.

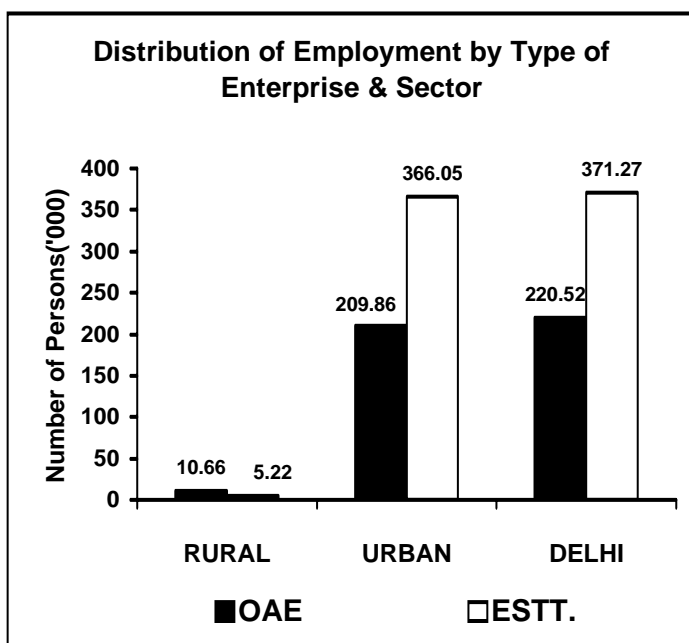

4.2 ESTIMATED EMPLOYMENT

The total employment provided by the un-organised service sector enterprises covered by the survey was about **5.92 lakhs**. This includes hired and household, full-time and part-time, skilled & un-skilled workers. Of the total employment **15885 persons (2.68%)** were employed in rural enterprises while **575909 persons (97.32%)** in the enterprises operating in urban Delhi .

Statement 4.2.1: Distribution of Estimated Employment.

Item	Own Account Enterprises	Establishments	All	Percentage To Total
EMPLOYMENT				
<i>RURAL</i>	10664	5221	15885	2.68
<i>URBAN</i>	209856	366053	575909	97.32
<i>DELHI</i>	220520	371274	591794	100.00
<i>Percentage to Total</i>	37.26	62.74	100.00	
AVERAGE EMPLOYMENT				
<i>RURAL</i>	1.12	2.67	1.39	
<i>URBAN</i>	1.31	4.99	2.47	
<i>DELHI</i>	1.30	4.93	2.42	

Further study revealed that about 2.21 lakh persons (37.26%) were employed in household

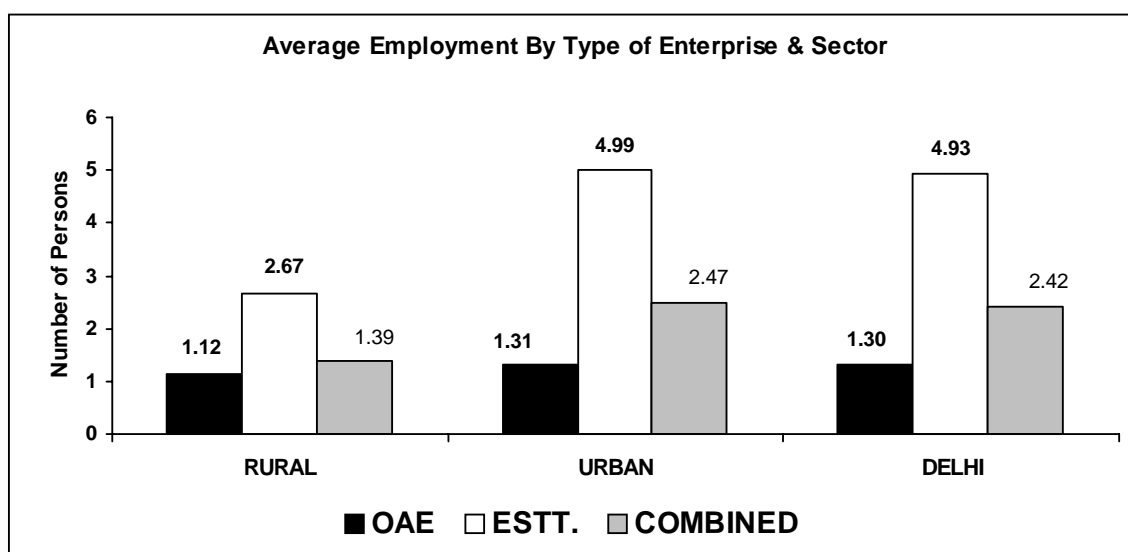

enterprises (OAE's) and 3.71 lakh persons (62.74%) were gainfully employed in establishments. Distribution of employment sector-wise and enterprise type-wise is presented in graph .

The average employment per enterprise in rural areas was 1.39 persons and that of urban areas was 2.47 persons. In Delhi average employment of own account enterprises stood at 1.3 persons and in establishments this

was as high as 4.93 persons.

Distribution of employment at NIC (National Industrial Classification 1998) and broad tabulation category wise is presented in statement 4.2.2. Enterprises of NIC 98 (Tabulation

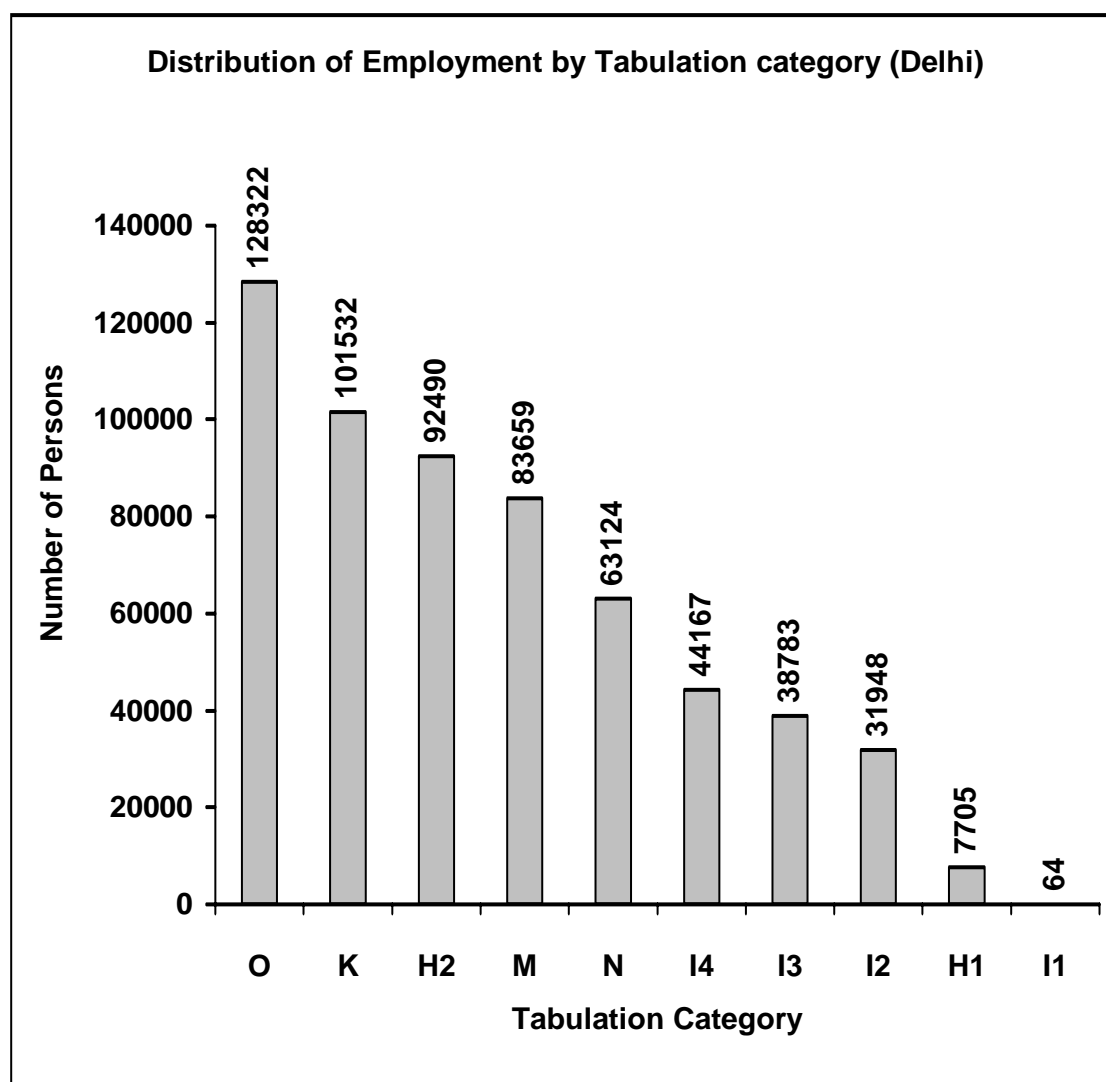

category 'O') dealing with Community/Social/Personal services etc. accounted for 21.68 % of the total employment provided by this Sector and thereby occupied first rank.

Statement 4.2.2: Distribution of Employment by Tabulation Category (Delhi)

Tabulation Category	NIC Code 1998	Description	Employment			%	Rank
			OAE	ESTT	Total

This is followed by enterprises of Real estate, renting and business activities (Tabulation Category 'K') which were found to be providing employment to the extent of 17.16 % in the total. Enterprises in the field of Restaurants (Tabulation Category 'H2' and NIC 552) by contributing 15.63 % of the total employment occupied 3rd position. Thus enterprises in Tabulation Category 'H2', 'K' & 'O' taken together provide employment for more than 50 % of the persons employed in this Sector. It is observed that employment also followed same pattern as that of enterprises when it comes to the share of top three Service Sector activities in the total.

Statement 4.2.5 provides State/UT wise comparison of employment in Service Sector Enterprises by Enterprises Type. At the All India level there were about 265.42 Lakh persons working in this Sector during 2000-2001. The States of Uttar Pradesh, Maharashtra and

Andhra Pradesh ranked 1st, 2nd and 3rd position with 15.67%, 9.82 % and 9.57% share respectively. Delhi with 2.23% share in the total employment had secured 14th position among 35 States/UTs in the country.

TYPE OF EMPLOYMENT

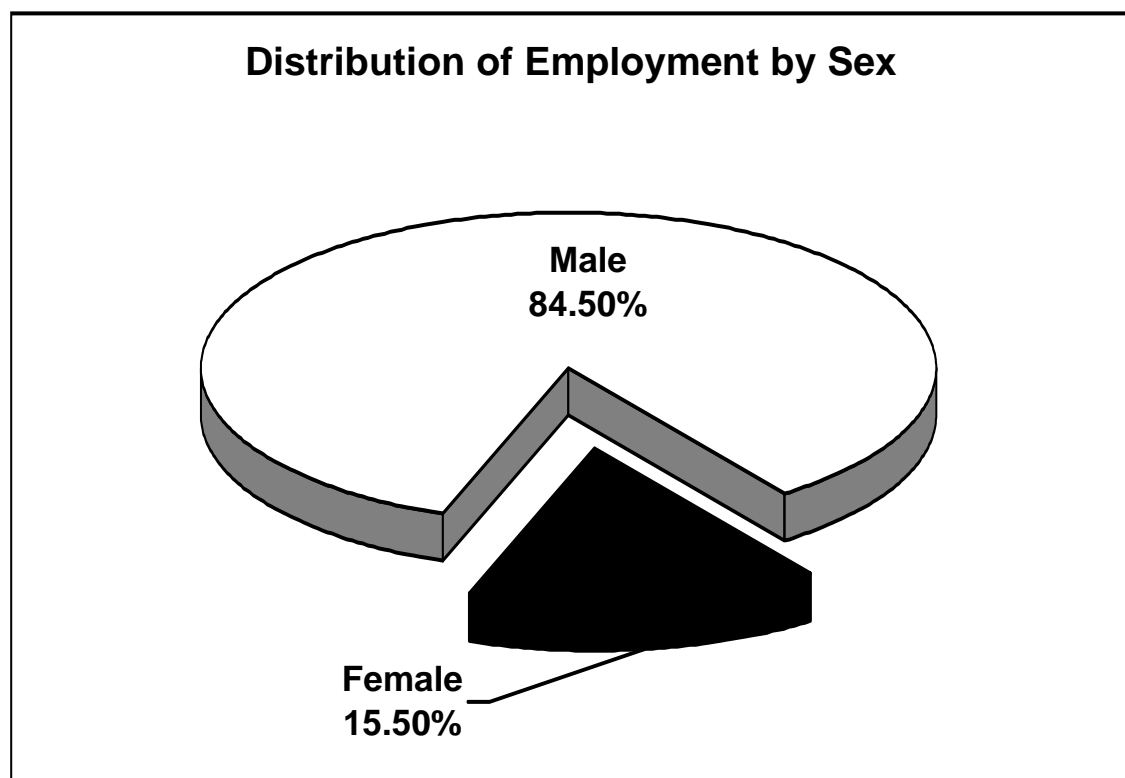

Statement 4.2.6 gives two important features namely, duration of employment and gender wise distribution of employment in Delhi. A person is said to be employed on part-time basis if he/she works for less than or equal to half of normal working hours of the enterprise on a fairly regular basis and on the contrary if a person works for more than half of the working hours he/she can be classified as employed on full-time basis. The survey revealed that out of the total only 1.91% were employed on part-time basis. Further, part-time employment was about 1.53% in own-account enterprises as against 2.14% in establishments. The incidence of part-time employment among males was about 1.72% where as it was about 2.98% among females.

Statement 4.2.6: Features of Employment in Delhi.

Sex-wise distribution of employment in this sector revealed that out of the total, 15.50% were females. The participation of females in the house hold enterprises was found to be less than of establishments as their share was to the tune of 10.99% in OAEs as against 18.17% in the case of later

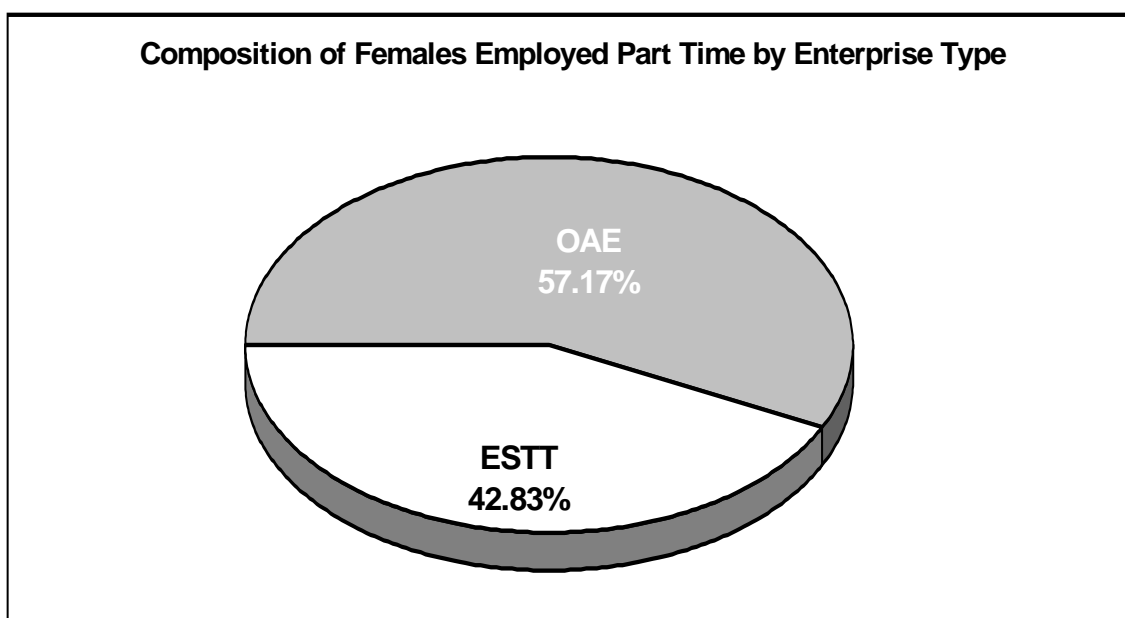

It is interesting to observe that of the total full time working females 25.5% were employed in household enterprises while the remaining 74.5% were working in establishments. On the other hand, in case of part time working females about 57.17% were working in household enterprises and the remaining 42.83% were working in establishments. In case of full time working males incidence was more in establishments with 96.04% share in the respective category while only 3.96% were employed in household enterprises. On the other hand, in case of part time working males in household enterprises and establishments was 21.04% and 78.96% respectively.

A worker is categorized as skilled if he/she has the proficiency in a given field acquired through formal or informal type of education. Skill was considered irrespective of general or technical level of education. All persons possessing the skills such as typing, stenography, computer programming, data entry, teaching, practice of medicine, nursing, painting, decoration, beautician, barber, vehicle driver etc. have been considered as skilled for the purpose of this survey.

The outcome of the survey provided a concrete evidence that this sector is

dominated by skilled labour in the hired category across all type of activities covered under the survey. Distribution of hired workers according to skill is presented in statement 4.2.7. Out of the total hired workers more than 70% were found to be skilled. Sex wise breakup of skilled hired workers indicated that 25.32% were females and 74.68% males. Among the male hired

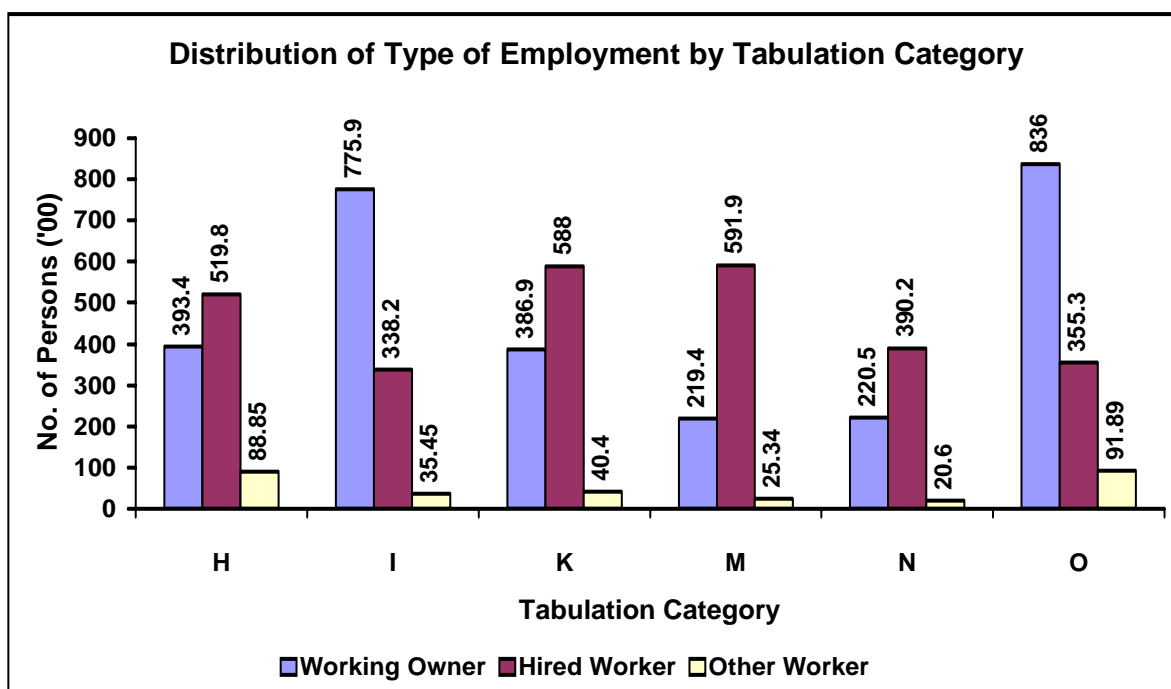

workers 66.18% were skilled and 33.82% unskilled. Similarly in case of females 15.38% were unskilled and 84.62% skilled labour. Among the different tabulation categories of enterprises (with the exception of I1) TC'M' concerning education had 82.6% of the hired employment in the skilled category.

Statement 4.2.8: Distribution of Employment by status in Delhi

Enterprises in the health sector were also equipped with 81.76% skilled hired workers. Hotel and Restaurant activities alone had skilled hired labour of less than 50% and going by the nature of this activity the findings of this survey tallies with the ground reality in this respect.

The total employed persons in this sector can be further classified in terms of their status namely working owner, hired worker and other worker. It is worthwhile to mention that the category of working owner occurs only in proprietary and partnership type of enterprises. Further hired workers may be taken to mean those employed on regular salary/wage basis. It also includes paid and unpaid apprentice.

The survey revealed that out of the total persons employed 47.86% were working owners, 47.03% hired workers and the rest of 5.11% fall in the category of other workers which includes un-paid house hold workers, helpers etc., Statement 4.2.9 provides gender wise breakup of type of employment by status. Accordingly, out of the total of working owners 90.53% were male and only 9.47 % were female. In the same fashion among hired workers to the extent of 79.04% were male and 20.96% were females. And in the case of 'other

workers' the gender wise composition is more or less same as the case with the hired workers.

Tabulation category wise position of hired workers indicated that Education sector (TC'M') was found to be employing highest number in this category namely 59189 persons. Enterprises in the field of Real Estate,Renting and Business activities (TC 'K')employing 58801 hired workers was a close second in the order.

Among the total male workers 51.27% were working owners, 44% hired workers and the rest of 4.73% were falling in other workers class. Similarly, among the 91727 women working in unorganised manufacturing enterprises in Delhi, 29.23% were working owners,63.59% were Hired workers and remaining 7.18% were in the category 'others'.

Delhi had an overall average employment of 2.4 persons per enterprise when compared to the national average of 1.8 persons per enterprise. In respect of establishments the average employment in Delhi was 4.9 persons per enterprise as against 4.5 persons at the All India level and in case of OAEs Delhi with 1.3 persons was on par with the All India average.

Further, in the over all average employment Delhi had jointly shared the 5th position in

the All India along with Chandigarh (UT) and Andaman Nicobar Island (UT). Pondichery with an over all average employment of 3.3 persons per enterprise had recorded the best average in the country. In fact it is only state/UT that had recorded an average employment of more than 3 persons per enterprise. Sikkim and Daman Diu managed second and third position respectively. Arunachal Pradesh and Goa had achieved the same average employment of 2.5 person per enterprise and ranked fourth in the All India.

4.3 FINANCIAL INDICATORS

GROSS VALUE ADDED:

One of the prime objectives of the survey was to ascertain the Gross Value Added per enterprise/worker to assess the significance of this sector to the economy in monetary terms. More over Value added per worker also serves as an important indicator of productivity of worker. Gross Value Added can be expressed in terms of Product and Factor approach. According to product approach GVA is arrived by deducting operating expenses(including distributive expenses) from total receipts. On the other hand factor approach involves clubbing of factor incomes to arrive at the GVA during the survey the value of surplus earned by entrepreneur was not collected for plausible reasons. It is so because enterprises in the unorganised sector were found to be not maintaining books of accounts in majority of the cases, hence collection of value of surplus verbally will lead to wild guess and in all probability lead to over or under estimation. Therefore, analysis of GVA is limited to product approach only.

Statement 4.3.1 shows the Annual Gross Value added per enterprise/ worker by Product approach in rupee terms by enterprise type. From this statement, it is evident that each enterprise in the unorganised service sector was found to be averaging Rs. 1.52 lakhs as Gross Value Added per annum. GVA of Household enterprises (OAE) was estimated at Rs. 0.49 lakh

as against Rs. 3.84 lakhs earned by establishments. It is worth while to observe that annual GVA of an enterprise in urban areas is more than three times to that of the rural areas.

Accordingly VA per worker in this sector was estimated as Rs. 62998 per year. Value added per worker in OAE's was Rs. 37844 and that of establishments was Rs. 77939 per annum. GVA per enterprise /worker is presented by enterprise type in graph, gives clear

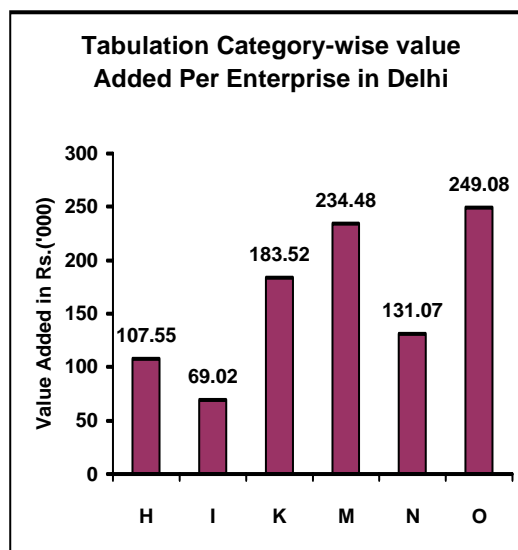

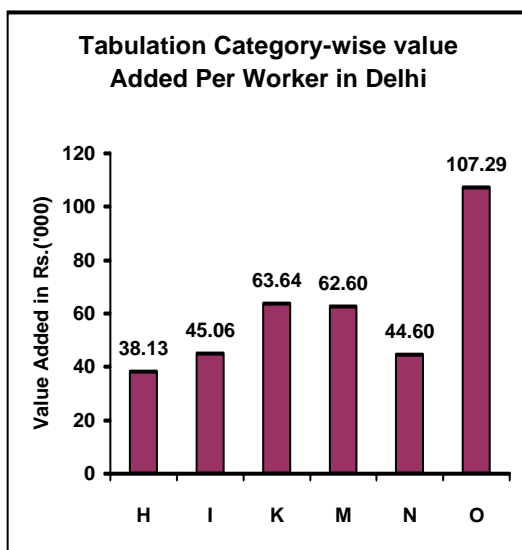

conclusions about relative importance of each type of enterprises. The productivity of worker expressed in terms of GVA per worker was relatively high in enterprises located in urban areas (Rs. 63770) when compared to that of (Rs.35011) in rural areas.

Statement 4.3.2 gives more details about the various components leading to working of GVA of unorganized service sector in actual monetary terms and also tabulation category wise. The overall contribution of this sector was estimated as Rs. 372820 lakhs during the year 2001-2002 in terms of gross value added.

In first instance, It may be observed from the statement 4.3.2 that wide variation exist in between GVA of different tabulation categories both for enterprise and worker. This can perhaps be due to scale of operation and inherent nature of activity. Enterprises in Hotel activity (H1) aggregated the best average value added both for enterprise as well as worker. In case of enterprises this value was about Rs. 4.61 lakhs in respect of workers it was Rs. 65695. In real estate Rental & business services activities recorded second best Value Added per worker of Rs. 63636.

Note: Figures of Average Employment for states except Delhi pertains to Central Sample

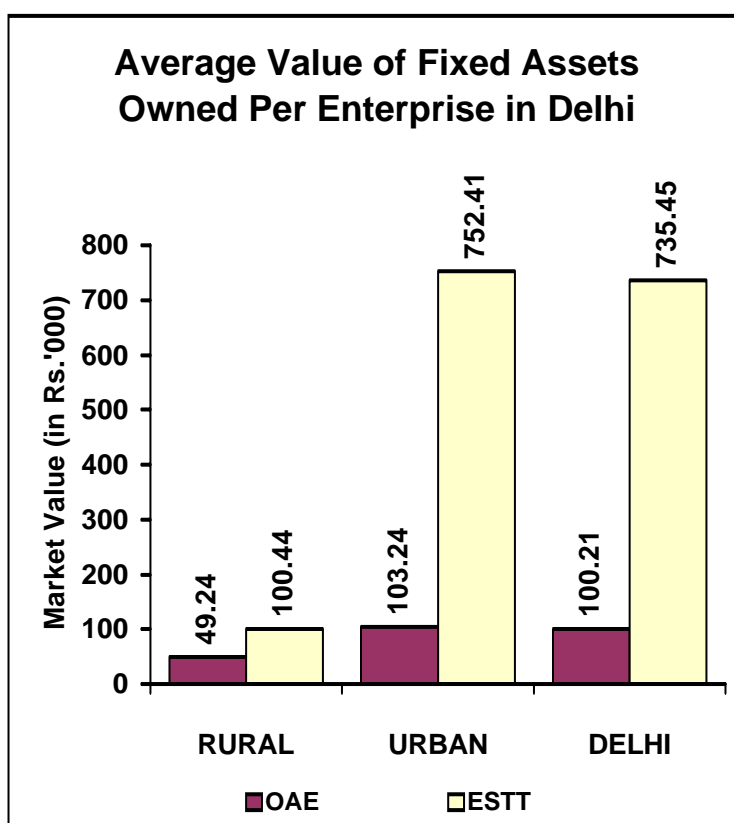

At the all India level, the state of Delhi has recorded the highest combined Gross Value Added per worker as well as per enterprise among 35 states/UTs. Infact GVA per enterprise of Delhi was nearly three times of the national average of Rs. 51673. On the other hand, the average value added per worker at the national level was only Rs. 28160 against Rs.62998 of Delhi. Value added per worker for OAE and Establishment in Delhi was also well ahead of the national average.

CAPITAL STRUCTURE:

This survey had also focussed on the study of the different components of capital structure of service sector enterprises by collecting data on fixed assets. However, working capital aspect was not covered as most of this class of enterprises were not maintaining books of accounts and estimation of working capital in the absence of record based information becomes unrealistic and simply not feasible.

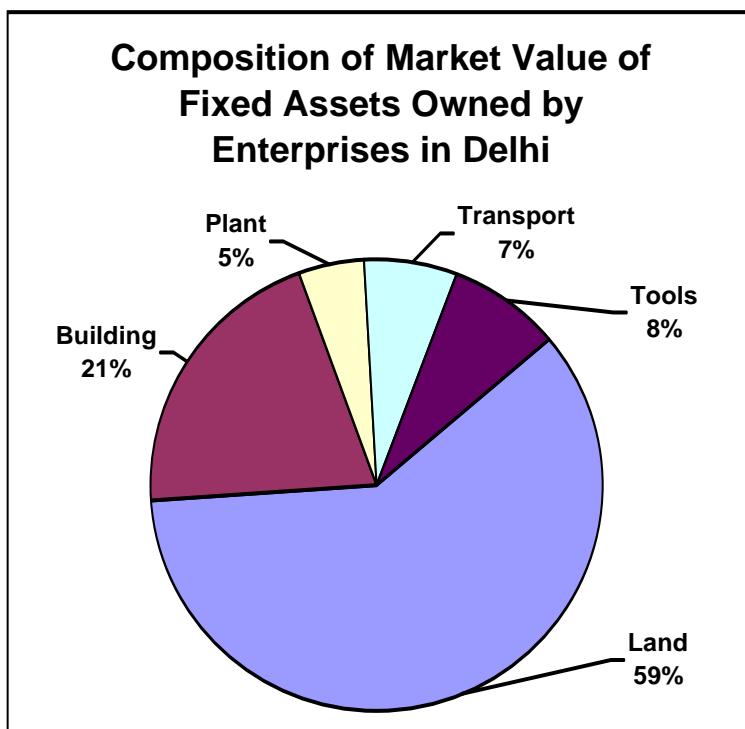

The value of fixed capital in these enterprises was estimated at market prices. Components of fixed capital per enterprise are presented in statement 4.3.6. It worked out to about Rs. 2.96 lakh per enterprise. It was only about Rs.

1.00 lakh per OAE, and in case of establishments it was worked out to Rs. 7.35 lakhs.

Statement 4.3.6: Market Value of Assets Owned by Enterprise Type

Components of fixed Assets are presented in the graph, which highlights the obvious importance of land in Delhi. Land accounts about 59% of the total assets of an enterprise, Building 21%, Plant 5%, Transport 7% and Tools 8%.

Value of assets is also given Tabulation Category-

wise in statement 4.3.7. Category 'I3' with Rs. 51578 has the lowest value and 'H1' with Rs. 31.15 lakhs had the highest value of fixed assets.

Statement 4.3.7: Tabulation Category-wise Value of Fixed Assets Owned (in Rs.).

STRUCTURAL RATIOS:

Ratio analysis is an effective tool in the hands of entrepreneurs to assess the performance of the enterprises. It is more a micro level indicator rather than for the Industry/sector as a whole. Ratios alone do not indicate anything unless compared with the previous year performance or with the other comparable enterprises in the same field. As far as unorganised service sector is concerned, this exercise may not fit well to the situation as data is not record based. Moreover, time series data is also not available to attempt any meaningful comparison to ascertain the trends. However, a few structural ratios have been presented in the statement 4.3.8 for the sector as a whole.

Statement 4.3.8: Selected Structural Ratios in Delhi by Tabulation Category.

Tabulation Category	RATIO OF						
	Total Receipts to			Value Added to			Fixed Assets to Employment
	Employment	Fixed Assets	Operating Expenditure	Employment	Fixed Assets	Total Receipts	
1	2	3	4	5	6	7	8

N	69201	0.40	2.81	44599	0.26	0.64	172708
O	116523	2.29	12.63	107294	2.11	0.92	50956
Total	97773	0.80	2.81	62998	0.52	0.64	122289

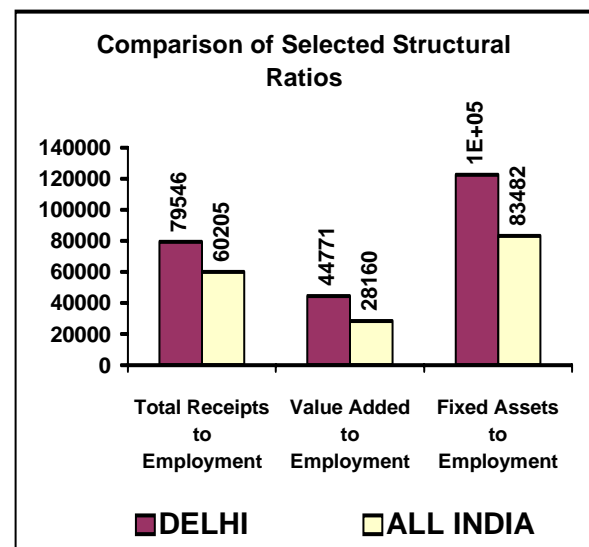

Fixed Asset Turnover Ratio:

This ratio is useful to determine the efficiency of the firm as amount of receipts that are generated from each rupee invested in fixed asset.

$$\text{FixedAssetsTurnoverRatio} = \frac{\text{Total Receipts}}{\text{FixedAssets}}$$

The higher the level of receipts generated by each 'unit' of fixed assets the more efficient the enterprise in proper utilisation of assets and *vice versa*. In interpreting this ratio a little care is needed. The figure given for the ratio depends critically on the value of the estimated fixed assets. For example, firms with higher market value of fixed assets will have a lower figure than the firm with lower value. Therefore, enterprises with low profit margins tend to have high asset turnover, those with high profit margins have low asset turnover.

This ratio was 0.80 for the service sector in Delhi. Activities wise presentation revealed that category 'H2', 'I2' 'I3' and 'O' had a very healthy position.

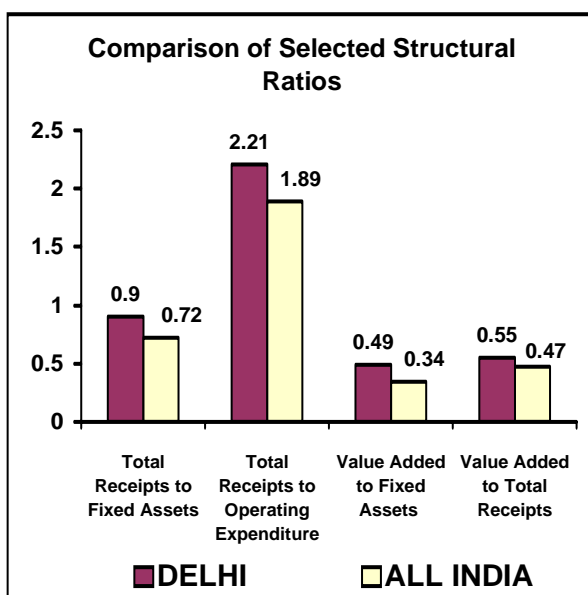

Earning- Expenditure Ratio :

This ratio is also called operating self-sufficiency ratio as it indicates the degree to which operating income covers the operating expenditure.

$$\text{Earning - ExpenditureRatio} = \frac{\text{Total Receipts}}{\text{Total Operating Expenditure}}$$

Accordingly higher the ratio greater will be the operating efficiency of the firm. This ratio stood at 2.81 for service sector in Delhi. It implies that for every rupee spent 2.81 is earned by this sector. Tabulation category wise analysis revealed that category 'O' recorded the best ratio 12.63 followed by 6.17 by category 'I1'. However, Tabulation category 'I4' had the lowest ratio of 1.47.

Receipts –Employment Ratio :

It refers to the amount of receipts per worker and it was estimated as 97773 in Delhi.

$$\text{Receipts – Employment Ratio} = \frac{\text{Total Receipts}}{\text{Employment}}$$

Activities in the field of ‘I1’ and ‘I2’ has managed the best ratio.

Similarly these ratios have also been

worked out and presented in the statement 4.3.8 with respect to GVA.

Statement 4.3.9: Comparison of Selected Structural Ratios of Delhi & All India.

4.4. OTHER FEATURES

NATURE OF OPERATION:

Based on the nature of operation, enterprises were classified into three groups viz. perennial, seasonal and casual type of enterprises.

Statement 4.4.1: Distribution of Enterprises by Nature of Operation and Tabulation Category

Tabulation Category	Nature of Operation				% age of Perennial to Total
	Perennial	Seasonal	Casual	Total	
1	2	3	4	5	6
H1	1099	0	0	1099	100.00
H2	34357	62	0	34419	99.82
I1	30	0	0	30	100.00
I2	28089	43	0	28132	99.85
I3	30416	235	0	30651	99.23
I4	16231	15	0	16246	99.91
K	34808	399	0	35207	98.87
M	22063	228	42	22333	98.79
N	21479	0	0	21479	100.00
O	54484	739	54	55277	98.57
TOTAL	243056	1721	96	244873	
%age to Total	99.26	0.70	0.04		

Out of the total enterprises, 2.43 lakh (99.26%) were perennial in nature as they were operational throughout the year. The rest of the 1817 enterprises constituting only 0.74% were seasonal/ casual in nature. This proportion was more or less same in all tabulation categories.

The insignificance of seasonal/casual type of enterprises in the unorganised service sector of Delhi is clearly visible in the graph.

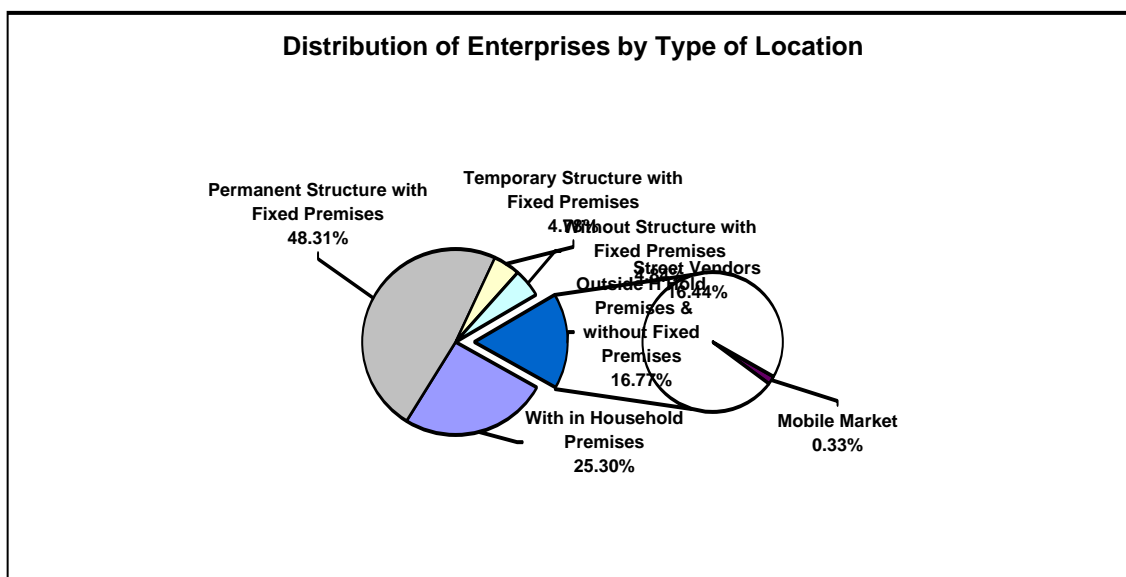

TYPE OF PREMISES:

Enterprises have been classified into two broad groups with respect to type of premises viz. Enterprises within Household premises and outside household premises. Enterprise operating outside the household premises can be further classified into enterprises with fixed premises and without fixed premises.

Statement 4.4.2: Tabulation Category-wise Distribution of Enterprises by Type of Premises in Delhi

Tabulation category	Type of Location								Total
	Within House hold Premises	Outside Household Premises							
		With Fixed Premises				Without Fixed Premises

Analysis of related data revealed that out of the total own-account enterprises 31.11% were located within household premises; however this proportion was only 12.22% for establishments. Sector-wise data revealed that the proportion of enterprises operating from

outside household premises were more i.e only 12.45% were operating from household

premises in rural area as compared to 32.22% operating from household premises in urban areas.

SIZE OF EMPLOYMENT:

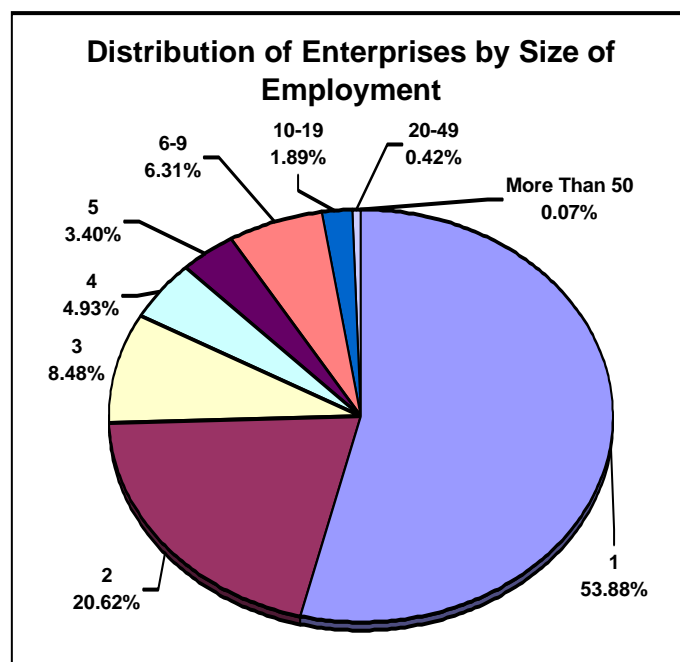

Enterprises have been arranged in terms of their size-class of employment to ascertain the intensity of employment.

Statement 4.4.4 :Distribution of Enterprises by Size of Employment

S. No.	Item	No. of Enterprises by Size of Employment									
		1	2	3	4	5	6-9	10-19	20-49	50 or More	All

MAINTENANCE OF ACCOUNTS:

Accounts maintenance may be taken to mean that books of accounts are maintained and information to the survey was also provided from them. This is an area where this sector was found lagging behind perhaps due to the complexity involved. Despite the obvious conclusions available on the practice of maintenance of accounts, information was collected to build up database for comparison for the future.

Statement 4.4.10: Percentage Distribution of Enterprises Maintaining Accounts in Delhi.

Tabulation category	Percentage of Enterprises Maintaining Book of Accounts		
	OAE	ESTT	ALL
H1	0.00	9.38	8.74
H2	0.00	2.82	1.23
I1	0.00	0.00	0.00
I2	0.01	3.27	0.13
I3	0.25	16.94	1.39
I4	1.72	5.40	3.02
K	2.07	9.10	6.18
M	0.17	13.58	6.03
N	5.74	30.42	15.20
O	0.00	8.79	1.88
TOTAL	0.79	10.57	3.80

It was observed that only 3.80% of these enterprises were found to be maintaining books of accounts. Coming to the practice of maintenance of accounts by enterprise type revealed that 10.57% establishments and less than one percent OAE's were in the habit of account maintenance. Among establishments, enterprises falling under the tabulation category 'N' were having the highest proportion of enterprises maintaining accounts with 30.42%, this was followed by category 'I3' with 16.94%.

MISCELLANEOUS FEATURES:

Data is also available on the other features like, pursuing of mixed activity, registration status of enterprises and receipt of assistance, if any.

Mixed activity refers to a state where enterprise carry out multiple activities simultaneously. If separate book of accounts are available it can be treated as separate enterprise, however, in its absence, data has to be collected for the mixed activities under one enterprise. Survey revealed that only 1.31% of OAE, 4.92% of Establishments were pursuing mixed activities. In case of Delhi as a whole, the contribution of such enterprises was 2.42% in the total number of enterprises.

Statement 4.4.11: Miscellaneous Features of Service Sector in Delhi

S.No.	Item	OAE	ESTT.	Combined
1	Pursuing Mixed Activity	2229 (1.31)	3704 (4.92)	5933 (2.42)
2	Registered Under Any Authority	158125 (93.25)	68644 (91.17)	226769 (92.61)
3	Enterprises Received Assistance	5254 (3.10)	2433 (3.23)	7687 (3.14)
	Total Number of Enterprises	169577	75296	244873

Note : Figures in parentheses pertains to percentage to total

Coming to the status of registration of enterprises, as high as 93.25% of the Own Account enterprises and 91.17% of establishments were registered under some authority or act. Further, only 3.14% of the enterprises in Delhi have availed of any type of assistance.

GROWTH STATUS OF ENTERPRISES

Enterprises were also asked to give their subjective assessment of the growth status of their enterprise based on the performance of last three years preceding the date of survey.

TOTAL	20.03	52.61	10.93	16.44	100.00

Analysis of the overall opinion on growth status of enterprise revealed that 20.03% were expanding, 52.61% stagnant, 10.93% were contracting and rest of the 16.44% enterprises, this question was reported to be not relevant.

COMPARISON OF MAIN FINDINGS OF CENTRAL-STATE SAMPLES

Selected findings of Central and State Samples are presented in statement 4.4.13 for enterprises and employment under NSS 57th round. To start with the coverage under the state sample is about 84% more than the sample covered under central sample. Coming to the estimated number of enterprises and employment negligible variation was found between central and state samples. Thus they are more or less comparable in this respect.

The most important indicator / outcome of the survey, namely Value added per worker was found to be comparable in both sets of data for OAE though variation is observed in case of establishment. The estimated market value of fixed assets brought out by both samples of

data is also comparable. In case of financial ratios, with some minor exceptions two sets of data are comparable.

Statement 4.4.13: Comparison of Key results of NSS 57th Round –Central & State Samples.
