

GOVERNMENT OF NATIONAL CAPITAL TERRITORY OF DELHI

RMPLOYMENTI AND UNAMPLOYMJNT SITIUATION IN<br>DELHI 2011-12

BASED ON
NSS 68 ${ }^{\text {th }}$ ROUND SURVEY (STATE SAMPLE)

Directorate Of Economics \& Statistics $3^{\text {rd }}$ Floor,Vikas Bhawan-II,Bela Road civil lines, Delhi - 110054
Website: http://des.delhigovt.nic.in

## PREFACE

The Present Report on "Employment \& Unemployment situation in Delhi" is brought out by this directorate on the basis of sample survey conducted under the $68^{\text {th }}$ NSS round during July, 2011 - June, 2012 in respect of state sample.

This report contains valuable data on labour force, work force and unemployment in Delhi. Labour participation rates - sex-wise, sector-wise, activity-wise., details about the Unemployed lot in terms of qualification, gender, social group was also given in the report. The break up of persons out of the labour force was also presented activity status-wise for prospective planning. The report also contains demographic characteristics. The data available from the report will be useful in the process of devising schemes to tackle issues relating to un-employment,, preparation of state income estimates and a host of other closely related purposes in both government departments and other public and private institutions.

This report was prepared by Shri Sabir Ali, Assistant Director of Data Processing Unit, under the able guidance of Dr.R.N Sharma, Joint Director. The extraordinary efforts put in by Sh. P.K.Chaurasia, Statistical Officer, Smt.Varsha Kumar, Sh. K. Prasanth Kumar and Sh. Prateek jain, Statistical Assistants in the data analysis and report making stages deserves special mention. The fieldwork was conducted by socio-economic unit under the guidance of S/Sh. K.R.Chhibber and Sh. P.K.Chaurasia, Statistical Officers. The role played by this unit in collection of data from the field against all odds is appreciated. The data processing was done by the EDP unit under the close guidance of Sh. Praveen Srivastav, Programmer.

The technical assistance provided by National Sample Survey Organisation, Government of India and the co-operation extended by the households is acknowledged.

Dr.B.K.Sharma
Director cum Special Secretary
Place: Delhi
Date: July, 2014

## HIGHLIGHTS

- The present report is based on NSS $68^{\text {th }}$ round survey on Employment \& Unemployment (State Sample).
- The field work of this survey was undertaken during July 2011- June 2012 in 256 FSUs (16 villages and 240 urban blocks).
- A sample of 2040 households has been covered, out of which 128 households are in rural sector and the remaining 1912 households in the urban sector.
- From the households covered, 8247 persons are surveyed out of which 640 persons reside in rural households and rest 7607 in the urban households.
- The labour force estimates based on all the four approaches have been derived. The four approaches are Usual Principal Status (PS) approach, Usual Principal and Subsidiary Status (PS+SS) approach, Current Weekly Status (CWS) approach and Current Daily Status (CDS) approach.
- The reference period of 365 days preceding the date of survey is used to derive estimates based on Usual Principal Status (PS) and Usual Principal and Subsidiary Status (PS+SS). For Current Weekly and Current Daily Status approach the week comprising of seven days preceding the date of survey is taken as reference period.
- The labour force estimates are derived for the persons of all age groups (i.e total population). However analysis has also been made for the population of age 15 years and above where ever necessary.
- The following are the findings of the survey:

## DEMOGRAPHIC PROFILE:

i) Total number of households in Delhi were estimated as 42.98 lakhs, out of them 0.86 lakhs were in Rural and 42.12 lakhs in Urban. The average household size worked out to 3.98 .
ii) The distribution of population in terms of Monthly Per Capita Expenditure (MPCE) class-wise reveals $0.40 \%$ of the total population was in upto Rs. 500 class, $2.29 \%$ in Rs. 501 -1000 class, $15.47 \%$ in Rs.1001-1500 Class, $16.36 \%$ in Rs.1501-2000 class, 11.37\% in Rs.2001-2500 class, 9.76\% in Rs.2501-3000 and the remaining $44.34 \%$ in above Rs. 3000 class.
iii) The social group-wise breakup of households indicates that about $20.04 \%$ of the total household belongs to Scheduled Castes category, $14.90 \%$ to other Backward classes and $65.06 \%$ belonged to other social groups.
iv) In Delhi $52.39 \%$ or majority of households are found to be having wage/salary earnings and $36.78 \%$ households had income from self employment.
v) In rural areas $40.75 \%$ households are estimated to having self employment as the major source of income under agriculture and non agriculture activities. And another $38.10 \%$ households had earning from regular wage/salary earnings.
vi) In urban areas $52.68 \%$ of households recourse to regular wage/salary earnings and another $36.70 \%$ households had earning from self employment.
vii) The distribution of household by principal household industry reveals that the principal household industry of $26.00 \%$ households was Services, followed by $22.36 \%$ manufacturing, $17.61 \%$ trade, $9.52 \%$ Construction, $8.96 \%$ transport \& storage, $4.59 \%$ information \& communication, $3.73 \%$ accommodation and food services, $1.51 \%$ electricity, Gas and water supply and remaining 5.72\% Others (incl. non-economic activities).
viii) The distribution of household by principal occupation reveals that about 27.05\% of household's principal occupation was Sr. Officials and Manager, Professionals followed by $22.41 \%$ "Craft and related works, Plant and machinery operators and assemblers, $13.08 \%$ skilled agricultural and fishery workers, $7.28 \%$ Elementary occupations", $6.18 \%$ Technicians and Associates Professionals,5.10\% Service worker and shop and market sales workers, 4.86\% Clerical related works and the remaining workers not classified by occupation.

## EMPLOYMENT STATUS OF POPULATION:

Based on survey results, the employment status of population of all age group is as follows:
i) Out of 170.89 lakh total population, 57.06 lakh ( $33.39 \%$ ) were found to be employed, 2.66 lakh $(1.56 \%)$ were unemployed and the rest 111.16 lakh ( $65.05 \%$ ) were out of labour force.
ii) The sector wise break up revealed that $21 \%$ of rural population and $33.68 \%$ of urban population was employed.
iii) The sex wise break up indicated that $56.59 \%$ population of male and only $6.78 \%$ population of female were employed.
iv) At all India level the distribution of urban population was $39.9 \%$ employed, $0.7 \%$ unemployed and the rest $59.4 \%$ out of labour force as per PS+SS approach while in rural population it was $35.5 \%, 1.3 \%$ and $63.3 \%$ respectively.

## EMPLOYMENT STATUS OF POPULATION OF AGE 15 YEARS \& ABOVE:

Based on survey results, the employment status of population of age 15 years \& above, perhaps the appropriate and meaningful indicator is as follows:
i) Out of 127.07 lakh total population of age 15 years and above, 56.52 lakh $(44.48 \%)$ were found to be employed, 2.66 lakh $(2.10 \%)$ were unemployed and the rest 67.88 lakh ( $53.42 \%$ ) were out of labour force.
ii) The sector wise break up indicated that $33.43 \%$ of rural population and $44.70 \%$ of urban population was employed.
iii) The sex wise break up revealed that $74.64 \%$ population of male and only $9.22 \%$ population of female were employed.

LABOUR FORCE PARTICIPATION: Labour force comprises of employed and unemployed and the number of such persons per 1000 persons in the population constitutes its rate.
i) Labour Force Participation Rate worked out to 315, 352 and 350 for rural, urban and Delhi respectively.
ii) In case of Males this rate was 589 per thousand population and among females this rate was only 75 per thousand population.
iii) Sex ratio refers to number of females in labour force for every 1000 male persons in the labour force. According to the survey, this rate worked out to $155,110,110$ for rural, urban and Delhi respectively.
iv) LFPR in respect of population of age 15 years \& above, perhaps the appropriate and meaningful indicator, worked out to 369,468 , 466 for rural, urban and Delhi respectively

WORK FORCE PARTICIPATION RATE: Work force participation rate refers to number of persons employed per 1000 persons in the population.
i) Work force Participation Rate worked out to 210, 337 and 334 for rural, urban and Delhi respectively.
ii) In case of Males this rate was 566 per thousand population and among females this rate was significantly low i.e. 68 per thousand population.
iii) Sex ratio refers to number of females in Work force for every 1000 male persons in the Work force. According to the survey, this rate worked out to $169,104,105$ for rural, urban and Delhi respectively.
iv) Out of the total work force $39.05 \%$ were self-employed, $55.35 \%$ were wage/ salaried and $5.60 \%$ persons were in other categories.
v) The age group - wise major proportion of work force was $70.24 \%$ in the age group of $15-44$ years followed by $25.13 \%$ in the age group of 45-59. While in the age group 60 \& above it was only $3.69 \%$.
vi) The work force participation rate of persons of age 15 years \& above worked out to be 334,447 and 445 for rural, urban and Delhi respectively.

UNEMPLOYMENT RATE: Unemployment rate refers to number of persons unemployed per 1000 persons in the labour force.
i) Unemployment Rate worked out to 94,44 and 45 for rural, urban and Delhi respectively.
ii) In case of Males this rate was 40 per thousand population and among females this rate was 90 per thousand population.
iii）Sex ratio refers to number of females unemployed for every 1000 male persons unemployed．According to the survey，this ratio worked out to 36，260， 251 for rural，urban and Delhi respectively．
iv）Age Group wise unemployment proportion in the age Age－Group 15－ 29 years was highest i．e． $93.84 \%$ ．
v）Distribution of unemployed persons（Age 15 years and above） indicated that $4.50 \%$ of Delhi labour force of this age group was unemployed．
vi）Distribution of unemployed persons in terms of their education attainment revealed that $2.78 \%$ were not literate， $5.50 \%$ were literate \＆below primary standard， $33.31 \%$ completed up to primary to secondary， $58.40 \%$ completed education up to higher secondary and above．

## PERSONS OUT OF LABOUR FORCE：

i） $65.05 \%$ of the Delhi＇s total estimated population was out of labour force．
ii） $46.44 \%$ of the persons of this category were students in various educational institutions，about $35.34 \%$ attended domestic duties and about $3.92 \%$ were living on remittances like pension，rent etc．Only $0.48 \%$ of this category were engaged in Domestic Duties as well as in free collection of goods，（Vegetables，roots，fire woods，cattle feed etc） sewing，tailoring，weaving etc．for household use， $0.72 \%$ were not able to work due to disability and the remaining $13.11 \%$ were others．

## SECTION ONE

## INTRODUCTION

Employment - Unemployment is a hotly debated subject among academicians, government circles as this is viewed as one of the important indexes of ultimate success or otherwise of public policies. This aspect is of great concern for the public at large because standard of living, disposable income, savings, education, health and overall psyche of the people is determined by current levels of employment and un-employment. Social behavioural analysts, of late, hold the view that unrest among the youth in the present day highly lop sided society is mainly due to high levels of un-employment which in turn leads to insecurity and related consequences thereof. Such a conclusion calls for the study of this sensitive issue with care, as factual position will serve as an eye opener for policy makers/administrators to initiate suitable measures to remedy the situation.

Generation of gainful employment both skilled and unskilled has been one of the important target areas vigorously pursued under the planning process both by central/state governments. However, the ambition of planners/administrators to mitigate the problem of un-employment and thereby poverty levels remained an unreachable destination due to high rate of population growth. The gap between the job seekers and avenues of employment remained an unbridgeable gap. In this respect the state of NCT of Delhi is on a firm wicket with a relatively low un-employment rate when compared to the position at all-India level due to ever growing economic activities.

## HISTORY OF SURVEYS

One of the important surveys conducted regularly under the NSS rounds is the quinquennial survey on employment-unemployment. The first quinquennial survey on employment and unemployment was conduct ted in the $27^{\text {th }}$ round of NSS (September 1972 - October 1973) on the basis of. conceptual framework recommended by the "Expert Committee on Unemployment Estimates", (popularly known as the Dantwala Committee). Eight comprehensive quinquennial surveys on employment and
unemployment situation have been carried out prior to the present survey. These were carried out during the $27^{\text {th }}$ round (Sept. 1972 - Oct. 1973), $32^{\text {nd }}$ round (July 1977 - June 1978), $38^{\text {th }}$ round (January - December1983), $43^{\text {rd }}$ round (July $1987-$ June 1988), $50^{\text {th }}$ round (July 1993 - June 1994), and $55^{\text {th }}$ round (July 1999 - June 2000), $61^{\text {st }}$ round (July 2004 - June 2006) and $66^{\text {th }}$ round (July 2009 - June 2010). Apart from the quinquennial surveys on employment and unemployment, information has been regularly collected on certain key items on employment and unemployment from a limited set of households in each round since $45^{\text {th }}$ round (July 1989 - June 1990) except $63^{\text {rd }}$ round (July 2006 - June 2007), known as annual series, through the survey on Household Consumer Expenditure. The present survey is like a quinquennial survey as far as subjects of enquiry, design, questionnaires and sample sizes are concerned.

## SCOPE AND COVERAGE:

The Directorate of Economics \& Statistics had participated in the $68^{\text {th }}$ NSS round (July 2011 - June 2012) of socio-economic survey which was mainly devoted to employment and unemployment besides studies on "household consumer expenditure". As in the past, in the present survey too, data was collected on some characteristics, based on which, estimates of employment and unemployment, measured in terms of 4 basic approaches viz. principal usual activity status(PS), principal usual + subsidiary activity status(PS+SS), current weekly status(CWS) and current daily status(CDS). The reference period for these approaches differs viz., 365 days preceding the date of survey for 'usual status' and 'usual + subsidiary status', 7 days preceding the date of survey for 'current weekly status' and 'current daily status '. Data were collected on the activity status of all persons, i.e. for workers, for those seeking or available for work and also for those remaining out of labour force. The status of employed in terms of self-employed or regular salaried/wage earner or employed on casual wage basis along with the industry of work of the worker and his/her occupation, were collected during this survey. In order to reveal the multidimensional features of the employment-unemployment situation, information on several correlates pertaining to it were also gathered. In addition, probing questions
were put to the workers in order to understand the extent of underutilization of their labour time and to acquire more specific information in this regard．

## SCHEME OF THE REPORT

The estimates presented in this report are based on state sample data ．It contains six sections，including the present introductory．Section two dealt with ＇sample design and estimation procedure＇．Section three describes the＇concepts and definitions＇of those terms used in the survey in connection with the various items covered in this report．The main findings relating to the estimates given in this report are presented and discussed in section four．The detailed tables forming the basis of this report are presented in section 5 ．The specimen of the schedule used in the survey is given in Section－6．

## SECTION TWO

## SAMPLE DESIGN \& ESTIMATION PROCEDURE

The period of survey of NSS 68th round was of one year's duration starting on 1st July, 2011 and ending on 30th June, 2012. The survey period of this round was divided into four sub-rounds of three months' duration each as follows:

Sub-Round 1 : July - September 2011
Sub-Round 2 : October - December 2011
Sub-Round 3 : January - March 2012
Sub-Round 4 : April - June 2012
An equal number of sample villages/blocks (FSUs) was allotted for survey to each of these four sub-rounds with a view to ensuring uniform spread of sample FSUs over the entire survey period. Each FSU was surveyed during the sub-round to which it was allotted. A total of 16 rural and 240 urban samples were surveyed during the round as against 8 rural and 120 urban samples under the central sample.

| Sector |  | Sub-Round-I | Sub-Round-II | Sub-Round-III | Sub-Round-IV | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Rural | Allotted | 4 | 4 | 4 | 4 | 16 |
|  | Surveyed* | 4 | 4 | 4 | 4 | 16 |
| Urban | Allotted | 60 | 60 | 60 | 60 | 240 |
|  | Surveyed* $^{*}$ | 60 | 60 | 60 | 60 | 240 |

* including 'zero case' but excluding 'causality cases'

## SCHEDULES OF ENQUIRY

This round was devoted to multiple subjects. During this round, the following schedules of enquiry were canvassed:

Schedule $0.0 \quad$ : List of households
Schedule $1.0 \quad$ : Consumer Expenditure
Schedule 10 : Employment and Unemployment

## SAMPLE DESIGN

Outline of sample design:
A stratified multi-stage design was adopted for the 68th round survey. The first-stage units (FSU) were the 2001 Census villages in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units, in both sectors, were households. In the case of large villages/ UFS blocks requiring formation of hamlet-groups (hg)/ sub-blocks (sb), the selection of two hg's/ sb's from each FSU formed an intermediate stage of sampling.

Stratification:
Two basic strata were formed at the State/ UT level, viz., (i) rural stratum comprising all rural areas of the district and (ii) urban stratum comprising all urban areas of the district. However, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of these also formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum.

## Sub-stratification:

Rural Sector: If ' $r$ ' was the sample size allocated for a rural stratum, the number of substrata formed was ' $\mathrm{r} / 4$. The villages within a district as per frame were first arranged in ascending order of population. Then cut-off points were marked off in this list demarcating sub-strata 1 to ' $r / 4$ 'in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less the same population.

Urban sector: If úwas the sample size for an urban stratum, the number of sub-strata formed was ' $u / 4$ '. If $u / 4$ was more than 1 , formation of 2 or more sub-strata was required. This was done by first arranging the towns in ascending order of number of households in the town as per UFS phase 2007-12 and then arranging the IV units of each town and the blocks within each IV unit in ascending order of their numbers. From this arranged frame of UFS blocks of all the towns/million-plus cities of a stratum, ú/4'sub-strata were formed in such a way that each substratum had more or less the same number of households as per UFS 2007-12.

## Allocation to strata/sub-strata:

With in each sector of a state/UT, the respective sample size had been allotted to the different strata/sub-strata in proportion to the population as per census 2001. Allocations at stratum level are adjusted to multiples of 4 with a minimum sample size of 4 . Allocation for each sub-stratum was 4 . Equal number of sample FSUs were allotted to the 4 sub-rounds.

## Selection of FSUs:

For the rural sector, from each sub-stratum, sample villages were selected with Probability Proportional to Size With Replacement (PPSWR), size being the population of the villages as per Census 2001.

For the urban sector, UFS 2007-12 phase was used for all towns and cities and FSUs were selected from each sub-stratum by Simple Random Sampling Without Replacement (SRSWOR).

Both rural and urban samples were drawn in the form of two independent sub-samples and equal sample sizes were allocated to the four sub-rounds.

## Criterion for hamlet-group/sub-block formation:

Large villages/blocks were divided into a suitable number of 'hamlet-groups' in the rural sector and 'sub-block' in the urban sector. In case population of the selected FSU was found having population 1200 or more, it was divided into a suitable number of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below:-

| Approximate present population of the sample FSU | no. of hgs/ sbs to be formed |
| :--- | :---: |
| less than 1200 (no hamlet groups/sub-blocks) | $1^{*}$ |
| $1200-1799$ | 3 |
| $1800-2399$ | 4 |
| $2400-2999$ | 5 |
| $3000-3599$ | 6 |
| and so on | $\ldots$ |

[^0]Once a large FSU had been divided into the required number of sub-FSUs (hamlet groups or sub-blocks), two of these sub-FSUs were selected in the following manner- the one with the largest population was purposively selected, and another was randomly selected from the remaining sub-FSUs by Simple Random Sampling (SRS). Listing and selection of the households was done independently in the two selected sub-FSUs.

## FORMATION OF SECOND STAGE STRATA AND ALLOCATION OF HOUSEHOLDS

In each selected village, some households were identified as affluent on the basis of a number of criteria such as possession of certain durables or assets. If there were more than 10 such households, the 10 most affluent of these were identified as the 'relatively affluent households 'of the village.

For urban areas, two cut off points 'A' and ' B '(in Rs.) were determined for each NSS region in such a way that the top $10 \%$ of the population had MPCE more than ' B ' and bottom $30 \%$ of the population had MPCE less than ' $A$ ' in 2009-10, as estimated by the NSS $66^{\text {th }}$ round survey.

Households listed in the selected FSU/sub-FSU were stratified into three second-stage strata (SSS). Composition of the SSS and the number of households planned to be surveyed from different SSS were as follows:

| SSS | Composition of SSS | No. of hhs Surveyed for Sch. 1.0, Type 1/Type 2 |  |
| :---: | :---: | :---: | :---: |
|  |  | FSU without $\mathrm{hg} / \mathrm{sb}$ formation | FSU with hg/sb formation (for each $\mathrm{hg} / \mathrm{sb}$ ) |
| RURAL |  |  |  |
| SSS 1 | Relatively affluent households | 2 | 1 |
| SSS 2 | Of the remaining, households having principal earning from non-agricultural activity | 4 | 2 |
| SSS 3 | Other households | 2 | 1 |
| URBAN |  |  |  |
| SSS 1 | Households having MPCE of top $10 \%$ of urban population (MPCE >B) | 2 | 1 |
| SSS 2 | Households having MPCE of middle $60 \%$ of urban population ( $\mathrm{A} \leq \mathrm{MPCE} \leq \mathrm{B}$ ) | 4 | 2 |
| SSS 3 | Households having MPCE of bottom $30 \%$ of urban population (MPCE $<\mathrm{A}$ ) | 2 | 1 |

## SELECTION OF HOUSEHOLDS

From each SSS the sample households were selected by Simple Random Sampling Without Replacement (SRSWOR).

## ESTIMATION PROCEDURE

## Notations:

$\mathrm{s}=$ subscript for s-th stratum
$\mathrm{t}=$ subscript for t -th sub-stratum (only for rural sector)
$\mathrm{m}=$ subscript for sub-sample $(\mathrm{m}=1,2)$
$\mathrm{i}=$ subscript for i-th FSU [village (panchayat ward) / block/non-UFS town]
d = subscript for a hamlet-group/sub-block ( $\mathrm{d}=1,2$ )
$\mathrm{j}=$ subscript for j -th second stage stratum in an FSU/ $\mathrm{hg} / \mathrm{sb}(\mathrm{j}=1,2$ or 3 )
$\mathrm{k}=$ subscript for k -th sample household under a particular second stage stratum within an FSU/hg/sb
$\mathrm{D}=$ total number of hamlet-groups/sub-blocks formed in the sample FSU
D* $=0$ if $\mathrm{D}=1$
$=(\mathrm{D}-1)$ for FSUs with $\mathrm{D}>1$
$\mathrm{N}=$ total number of FSUs in any urban stratum
$\mathrm{Z}=$ total size of a rural stratum/sub-stratum (= sum of sizes for all the FSUs of a stratum/substratum)
$\mathrm{z}=$ size of sample village used for selection.
$\mathrm{n}=$ number of sample FSUs surveyed including zero cases but excluding casualty for a particular sub-sample and stratum/sub-stratum.
$\mathrm{H}=$ total number of households listed in a second-stage stratum of an FSU/hamlet-group or sub-block of sample FSU
$h=$ number of households surveyed in a second-stage stratum of an FSU/hamlet-group or subblock of sample FSU.
$\mathrm{x}, \mathrm{y}=$ observed value of characteristics $\mathrm{x}, \mathrm{y}$ under estimation $\mathrm{X}^{\wedge}, \mathrm{Y}^{\wedge}=$ estimate of population total $\mathrm{X}, \mathrm{Y}$ for the characteristics $\mathrm{x}, \mathrm{y}$

In terms of the above symbols, $\mathrm{Y}_{\text {stmidjk }}=$ observed value of the characteristic y for the kth household in the jth second-stage stratum of the d-th segment $(d=1,2)$ of the i-th FSU belonging to the $m$-th sub-sample for the $t$-th sub-stratum of s-th stratum. However, for ease of understanding, a few symbols have been suppressed in the following paragraphs where they are obvious.

## Formulae for E stimation of Aggregates based on Schedule 10 for a particular subsample and stratum (for urban)/sub-stratum (for rural):

## Rural:

i) For j-th second stage stratum of a sub-stratum:

$$
\hat{Y}_{j}=\frac{Z}{n_{j}} \sum_{i=1}^{n_{j}} \frac{1}{z_{i}}\left[\frac{H_{i 1 j}}{h_{i 1 j}} \sum_{k=1}^{h_{i 1 j}} y_{i 1 j k}+D_{i}^{*} \times \frac{H_{i 2 j}}{h_{i 2 j}} \sum_{k=1}^{h_{i 2 j}} y_{i 2 j k}\right]
$$

ii) For all second-stage strata combined:

$$
\hat{Y}_{s t}=\sum_{j} \hat{Y}_{j}
$$

iii) Estimate for a stratum $\left(\hat{Y}_{s m}\right)$ will be obtained by adding sub-stratum level estimates $\left(\hat{Y}_{s t}\right)$

## Urban：

i）For j－th second stage stratum of a stratum：

$$
\hat{Y}_{j}=\frac{N}{n_{j}} \sum_{i=1}^{n j}\left[\frac{H_{i 1 J}}{h_{i 1 j}} \sum_{k=1}^{h_{i j j}} y_{i 1 j k}+D_{i}^{*} \times \frac{H_{i 2 j}}{h_{i 2 j}} \sum_{k=1}^{h_{i 2 j}} y_{i 2 j k}\right]
$$

ii）For all second－stage strata combined：

$$
\hat{Y}_{s t}=\sum_{j} \hat{Y}_{j}
$$

iii）Estimate for a stratum $\left(\hat{Y}_{s m}\right)$ will be obtained by adding sub－stratum level estimates $\left(\hat{Y}_{s t}\right)$

## Overall Estimate for Aggregates：

Overall estimate for aggregate for a stratum（ $\hat{Y}_{s}$ ）based on two sub－sample is obtained as：

$$
\hat{Y}_{s}=\frac{1}{2} \sum_{m=1}^{2} \hat{Y}_{s m}
$$

## Overall Estimate of Aggregates at State／UT level：

The overall estimate $\hat{Y}$ at the State／UT level is obtained by summing the stratum estimates（ $\hat{Y}_{s}$ ）over all strata belonging to the State／UT．

## SECTION THREE

## CONCEPTUAL FRAMEWORK

The concepts and technical terms used in the report are explained in detail for the benefit of users of this report.

## Household \& Household Size:

A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb "normally" means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer's/host's household. "Living together" was given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person's family members was taken to include the person also. Each inmate of a hotel, mess, boardinglodging house, hostel, etc., was considered to be a single- member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

## Public works:

Public works was defined as those activities which were sponsored by Government or Local bodies and which covered local area development works like construction of roads, dams, bunds, digging of ponds etc. as relief measures, or as an outcome of the employment generation schemes under the poverty alleviation programmes such as National Rural Employment Guarantee (NREG) public works, Sampoorna Grameen Rozgar Yojana (SGRY), and National Food for Work Programme (NFFWP) etc.

## Economic activity:

The entire spectrum of human activity falls into two categories - economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey of NSS $64^{\text {th }}$ round. Such activities included production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets. The full spectrum of economic activities as defined in the UN system of National Accounts (1993) was not covered in the definition adopted for the NSS $64^{\text {th }}$ round survey of Employment and Unemployment. Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption was considered as economic activity by NSSO. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity.

The term 'economic activity' as defined in the employment and unemployment survey of NSS $68^{\text {th }}$ round, therefore, included:
(i) all the market activities performed for pay or profit which result in production of goods and services for exchange.
(ii) of the non-market activities,
(a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 09 of NIC - 2008) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption and
(b) the activities relating to the own-account production of fixed assets. Own account production of fixed assets includes construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the stuation whether such activity was carried out illegally in the form of smuggling or not.

## Activity status

It is the activity situation in which a person was found during a reference period with regard to the person's participation in economic and no n-economic activities. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:
(i) working or being engaged in economic activity (work) as defined above,
(ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if the 'work' is available and
(iii) being not engaged in any economic activity (work) and also not available for' work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and 'unemployment', respectively. Identification of each individual into a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained for a person. In such an eventuality, the identification uniquely under any one of the three broad activity statuses was done by adopting either the major time or priority criterio.

The former was used for classification of persons according to the 'usual activity status' approach and the latter for classification of persons according to the ' current activity status' approach. Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorized as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code related to that activity in which relatively more time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorized as engaged in non-economic activity and pursuing more than one non-economic activity.

The detailed activity statuses under each of the three broad activity statuses (viz. employed, unemployed and not in labour force) and the corresponding codes used in the survey are given below:

```
code description
(a) working (or employed)
self-employed
    11 worked (self-employed) in household enterprises as own-account worker
    1 2 \text { worked (self-employed) in household enterprises as an employer}
    21 worked (self-employed) in household enterprises as helper
regular salaried/ wage employee
    31 worked as regular salaried/wage employee
casual labour
    41 worked as casual wage labour in public works other than NREG public works.
    4 2 ~ w o r k e d ~ a s ~ c a s u a l ~ w a g e ~ l a b o u r ~ i n ~ N R E G ~ p u b l i c ~ w o r k s .
    51 worked as casual wage labour in other types of works
    61 did not work owing to sickness though there was work in household
    enterprise
    62 did not work owing to other reasons though there was work in household
        enterprise
        did not work owing to sickness but had regular salaried/wage employment
        did not work owing to other reasons but had regular salaried/wage employment
```

(b) not working but seeking/available for work (or unemployed)

81 sought work /did not work but was seeking and/or available for work (for usual status/ current weekly status approach)
82 did not seek but was available for work (for current weekly status approach)
(c) neither working nor available for work (or not in labour force)

91 attended educational institutions
92 attended to domestic duties only
attended to domestic duties and was also engaged in free collection of
93 goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
94 rentiers, pensioners, remittance recipients, etc.
95 not able to work owing to disability
97 others (including beggars, prostitutes, etc.)
98 did not work due to temporary sickness (for casual workers only)

It may be noted that codes $61,62,71$ and 72 were applicable for current weekly status and current daily status approaches only.

## Workers (or employed):

Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained from work for reason of illness, injury or other physical disability, bad weather r , festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non- farm activities were also considered as workers. Relevant activity status codes within 11 to 72 were assigned for workers. Workers were further categorized as self-employed (relevant activity status codes: 11, 12, 21, 61, 62), regular salaried/wage employee (relevant activity status codes: 31, 71, 72), and casual wage labour (relevant activity status codes: 41 and 51).

Seeking or available for work (or unemployed) : Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those who were 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed.

Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) together constituted the labour force. Persons with activity status codes $11-82$ constituted the labour force.

Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'.

Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in household enterprises. The essential feature of the self- employed is that they have autonomy (i.e., how, where and when to produce)
and economic independence (i.e., market, scale of operation and money) for carrying out their operation. The remuneration of the self- employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the sales of output produced by selfemployed persons.

Categories of self-employed persons: Self-employed persons were categorized as follows:
(i) own-account workers : those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;
(ii) employers: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
(iii) helpers in household enterprise: those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

Regular wage/salaried employee: These were persons who worked in others' farm or non-farm enterprises (both household and non household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

Casual wage labour: A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labour.

Different approaches followed to determine activity status: The persons surveyed were classified into various activity categories on the ba sis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. The procedure adopted to arrive at these three measures is given below.

Usual principal activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively longer time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the usual principal activity status of the person. To decide the usual principal activity of a person, first a two stage dichotomous classification was followed for determining the broad usual principal activity status of the person viz. (i) employed, (ii) unemployed, and (iii) not in labour force. Persons were first categorized as those in the labour force and those not in the labour force depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (not in the labour force). For persons belonging to the labour force, the broad activity status of either 'working' (employed) or 'not working but seeking and/or available for work' (unemployed) was ascertained based on the same criterion viz. relatively longer time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively longer time spent on such activities. In terms of activity status codes (stated earlier), codes 11-51 were applicable for persons classified as workers and codes 91-98 for those who were not in the labour force. In the usual status approach, a single code 81 was assigned for persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned for unemployed persons according to current weekly status and current daily status approach.

Usual subsidiary economic activity status: A person whose principal usual status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11-51 only were applicable for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:
(i) a person may be engaged in a relatively longer period during the 365 days in an economic (a non-economic activity) and for a relatively small period, which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively minor period, was considered as his/her subsidiary economic activity.
(ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively small period in a subsidiary capacity. The economic activity, which was pursued for a relatively shorter time, was considered as his/her subsidiary economic activity.

Usual activity status considering principal and subsidiary status taken together: The usual status, determined on the basis of the usual principal activity and usual sabsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status ( $\mathrm{ps}+\mathrm{ss}$ ), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

Current weekly activity status: The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided on the basis of a certain priority cum major time criterion. According to the priority criterion, the status of 'working' gets priority over the status of 'not working but seeking or available for work' that, in turn, gets priority over the status of 'neither working nor available for work'. A person was considered working (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of survey.

A person was considered 'seeking or available for work (or unemployed)' if, during the reference week, no economic activity was pursued by the person but he/she made efforts to get work or had been available for work any time during the reference week though not actively seeking work in the belief that no work was available. A person who had neither worked nor was available for work anytime during the reference week was considered as engaged in non-economic activities (or not in labour force).After deciding the broad current weekly activity status of a person on the basis of 'priority' criterion, the detailed current activity status was then decided on the basis of 'major time' criterion if that person pursued multiple economic activities. The current weekly activity status of a person could be any one of the detailed activity status and could have any of the valid codes within 11 to 98 . Of these codes, 11 to 72 pertained to workers, 81 to 82 for unemployed and 91 to 98 for persons not in the labour force.

Current daily activity status : The activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people could even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person was determined on the basis of his/her activity status on each day of the reference week using a priority-cum-major time criterion (day to day labour time disposition). Time disposition was recorded for every member of the sample households. This involved recording of different activities pursued by the members along with the time intensity in quantitative terms for each day of the reference week. The different activities were identified and recorded in terms of 'activity status' and 'industry'
codes for persons in urban areas and 'activity status', 'industry' and 'operation' codes for persons in rural areas. The description (and codes used) of current daily activity statuses is the same as those of current weekly activity status. The terms 'industry' and 'operation' are explained later. The following points were considered for assigning the time intensity and determining the current daily status of a person:
i) Each day of the reference week was looked upon as comprising either two 'half days' or a 'full day' for assigning the activity status. For recording time disposition for activities pursued by a person in a day, an intensity of 1.0 was given against an activity that was done for 'full day' and an intensity of 0.5 against the activity which was done for 'half day'.
ii) A person was considered 'working' (employed) for the full day if he/she had worked for 4 hours or more during the day.
iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively longer time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities.
iv) If the person had worked for 1 hour or more but less than 4 hours, he/she was considered 'working' (employed) for half-day and 'seeking or available for work(unemployed) or 'neither seeking nor available for work' (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.
v) If a person was not engaged in any 'work' even for 1 hour on a day but was seeking/available for work for 4 hours or more, he was considered 'unemployed' for the entire day. But if he was 'seeking/ available for work' or more than 1 hour and less than 4 hours only, he was considered unemployed' or half day and 'not in labour force' for the other half of the day.
vi) A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and was assigned one or two of the detailed noneconomic activity statuses depending upon the activities pursued during the reference day.

The current weekly status of a person is derived from the intensities assigned for the daily activities performed by a person during the 7 days of the reference week.

While assigning intensity, an intensity of 1.0 was given against an activity which was done for "full day" and 0.5 , if it was done for "half day".

Industry and occupation of the work activity: For the employed persons, to record the industry of work, 5-digit classification of NIC-2008 was used and to record the type of occupation, 3-digit classification of NCO-2004 was used. In case two or more industry- occupation combinations corresponding to the status code were reported by a person, the industry-occupation was taken as the one in which relatively more time was spent during the reference period by the person.

Wage and salary earnings: Information on wage and salary earnings was collected separately for each of the wage/salaried work recorded for a person in a day. Here, earnings refer to the wage/salary income (and not total earnings taking into consideration of all other activities done) received/receivable for the wage/salaried work done during the reference week by a wage/salaried employee and casual labourer. The wage/ salary received or receivable may be in cash or kind or partly in cash and partly in kind. While recording the earnings following conventions were followed.
i) The wages in kind were evaluated at the current retail price.
ii) Bonus and perquisites such as free accommodation, reimbursement of expenditure for medical treatment, free telephones, etc. evaluated at the cost of the employer or at retail prices and duly apportioned for the reference week were also included in earnings.
iii) Amount receivable as 'over-time' for the additional work done beyond normal working time was excluded.

It may be noted that in the survey, at most two activities could be recorded for a person in a day. Therefore, it is possible that a person might have carried out two or more wage/salaried activities in a day, but only one activity or two activities at the most, depending upon the time spent on those activities, was recorded. In that case, the wage/salary income only from that activity(s) was collected and recorded separately, and not the total income of the person from all the activities done for the entire day.

Procedure for determining household type: On the basis of the sources of the household's income during the last 365 days preceding the date of survey, the household types were assigned. For this purpose, only the household's income from economic activities was considered. The income of servants and paying guests was not taken as the income of the household.

For the rural areas, household types were as follows:
self-employed in non-agriculture; agricultural labour; other labour;
self-employed in agriculture; others.

For urban areas, the household types were as follows:
self-employed; regular wage/salary earning; casual labour ; others.

Procedure for determining household industry and occupation: To determine the household principal industry and occupation, the general procedure followed was to list all the occupations pertaining to economic activities pursued by the members of the household excluding those employed by the household and paying guests (who in view of their staying and taking food in the household were considered as its normal members) during the one year period preceding the date of survey, no matter whether such occupations were pursued by the members in their principal or subsidiary (on the basis of earnings) capacity. Out of the occupations listed that one that fetched the maximum earnings to the household during the last 365 days preceding the date of survey was considered as the principal household occupation. If one or more members of the household pursued the household occupation in different industries, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, was considered as the principal industry of the household.

## Labour Force Parameters：

The basic concept of important Labour Force Parameters are given below：

Labour Force Participation Rate：LFPR is described as the number of persons in the labour force per 1000 persons．

LFPR＝［Labour Force＊／Total Population］X 1000
＊Labour Force $=$ No．of Employed + No．of Unemployed persons

Work Force Participation Rate：Similarly the number of persons employed per 1000 persons is refered to as Work Force Participation Rate（WFPR）or Work Participation Rate（WPR）．

$$
\boldsymbol{W P R}=\text { [No. of Employed persons } / \text { Total Population] X } 1000
$$

Unemployed Rate：Unemployed Rate（UR）is defined as the number of persons unemployed per 1000 persons in the labour force（ employed \＆unemployed）．

$$
\boldsymbol{U R}=[\text { No. of Unemployed persons } / \text { Labour Force*] X } 1000
$$

＊Labour Force $=$ No．of Employed + No．of Unemployed persons

## SECTION FOUR

## EMPLOYMENT \& UNEMPLOYMENT SITUATION IN DELHI

The NSS $68^{\text {th }}$ round survey was conducted during July 2011 to June 2012 to study the employment - unemployment situation in Delhi. The main results of the state sample are presented in this section under different sub-headings viz. Demographic profile, Labour force, Work force, Unemployment and Persons out of Labour force. The findings are explained with the help of statements and graphic presentation. Comparison with earlier survey rounds was also made to ascertain the degree of variation during the intervening period. The estimates are based on 128 rural \& 1912 urban households and 640 sample persons of rural \& 7607 sample persons of urban.

### 4.1 DEMOGRAPHIC PROFILE

To study the employment - unemployment situation of a state, it is necessary to look into the socio-economic structure of households and the demographic pattern of the population of the state during that time. Therefore, certain information on socio-economic condition of sample households and demographic data pertaining to the surveyed individuals were also collected in this survey. In this sub-section, the main findings relating to these aspects are presented.

## ESTIMATED POPULATION

The Survey estimated that there were about 42.98 lakh households with an average household size of 3.98 persons during the above said period. Out of the total households 0.86 lakh ( $1.99 \%$ ) were in rural and 42.12 ( $98.01 \%$ ) lakhs in urban areas. The average household size was 4.57 persons in rural area and 3.96 persons in urban areas. The average number of persons gainfully employed per household was estimated to be 1.32.

## Statement 4.1.1: Distribution of households/Population

Statement 4.1.2 gives the distribution of population Monthly Per Capita Expenditure (MPCE) class-wise. $0.40 \%$ of the total population was in upto Rs. 500 class, $2.29 \%$ in Rs. 501 1000 class, $15.47 \%$ in Rs.1001-1500 Class, 16.36\% in Rs.1501-2000 class, 11.37\% in Rs.20012500 class, $9.76 \%$ in Rs. $2501-3000$ and the remaining $44.34 \%$ in above Rs. 3000 class. The distribution of population over broad age group reveals that while the proportion of persons in the population in the age group of $0-14$ years was around $27.37 \%$. It was $66.31 \%$ in the age group of $16-59$ years, and $6.32 \%$ in the age group of 60 years and above.

## Statement 4.1.2: Estimated Population \& Households by MPCE Class

| MPCE (Rs.) | No. of Household | 0-5 yrs |  |  | 6-15 years |  |  | 16-59 years |  |  | 60 \& Above |  |  | all age |  |  | $\begin{aligned} & \% \text { to } \\ & \text { total } \end{aligned}$ | Avg <br> Household Size |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## HOUSEHOLD TYPE

The nature and type of work from which a household derives its major part of income is an important indicator of the activity pattern of its member. The distribution of household by household type is given in statement 4.1.4. The statement reveals that during July 2011 to June 2012, 40.75\% rural household recourse to self-employment and $38.10 \%$ household were regular wage/ salary earner. Another $21.15 \%$ of the rural population belonged to casual labour/others.

Among urban Delhi regular wage/salaried employment was the mainstay of $52.68 \%$ urban household and about $36.70 \%$ household had income from self-employment.

## Statement 4.1.4 : Distribution of household by household type.

|  | No of Households | \% |

## HOUSEHOLD PRINCIPAL INDUSTRY AND OCCUPATION

To determine the household principal industry, the general procedure followed was to list the all the occupations pertaining to economic activities pursued by the members of the household during the last 365 days preceding the date of survey. Out of the occupations listed one which fetched the maximum earning to the household was considered as the principal household occupation. If one or more member of the household pursued the household occupation in different industries, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, was considered as the principal industry of the household.

Statement 4.1.5. gives the distribution of households by broad principal household industry. The principal household industry of $26.00 \%$ households was 'Services', followed by $22.36 \%$ Manufacturing, $17.61 \%$ Trade, $9.52 \%$ Construction, $8.96 \%$ Transport \& Storage, 4.95\% Information \& Communication, 3.73\% Accommodation \& Food services, 1.51\% Electric Gas \& Water, 0.30\% Agriculture and the remaining 5.34\% Non-Economic Activities. Manufacturing, Trade and other services taken together accounted for nearly $\mathbf{2} / \mathbf{3}^{\text {rd }}$ of total households.

Statement 4.1.5: Distribution of Household by principal household industry (NIC 2008)

| Principal Household Industry | Estimated Households |  |  | \% to total |
| :--- | ---: | ---: | ---: | ---: |
|  | Rural | Urban | Combined |  |

### 4.2 LABOUR FORCE

The term labour force may be taken to means, those persons who are economically active in the economy. In other words labour force includes persons employed as well as those seeking and available for work. In nutshell it is composed of employed and unemployed persons. The results in this section are based on the data collected during NSS $68^{\text {th }}$ round (July 2011 -June 2012) on usual activity (principal + subsidiary) status.

The survey revealed that of the total projected population (all age groups) of 170.89 lakh in Delhi, 59.73 lakh ( $34.95 \%$ ) of them were estimated to be in the labour force and 111.16 lakhs (65.05\%) were out of labour force during 2011-2012.

Sector wise break-up indicated that $23.20 \%$ of the rural and $35.23 \%$ of the urban population figured in the labour force of Delhi. Further analysis of population revealed that out of the total male population $58.92 \%$ were in labour force whereas only $7.46 \%$ of the total female were in economically active category.

Composition of labour force in terms of sex and sector is presented in statement 4 .2.1. Out of the total labour force $90.06 \%$ were male and $9.94 \%$ were female. Rural areas of Delhi account for $1.52 \%$ of labour force whereas $98.48 \%$ of economically active persons were in urban Delhi.

Statement 4.2.1: Distribution of Population by employment status.

|  | 61st Round <br> (July 2004 - June 2005) | 544 | 79 | 335 | 118 |
|  | $55^{\text {th }}$ Round <br> (July 1999-June 2000) | 530 | 99 | 335 | 155 |

It is evident from the statement 4.2.3 that out of every 1000 persons in Delhi only 350 (about one-third) were found to be economically active persons. LFPRs have registered a decrease in rural and increase in urban Delhi during 2011-2012 when compared to that of 2009-2010. Sex ratio in case of labour force participation rates revealed that for every 1000 male persons in labour force there were only 110 female persons in economically active sphere.

## LABOUR FORCE OF POPULATION OF AGE 15 YEARS AND ABOVE

Labour force in respect of population of age 15 years and above is perhaps the appropriate and meaningful indicator. Statement 4.2.5 provides these details sector and gender-wise. During 2011-2012 about 59.19 lakh ( $46.58 \%$ ) persons were in the labour force in a population of 127.07 lakhs in the age group of 15 years \&above.

## Statement 4.2.5: Labour Force participation Rate of Age Group 15 Years and above by Sex and Sector.

| Item | Male | Female | All | $\begin{gathered} 66^{\text {th }} \text { NSS round } \\ (2009-10) \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| RURAL |  |  |  |  |
| Labour Force | 78637 | 12194 | 90831 | 139817 |
| \% to the Total Pop | 59.15 | 10.76 | 36.88 | 45.47 |
| Total Population | 132956 | 113321 | 246276 | 307461 |
| URBAN |  |  |  |  |
| Labour Force | 5246457 | 581269 | 5827726 | 5304103 |
| \% to the Total Pop | 78.12 | 10.12 | 46.77 | 46.27 |
| Total Population | 6715935 | 5744360 | 12460295 | 11461752 |
| DELHI |  |  |  |  |
| Labour Force | 5325094 | 593463 | 5918557 | 5443922 |
| \% to the Total Pop | 77.75 | 10.13 | 46.58 | 46.25 |
| Total Population | 6848891 | 5857680 | 12706572 | 11769213 |

On the other hand labour force accounted for $46.25 \%$ in the same age group population during 2009-2010 ( $66^{\text {th }}$ NSS round). This makes one point clear that the number of persons in the labour force in the total population increased marginally during 2011-2012 when compared to that of 2009-2010. Sex-wise distribution of population for 15 years \& above group revealed that out of every 1000 males 778 of them were in labour force. In case of females this ratio was 1000:101. Labour force data for different age groups is also available sector-wise and gender-wise in statement 4.2.5.

Among males labour force proportion percentage for the age-groups 30-44 years and 45-59 years was more than $90 \%$. In case of 15-29 years age groups among males it was about $61 \%$.

Among females labour force proportion percentage was at its best, namely, about $12 \%$ for the age-group 30-44 years and 45-59 both.

Statement 4.2.6: Distribution of Labour Force by Age Group and Sector.

| Age Group | Male |  |  | Female |  |  | Persons |  |  |

Analysis of statement 4.2.6 reveals that proportion of labour force in total population by age group for Delhi as a whole was more than $50 \%$ in case of age-groups 30-44 and 45-49 and about $39 \%$ in case of age group 15-29 years.

### 4.3 WORK FORCE

Work Force refers to the persons gainfully employed in economic activities as selfemployed, salary/wage paid etc. This includes agricultural and non-agricultural activities, seasonal and perennial, regular and casual employment. The results are based on usual Activity (ps+ss) Status data. Survey estimates are based on a sample of 2745 number of employed persons during 2011-2012.

Statement 4.3.1: Distribution of Work Force.

| Item | Estimated Number of Persons |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Rural | \% | Urban | \% | Delhi | \% |

## COMPOSITION OF WORK FORCE:

The survey estimated the workforce of Delhi at 57.06 lakhs which constituted about $33.39 \%$ of the total population of Delhi in 2011-2012. Out of the total male persons $56.59 \%$ were in workforce as against only $6.78 \%$ among female persons. Further, $21.02 \%$ of rural and $33.68 \%$ urban population was found to be engaged in gainful employment.

Distribution of estimated work force in terms of sex and sector as presented in statement 4.3.1, revealed that out of the total workforce, $90.54 \%$ were male and $9.46 \%$ female. Urban-rural break-up brought to light the contribution of urban areas in the total workforce to the tune of $98.56 \%$ and rest is from rural areas.

## EMPLOYMENT RATE / WORK FORCE PARTICIPAION RATE

Statement 4.3.2 gives the work force participation rates in Delhi and comparison with previous NSS data on the subject taking in to account principal plus subsidiary activity status. In rural, for every 1000 persons 210 were employed and in urban it was 337 persons. On the whole, work participation rate stands at 334 persons per thousand population in Delhi.

Statement 4.3.2: Work Force Participation Rate

Statement 4.3.3 provides a comparative picture of rate of employment under different approaches adopted during the survey. It is evident that rate of employment in Delhi remains more or less same, except of marginal variations in this regard.

## WORK PARTICIPATION RATE OF AGE GROUP 15 YEARS AND ABOVE

Work force in the age-group of 15 years and above is presented in Statement 4.3.4. Workforce participation in respect of male was as high as $74.64 \%$ and in case of female it was only $9.22 \%$ and overall work force participation works out to $44.48 \%$ in Delhi. Rural -urban break-up revealed that $33.43 \%$ was in rural and $44.70 \%$ in urban.

Statement 4.3.4: Work Participation Rate of Age Group 15 Years and above by Sex and Sector.

| Item | Male | Female | All |
| :--- | ---: | ---: | ---: |
| Rural | 70421 | 11901 | 82322 |
| Employed | 52.97 | 10.50 | 33.43 |

### 4.4 UNEMPLOYMENT

For the purpose of the survey persons who are "seeking as well as available" for work were classified as unemployed. In other words unemployment refers to involuntary unemployment of persons due to non-availability of work. The data presented in this section is based on the Principal usual activity ( $\mathrm{ps}+\mathrm{ss}$ ) status of the persons during reference period of one year preceding the survey date. The survey estimates are based on a sample of 146 persons ( 110 male and 36 female) selected and surveyed through a systematic sampling during July 2011 - June 2012.

The survey estimated the unemployed persons at 2.66 lakh persons against an estimated labour force of 59.73 lakhs persons in Delhi during July 2011 - June 2012.

Statement 4.4.1: Distribution of Estimated Persons Unemployed.

| Item | Estimated number of unemployed persons |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Rural | \% | Urban | \% | Delhi | \% |
| UNEMPLOYED |  |  |  |  |  |  |
| Male | 8216 | 96.55 | 204690 | 79.36 | 212905 | 79.91 |
| Female | 293 | 3.45 | 53227 | 20.64 | 53520 | 20.09 |
| Total | 8509 | 100.00 | 257917 | 100.00 | 266426 | 100.00 |
| ESTIMATED LABOUR FORCE |  |  |  |  |  |  |
| Male | 78637 | 86.57 | 5300443 | 90.12 | 5379080 | 90.06 |
| Female | 12194 | 13.43 | 581269 | 9.88 | 593463 | 9.94 |
| Total | 90831 | 100.00 | 5881711 | 100.00 | 5972543 | 100.00 |

In other words unemployed persons (all age-groups) constituted about $4.46 \%$ of Delhi's Labour Force. It is evident from the statement 4.4.1 that $3.96 \%$ of total males and $9.02 \%$ of total females were unemployed. It is further revealed that $9.37 \%$ of rural and $4.39 \%$ of the urban Labour Force is found to be unemployed. The following graphs explain these details with reference to the respective share of Labour Force.

Out of the total persons estimated to be unemployed 2.58 lakh ( $96.81 \%$ ) were in urban and 0.08 lakh ( $3.19 \%$ ) in rural areas of Delhi. Sex-wise break up of unemployed revealed that 2.13 lakhs ( $79.91 \%$ ) males and 0.53 lakhs ( $20.09 \%$ ) females were estimated to be in this category.

The following graph depicts the composition of estimated unemployment sex-wise and sector-wise separately.

## UNEMPLOYMENT RATE

Unemployment rate is expressed in terms of no. of persons unemployed per 1000 Labour Force. Statement 4.4.2 gives the unemployment rate, sex and sector wise.

For every 1000 male persons in labour force in Delhi 40 were unemployed and in case of females for every 1000 females in labour force 90 were unemployed. On the whole for every 1000 persons in labour force in Delhi 45 were unemployed. Unemployment rate in respect of male in 2011-2012 when compared with that of 2009-2010 increased considerably in rural and urban both, which is of concern to policy makers and administrators.

## Statement 4.4.2: Unemployment Rate

| SECTOR | Round | UNEMPLOYMENT RATE (PER 1000 PERSONS IN LABOUR FORCE) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

|  | $55^{\text {th }}$ Round <br> (July 1999 - June 2000) | 70 | 487 | 126 | 1079 |

Similar analysis in respect of females revealed that unemployment rate had decreased considerably in rural while it had registered a rise in urban. Sectoral composition of unemployment rate between 2009-2010 and 2011-2012 showed a decreasing trend in rural and increasing trend in urban Delhi.

Sex ratio of unemployment indicated that for every 1000 unemployed males in rural there were 36 females unemployed where as in urban for every 1000 males unemployed 260 female were recorded by the survey. Sex ratio of unemployed Persons for Delhi as a whole was 251 female for every 1000 unemployed males in 2011-2012.

## UNEMPLOYMENT BY AGE GROUP AND SEX

Proportion of unemployment in different age groups is presented in statement 4.4.3 sex wise. Among the males proportion of unemployment was maximum in the age group 1529 years ( $93.58 \%$ ) for obvious reasons.
Statement 4.4.3: Distribution of Unemployed Persons by Age Group and Sex.

| Age Group | Unemployed Persons |  |  | \% to the Total |

### 4.5 PERSONS OUT OF LABOUR FORCE

Survey also focussed on certain important aspects relating to persons out of labour force at the time of survey. This group includes infants, students, persons engaged in domestic duties, pensioners and other dependent on remittances. Analysis of the magnitude of such persons in the population is essential for future planning. To illustrate, persons in the category of students are those awaiting to enter labour force and housewives who are willing to take up assignments by confining to their house during spare time etc.

It is evident from the statement 4.5 .1 that out of the total projected population of 170.89 lakhs, about 111.16 lakh persons (about $65.05 \%$ ) were out of labour force. Among males about $34 \%$ and $66 \%$ of females were in this group. Further $76.80 \%$ of rural population and $64.77 \%$ of urban population were out of labour force in Delhi.

## Statement 4.5.1: Distribution of Number of Persons out of Labour Force

| Item | Estimated Number of Persons |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Rural | \% | Urban | \% | Delhi | \% |

## SECTION FIVE

## NOTE ON STATISTICAL TABLES

## ESTIMATED POPULATION:

The estimated population of Delhi as per survey was $92,42,765$ persons against projected population of 1,70,88,799 persons as on 01-01-2012 on the basis of recently released estimates of Census-2011 by Registrar General of India. This has been derived using the formula, $\mathrm{A}=\mathrm{A} 1 *[1+\mathrm{R} / 100]_{10 / 120}$, where A 1 is the Census population as on $1^{\text {st }}$ March 2011, R is the percentage decadal change in population between census 2001 and 2011 and A is the projected population as on $1^{\text {st }}$ January 2012.

## Statement 5.1: Estimated Survey Population \& Households

| Item | Rural |  |  | Urban |  |  | Total |  |  |

Comparison of survey population with projected population (as on 01.01.2012) based on RGI estimates was made to ascertain the discrepancies, if any, between the two sets of data. Sample survey estimates were found to be on the lower side in urban and on higher side in rural for obvious reasons. For the benefit of data users adjustment factor was worked out and presented in the statement 5.1. This is to be applied in respect of rural (deflated) and urban (inflated) aggregates to get the data comparable with RGI's population projections. However these adjustment factors have already been applied while presenting the data in all the statements under section 4 of this report. Similarly, Adjustment Factor for households was also worked out and inserted in the statement 5.1 above. To keep the survey results intact the average household size as per survey results used as a denominator to the projected population to get the projected households. Details of the sample are given in the statement 5.2.

Statement 5.2: Age-Group wise Distribution of Sample Persons by Gender

| Age Group | Rural |  |  | Urban |  |  | Combined |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |
| 0-4 | 29 | 22 | 51 | 255 | 228 | 483 | 284 | 250 | 534 |
| 5-9 | 29 | 27 | 56 | 336 | 317 | 653 | 365 | 344 | 709 |
| 10-14 | 34 | 35 | 69 | 418 | 312 | 730 | 452 | 347 | 799 |
| 15-19 | 48 | 28 | 76 | 423 | 344 | 767 | 471 | 372 | 843 |

[9] remarks by investigator/assistant superintending officer

## [10] comments by supervisory officer (s)

## Codes for Block 3

item 4: household type:
for rural areas: self-employed in: agriculture-1, non-agriculture -2; regular wage/salary earning-3, casual labour in: agriculture-4, non-agriculture -5; others -9.
for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3 , others -9.
item 5: religion: Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9. item 6: social group: scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.

## Codes for Block 4

col. (3): relation to head:
self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5 , grandchild -6, father/ mother/ father-in-law/ mother-inlaw -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8 , servants/ employees/ other non-relatives -9.

## col. (6): marital status:

never married -1 , currently married -2 , widowed -3 , divorced/separated -4 .

## col. (7): educational level-general:

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12 , postgraduate and above -13 .

## col. (8): educational level-technical:

no technical education -01,
technical degree in agriculture/ engineering/ technology/ medicine, etc. -02,
diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07;
diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12 .

## col. (9): status of current attendance:

currently not attending:
never attended: school too far -01, to supplement household income -02, education not considered necessary -03 , to attend domestic chores -04, others -05;
ever attended but currently not attending: school too far -11 , to supplement household income -12, education not considered necessary -13 , to attend domestic chores -14, others -15;
currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kindergarten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29 , medicine -30 , other subjects -31 ; post graduate and above -32 , diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37 ; diploma or certificate (graduate level) in: agriculture 38, engineering/ technology -39, medicine -40 , crafts -41 , other subjects 42; diploma or certificate in post graduate and above level- 43.
col. (10): type of institution: government -1, local body-2, private and aided -3 , private and unaided -4, not known -5.
col. (11): whether currently registered with any placement agency: registered: only in government employment exchanges-1, only in private placement agencies-2, in both government employment exchanges and private placement agencies-3; not registered -4.
col. (12): whether receiving/received any vocational training:
yes: receiving formal vocational training -1 ; received vocational training. formal -2 ,
non-formal: hereditary-3, self-leanring-4, learning on the job-5, others -6; did not receive any vocational training -7.
col. (13): field of training:
mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10 , agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13 , office and business related work -14 , driving and motor mechanic work -15, beautician, hairdressing \& related work -16, work related to tour operators/ travel managers -17, photography and related work -18 , work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.
col. (15): whether worked in MGNREG works during last 365 days:
worked-1, sought but did not get work-2, did not seek work-3.

## Codes for Block 5.1

## col. (3): status:

worked in h.h. enterprise (self-employed): own account worker -11, employer-12, worked as helper in h.h. enterprise (unpaid family worker) -21; worked as regular salaried/ wage employee -31 , worked as casual wage labour: in public works -41 , in other types of work -51 ; did not work but was seeking and/or available for work -81, attended educational institution -91, attended domestic duties only -92, attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use -93, rentiers, pensioners, remittance recipients, etc. -94, not able to work due to disability -95, others (including begging, prostitution, etc.) -97.
col. (5): industry: 5-digit code as per NIC -2008.
col. (6): occupation: 3-digit code as per NCO -2004.
col. (8): location of workplace:
workplace in rural areas and located in: own dwelling unit-10, structure attached to own dwelling unit-11, open area adjacent to own dwelling unit-12, detached structure adjacent to own dwelling unit- 13, own enterprise/unit/office/shop but away from own dwelling-14, employer's dwelling unit -15, employer's enterprise/unit/office/shop but outside employer's dwelling -16, street with fixed location-17, construction site-18, others -19; workplace in urban areas and located in: own dwelling unit-20, structure attached to own dwelling unit-21, open area adjacent to own dwelling unit-22, detached structure adjacent to own dwelling unit- 23, own enterprise/unit/office/shop but away from own dwelling-24, employer's dwelling unit -25 , employer's enterprise/unit/office/shop but outside employer's dwelling -26, street with fixed location-27, construction site-28, others -29; no fixed workplace -99.
col. (9): enterprise type: proprietary: male -1, female -2; partnership: with members from same hh. -3, with members from different hh. -4; Government/public sector-5, Public/Private limited company-6, Co-operative societies/trust/other non profit institutions -7, employer's households(i.e., private households employing maid servant, watchman, cook, etc.) -8, others -9.
col. (11): number of workers in the enterprise: less than $6-1,6 \&$ above but less than $10-2,10$ \& above but less than $20-3,20$ \& above -4, not known -9.
col. (12): type of job contract: no written job contract -1 ; written job contract: for 1 year or less -2, more than 1 year to 3 years -3, more than 3 years -4.

## col. (14): availability of social security benefits

eligible for: only PF/ pension (i.e., GPF, CPF, PPF, pension, etc.) -1, only gratuity -2 , only health care \& maternity benefits -3 , only $P F /$ pension and gratuity -4 , only PF/ pension and health care \& maternity benefits -5 , only gratuity and health care \& maternity benefits -6, PF/ pension, gratuity, health care \& maternity benefits -7; not eligible for any of above social security benefits -8, not known-9
col. (15): method of payment: regular monthly salary -1, regular weekly payment -2, daily payment -3 , piece rate payment -4 , others -5 .
col. (16): period of seeking/available for work during last 365 days: sought/available for: less than 1 month $-1,1$ month \& above but less than 3 months -2, 3 months \& above but less than 7 months $-3,7$ months \& above but less than 10 months -4, 10 months to 12 months - 5; did not seek/ not available -6.

## Codes for Block 5.2

col. (3): status: codes as in col. 3, block 5.1. (only codes 11 to 51 are applicable here).
col. (5) : industry : 5-digit code as per NIC-2008.
col. (6) : occupation : 3-digit code as per NCO-2004.
col. (7) : location of workplace: codes as in col. 8, block 5.1
col. (8): enterprise type: codes as in col. 9, block 5.1.
col. (10): number of workers in the enterprise: codes as in col. 11, block 5.1
col. (11): type of job contract: codes as in col. 12, block 5.1.
col. (13): availability of social security benefits: codes as in col. 14, block 5.1.
col. (14): method of payment : codes as in col. 15, block 5.1.
