MESSAGE

I am pleased to present the report titled 'Comprehensive Annual Modular Survey in Delhi 2022-23' prepared by the Directorate of Economics & Statistics, Govt. of NCT of Delhi as per the methodology of the National Sample Survey (NSS), Ministry of Statistics & Programme Implementation (MoSPI), Govt. of India (GoI). All the estimates presented in the report are based on the State Sample (Delhi) data collected through the Schedule CAMS 2022-23: "Comprehensive Annual Modular Survey" during the period July 2022 to June 2023.

The "Comprehensive Annual Modular Survey (CAMS), 2022-23" was conducted to gather insights to generate important socio-economic indicators for the Sustainable Development Goals (SDGs), demand for which has been increased significantly during past few years. The importance for having globally comparable indices measuring and monitoring the performance of the country in various socio-economic dimensions has also been emphasized in different forum.

The technical guidance provided by MoSPI, GoI and the committed work of field functionaries had made the foundation of this survey. The cooperation extended by the sample households is acknowledged. I extend special thanks to the field staff for their efforts in collection of data. Finally, I extend my words of appreciation to the Directorate of Economics & Statistics, Govt. of NCT of Delhi for their sincere efforts in producing valuable output in form of this report.

The data collected through this survey is highly valuable for multiple stakeholders, including policymakers, researchers, economist and social planners.

Suggestions and comments from readers for further improvement are highly solicited.

FOREWORD

NSS 79th round was earmarked for collection of data for compilation of a number of SDG indicators through a "Comprehensive Annual Modular Survey (CAMS)". This new modular approach was designed to strengthen the availability of comprehensive data by integrating different subject modules within a common survey framework. This report contains the estimates of various quantitative characteristics on access to facilities like drinking water, sanitation, hygiene etc.; person level information on education, Health, Mobile & Internet, ICT skills, financial inclusion and other various indicators.

The National Statistical Office (NSO), Ministry of Statistics and Programme Implementation (MoSPI), Government of India (GoI), continues to conduct large-scale socio-economic surveys across the country through the National Sample Surveys (NSSs). The Directorate of Economics and Statistics, GNCTD actively participated in this round by adopting the standard methodology developed by National Statistical Office (NSO), MoSPI, GoI. Fieldwork was undertaken for state sample across selected sample households in Delhi during July 2022 – June 2023. The survey covered key indicators necessary for evaluating progress on several Sustainable Development Goals (SDGs).

I am thankful to the National Sample Survey (NSS), Ministry of Statistics & Programme Implementation (MoSPI), Govt. of India for their constant guidance and especially appreciated the technical officers of the Household Survey Division, NSO for providing technical assistance/support. The dedication of field staff in collecting data amidst field challenges is sincerely acknowledged. Special thanks are due to the team involved in data validation, report writing and tabulation at the state level.

It is hoped that this report will serve as a valuable resource for policymakers, planners, researchers and other stakeholders working towards inclusive development.

Suggestions and feedback for improving future rounds and reporting are welcome and appreciated.

PREFACE

The present report titled "Comprehensive Annual Modular Survey in Delhi" is brought out by this Directorate on the basis of State Sample data collected in NSS 79th Round. The field work of 79th round of the State Sample Survey was carried out during the period July 2022 to June 2023.

The "Comprehensive Annual Modular Survey (CAMS)" was introduced to collect the information required for the purpose of generating some SDG indicators and sub-indicators of Global Indices. In CAMS, information related to education, health, usage of mobile & internet, ICT Skills, drinking water, sanitation & hygiene, birth registration, possession of assets & access to public transport facilities etc. were collected.

All the estimates presented in the report titled 'Comprehensive Annual Modular Survey in Delhi' are based on the State Sample data of Delhi collected through the Schedule CAMS 2022-23: "Comprehensive Annual Modular Survey".

The field work was carried out by the Socio-Economic Unit and the data processing was done by the EDP Cell. The present report is prepared by the Data Processing & Analysis Unit of this directorate.

I would also like to appreciate the sincere efforts done especially by the field functionaries who collected the information even in adverse conditions. This Directorate is gratified to the households for extending active co-operation to the field staff even in the post COVID era where the outlooks of the people have transformed. This Directorate is also thankful to National Statistical Office (NSO), Ministry of Statistics & Programme Implementation (MoSPI), Govt. of India for the technical guidance and material assistance provided by them.

It is expected that this document may be found useful by the planners, policy makers & researchers. I welcome continued suggestions and feedback from the research community, policymakers and all relevant stakeholders for improvement of future version of the report.

Limitations

Limitations in respect of Survey:

- ✚ It is important to recognize that respondents sometimes reluctant to provide specific information which may lead to under-reporting of some information.
- ✚ The coverage and definitions used in alternative data sources/administrative record may not align perfectly with those adopted in this survey. These variations in methodology, scope, and timeframes may affect the comparability of results across different data sources.
- ✚ Additionally, this survey attempted to collect person-level information on the formal education of erstwhile household members aged 18 years or above who are currently studying outside India. However, the total number of samples representing the information is insufficient to generate reliable estimates for the indicator. Thus, table based on this dataset is not required to be included in the report to avoid possible ambiguity in interpreting the results.
- ✚ There has been provision to collect information on household characteristics e.g., social group, religion, household type etc. along with demographic particulars of household members, namely, age, marital status etc. The purpose of gathering information on these auxiliary variables is to validate variables of interest and not to generate any estimates on these auxiliary variables.
- ✚ Data related to the auxiliary variables were recorded as reported by the respondent and not verified with any administrative record(s).

EXECUTIVE SUMMARY
&
HIGHLIGHTS IN TABLE FORM

Executive Summary

Key findings

A. Education

- i. In Delhi, about 93.8 percent of persons aged '15 years & above' are able to read and write simple statements with understanding and also able to perform simple arithmetic calculations. In the same age group, the figure stands around 97.7 percent for males and 89.1 percent for females in Delhi. However, at All-India level, about 81.2 percent of persons aged '15 years & above' are able to read and write simple statements with understanding and also able to perform simple arithmetic calculations. In the same age group, the figure stands around 87.9 percent for males and 74.2 percent for females.
- ii. The mean years of schooling in formal education for the persons of age '15 years and above' is 12.3 in Delhi while at the all-India level the percentage comes at 8.4 for the persons of age '15 years and above'.
- iii. The mean years of schooling in formal education for the persons of age '25 years and above' comes at 12.0. However, at All-India level, the same is 7.5 for the persons of age '25 years and above'.
- iv. Percentage of persons who were currently enrolled in primary education (Class I to Class V) were reported as 89.8% in Delhi while at All-India level, the percentage was 90.1% in the age group '6 to 10 years'.
- v. In Delhi, 47.7% children of age group '6 to 10 years' were currently enrolled in Government School while 47.1% children were enrolled in Private Un-Aided (Recognized) schools. However, at All-India level, the percentage in respect to Government School came to 66.7 and percentage for Private Un-Aided (Recognized) schools comes at 23.4.
- vi. About 68.0 % persons in the age group '25 years and above' in rural areas and 72.9 % in urban areas of Delhi reported that they have completed secondary education. However, at All-India level, the percentage was 30.4% in rural areas and 56.6% in urban areas. Overall, 72.8% persons in Delhi and 38.6% at All-India level have completed secondary education.
- vii. About 1.0% persons never enrolled in formal education in Delhi while at All-India level, the percentage was 2.1% among the persons of age group '6 to 18 years'.
- viii. About 8.7% persons in Delhi for the age group '18 years & above' were graduated in Science and Technology among all graduates.

- ix. In Delhi, about 62.8% persons were in formal and non-formal education and training in the previous 12 months from the date of survey while at All-India level, the percentage was 49.0 for the age 15-24 years. It has been observed that the percentage of male (63.6%) was slight higher than that for female (61.6%) in Delhi. Similar trend has been observed at All-India level for this indicator.
- x. In Delhi, about 42.9% persons were in formal and non-formal education and training in the previous 12 months from the date of survey while at All-India level, the percentage was 35.5 for the age 15-29 years. It has been observed that the percentage of male (44.5%) was higher than that for female (40.8%) in Delhi. Similar trend has been observed at All-India level for this indicator also.
- xi. In Delhi, about 19.3% persons and 23.3% persons at All-India level in the age group '15-24 years' were not in education, employment and training (NEET) at the time of survey. However, for the age group of '15-29 years', the percentages were 23.0 in Delhi and 25.6 at All-India level.

B. Health

It is pertinent to mention here that the NSO, MoSPI, GoI has changed the methodology/tabulation plan for the computation of average medical expenditure in 79th NSS Round. This shows departure from the methodology adopted in the NSS Rounds say 71st & 75th Rounds of the Health Survey. In earlier rounds, this indicator was derived based only on households that had actually incurred medical expenditure. However, in NSS 79th Round, the estimates were generated by including all households, irrespective of whether they had incurred any medical expenditure or not. Thus, the Average Medical Expenditure (in Rs.)/Average out-of-pocket Medical Expenditure (OOPME) comes in NSS 79th Round both in Central Report of CAMS 2022-23 & Delhi State Sample 2022-23 are not comparable.

i. As per the new methodology where estimation of average medical expenditure was done after considering the total estimated number of households instead of total estimated number of households that took the hospitalized/non-hospitalized treatment:

- a. In Delhi, the average medical expenditure per household on hospitalization during last 365 days in rural and urban areas were Rs. 3,544 and Rs. 4,974 respectively. However, at All-India level, the average medical expenditure per household on hospitalization during last 365 days in rural and urban areas were Rs. 4,496 and Rs. 6,877 respectively.
- b. In Delhi, the average medical expenditure for non-hospitalized treatment per household during last 30 days in rural and urban areas were Rs 585 and Rs 957 respectively. However, at All-India level, it was Rs. 545 for rural & Rs. 621 for urban.

ii. As per the old methodology where estimation of average medical expenditure was done after considering the total estimated number of households that took the hospitalized/non-hospitalized treatment:

- a. In Delhi, the average medical expenditure per household on hospitalization during last 365 days in rural and urban areas were Rs. 37,174 and Rs. 54,098 respectively.
- b. In Delhi, the average medical expenditure for non-hospitalized treatment per household during last 30 days in rural and urban areas were Rs. 1,290 and Rs. 2,356 respectively.

iii. As per the new methodology where estimation of average out-of-pocket medical expenditure was done after considering the total estimated number of households instead of total estimated number of households that took the hospitalized/non-hospitalized treatment:

- a. In Delhi, the average out-of-pocket medical expenditure per household on hospitalization during last 365 days in rural and urban areas are Rs. 2,315 and Rs. 2,517 respectively. However, at All-India level, the average out-of-pocket medical expenditure per household on hospitalization during last 365 days in rural and urban areas are Rs. 4,129 and Rs. 5,290 respectively.
- b. In Delhi, the average out-of-pocket medical expenditure for non-hospitalized treatment per household during last 30 days in rural and urban areas were Rs. 541 and Rs. 857 respectively. However, at All-India level, it was Rs. 539 for rural & Rs. 606 for urban.

iv. As per the old methodology where estimation of average out-of-pocket medical expenditure was done after considering the total estimated number of households that took the hospitalized/non-hospitalized treatment:

- a. In Delhi, the average out-of-pocket medical expenditure per household on hospitalization during last 365 days in rural and urban areas were Rs. 24,287 and Rs. 27,378 respectively.
- b. The average out-of-pocket medical expenditure per household on non-hospitalization during last 30 days in rural and urban areas were Rs. 1,193 and Rs. 2,110 respectively in Delhi.

- v. In Delhi, about 31.7% households in Rural and about 46.2% households in urban areas were covered by any health financing scheme/insurance scheme.

C. Financial Inclusion

- i. It has been observed that in Delhi, 97.1% persons for the age group 18 years & above have an account individually or jointly in any bank/other financial institution/mobile money service provider. While, at All-India level, the percentage was 94.6.
- ii. It is observed that 7.1% person in Delhi and 18.3% persons at All-India level for the age group '18 years and above' were indebted to any institutional/non-institutional agency as on date of survey.

D. Mobile & Internet

- i. It is observed that 96.6 % persons in Delhi and 86.5% persons at All-India level for the age group '15 years & above' were able to use mobile (including smart phone).
- ii. About 96.6% persons for the age group '15 years & above' in Delhi used mobile telephone with an active sim card during the last three months preceding the date of the survey while at All-India level, the percentage was 85.1% for the same age group.
- iii. About 90.7% persons for the age group '15 years & above' in Delhi were able to use internet while at All-India level, the percentage was 59.8%.
- iv. About 88.1% persons for the age group '15 years & above' in Delhi used internet during the last three months preceding the date of the survey while at All-India level, the percentage was 57.5% for the same age group.
- v. It is observed that 100.0% persons were covered by 4G or above mobile technology while at All-India level, the percentage was 99.7%.
- vi. It has been found that about 92.3% households were with broadband internet facility within the household premises in Delhi.

E. ICT Skills

- i. It has been observed that about 71.4% persons in Delhi and 52.5% at All-India level for the age group '15 years & above' reported executing the skill of 'sent messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video)', using mobile or computer-like devices, during the last three months preceding the date of survey.
- ii. In Delhi, 73.1% persons of age group '15 years & above' performed copy and paste tools to duplicate or move data, information, documents, etc. using mobile or computer-like devices during last three months preceding the date of survey while at All-India level, the percentage was 46.1% for this age group.
- iii. It has been found that about 74.9% persons in Delhi and 60.1% persons at All-India level can search internet for information for the age group '15 years and above'.
- iv. It may be seen that 56.6% persons for the age group '15 years and above' in Delhi and 43.4% persons of the same age group at All-India level can send or receive emails.
- v. About 65.1% persons in Delhi for the age group '15 years and above' reported that they were able to perform online banking transactions. However, at All-India level, the percentage was 37.8% for the same age group.
- vi. It has been observed that about 39.6% persons in Delhi for the age group '15 years and above' were able to search internet for information and who can send or receive emails and who can perform online banking transactions. While at All-India level, the percentage was 25.0% for the same age group.

F. Others

a. Assets possessed by household

- i. It has been observed that in Delhi about 99.0% household have possessed telephone (including landline)/mobile phone (including smart phone) at the time of survey while at All-India level, the percentage was 95.1%. Further, in case of possession of Computer (desktop PC, laptop), about 57.2% have such possession while at All-India level, this percentage was 9.9%.

b. Access to transport facilities

- i. 99.6% of the urban population having convenient access to low-capacity public transport (*bus, car, taxi, auto etc.*) within 500 meters and 70.4% of the urban population having convenient access to high-capacity public transport (*train, metro, ferry etc.*) within 1 km from place of living, in Delhi while at All-India level, it was 93.7% & 41.6% respectively.

c. Availability of all-weather road

- i. It may be seen that about 99.7% rural population have all-weather road within a distance of 2 km from the place of living of the household in rural areas. While at All-India level, the percentage was 94.2%.

d. Open public space

- i. It is observed that about 87.5% households have the nearest open public space in less than 500 meters from the place of living of the household in Urban areas of Delhi.

e. Registration of birth certificate

- i. It has been observed that about 97.6% persons in Delhi and 90.6% persons at All-India level have registered with civil authority for birth certificate ever.

f. Use of Clean Fuel

- i. It has been observed that about 100.0% households used clean fuel for lighting purpose in Delhi. It may be seen that in Delhi, 99.7% households used clean fuel for cooking while at All-India level, the percentage was 63.4%.

g. Access to improved principal source of drinking water

- i. 100.0% persons have access to improved principal source of drinking water in Delhi. However, at All-India level, the percentage of households was 95.7% for this indicator.
- ii. About 52.8% persons did not treat the drinking water before use received from principal source in Delhi.
- iii. In Delhi, about 73.2% persons have piped water into dwelling.
- iv. About 97.7% persons have the principal source of drinking water within dwelling in Delhi.

h. Sanitation & Hand washing

- i. It has been observed that in Delhi, about 99.7% persons have access to improved latrine (among the persons with access to latrine) while at All-India level, 97.8% households have this access.
- ii. 99.7 % of persons have hand washing facilities with water, soap/detergent in Delhi.

Major findings/Estimates of some of the indicators in Delhi & at the All-India level are given below:

Sl. No.	Item Description	Delhi			All-India		
		Rural	Urban	All	Rural	Urban	All
Education							
1.	Percentage of persons aged 15 years& above able to read and write short simple statements in their everyday life with understanding	93.4	94.1	94.1	77.8	90.3	81.6
2.	Percentage of persons aged ‘15 years& above’ able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations	92.8	93.8	93.8	77.3	90.0	81.2
3.	Mean years of schooling in formal education (15 years and above)	11.1	12.3	12.3	7.5	10.5	8.4
4.	Mean years of schooling in formal education (25 years and above)	10.5	12.0	12.0	6.4	9.9	7.5
5.	Percentage of persons of age 6 to 10 years who reported as currently enrolled in primary education (Class I to Class V) at the time of survey	94.0	89.7	89.8	90.5	89.2	90.1
6.	Percentage of persons of age 25 years and above with some secondary education	68.0	72.9	72.8	30.4	56.6	38.6
7.	Percentage of persons of age 6 to 18 years who never enrolled in formal education	0.6	1.0	1.0	2.2	1.9	2.1
8.	Percentage of persons aged 18 years & above who graduated in Science and Technology among all graduates (Delhi)	2.6	8.8	8.7	NA for the age group ‘18 years & above’		
9.	Percentage of youth in formal and non-formal education and training in the previous 12 months in the age group 15-24 years	63.9	62.7	62.8	45.9	57.1	49.0
10.	Percentage of youth in formal and non-formal education and training in the previous 12 months in the age group 15-29 years	44.8	42.9	42.9	33.2	40.9	35.5
11.	Percentage of youth reported to be not in education, employment, or training, as on date of survey for the age group 15-24 years	15.8	19.4	19.3	25.0	19.0	23.3
12.	Percentage of youth reported to be not in education, employment, or training, as on date of survey for the age group 15-29 years	23.9	23.0	23.0	26.9	22.6	25.6

Sl. No.	Item Description	Delhi			All-India		
		Rural	Urban	All	Rural	Urban	All
Financial Inclusion							
13.	Percentage of persons (age $\geq$ 18 years) who have an account individually or jointly in any bank/ other financial institution/mobile money service provider	95.9	97.2	97.1	94.6	94.4	94.6
14.	Number of borrowers (age $\geq$ 18 years) per 1,00,000 persons	9,069	7,010	7,060	18,714	17,442	18,322
Mobile & Internet							
15.	Percentage of persons able to use mobile (including smart phone) as on date of survey (age 15 years& above)	95.2	96.6	96.6	83.9	92.4	86.5
16.	Percentage of persons who used mobile telephones with an active sim card, at least once, during the last three months preceding the date of the survey (age 15 years& above)	95.2	96.6	96.6	82.3	91.7	85.1
17.	Percentage of persons able to use internet as on date of survey (age 15 years& above)	88.0	90.8	90.7	53.6	74.0	59.8
18.	Percentage of persons who used internet during last three months preceding the date of survey (age 15 years& above)	83.1	88.2	88.1	51.2	72.0	57.5
19.	percentage of persons covered by 4G or above mobile technology	100.0	100.0	100.0	99.5	99.8	99.7
ICT Skills							
20.	Percentage of persons aged '15years& above' reported execution of skill of 'sending messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, and video)'	62.7	71.7	71.4	46.0	67.3	52.5
21.	Percentage of persons aged '15years& above' reported execution of skill of 'copy and paste tools to duplicate or move data, information, documents, etc.'	64.9	73.3	73.1	39.8	60.2	46.1
22.	Percentage of persons who can search internet for information and who can send or receive emails and who can perform online banking transactions in the age group 15 years& above	25.0	40.0	39.6	18.5	35.7	25.0

Average medical expenditure/Average out-of-pocket medical expenditure as per new* methodology

**It is pertinent to mention here that the NSO, MoSPI, GoI has changed the methodology/tabulation plan for the computation of average medical expenditure in 79th NSS Round. This shows departure from the methodology adopted in the NSS Rounds say 71st & 75th Rounds of the Health Survey. In earlier rounds, this indicator was derived based only on households that had actually incurred medical expenditure. However, in NSS 79th Round, the estimates were generated by including all households, irrespective of whether they had incurred any medical expenditure or not. Thus, the Average Medical Expenditure (in Rs.)/Average out-of-pocket Medical Expenditure (OOPME) comes in NSS 79th Round both in Central Report of CAMS 2022-23 & Delhi State Sample 2022-23 are not comparable.*

Sl. No.	Item Description	Delhi			All-India		
		Rural	Urban	All	Rural	Urban	All
23.	Average medical expenditure (Rs.) per household on hospitalized treatment (including institutional delivery) during the last 365 days	3544	4974	4943	4,496	6,877	NA
24.	Average medical expenditure (Rs.) per person on hospitalized treatment (including institutional delivery) during the last 365 days	922	1488	1474	1,035	1,879	NA

Volume I

CHAPTER I

INTRODUCTION

INTRODUCTION

The National Sample Surveys (NSSs) are conducted by the Government of India since 1950 to collect data on various socio-economic indicators employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. The Seventy-ninth round of NSS was commenced from July 2022 to June 2023.

NSS 79th round was earmarked for collection of data for compilation of a number of Sustainable Development Goal (SDG) indicators through a 'Comprehensive Annual Modular Survey (CAMS)' along with a survey on Ayurveda, Yoga, Naturopathy, Unani, Siddha, Sowa-Rigpa/Amchi and Homoeopathy (AYUSH).

Objective of Comprehensive Annual Modular Survey (CAMS)

CAMS was introduced to cater the emerging need for supply of information on high-frequency socio-economic indicators that are not available from any other sources like, administrative data etc. Information required for the purpose of generating some SDG indicators and sub-indicators of Global Indices was also collected. The primary objective of CAMS was to collect data to generate indicators encompassing education, health, financial inclusion, use of mobile & internet, ICT skills, possession of assets etc. The information collected in the survey includes:

- ❖ Educational particulars of the household members
- ❖ Average medical expenditure/Average out-of-pocket expenditure
- ❖ Usage of mobile, computer etc.
- ❖ Ability of the household members performing different ICT skills
- ❖ Drinking water facilities
- ❖ Sanitation facilities
- ❖ Possession of Assets
- ❖ Birth Registration
- ❖ Public Transport facilities in Urban Areas
- ❖ Distance of Open public space from the place of Households in Urban Areas
- ❖ All-weather Road in Rural Areas
- ❖ Clean fuel as the primary source of energy for cooking, heating & lighting

Geographical Coverage:

The Delhi Sample Survey covered the rural and urban Delhi.

Survey Period:

The survey was commenced from July 2022 and it was of one year duration. CAMS and AYUSH were carried out simultaneously in same FSU but in different households.

Schedule of enquiry:

During this round, for survey on CAMS, the following Schedules of enquiry were canvassed:

Schedule 00CM:	List of Households
Schedule CAMS 2022-23:	Comprehensive Annual Modular Survey

Total sample size (FSUs):

Total 180 FSUs (136 urban FSUs + 44 rural FSUs) were allotted for Delhi State Sample for CAMS survey by MoSPI, GoI.

Selection of FSUs within a stratum/sub-stratum:

From all the sub-strata in both rural and urban sector within each stratum, the required numbers of FSUs were selected by Simple Random Sampling without Replacement (SRSWOR) scheme.

Selection of households:

The sample households from each SSS for each of the Schedule were selected by SRSWOR. The two different surveys were conducted in two different households. If there is any shortage of households then same households were canvassed for different schedules.

RELEVANCE OF SOME INDICATORS WITH SUSTAINABLE DEVELOPMENT GOALS

Based on the data collected through CAMS 2022-23, estimates of some Sustainable Development Goals (SDG) indicators (both global and national) may be developed. Some of these indicators are:

National/Global Indicator Numbers	Indicators
National Indicator No. 4.3.1	Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months.
Global Indicator No. 17.8.1	Proportion of individuals using the Internet during last 3 months/last 365 days.
Global Indicator No. 6.1.1	Proportion of population using safely managed drinking water services.
National Indicator No. 8.6.1	Proportion of youth (15-24 years) not in education, employment and training (NEET).
National Indicator No. 9.1.1	Proportion of the rural population who live within 2 km of all-weather road.
National Indicator No. 5.a.6	Percentage of adult having an account at a formal financial institution.
National Indicator No. 5.a.7	Percentage of women having an account at a formal financial institution.
National Indicator No. 5.a.2	Number of borrowers per 1,00,000 adults.
Global Indicator No. 5.b.1	Proportion of individuals who own a mobile telephone, by sex.
Global Indicator No. 6.2.1	Proportion of population using (a) safely managed sanitation services and (b) a hand-washing facility with soap and water.
Global Indicator No. 7.1.1	Proportion of population with access to electricity.
Global Indicator No. 8.10.2	Proportion of adults (15 years and older) with an account at a bank or other financial institution or with a mobile-money-service provider.
Global Indicator No. 4.4.1	Proportion of youth and adults with information and communication technology (ICT) skills, by type of skill.
National Indicator No. 11.2.1	Proportion of population that has convenient access within (0.5/1 km) to (low/high) capacity public transport stop.
National Indicator No. 11.7.1	Proportion of households reporting an open space within 500 meters from premises (urban).
Global Indicator No. 9.c.1	Proportion of population covered by a mobile network, by technology.

CHAPTER 2

CONCEPTS & DEFINITIONS

Concepts and Definitions

2. Important concepts and definitions used in this survey are explained below:

2.1 Population coverage: The following rules regarding the population covered are remembered in listing of households and persons:

- i. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., are excluded, but residential staff therein was listed while listing was done in such institutions. The persons of the first category are considered as members of their parent households and are counted there. Convicted prisoners undergoing sentence are remained outside the coverage of the survey.
- ii. Floating population, i.e., persons without any normal residence are not listed. But households residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, are listed.
- iii. Neither the foreign nationals nor their domestic servants are listed, if by definition the latter belong to the foreign national's household. If, however, a foreign national becomes an Indian citizen for all practical purposes, he or she is covered.
- iv. Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) are kept outside the survey coverage due to difficulty in conduct of survey therein. However, civilian population residing in their neighbourhood, including the family quarters of service personnel, are covered.
- v. Orphanages, rescue homes, ashrams and vagrant houses are outside the survey coverage. However, the residential staffs of these institutions are listed. People staying in old age homes are covered in the survey.

2.2 House: Every structure, tent, shelter, etc. is a house irrespective of its use. It may be used for residential or non-residential purpose or both or even may be vacant.

2.3 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months during the survey period) but exclude temporary visitors and guests (expected total period of stay less than 6 months during the survey period). Even though the determination of the actual composition of a household left to the judgement of the head of the household, the following procedure was adopted as per guidelines.

- ❖ Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., constitutes a single-member household. If, however, a group of persons among them normally pool their income for spending, they together are treated as forming a single household.
- ❖ In deciding the composition of a household, more emphasis was placed on 'normally living together' than on 'ordinarily taking food from a common kitchen'. In case the place of residence of a person is different from the place of boarding, he or she is treated as a member of the household with whom he or she resides.
- ❖ A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) is considered as a member of the household with whom he or she resides even though he or she is not a member of the same family.
- ❖ When a person sleeps in one place (say, in a shop or a room in another house because of space shortage) but usually takes food with his or her family, he or she should be treated not as a single member household but as a member of the household in which other members of his or her family stay.
- ❖ If a member of a family (say, a son or a daughter of the head of the family) stays elsewhere (say, in hostel for studies or for any other reason), he/she is not considered as a member of his/her parent's household. However, he/she is listed as a single member household if the hostel is listed.

2.4 Household size: The number of members of a household is its size.

2.5 Household's usual monthly consumer expenditure (Rs.): This information was collected to classify the households into different UMPCE (Usual Monthly Per Capita Consumption Expenditure) classes. Household consumer expenditure (HCE) is the sum total of monetary values of all goods and services consumed (out of purchase or procured otherwise) by the household on domestic account (i.e. all expenditures excluding those for entrepreneurial purposes) during a reference period. Procedure for deciding consumption of goods and services by a household is same as that followed in Consumer Expenditure Survey of NSS. Unusual expenditures, such as expenditure on social ceremonies, capitation fee, hospitalization, etc., are excluded for deriving usual monthly consumer expenditure of the household. Further, all types of transfer payments made such as gifts given to beggar, income tax paid, if any, was not covered under consumer expenditure. However, expenditure on household durable goods is included.

2.5.1 Household's usual monthly consumer expenditure was derived through the following items:

- i. Usual consumer expenditure in a month for household purposes out of purchase (including online purchase) of goods and services excluding items like clothing, footwear (A)

- ii. Imputed value of usual consumption in a month from home grown stock like, rice, cereals, pulses, vegetables, milk, firewood, chips, cow dung, etc.(B)
- iii. Imputed value of usual consumption in a month from wages in kind, free collection, gifts, etc. (C)
- iv. Expenditure on purchase of items like clothing, footwear, etc. during last 365 days (D)
- v. Expenditure on purchase of household durables like bedstead, furniture, vehicles, TV, fridge, fans, cooler, AC, mobile, computer, kitchen equipment, etc. during last 365 days (E)

Thus, UMPCE is derived in whole number of rupees rounded to the nearest rupee as $\{A+B+C+(D+E)/12\}$.

(i) Usual consumer expenditure in a month for household purposes out of purchase (including online purchase) of goods and services excluding items like clothing, footwear (A):

Regular monthly expenditure incurred by the household for purchase (including online purchase) of goods and services for household purposes was included here *whereas expenses on items like clothing, footwear and purchase of durable goods were excluded from the coverage of this item*. Further, cash remittances were not reported under this item.

(ii) Imputed value of usual consumption in a month from home grown stock like, rice, cereals, pulses, vegetables, milk, firewood, chips, cow dung, etc.(B):

There are some households, especially in rural areas, who used (i.e., consumed) items of household consumer goods like rice, cereals, pulses, vegetables, milk, firewood & chips, cow dung etc., from home grown stock on a regular basis. For households who used items of household consumer goods from home grown stock on regular basis, the imputed value of such usual consumption in a month at ex farm/ex-factory price was recorded here.

(iii) Imputed value of usual consumption in a month from wages in kind, free collection, gifts, etc. (C):

There are some households who regularly consume goods and services that are received in exchange of goods and services provided by them. For wage salaried employees, such services received could be perquisites like free electricity, free telephone services, free medical services, etc. For agricultural labourers, such goods and services received could be food-grains, vegetables, meals etc., as payment for wages in kind. In some cases it may also happen that household regularly consumes goods and services received as gifts or obtained through free collection. For households who regularly consume goods and services received as (1) wages in kind, (2) in exchange of goods provided by them, (3) as gifts or (4) obtained through free collection, etc., the imputed value of such usual consumption in a month at local retail prices were recorded here. Mid-day meals

received by household members also was considered for making entries against this item.

Points to remember:

- ❖ For households who regularly consume goods and services received as wages in kind, in exchange of goods provided by them, as gifts or obtained through free collection etc.; the imputed value of such usual consumption in a month at local retail prices was recorded.
- ❖ Goods and services received as gifts or obtained through free collection or allotted by Government (e.g. fund allotted for students in Government sponsored school) which are regular in nature were only considered for reporting.
- ❖ If goods and services received at subsidised rates, local retail price was imputed.
- ❖ Rent of leased out land received in kind, and consumed by the household, was considered and imputed value of good received was recorded.

(iv) Expenditure on purchase of items like clothing, footwear, etc. during last 365 days (D):

Expenditure on purchase of items like clothing footwear, etc., which generally are not purchased on a regular basis during the last 365 days were recorded here.

(v) Expenditure on purchase of household durables like bedstead, furniture, vehicles, TV, fridge, fans, cooler, AC, mobile, computer, kitchen equipment, etc. during last 365 days (E):

Expenditure incurred by the household during the last 365 days for purchase (including online purchase) of household durable goods like bedstead, furniture, vehicles, TV sets, fridge, fans cooler, AC, mobile phones, computers, kitchen equipment, etc., were recorded here. Expenditure for construction of household durable goods was considered for reporting in this item.

Points to remember:

- ❖ If a household purchases a car or any other durable goods on hire purchase basis, the actual amount paid, which may include down payment and/or payment of instalments during the reference period was recorded irrespective of whether the such durable goods were purchased during the reference period.
- ❖ If a car or any other durable goods is purchased during last 365 days by taking loan from bank and instalments are being paid to the bank as repayment of loan, the full purchase amount of such durable goods was considered and reported instead of the amount of instalments paid during the last 365 days.
- ❖ Cost of repair/servicing of vehicle was considered for reporting in this item.
- ❖ Major repairs/construction of durable goods which intends to increase the life of the durable goods was considered for reporting in this item.

- ❖ Minor repair of the durable goods or minor repair made for the purpose of beautification of house/flat was considered for reporting in this item.

Special procedure for expense on tuition fees, hostel room charges and hostel mess charges:

- ❖ If these expenses are incurred with a monthly periodicity, they were naturally come under 'A'. But if they are incurred semester-wise, or quarterly or annually, the average expenditure per month was calculated and included in 'A'.
- ❖ In case of hostel students, these expenditures accounted in the student's household and not in the 'parent' household. This is because rent and tuition fees regularly paid by a household (parent household) for a member of another household (usually a hostel student) were covered by the Use Approach.
- ❖ For simplicity, the above procedure was followed for tuition fees paid for non-hostel students as well. That is, if tuition fees was not paid monthly and therefore not reported in 'A', the monthly average over a year was included in 'A'.

Points to remember:

- ❖ Amount spent for purchase of flats/houses were not considered for calculating UMPCE excluded as it was treated as an investment/capital expenditure.
- ❖ Expenditure incurred for regular medical treatment or diagnosis (e.g. dialysis for kidney impairment, chemotherapy/radiology for cancer) were considered for calculating UMPCE. However, any expenditure on hospitalisation, not of regular nature, was excluded.
- ❖ Expenditure incurred for payment of insurance premium, was excluded as it was essentially a transfer payment and all types of transfer payments were outside the purview of consumer expenditure.

2.6 Economic activity: Any activity that results in production of goods and services that adds value to national product is considered as an economic activity. The economic activities have two parts-market activities and non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. Non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets.

2.6.1 Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption is considered as economic activity in NSS surveys. While the former includes activities like own account processing of primary products among other things, in the NSS surveys, processing of primary products for own consumption is not considered as economic activity. However, it may be noted that 'production of agricultural goods for own consumption' covering all activities upto and including stages of threshing and storing of produce for own consumption,

comes under the coverage of the economic activities in NSS surveys.

2.6.2 The term 'Economic activity' in the context of collection of information on usual principal activity status particulars of the household members includes:

- i) All the market activities performed for pay or profit which result in production of goods and services for exchange.
- ii) of the non-market activities
 - a) All the activities relating to the primary sector (i.e. Industry Divisions 01 to 09 of NIC-2008) which result in production (including free-collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods, including threshing and storing of grains for own consumption.
And
 - b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc. and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

2.6.3 The activities like prostitution, begging, etc., which may result in earning, were not considered as economic activities for the survey.

2.7 Activity status: It is the activity situation relating to participation in economic and or non-economic activities in which a person is found engaged during a reference period. According to this, a person will be in one or a combination of the following three broad activity statuses during a reference period:

- (i) Working or being engaged in economic activity (work),
- (ii) Being not engaged in economic activity (Work) and either making tangible efforts to seek 'work' or being available for 'work' if the 'work' is available and
- (iii) Being not engaged in any economic activity (work) and also not available for 'work'.

Activity statuses as mentioned above in (i) & (ii), are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, activity status (i) above is associated with 'employment' and activity status (ii) with 'unemployment'. During the reference period of last 365 days, by adopting the procedure to determine the broad activity statuses, each person is classified in one or the three broad activity statuses. Persons found with the broad activity statuses (i), (ii) & (iii), during the reference period, are employed (worker), unemployed and 'not in labour force', respectively.

2.7.1 The detailed activity categories for these broad activity statuses are as below:

- (i) Working or being engaged in economic activity (employed):
 - a) Worked in household enterprise (self-employed) as an own-account worker
 - b) Worked in household enterprise (self-employed) as an employer
 - c) Worked in household enterprise (self-employed) as helper
 - d) Worked as regular salaried/wage employee
 - e) Worked as casual wage labour in public works
 - f) Worked as casual wage labour in other types of works
- (ii) Not working but seeking or available for work (unemployed).
- (iii) Not working and also not available for work (not in labour force):
 - a) Attended educational institution
 - b) Attended domestic duties only
 - c) Attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle-feed etc.) sewing, tailing, weaving, etc. for household use
 - d) Rentiers, pensioners, remittance recipients, etc.
 - e) Not able to work due to disability
 - f) Others

2.7.2 The various constituents of ‘employed’, ‘unemployed’, ‘labour force’, ‘out of labour force’ are explained below:

- a) **Workers (or employed):** Persons who, during the reference period, were engaged in any economic activity or who, despite their attachment to economic activity, have temporarily abstained from work for reasons or illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household farm or non-farm activities were also considered as workers.
- b) **Seeking or available for work (or unemployed):** Persons, who, during the reference period, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration were considered as those who were ‘seeking or available for work’ (or unemployed).
- c) **Labour Force:** Persons who were either ‘working’ (or employed) or ‘seeking or available for work’ (or unemployed) during the reference period together constitute the labour force.

- d) **Out of labour force:** Persons who are neither ‘working’ and at the same time nor ‘seeking or available for work’ for various reasons during the reference period were considered to be ‘out of labour force’. The persons under this category were students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, prostitutes, etc. and casual labourers not working due to sickness.

It may be noted that workers have been further categorized as self-employed, regular wage/salaried employee and casual wage labourer. These categories are defined in the following paragraphs.

2.7.3 Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have autonomy (i.e. how, where and when to produce) and economic independence (i.e. market, scale of operation and money) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is given by the revenue from sale of output produced by self-employed persons minus the cost of purchased inputs in production.

2.7.3.1 The self-employed persons may again be categorised into the following three groups:

- (i) **Own-account workers:** They are the self-employed who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprise without hiring any labour. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- (ii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprise by hiring labour are the employers, and
- (iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons mostly family members who keep themselves engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist the related person living in the same household in running the household enterprise.

2.7.3.2 There is a category of workers who work at a place of their choice which is outside the establishment that employs them or buys their product. Different expressions like ‘home workers’, ‘home based workers’ and ‘out workers’ are generally used synonymously for such workers. For the purpose of this survey, all such workers were categorised as ‘self-employed’. The ‘home workers’ have some degree of autonomy and economic independence in carrying out the work, and their work is not directly supervised, as is the case for the employees. Like the other self-employed, these workers have to meet certain costs, like actual or imputed rent of

the space in which they work, costs incurred for heating, lighting and power, storage or transportation, etc., thereby indicating that they have some tangible or intangible means of production. It may be noted that employees are not required to provide such inputs for production.

2.7.3.3 It may further be elaborated that the ‘putting out’ system prevalent in the production process in which a part of production which is ‘put out’ is performed in different household enterprises (and not at the employer’s establishment). For example, bidi rollers obtaining orders from a bidi manufacturer will be considered as home workers irrespective of whether or not they were supplied raw material (leaves, masala, etc.), equipment (scissors) and other means of production. In some cases, the payment may be based on piece rate. Similarly, a woman engaged in tailoring or embroidery work on order from a wholesaler, or making pappad at home on order from some particular unit/contractor/trader will be treated as ‘home worker’. On the other hand, if she does the work in the employers’ premises, she will be treated as an employee. Again, if she is not undertaking these activities on orders from outside, but markets the products by herself/other household members for profit, she will be considered as an own account worker, if of course, she does not employ any hired help more or less on a regular basis.

2.7.4 Regular wage/salaried employee: Persons working in other’s farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular wage/salaried employees. This category not only includes persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part time.

2.7.5 Casual wage labour: A person casually engaged in other’s farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually, in the rural areas, one category of casual labourers can be seen who normally engage themselves in ‘public works’ activities.

2.8 Bank: In this survey, the bank referred to commercial banks including foreign commercial banks operating in India, nationalized banks, regional rural banks, cooperative societies, district or central cooperative banks or other types of cooperative societies.

2.8.1 A person holding an account at a bank means that the person is having an account at a nationalized bank, foreign commercial bank operating in India, regional rural bank, cooperative banks etc. in the past 12 months.

2.8.2 Loan account is not to be treated as bank account. Only savings and current accounts are to be considered.

2.8.3 Possessing of bank account is to be considered in this question irrespective of the bank account being dormant or in operation.

2.9 Other financial institutions: Other financial institutions included credit unions, microfinance institutions, cooperatives, or post offices (if applicable), or having a debit card in own name. Account at a financial institution may have been used for receiving wages, government transfers, and payments for agricultural

products and for paying utility bills or school fees in the past 12 months from the date of survey.

The household member who reports to be receiving wages, government transfers, or payments for agricultural products into an account at a financial institution in the past 12 months; paying utility bills or school fees from an account at a financial institution in the past 12 months also included under this category.

2.10 Mobile-money-service provider: It generally refers to payment services operated under financial regulations and performed from or via mobile device. Instead of paying with cash, cheque or credit card, a consumer can use a mobile to pay for a wide range of services. Some examples are Paytm, Google Pay, Phonepe, Freecharge etc.

2.10.1 A person holding a mobile money account means that the person was using GSM Association (GSMA) Mobile Money for the Unbanked (MMU) services in the past 12 months to pay bills or to send or receive money.

2.11 Indebtedness

Descriptions of the different institutional and non-institutional agencies for borrowing loan are as follows:

2.11.1 Institutional Agencies

- ❖ **Government:** When money (including subsidy received either in cash or kind) is received from the central or state governments, it is considered for this survey.
- ❖ **Bank (Commercial banks including regional rural bank, cooperative society/bank):** Amount or money (including subsidy received either in cash or kind) taken from commercial banks, including nationalised banks, regional rural banks, State Bank of India and its associates like State Bank of Rajasthan, State Bank of Mysore, etc. and foreign commercial banks operating in India is considered here. Similarly, money may be obtained from agencies such as cooperative society/banks, like district or central cooperative banks or other types of cooperative societies, etc. Such amount is also considered here.
- ❖ **Insurance:** All loans taken from Life Insurance Corporation, Postal Life Insurance and other insurance funds are also considered as loans taken from 'insurance'.
- ❖ **Provident fund:** Refundable advance/loans taken from a Provident Fund account, such as a Contributory Provident Fund, a General Provident Fund, a Public Provident Fund or any other provident fund in the public/private sector offices and companies by the employees of the respective concerns, or account holders in case of a Public Provident Fund are considered here.
- ❖ **Financial corporations/institutions:** Institutions such as Housing Development Finance Corporation Limited (HDFC), Housing and Urban Development Corporation Limited (HUDCO), etc., are considered here.
- ❖ **Other institutional agencies:** Amount raised by the households from financial institutions other than those listed above are treated as loans from 'Other Institutional Agencies'.

2.11.2 Non-Institutional Agencies

- ❖ **Self-help group:** A Self-help-group (SHG) is a financial intermediary usually composed of between 10-12 local persons. Members make small regular savings contributions over a few month until there is enough capital in the group to begin lending. Funds are lent back to the members or at times to others. In India, many SHGs are linked to banks for the hand delivery of microcredit.
- ❖ **Money lender:** In this survey, persons who lend money on interest are considered as money lenders.
- ❖ **Friends and relatives:** Friends and relatives in this particular context are those who are not the household members of the selected household and gifted money/material or lent money free of interest to sample household members. A friend or relative who charges interest for any loan advanced are regarded as money lender and the amount is to be considered.
- ❖ **Other non-institutional agencies:** Any non-institutional credit agency not covered above is to be considered under this category.

Note: If a non-household member has taken loan from a bank in the name of a household member and that household member is repaying the loan, the household member is to be treated as indebted to any institutional/non-institutional agency.

Kind loans are outside the coverage of this survey.

Points to remember:

- ❖ If the institutional or non-institutional loan providing agency has recovered the loan from any mortgaged item, the household member is not considered as indebted as he/she is not indebted as on the date of survey.
- ❖ If a joint loan has been taken by more than one household member, all such persons are considered as indebted.
- ❖ If head of a household buys some items from grocery shop and makes payment to the shopkeeper on a monthly basis, such cases are not treated as indebtedness.
- ❖ Persons who are availing/have availed Student Credit Card Scheme are considered as indebted till repayment has been made.
- ❖ Persons clearing off credit card dues within due date of payment are not treated as indebted even if the payment is due for the current month as on the date of survey. Otherwise he/she is considered as indebted provided the credit amount is greater than or equal to Rs. 500.
- ❖ A person repaying loan through EMI is treated as indebted provided the loan amount is greater than or equal to Rs.500.

2.12 Birth Certificate

Birth Certificate issued by Municipalities, Panchayat, Government Health institution or other local authority appointed by State Government for registration of birth and issue of certificate is considered here.

2.12.1 Transfer certificate issued by a school was not considered as birth certificate for this survey.

2.12.2 In this survey, civil authority includes municipality, panchayat, Government health institution or other local authority appointed by the State Government for registration of birth and issue of birth certificate.

2.13 Usage of mobile, computer etc., particulars of the household members of age 3 years or more

The information on the usage of mobile telephone or smartphone, type of mobile technology used usage of desktop/computer/laptop/tablet/palmtop/notebook for each of the household members of age 3 years and above was collected. Moreover, for members reported usage of any of mobile telephone or computer alike devices; usage of internet via these devices, status of usage, ability to send or receive emails, status of usage of mobile or computer alike devices for performing banking transactions were recorded.

2.13.1 Smart phone is a mobile phone that performs many of the functions of a computer, typically having a touch screen interface, internet access, and an operating system capable of running downloaded apps.

Points to remember

- ❖ The usage of mobile phone was given importance rather than its possession or ownership.
- ❖ Mobile cellular phone(s) supplied by employers that can be used by the household member(s) for personal reasons (i.e. to make personal calls and or to access the Internet etc.) are considered.
- ❖ Household member(s) who have only active SIM card(s) without a mobile phone device are not considered.

2.14 Mobile technology refers to mobile-cellular signal.

2.15 A Palmtop PC is an approximately pocket calculator-sized, battery- powered computer compatible with the IBM Personal Computer in a horizontal clamshell design with integrated keyboard and display. It can be used like a sub-notebook, but is light enough to be comfortably used handheld as well.

2.16 Notebook computer is a small, portable personal computer (PC) with a screen and alphanumeric keyboard. Notebook typically have a 'clamshell' form factor, typically having the screen mounted on the inside of the upper lid of the clamshell and the keyboard on the inside of the lower lid, although 2 in 1 PCs with a detachable keyboard are often marketed as laptops or having a 'laptop mode'.

Point to remember

The ability to use of desktop computer/laptop/tablet/palmtop/notebook was given importance rather than its possession or ownership or its regular/occasional usage.

2.17 Internet: The internet is a worldwide public computer network. It provides access to a number of communication services, including the World Wide Web and carries e-mail, news, entertainment and data files, irrespective of the device used (not assumed to be only a computer; it may also be a mobile telephone, tablet, PDA, games machine, digital TV, and so on).

Point to remember

The use of internet with/via smart phone/desktop computer/ laptop/ palmtop/ tablet/ notebook etc. for any purposes was given importance rather than its possession or ownership.

2.18 Digital Literacy: A person shall be considered digitally literate if he/she can operate digital devices like mobile phone, tablet, and computer to do all the following:

-  Send or receive emails,
-  Search internet for information and
-  Perform some banking transactions like making digital payment.

2.19 Execution of some ICT skills: Information was collected for each of the household members of age 15 years and above on 11 different types of Information and Communication Technologies (ICT) skills of the household members who can use any of smart phone, desktop, computer, laptop, palmtop, notebook etc.

The information on the following ICT skills was collected for each of the eligible household members:

- ❖ Use copy and paste tools to duplicate or move data, information, documents etc.
- ❖ Send messages (e.g. e-mail, messaging service, SMS) with attached files (e.g. document, pictures and video)(e.g. uploading of video clip, audio clip or picture in social media platform)
- ❖ Use basic arithmetic formulae in a spread-sheet (Spreadsheet includes excel, calc, GSheets, etc.
- ❖ Connect and install new devices (e.g. modem, camera, printer) through wired or wireless technologies
- ❖ Search, download, install and configure software and applications
- ❖ Create electronic presentations with presentation software (including text, images, sound, video or charts)(e.g. Power Point Presentations)
- ❖ Transfer files or applications between devices (like PC, tablet, pen drive, portable disk etc.)
- ❖ Set up effective security measures to protect devices and online accounts (e.g. strong passwords, log-in attempt notification, etc.)

Note: It includes skill of using firewall, installing antivirus software, anti-spyware package, keeping Operating System, apps and browser up-to-date, taking backups, to protect computer like devices. Also includes skill of using complex passwords/pin/pattern lock, securing network, using two factor authentication, encryption, control access to protect online accounts.

- ❖ Change privacy settings on device, account or app to limit the sharing of personal data and information (e.g. name, contact information, photos, etc.)

Note: It includes skill of turning off activity history, location tracking, camera, microphone access of device, access to account information, contacts, limiting lock screen, secure log in settings to smartphone/apps/PC etc.

- ❖ Verify the reliability of online information

Note: It includes skills like viewing authentic websites, checking the date of published content, authenticity of address bar of the website, authenticity of information circulated through various social media platforms etc.

- ❖ Write programme or code to develop/modify software, mobile app etc.

Note: It includes skill of writing programme in any programming language.

It is to be noted that ability of performing the above-mentioned ICT operations was not tested. The person was considered if he/she has performed a particular ICT operation at least once during last three months irrespective of the fact whether he/she was successful in doing the operation every time they attempted for in the past.

2.20 Drinking water facilities

For all the selected households, the information on the source of drinking water from which most of the drinking water was obtained by the household during the last 365 days was recorded.

2.20.1 Descriptions of the different sources of drinking water are given below:

- i. **Bottled drinking water:** Drinking water packaged in bottles, jars, pouches and similar containers is classified as bottled drinking water. Generally, this packaged drinking water meets certain safety standards and are considered safe for drinking. Tap water, well water, etc., kept by the household in bottles, for convenience, is not considered as bottled drinking water.
- ii. **Piped water into dwelling and piped water to yard/plot:** If an arrangement is made by corporation, municipality, panchayat or other local authorities of any private or public housing estate or agency to supply water through pipe and if the sample household is availing such facility for drinking, then such sources of drinking water is considered as piped water. Piped water into dwelling is defined as a piped water connection to one or more taps to the dwelling unit (e.g.in the kitchen). Piped water to yard/plot is defined as a piped water connection to a tap placed outside the dwelling unit of the household but in the yard or plot within the household premises.

- iii. **Public tap/standpipe:** Public tap or standpipe is a water point for community use in which water is supplied through pipe by corporation/municipality/panchayat or other local authorities or any private agency. Public tap/standpipe can have one or more taps and are typically made of brickwork masonry or concrete.
- iv. **Tube well and Hand pump:** Tube well and hand pump are borewell used for extracting ground water for drinking purpose. For constructing a bore well, a deep vertical hole is bored or drilled and a long casing or pipe is sunk deep into the underground with the purpose of reaching ground water supplies and ground water is lifted through a pump, which may be powered by human, animal, wind, electric, diesel or solar means. The casing or pipes prevent the small diameter hole from caving in and protect the water source from infiltration by run-off water. Bore wells are usually protected by a platform around it, which leads spilled water away from the tubewell. If the pump of the bore well is operated by animal, wind, electric, diesel or solar means etc., it is known as tube well and if the pump is operated manually by hand using human power and mechanical advantage to lift ground water, it is known as hand pump.
- v. **Protected well/unprotected well:** A well is considered as protected if it has generally the following protective measures to lower the risk of contamination.
 - a. A headwall around the well with a properly fitting cover
 - b. A concrete drainage platform around the well with a drainage channel
 - c. A hand pump or bucket with windlass

If instead of hand pump or bucket with windlass, electric pump is used to pump water from such wells, where the conditions (a) and (n) exist, it is considered as protected well. A well which is not protected by the above measures, e.g. the well is not protected from runoff water or the well is not protected from bird droppings and animals, it is classified as unprotected well.
- vi. **Tanker-truck: public/private:** In ‘tanker-truck’, drinking water is trucked to a locality and supplied from tanker to the households of the locality. If the ‘tanker-truck’ is operated by government agencies (central/state/local bodies etc.) and the sample household reports that it is their principal source of drinking water then the source of drinking water of the household is recorded as ‘public tanker-truck’. In case the ‘tanker-truck’ is operated by private agencies (NGOs, trusts etc.) and the sample household reports that it is their principal source of drinking water, then the source of drinking water of the household is recorded as ‘private tanker-truck’. It is to be noted that in both the cases, sample household may have to pay the price for the water. Therefore, price is not made as a criterion to determine whether the source is public or private.

- vii. **Protected spring/unprotected spring:** A spring is considered as protected, if it is protected from runoff, bird droppings and animals by a 'spring box', which is constructed of brick, masonry or concrete and is built around the spring so that water flows directly out of the box into a pipe or cistern, without being exposed to outside pollution. A spring which is not protected is called unprotected spring.
- viii. **Rainwater collection:** Rainwater refers to rain that is collected or harvested from surfaces (by roof or ground catchment) and stored in a container, tank or cistern until used. Traditionally, rainwater collection has been practised in arid and semi-arid areas to get drinking water of the household and water for other uses. When such water is used for drinking purpose, the source of drinking water is the rainwater collection.
- ix. **Surface water:** Surface water is water located above ground and includes rivers, dams, lakes, ponds, streams, canals and irrigation channels.
- x. **Others (cart with small tank or drum, etc.):** In 'cart with small tank or drum', water is supplied in small tank or drum to a locality by donkey carts, motorized vehicles and other means.

Points to remember:

- ❖ Drinking water carried through pipe mostly from sources like 'tanker-truck', 'well', 'tank', 'spring', 'river', 'dam', 'stream', 'canal', 'lake' etc. by the sample household only for convenience of the household, is not treated as 'piped water'(i.e., 'piped water into dwelling' or 'piped water to yard/plot').
- ❖ When a household makes arrangement for getting most of the drinking water by hiring the service of person, the source of water is the one from which water is collected by the hired person.
- ❖ Source of drinking water of same type located at two different places is not treated as two different sources of drinking water.
- ❖ If the household has made arrangement to bring most of the drinking water from a spring to his house through pipe, the source is the spring. Whereas, if some private or public agency has made arrangement to bring most of the drinking water from the spring to the house through pipe, the source is the piped water.
- ❖ If a household collects most of the drinking water from RO treated kiosk managed by Government or NGO or any private agency, the source of drinking water is considered as bottled water.
- ❖ If a household member brings most of the drinking water in a bottle from the 20 litre packaged water bottle supplied at his place of work, the source of drinking water is considered as bottled water.

- ❖ If most of the drinking water is collected through tube well fitted to a well, the source of drinking water is protected or un-protected well, as the case may be.

2.20.2 Availability of drinking water from the principal source sufficient throughout the year (i.e. during each calendar month of the last 12 months)

For all the selected households, availability of drinking water from the principal source reported is considered as sufficient throughout the year if availability of drinking water was sufficient in each calendar month of the last 12 months. If in any calendar month, the availability of drinking water was not sufficient for majority of the days of the month, availability of drinking water is not considered as sufficient in that month.

Points to remember

- ❖ If during a particular season, the household deliberately does not collect drinking water from the principal source though sufficiently available, due to deterioration of drinking water quality, it is considered that the household has sufficient drinking water.
- ❖ In situations where supply of drinking water from the principal source is periodic in nature and the household stores it for use during the period of non-supply, the state of sufficiency of drinking water was reported based on the judgement of the informant.

2.20.3 Access to the principal source of the drinking water

For all the selected household, the type of access of the household to the principal source from which most of the drinking water is obtained is defined in terms of the prevailing situation reported by the sample household in respect of the principal source of drinking water that is being used and not the legal right to use the principal source of drinking water.

Points to remember

- ❖ If a group of households residing in the same building is accessing drinking water from a common well, located outside their premises through a motored pipe connection, the access to the principal source of drinking water is considered for the common use of the households in the building in case no other household is accessing drinking water from that common well, the access to the principal source of drinking water for that group of households is considered for community use.
- ❖ If two households have only one water connection registered with the authority but have separated the same connection, for both of the households, type of access is considered as exclusive use.

For all the selected households, the distance to the principal source (from which most of the drinking water is obtained) from the dwelling unit was ascertained and relevant information was recorded.

In this survey, Household premises is defined as the dwelling unit of the household together with the courtyard, compound, garden, out-house, place of worship, garage, family graveyard, guest house, shop and offices for running household enterprises, tanks, wells, latrines, drains and boundary walls annexed to the dwelling unit which are under the possession of the household (possessed exclusively or possessed with some other households).

2.20.4 Method used by the household for treatment of drinking water received from principal source:

The purpose of treatment of drinking water is to remove contaminants present in the water or reduce the concentration of such contaminants to improve the quality of drinking water. The method of treatment of drinking water used by the household is the one which is generally used for most of the drinking water of the household.

Drinking water received by the household from the principal source may be treated at home by various methods before use. Treatment of drinking water can be done through boiling, filtering, by using chemicals, by using electric/non-electric purifiers etc. Here it was enquired whether household treat drinking water throughout the last 365 days and based on major time criterion and method of treatment used by the household, the information was recorded.

Points to remember:

- ❖ Method of treatment of water done at the source of drinking water (for e.g., using alum directly into the well) was not considered.
- ❖ Method of treatment of water done only during a particular season (for e.g., in monsoon season which is the breeding season of numerous fungi, algae etc.), was not considered.
- ❖ When a household boils drinking water for the use of the child only and other members use drinking water without any treatment, it was not considered as treating drinking water.
- ❖ Electric water purifiers are like reverse osmosis (RO) water purifiers, ultraviolet (UV) water purifiers which works using electricity whereas non-electric water purifiers are like activated carbon water purifier, sediment water purifier, ultra filtration (UF) water purifier work without using electricity.
- ❖ If a household reports two different methods of treating drinking water, the method through which most or maximum of the drinking water was recorded.

2.21 Sanitation facilities

For the purpose of this survey, a 'latrine' is defined as an infrastructure which allows safer and more hygienic disposal of human excreta. In this survey, 'access of the household to latrine' is defined in terms of the latrine facility that can be used by the majority of the household members, irrespective of whether it is being actually used by them or not.

2.21.1 It was first ascertained whether the household has access to any latrine or not. If the household has access to latrine (i.e. there is latrine facility that can be used by majority of the household members), then it was ascertained whether household's access to latrine is for 'exclusive use of the household' or for 'common use of households in the building' or for 'public/community use' or 'others'.

Points to remember:

- ❖ If the household can use a latrine facility which is for use of the households in the locality or for a specific block of the people, it was considered that the household has access to public/community latrine.
- ❖ If a household is using a shared latrine exclusively due to absence of the other household in the same building for a long period, household's access to latrine was recorded as 'common use of households in the building'.
- ❖ The access to latrine was considered as 'exclusive', even if the septic tank is same for the households having separate latrines.
- ❖ The access to the latrine for majority of the household members was considered.

2.22 Different types of latrines:

There are two basic type of latrines, wet and dry, differentiated depending on use of water to divert human excreta. In a wet latrine water is used to divert human excreta while dry latrines use very limited water or no water for flushing the human excreta. Besides these two basic types of latrines, there are latrines like, incinerating latrines which burn the human excreta; chemical latrines which are used in a variety of situations like in passenger trains and airplanes, hanging latrines, which deposit waste directly into open waterways; bucket latrine, in which human excreta are collected in a bucket placed underneath a latrine hole.

Description of the different types of latrines are given below:

- i. **Flush/pour-flash:** Flush latrine uses a cistern or holding tank for flushing water and a water seal (which is a U-shaped pipe below the seat or squatting pan) that prevents the passage of flies and odours. A pour-flash latrine uses a water seal, but unlike a flush latrine, it uses water poured by hand for flushing (no cistern is used). Depending on the system/site where human excreta and wastewater are disposed off, flush/pour-flush latrine can be of the following type: (i) piped sewer system, (ii) septic tank, (iii) twin leach pit, (iv) single pit, (v) elsewhere (open drain, open pit, open field, etc.)
- ii. **Piped sewer system:** Piped sewer system is a system of sewer pipes, also called sewerage that is designed to collect human excreta and wastewater and remove them from the household environment.
- iii. **Septic tank**
- iv. **Flush/pour-flush to twin leach pits/single leach pit:** In twin pit flush/pour-flush latrine, the excreta are carried into subsurface leach pits through pipes or covered drains and one pit is used at a time. The liquid infiltrates into the soil through the holes in the pit lining. The gases also

disperse into the soil, and therefore, the provision of a vent pipe for its outlet is not necessary. When one pit is full, the excreta are diverted to the second pit. The filled pit can be conveniently emptied after a rest period of one and a half years, during which pathogens are inactivated and the organic matter decomposed. Thus, the two pits can be used alternately and continuously.

In a single leach pit system desludging is required immediately after the pit has filled up, and, therefore involves handling of fresh and undigested excreta which is hazardous to health. Single leach pits are appropriate only if a mechanical desludging vacuum tanker is readily available, or if the pit is abandoned when full.

- v. **Flush/pour-flush to elsewhere (open drain, open pit, open field, etc):** This type of latrine refers to the system of flush/pour-flush latrine where excreta are disposed of near the household environment (not into a pit, septic tank or sewer). Excreta may be flushed to the open drain, open pit, open field etc.
- vi. **Ventilated improved pit latrine:** This is a dry pit latrine ventilated by a pipe that extends above the latrine roof. The open end of the vent pipe is covered with gauze mesh or fly-proof netting and the inside of the superstructure is kept dark.
- vii. **Pit latrine with slab:** This is a dry pit latrine that uses a hole in the ground to collect the excreta and a squatting slab or platform that is firmly supported on all sides, easy to clean and raised above the surrounding ground level to prevent surface water from entering the pit. The platform has a squatting hole or is fitted with a seat. Unlike the ventilated improved pit latrine, in this type of latrine, vent pipe is not used.
- viii. **Pit latrine without slab/open pit:** Pit latrine without slab uses a hole in the ground for excreta collection and does not have a squatting slab, platform or seat.
- ix. **Composting latrine:** This is a dry latrine into which carbon-rich material (vegetable wastes, straw, grass, sawdust, ash) are added to the excreta and special conditions maintained to produce in offensive compost.
- x. **Open drain/nallah:** If the sample household has access to a latrine which actually is an open drain or nallah, it was covered under this item.
- xi. **Others:** If the sample households uses a latrine which is not covered above comes under this category. Examples of such latrine are (i) hanging latrine which is build over the sea, a river, or other body of water, into which excreta drops directly, (ii) service latrine which are serviced by seavengers.

Point to remember:

- ❖ If the sample household has access of more than one type of latrine, the type of latrine which is generally accessed by the majority of the household members was recorded here.

Information was collected regarding the place where excreta were disposed of in the last occasion after removal from the household, as reported by the sample household.

Information was also collected regarding the frequency of emptying excreta from septic tank/pit/composting latrine of the household as reported by the sample household.

2.23 Hand washing facility available within the household premises:

2.23.1 Hand washing facility is an important hygienic facility required for removing dirt, soil, germs from hands before and after taking meal, after defecation etc. which prevent attack from diseases like diarrhoea/other stomach problems etc. to a great extent.

Points to remember:

- ❖ Sanitizer was treated as 'with water and soap/detergent'.
- ❖ Wet tissue paper was treated as 'with water and soap/detergent'.
- ❖ Dry tissue paper was treated as 'with water only'.
- ❖ The availability of facility of hand washing was given importance, not to the practice of hand washing.

2.24 Energy used by household for cooking, lighting, heating:

For all selected households, information on primary source of energy generally used by the household for cooking, lighting & heating purposes was collected.

If more than one type of primary source of energy are used by the household for cooking/lighting/heating, the type of energy mainly used by the household was recorded.

2.24.1 If a household does not cook food in the dwelling unit, rather depends on food purchased from outside, it was considered that the household has no cooking arrangement.

2.24.2 For two or more different sources of energy for cooking/lighting/heating (for example, electricity for room heating and LPG for food and water heating), primary source of energy used for cooking/lighting/heating for most of the time by the household was recorded.

2.24.3 Electricity may be availed by the household legally or illegally and the electricity may be supplied to the household either through public agencies, corporations or by private suppliers.

2.24.4 If the household makes its own arrangement, either through generator or solar panel, to generate electricity, the household was considered.

2.25 Other facilities:

2.25.1 Low-Capacity Public Transport: Low-capacity public transport is defined as a shared passenger transport service with less capacity that is available to the general public.

Low-capacity public transport system includes cars, buses, trams that are shared by strangers without prior arrangement.

Point to point shared taxi, auto, toto/tuktuk services are also included as low-capacity transport.

However, taxis, car pools, and hired buses, which are not shared by strangers without prior arrangement, were not included as low-capacity transport.

Low-capacity transport also excludes informal, unregulated modes of transport (para-transit), motorcycle, taxis, three-wheelers etc.

2.25.2 High-Capacity Public Transport: High-capacity public transport is defined as a shared passenger transport service with high capacity that is available to the general public.

High-capacity public transport system includes trains, metro, ferry etc. that are shared by strangers without prior arrangement.

2.25.3 Open Public Space: Open public space includes:

- ❖ **Parks:** Open space inside an urban territory that provides free air recreation and contact with nature. Their principal characteristic is the significant proportion of green area.
- ❖ **Recreational areas:** Public areas that contribute to environmental preservation. Their main functions can be both ornamental and passive recreation. These include areas such as playgrounds, riverfronts, waterfronts, public beaches, etc.
- ❖ **Civic Parks:** Open space created because of building agglomeration around an open area, which was later transformed into a representative civic area. They are characterized by considerable nature, specifically gardens and a good place for cultural events and passive recreation.
- ❖ **Squares:** Open spaces created because of building agglomeration around an open area. Its main characteristics are the significant architectonic elements and interaction between buildings and the open area. Squares are usually public spaces relevant to the city due to their location, territorial development, or cultural importance.
- ❖ **Undeveloped or land with no buildings** (or other build structures)

Points to remember:

- ❖ If some persons gather under a tree for smoking, gather in a place for playing cards, making gossip etc. such place was not considered as open public place for this survey.
- ❖ Private or Government plots lying vacant accessible by the public and used as open public space was considered as open public space for this survey.

- ❖ An open space may or may not be accessible to public free of charge for the entire day. In such cases, it was treated as an open space depending on the response of the informant of whether any fee was levied for accessing the concerned open space.

2.25.4 Information was collected as:

- i. Whether an all-weather road (i.e., usable during all seasons) is within a distance of 2 km from the place of living of the household?
- ii. In this survey, a road which is motor able all year round by the prevailing means of rural transport was considered as a road which is usable during all seasons in rural area.
- iii. Whether the nearest low-capacity public transport system (e.g. bus, car, taxi, auto, rickshaw etc.) stop is within a walkable distance of 0.5 km from the place of living of the household?
- iv. Whether the nearest high-capacity public transport system stop is within a walkable distance of 1 km from the place of living of the household
- v. Distance of the nearest open public space (like parks, playgrounds, riverfronts, lakes, public beaches, squares etc.) from the place of living of the household
- vi. In this survey, public space refers to all places that are publicly owned or of public use, accessible and enjoyable by all, free and without a profit motive, categorized into streets, open spaces and public facilities. Public space in general is defined as the meeting or gathering places that exist outside the home and workplace that are generally accessible by members of the public, and which foster resident interaction and opportunities for contact and proximity. This definition implies a higher level of community interaction and places a focus on public involvement rather than public ownership or stewardship. Open public space is any open piece of land that is accessible to the public without charge, and provides recreational areas for residents and helps to enhance the beauty and environmental quality of neighbourhoods.

2.26 Household assets and amenities

Household assets and amenities from each of the selected household was recorded.

For all the selected households, the number of possession of each of the items such as telephone (including landline), mobile phone (including smartphone), desktop PC, laptop, tablet/palmtop & television for household use, as on the date of the survey was recorded in whole number.

Points to remember:

- ❖ Use of the items exclusively for enterprise purposes was excluded.
- ❖ If household uses any item both for residential as well as enterprise purposes, it was considered that the household possessed that item.
- ❖ The items possessed by the household includes item provided by employer also.
- ❖ The items were in working condition. If the item was not in working condition, as on the date of survey, it was considered for recording in this survey only if the household reported that it intends to repair the item for future use by the household for household purposes.

2.27 Access to broadband internet facility within the household premises

For this survey, 'broadband' is defined as technologies that deliver advertised download speeds of at least 256 kbit/s. The main types of broadband services are i) Fixed (wired) broadband network, such as DSL, cable modem, high speed leased lines, fibre to-the-home/building, powerline and other fixed (wired) broadband; ii) Terrestrial fixed (wireless) broadband network, such as WiMAX, fixed CDMA; iii) Satellite broadband network (via a satellite connection); iv) Mobile broadband network (at least 3G, e.g. UMTS) via a handset and vi) Mobile broadband network (at least 3G, e.g. UMTS) via a card (e.g. integrated SIM card in a computer) or USB modem.

Points to remember:

- ❖ Both wired and wireless internet connection was considered for this survey.
- ❖ If any member of the household were using mobile network internet data, the household was considered to have access to broadband internet facility within the household premises.

2.28 Hospitalization: Hospitalization means admission as in-patient- for treatment of ailment or injury, or for childbirth – to any medical institution. Further, childbirths sometimes take place in Health Sub-Centres; such cases of delivery will not be considered as hospitalization. Surgeries undergone in temporary camps set up for treatment of ailments, such as eye camps, will also be treated as cases of hospitalization.

2.28.1 Information has been gathered from the households that if any member of the household has taken treatment as non-hospitalization and/or preventive measures and/or self-care during the last 30 days (excluding hospitalization).

2.28.2 All the medical treatment received before hospitalization or after discharge from hospital was covered here if occurred during the last 30 days.

Note:Special case in respect of Covid treatments: If any hospital/medical institution makes some arrangement in hotels/home for treating Covid patients, then it was treated as in-patient treatment for the purpose of this survey. Here medical facilities have been made available under supervision of a medical institution and proper supervision on the patients was made by medical practitioners.

2.29 Medical Institution: Medical institution here refers to any institution having provision for admission of sick persons as in-patients for treatment as well as providing treatment to a person as out-patient-all Primary Health Centres. Community Health Centres, all public/government hospitals (district hospitals/state general hospitals/medical college hospitals etc.) and all private hospitals (run by charitable organisations or NGOs or trusts, private nursing home, day care centre, private medical college and hospital, super-speciality hospital, etc.) comes under this.

2.30 Explanations of Associated Terms with medical institution

- ❖ **ASHA (Accredited Social Health Activist):** ASHAs are the local women trained to act as health educators and promoters in their communities. There is one ASHA for every 1000 population. Their tasks include motivating women to give birth in hospitals, bringing children to immunization clinics, encouraging family planning (e.g. usage of condoms, IUDs, surgical sterilization), treating basic illness and injury with first aid, keeping demographic records, and improving village sanitation. They have a drug kit- which has tablets like paracetamol, anti-malarials, oral contraceptives, co-trimoxazole (an antibiotic), ORS packets etc.
- ❖ **AWW (Anganwadi worker):** These are the staff of the Anganwadi centre in the village. There is one Anganwadi centre for every 1000 population. These centres provide supplementary nutrition, non-formal pre-school education, nutrition and health education, immunization, health check-up and referral services. They are provided with a drug kit and may give tablets for about 1 to 3 children a day.
- ❖ **Dispensary:** 'Dispensary' is the consulting place/chamber, which does not generally have facilities for treatment of in-patients. A dispensary is a public institution that dispenses medicine or medical aids or an office in a hospital, school or other institution from which medical supplies, preparations, and treatments are dispensed. Hospitals without bed may be treated as Dispensaries.
- ❖ **HSC (Health Sub-Centre):** This is the most peripheral facility in the primary health care system. There is one sub-centre for every 3000 population in hilly/tribal/difficult areas and 5000 population in plains. Each Sub-Centre is staffed by one or two Auxiliary Nurse Midwives (ANM) { An ANM is a nurse, usually with 18 months training, who is expected to provide a range of services as required in a health sub-centre. In some States the post is called village health nurse, or junior public health nurse}. No doctor is posted in such Sub-Centre. The main task of these ANM (as perceived) is to provide immunization to children and antenatal care. Some sub-centres also conduct normal delivery but have no beds and the sub-centre is not considered as an institution with in-patients. They perform some outpatient care largely in the form of treatment for basic illness. Any treatment taken from ANM during her visit to the village can be considered as treatment taken at sub-centre.
- ❖ **PHC (Primary Health Centre):** PHC is the first contact point between a village community and the medical officer. It has a medical officer (MBBS or AYUSH doctors) and other paramedical staff. It is run by the Government and usually has in-patient and out-patient facilities including ante-natal check-ups and deliveries. They usually have 4-6 beds to conduct delivery. They may or may not have facilities for in-patient treatment. There is one PHC for every 30000 population in the plains and for every 20000 populations in hilly/tribal/difficult areas. The terms 'additional PHC', 'mini-PHC' and 'New PHC' are considered synonymous to 'PHC'. PHCs in Bihar and Uttar Pradesh are the equivalent to CHCs in other States that their area of coverage is a block and may even have 30 beds. Their equivalent of a PHC in these States is called an additional PHC.

- ❖ **CHC(Community Health Centre):** CHC is usually located at block/division or taluk level and serves as a referral centre for PHCs. It is to be staffed by medical specialists and medical officers and AYUSH doctors-but in practice there are usually only medical officers. It always has provision for in-patients and 10 to 30 beds. It usually has an OT, X-Ray, Labour Room and Laboratory facilities including out-patient facilities.
- ❖ **Government/Public Hospital:** All other government hospitals, including district hospitals in the district headquarters town (which acts as referral site for all the CHCs and PHCs and sub-centres), government medical college hospitals, ESI hospitals, other government hospitals like maternity hospitals, cancer hospitals, TB or leprosy hospitals, railway hospitals, etc. run by the government will come under the category of 'gov./public hospital'.
- ❖ **Charitable/NGO/Trust run hospital:** Some hospitals which are run by presumable NGO/religious or other trust with a basic motive to offer health facility at a lower cost, for example, Sri Sathya Sai Central Trust. The CMC hospitals of Vellore and Chandigarh, which are voluntary non-profit organisation. Medical services offered by Ramkrishna Mission with 15 major hospitals, 125 dispensaries and 60 mobile dispensaries etc.
- ❖ **Private Hospitals, private clinic:** Hospital/nursing home/day care centre apart from Government or Charitable organizations with facilities for in-patient treatment will be called a private hospital. A private clinic has facilities for construction with private doctor(s) but no in-patient facility.
- ❖ **Informal Health Provider (IP):** Informal Health Provider is a heterogeneous group of providers of informal health facilities with different type of training, regulatory frameworks, and services provided as follows:

The set of definitional criteria include:

- **Training:** IPs include those who have not received formally recognized training with a defined curriculum from an institution (I.e. government, NGO, or academic institution). IPs, however, typically have some level of informal training through apprenticeships, seminars, workshops etc. and are typically not mandated by any formal institution.
- **Payment:** IPs collect payment from patients served, not from institutions. One notable exception to this criterion involves NGO or other sponsored voucher programs, where informal providers exchange services or goods for payment from a sponsoring body in the form of reimbursement vouchers. Payment is usually, but not always, un-documented and tendered in cash. IPs are mainly entrepreneurs.
- **Registration and regulation:** IPs are not typically registered with any government regulatory body and operate outside of the purview of regulation, registration, or oversight by the government or other institutions.
- **Professional affiliation:** IP professional associations, if they exist, are primarily focussed on networking and business activities and conduct minimal self-regulation.

Thus, in general, IP may be defined as a variety of health service providers who are untrained and work outside regulatory frameworks.

2.31 Information on particulars of health

In this block, information on coverage of health financing scheme/insurance of the household, medical expenditure incurred by the household on hospitalization and non-hospitalization and reimbursement on the same by the insurance company or employer was collected.

Information was collected whether any member of the household is covered by any health financing scheme/insurance as on the date of survey.

The following health financing scheme/insurance are covered:

- i. Ayushman Bharat (AB)- Pradhan Mantri Jan Aarogya Yojana (PMJAY)
- ii. Janani Suraksha Yojana
- iii. ESIS/ESIC
- iv. CGHS/ECHS/Other Central Govt. Health Scheme (of Railways etc.)
- v. State Health Insurance Scheme
- vi. Other Health Insurance through employer/medical reimbursement by employer
- vii. Privately purchased commercial insurances
- viii. Other Insurances

- i. **Ayushman Bharat – Pradhan Mantri Jan Aarogya Yojana (PMJAY):** This is a component of Ayushman Bharat scheme of Government of India which aims at providing health cover of Rs. 5 lakhs per family per year for secondary and tertiary healthcare hospitalization to poor and vulnerable families (approximately 50 crore beneficiaries) that form the bottom 40% of the Indian population. The households included in this scheme are based on the deprivation and occupational criteria of Socio-Economic Caste Census 2011 (SECC 2011) for rural and urban areas respectively.
- ii. **Janani Suraksha Yojana:** Janani Suraksha Yojana (JSY) is a safe motherhood intervention under the National Health Mission. It has been implemented with the objective of reducing material and neonatal mortality by promoting institutional delivery among poor pregnant women. The Yojana launched on 12th April 2005, by the Hon'ble Prime Minister and implemented in all states and UTs with special focus on low performing states. JSY is a 100% centrally sponsored scheme and it integrates cash assistance with delivery and post-delivery care.
- iii. **ESIS/ESIC (Employee's State Insurance Scheme (ESIS)/Employee's State Insurance Corporation (ESIC):** The promulgation of Employees' State Insurance Act, 1948 (ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. The ESI Act 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social Security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from

deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

- iv. **CGHS/ECHS/Other Central Govt. Health Scheme (of Railways, etc.):** Central Government Health Scheme (CGHS) is providing comprehensive medical care to the Central Government employees and pensioners enrolled under the scheme. It caters to the healthcare needs of eligible beneficiaries covering all four pillars of democratic set up in India namely Legislature, Judiciary, Executive and Press. CGHS is the model Health care facility provider for Central Government employees & Pensioners and is unique of its kind due to the large volume of beneficiary base, and open-ended generous approach of providing health care. CGHS provides health care through the systems of Medicine: Allopathic, Homoeopathic, Indian System of Medicine, Ayurveda, Unani, Siddha and Yoga.

Ex-Servicemen Contributory Health Scheme (ECHS) of Department of Ex-Servicemen Welfare (ESW), M/o Defence was launched with effect from 01 April, 2003. This is a contributory social health insurance scheme, for every personnel of the armed forces, after retirement. The member has to make one time contribution to the scheme according to his pay scale. Ex-servicemen authorised for treatment, not only in service hospitals, but also in those civil/private hospitals which are specifically empanelled with the ECHS.

Any other health schemes of Central Government such as Health schemes of M/o Railways, etc., are also included under this category.

- v. **State Health Insurance Scheme:** Any specific health insurance scheme launched by State Government is to be covered under this category. For e.g., Swasthya Sathi Health Insurance Scheme of Government of West Bengal. Biju Swasthya Kalyan Yojana of Government of Odisha, Karunya Health Scheme of Government of Kerala etc.
- vi. **Other Health Insurance through employer/medical reimbursement by employer:** Any other health insurance scheme provided by employer/medical reimbursement by employer, which does not cover under any of the categories mentioned above, is recorded under this category.
- vii. **Privately purchased commercial insurances:** Any health insurance scheme purchased directly from an insurance company comes under this category.
- viii. **Other Insurances:** If any other health insurances were held by any member of the household as on the date of survey which does not falls under the categories mentioned earlier, are reported under this category.

2.32 Medical expenditure: This included bed charges, doctor's/surgeon's fees, the total amount paid for medicines, diagnostic tests, attendant charges, physiotherapy, personal medical appliances, blood, oxygen, etc. during the stay at the hospital (within the reference period) – whether made available by the hospital or procured from outside. Expenses on transportation of the patient to or from the hospital were excluded.

2.32.1 Problem of non-available break-up of medical expenditure:

If the inability to provide the break-up is because the household paid a lump-sum payment to the medical institution/clinic without being given any idea as to the details, the entire amount was recorded with a comment.

2.33 Out-of-pocket medical expenditure: In cases of both hospitalised and non-hospitalised treatment, some amount of medical expenditure may be reimbursed by employers or insurance companies (public or private), or other agencies. In this survey, expenditures were recorded when borne initially by the patient's household, whether or not reimbursed later. The amount reimbursed later was also separately recorded. Out-of-pocket medical expenditure is the total medical expenditure initially borne by the households less reimbursement received later on account of hospitalized/non-hospitalized treatment.

Points to remember

- ❖ All the expenditure for in-patient treatment in hospital was excluded from here. However, expenses on medical treatment received before hospitalization or after discharge from hospital were covered here if incurred during the last 30 days.
- ❖ Expenses incurred includes all expenditure made by the household ('Out-of-pocket' expenditure) even if reimbursed later.
- ❖ Expenditure incurred and reimbursed by the employer or any other organisation is not regarded as 'provided free'.
- ❖ Total expenditure incurred by households was recorded even if direct payment to the clinic/medical institution is made by the employer or an insurance company, the payment made to the medical institution/clinic was recorded and the amount of reimbursed entered in the respective question.
- ❖ In case some or all of the expenditure was incurred by some other household, efforts have been made to record the approximate expenditure if the exact amount is not known.

2.34 Package component (in whole number of Rupees)

'Packages' in respect of hospitalization cases involves specific surgical or non-surgical medical procedures, inclusive of different items like operation theatre (OT) charges, OT consumables, medicines, doctor's fees, bed charges, etc. Are common nowadays in all private hospitals. Normally, packages do not include additional diagnostic tests, attendant charges, physiotherapy, personal medical appliances, blood, oxygen etc.

The expenditure incurred (Non-package component) on treatment during last 365 days as an in-patient of medical institution are recorded in following heads:

- Doctor's/surgeon's fee (hospital staff/other specialist)
- Medicines
- Diagnostic tests
- Bed charges
- Other medical expenses (attendant charges, physiotherapy, personal medical appliances, blood, oxygen, etc.)
- Transport

'Packages' in respect of non-hospitalization cases involves specific non-surgical medical procedures, inclusive of different items like medicines, doctor's fees, etc. are common nowadays in all private hospitals/clinics. Normally, packages do not include additional diagnostic tests, attendant charges, physiotherapy, personal medical appliances, blood, oxygen, etc.

The expenditure incurred (non-package component) on treatment during last 365 days as an in-patient of medical institution was recorded in the following heads:

- ❖ **Doctor's/surgeon's fee:** This includes the total amount paid on account of doctor's/surgeon's fees chargeable for the period of treatment during the period of last 30 days for non-hospitalization and/or preventive measures and/or self-care. It is not necessary that the doctor(S) or surgeon(s) are attached to the hospital.
- ❖ **Medicines:** The total amount paid for medicines (including drips) used for treatment during the period of last 30 days for non-hospitalization and/or preventive measures and/or self-care was recorded here.
- ❖ **Diagnostic tests:** The total amount paid for diagnostic tests carried out on the patient during the period of last 30 days for non-hospitalization and/or preventive measures and/or self care-whether using the hospital's diagnostic facilities or not was recorded here.

Other medical expenses (attendant charges, physiotherapy, personal medical appliances, blood, oxygen, etc.)

This item includes all other expenditure involved in medical treatment as non-hospitalization and/or preventive measures and/or self-care during the period of last 30 days. The amount was recorded in whole number of Rupees.

❖ **Other medical expenses:**

- **Attendant charges:** This refers to the expenses on charges for services of hired attendant(s) (caregivers) who stay with the patient to attend to their needs. They may be arranged by the medical institutions/clinic or by the patient's relatives. If any household member or relative attends to the patient, no imputation of charges for his/her services was made.
- **Physiotherapy:** If the patient has undergone any physiotherapy during the reference period, the amount chargeable was included here irrespective of whether the physiotherapist is the staff of the medical institution/clinic or not.
- **Personal medical appliances:** This refers to the expenses on personal medical appliances of durable nature like spectacles, contact lenses, intro-ocular lenses, hearing aids, trusses, crutches, catheter, nebulizer, artificial limbs, pacemaker, etc. for the purpose of treatment of the patient.
- **Blood, oxygen cylinder, etc:** Charges for blood, oxygen cylinders and other consumables such as gloves, bandages, plaster, etc., used by the patient, was included here. Apart from these, expenses on any other

item used in medical treatment or diagnosis during the reference period, such as thermometer, infra-red lamp, blood pressure measuring equipment, blood sugar measuring kit, bed-pan, urinal, etc., was recorded against this item, if borne by the household.

❖ **Transport for patient:**

Here the amount paid for transport charges (by ambulance or other vehicle) for the patient-whether accompanied by other household members or not-for the journey to medical institution/clinic for treatment, and for the return journey, was recorded. In addition, charges for any journey performed on medical advice during the reference period (e.g. to undergo a diagnostic test which doctor advised but did not have the facilities at the clinic/medical institution to perform) was included.

2.35 Types of reimbursement

For some cases, expenditure made from out of pocket gets reimbursed at a later date. These may include:

- ❖ Payment through government sponsored schemes if any, like RSBY, Arogyasri, etc.
- ❖ Reimbursement from government as an employer like cases of CGHS beneficiaries, reimbursement from central govt. through AMA (Authorised Medical Attendant) or through other reimbursement process of PSUs, nationalized banks and all state govt.
- ❖ Reimbursement from employer supported health protection (other than govt.)
- ❖ Reimbursement from insurance companies
- ❖ Other types of reimbursement (paid by some charitable organisation or other household(s)).

Points to remember

- The amount of expenditure reimbursed by medical insurance company/employer for treatments on non-hospitalization and/or preventive measures and/or self care during the last 30 days was recorded here in whole number of rupees.
- Expenses incurred includes all expenditure made by the household on hospitalization including institutional delivery ('out-of-pocket' expenditure) during the last 365 days, even if reimbursed later.
- Expenditure incurred and reimbursed by the employer or any other organization was not regarded as 'provided free'.
- Total expenditure incurred by households was recorded even if direct payment to the medical institution was made by the employer or an insurance company (cashless treatment).
- If the household made a payment to the medical institution which is later partly or wholly reimbursed by the employer or an insurance company, the

payment made to the medical institution/clinic was recorded.

- In case, the reimbursement has not been provided by an insurance company or employer till date for expenses incurred on non-hospitalized treatment during the last 30 days, however, the same was supposed to be reimbursed by an insurance company or employer in a near future.
- In case some or all of the expenditure was incurred by some other household, efforts were made to record the approximate expenditure if the exact amount was not known.
- For institutional childbirth, expenditure was recorded excluding pre-natal and post-natal care.

2.36 Formal education will cover general, technical, professional, vocational courses offered by colleges, universities, open schools, open education universities, CA/CFA/ICWA/CS or similar professional bodies or other institutions.

Information on the course currently enrolled and attending, currently enrolled but not attending, courses previously attended and completed and those courses previously attended but not completed was collected along with the number of years completed (excluding repeated years) in each of such courses. Further, information regarding recognition of school/institute where currently enrolled, medium of instruction in school in which currently enrolled, type of school where currently enrolled and whether the current class of enrolment is same as that of the previous academic year was also collected.

Person level information was collected on education of currently enrolled persons with age ≥ 3 years.

2.36.1 Type of courses enrolled ever:

- ❖ Pre-primary (ECCE centre of Aanganwadi/nursery/KG)
- ❖ School/Junior College: Primary to Higher Secondary
- ❖ Vocational courses after completing class 8 or above (ITI/others)
- ❖ Open and Distance Education Courses upto Higher secondary level including open school
- ❖ Open and Distance Education Courses post Higher secondary level including those conducted in open college/open university
- ❖ College (Degree/Diploma)
- ❖ College/University (Post graduate/PhD/Post-doctoral)
- ❖ Technical/professional diploma education after Higher Secondary/graduate/ post graduate (Engineering/ Medical/ Law/ CA/ ICWA/ CFA/ MBA, MCA, Nursing/ Education/etc.)

Points to remember

- ❖ Repeated Years in a particular class/course were not included in number of Years completed or attended.
- ❖ For school education, number of years completed/attended (excluding repeated years) excluded years attended/completed in pre-primary level.

- ❖ Number of years completed/attended (excluding repeated years) for pre-primary, if any, was recorded separately.
- ❖ For courses (apart from school education) in which the eligible household member has attended or completed for less than 9 months, 0 was reported.
- ❖ If there was any delay in receiving final degree/diploma/certificate or delay due to late commencement of completion of session for a course enrolled, the number of years spent in the course till receipt of final degree/diploma/certificate was considered while calculating number of years completed/attended excluding repeated years.

2.37 Medium of instruction in school

The language in which the person mainly receives instruction in school in which currently enrolled (either attending or not attending) was recorded.

2.38 Type of school in which currently enrolled

The following concepts of Government school, Private school aided by Government, Private un-aided (recognised) school, unrecognised were followed in this survey:

- (i) **Government school:** A Government school is a school which is run by Central or State Government or public sector undertakings or autonomous organisations or municipal corporations or municipal committees or notified area committees or zilla parishads or panchayat samitis or cantonment boards etc. which are completely financed by the Government. It may be note that a Government institution may be run by either the Government directly or through a governing body/managing committee, etc., set-up by the Government.
- (ii) **Private school aided by Government:** Private school which is run by an individual or a private organisation but receives maintenance grant from Government.
- (iii) **Private un-aided (recognised) school:** Private school recognised by State or Central Government, which is managed by an individual or a private organisation and not receiving maintenance grant from Government.
- (iv) **Unrecognised School:** Unrecognised school is the one that is run by an individual or a trust or a society or other private organisation and is not approved by any competent authority (i.e. Central or State Governments or public sector undertakings or autonomous organisations or municipal corporations or municipal committees or notified area committees or zilla parishads or panchayat samitits or cantonment boards etc.) but running classes on the pattern of recognised school. This does not include coaching centres.

2.39 Non-formal educational courses: Non-formal educational courses are courses that does not have the level of curriculum, syllabus, accreditation and certification associated with formal education but has more structure than that associated with informal education.

The information on whether the household member is currently attending any one of the non-formal education courses like courses from government programmes like Non-Formal Education Centres, Total Literacy Campaign, similar programme run by NGOs or any one of the non-formal trainings like driving training, beautician training, hereditary training, training under USTTAD scheme etc. was collected.

2.40 USTTAD (Upgrading the Skills and Training in Traditional Arts/Crafts for Development) scheme launched in May, 2015 by the Ministry of Minority Affairs aims to preserve heritage of traditional arts and crafts of minority communities and build capacity of traditional crafts persons and artisans and establish linkages of traditional skills with the global market.

The scheme has the following programmes:

- Up-gradation of Skills and Training in Traditional Arts/Crafts through Institutions.
- USTTAD Fellowship for Research and Development.
- Support to Craft museum for curating traditional arts/crafts.
- Support to minority craftsmen/artisans for marketing their products.

2.41 Total Literacy Campaign: The Total Literacy Campaign (TLC) is a dominant strategy for eradication of adult illiteracy in India. This approach is a potent and viable model which helps to achieve a significant breakthrough in the literacy scene in India. It constitutes the principal strategy of National Literacy Mission (NLM). This TLC is area-specific, time bound, volunteer-based, cost effective and outcome-oriented. The thrust is on attainment of functional literacy through prescribed norms of literacy and numeracy. The learner is the focal point in the entire process. The measurement of learning outcome is continuous, informal and participative.

2.42 Padna Likhna Abhiyan: The primary objective of Padna Likhna Abhiyan is to impart functional literacy to adult illiterates aged 15 and above under a Basic Literacy Programme, generally of one year duration. Adult Education in the Indian context, extends educational option to those adults, who have lost the opportunity of getting an education and transcended the age for formal education, and now feel a need for pursuing basic education, vocational education (Skill development), equivalency, physical and emotional development, practical arts, applied science, or recreation.

In order to ensure complete focus on eradication of illiteracy, the scheme of Adult Education (Padna Likhna Abhiyan) focused on the Basic Literacy component. It focuses on the Basic Literacy component in four months cycle amongst the adults of the nation.

2.43 Person level information on formal education of erstwhile member of household studying outside India at present, if any, with age greater than or equal to 18 years:

For this survey, an 'erstwhile member' (age 18 years and above) of a sample household currently pursuing formal education (apart from school education) (formal education after completing higher secondary/class 12 or equivalent level) outside India is defined as:

A person whose country of origin is India and have crossed the border for the purpose of pursuing tertiary education (i.e. formal education after completing higher secondary/Class 12 or equivalent level) and will be the member of that Indian household whenever he/she returns back to India either temporarily or permanently.

2.44 Enrolment

For this survey, Enrolment covered education acquired through formal pre-school, school, college, university, institutions, ITIs, vocational/technical training institutes, special schools for children with special needs, etc. Enrolment included enrolment in kindergarten (upper and lower), nursery, pre-primary school, Early Childhood Care and Education (ECCE) or Aanganwadi etc.

However, Enrolment did not cover the following:

- a. Education acquired through play schools, Government run literacy programmes e.g., Non-formal Education Centres/Total Literacy Campaign/Adult Education Centres and similar programmes run by NGOs.
- b. Gaining knowledge from master craftsmen, motor repairing shops, parents/relatives who work in agriculture, tailoring, pottery, cobbling, carpenter, etc. work-based training given at offices.

The ability to read and write short simple statements in everyday life with understanding for a particular age group is estimated by considering the following two cases.

I: For persons who have never been enrolled in formal education, questions were administered to determine if they have the ability to read and write short, simple statements with understanding.

II: For persons who are either currently enrolled or have ever been enrolled in formal education, they were categorized as having the ability to read and write short, simple statements with understanding if they have at least attended and completed pre-primary or Class I level of education.

It is to be noted that no test of the ability was performed.

Simple arithmetic calculations involve the ability to perform basic mathematical operations such as addition, subtraction, multiplication, and division, which individuals typically use in their day-to-day lives. However, no specific test was conducted to assess an individual's ability to perform these simple arithmetic calculations.

While canvassing the CAMS 2022-23 schedule, each of the members (of age 3 years and above) of the sampled household was enquired about details of courses currently enrolled and/or ever enrolled in formal education starting from pre-primary level of education and the number of years attended/completed in each such course(s) excluding repeated years, as on the date of survey were also recorded.

2.45 Mean Years of Schooling: Mean Years of Schooling of the persons of a particular age group (say, 15 years or above / 25 years or above) indicates the weighted average number of completed years informal education of a country's

population of that age group, excluding years spent repeating individual grades. Mean Years of Schooling (MYS) for each gender, sector, and age group is calculated using the following formulae:

$$MYS = \frac{\sum_{j=1}^m \sum_{i=1}^{n_j} y_{ij} \times w_j \times I_i(.)}{\sum_{j=1}^m \sum_{i=1}^{n_j} w_j \times I_i(.)}$$

where,

y_{ij} =number of years(excluding repeated years) spent in formal education by the i^{th} individual in the j^{th} household

w_j =design-based weight (multiplier)of the j^{th} household

$I_i(.)$ =Indicator variable that takes value 1 if the age of the i^{th} individual is greater than or equal to T , and 0 otherwise.

m =total number of sampled households

n_j =number of individuals in the j^{th} household

T =threshold age for the age group under consideration

Suppose a person is currently in the third year of a college graduation course. Prior to that, he attended 2 years of pre-primary education and 12 years of schooling. Therefore, the total number of years considered for calculating the Mean Years of Schooling (MYS) is (2 +12 +2) years,i.e.16 years.

2.46 Graduate in Science and Technology: A person has been considered as graduated in science and technology if s/he has completed graduate (degree/diploma) level courses or undergoing post-graduate degree/diploma or doctorate/post-doctorate degree in at least one of the disciplines like Agriculture and Fisheries, Engineering and Technology, IT and Computer Science, Medical science (including Nursing), Management, Science, Veterinary and Animal Sciences.

2.47 ICT Skills: In this survey, information on the execution of some **ICT skills** (like send messages with attached files, use copy and paste tools to duplicate or move information, documents etc.) was collected from sample persons of age 15 years and above with the reference period of last three months preceding the date of survey. Further, the information on the ability to perform certain skills (like searching of internet for information, sending or receiving emails, performing online banking transactions) was collected for sample persons. It is to be noted that information on the execution/ability to perform the skills was collected based on the reporting of the informant only. While collecting this information, no tests of the skills of the informants were performed.

CHAPTER 3

SUMMARY OF FINDINGS

SUMMARY OF FINDINGS

Introduction

The National Sample Surveys (NSSs) are conducted by the Government of India since 1950 to collect data on various socio-economic indicators employing scientific sampling methods. The Seventy-ninth round of NSS was commenced from July 2022 to June 2023.

NSS 79th round was earmarked for collection of data for compilation of a number of Sustainable Development Goal (SDG) indicators through a 'Comprehensive Annual Modular Survey (CAMS)' along with a survey on Ayurveda, Yoga, Naturopathy, Unani, Siddha, Sowa-Rigpa/Amchi and Homoeopathy (AYUSH). Two separate reports have been prepared of NSS 79th Round on the subjects, "Comprehensive Annual Modular Survey in Delhi 2022-23" & "Survey on AYUSH in Delhi 2022-23".

Objective of Comprehensive Annual Modular Survey (CAMS)

CAMS was introduced to cater the emerging need for supply of information on high-frequency socio-economic indicators that are not available from any other sources like, administrative data etc. Information required for the purpose of generating some SDG indicators and sub-indicators of Global Indices was also collected.

Geographical Coverage: The Delhi Sample Survey covered the rural and urban Delhi.

Survey Period: The survey was commenced from July 2022 and it was of one year duration. CAMS and AYUSH were carried out simultaneously in same FSU but in different households.

Schedule of enquiry: During this round, for survey on CAMS, the following Schedules of enquiry were canvassed:

Schedule 00CM:	List of Households
Schedule CAMS 2022-23:	Comprehensive Annual Modular Survey

Total sample size (FSUs): Total 180 FSUs (136 urban FSUs + 44 rural FSUs) were allotted for Delhi State Sample for CAMS survey by Ministry of Statistics & Programme Implementation (MoSPI), Govt. of India (GoI).

Selection of FSUs within a stratum/sub-stratum:

From all the sub-strata in both rural and urban sector within each stratum, the required numbers of FSUs were selected by Simple Random Sampling without Replacement (SRSWOR) scheme.

A total of 20 households were surveyed in each selected FSU for CAMS.

5 households were selected from SSS1 and 15 households were selected for SSS2 with “Simple Random Sampling Without Replacement (SRSWOR).

SURVEY	SSS	Composition of SSS	Number of households surveyed
CAMS	1	Households with at least one member (including deceased former member) hospitalized (including institutional childbirth) during last 365 days	5
	2	Remaining households	15

Selection of households: The sample households from each SSS for each of the Schedule were selected by SRSWOR. The two different surveys were conducted in two different households. If there is any shortage of households then same households were canvassed for different schedules.

Note:

In CAMS, an attempt was made to collect person-level information on the formal education of erstwhile household members aged 18 years or above who are currently studying outside India. However, the survey could not capture a sufficient number of households where at least one member aged 18 years or above is currently studying outside India. Since the above-mentioned dataset is not usable for any policy purposes, the tables based on this dataset is not required to be included in the report to avoid possible ambiguity in interpreting the results.

Contents of the Report

This report contains Volume I to Volume IV. Volume I contains three chapters including the introductory chapter (Chapter One). Chapter Two describes the concepts & definitions of those terms used in the survey in connection with the various indicators/items covered in this report. The Summary of Findings is presented in Chapter Three. The tables of various indicators in comparison with All-India data are presented in Volume II. The detailed tables forming the basis of this report representing the data of NSS 79th Round, Delhi (State Sample) are presented in Volume III. Further, the comparative tables of Delhi (State Sample) alongwith all the States/UTs are presented in Volume IV. Appendix A gives a detailed description of the sample design and estimation procedure used for this survey. Appendix B gives a facsimile of the schedules canvassed in NSS 79th Round survey on “Comprehensive Annual Modular Survey (CAMS). The report also bears Executive Summary & Limitations of the survey.

Summary of findings contains Seven Sections such as:

Section 1: Households and Population

Section 2: Education

Section 3: Health

Section 4: Financial Inclusion

Section 5: Mobile & Internet

Section 6: ICT Skill

Section 7: Others

Section 1: Households and Population

The percentage distribution of persons, percentage distribution of households and average household size, as estimated from the survey for Delhi & at All-India level is presented in Statement 1.

Statement 1: Percentage distribution of persons, percentage distribution of households and average household size in Delhi & at All-India level						
Particulars	Delhi			All-India		
	Rural	Urban	Rural + Urban	Rural	Urban	Rural + Urban
Percentage distribution of persons (%)	2.5	97.5	100	70.8	29.2	100
Percentage distribution of households (%)	2.2	97.8	100	67.1	32.9	100
Average household size (0.0)	3.8	3.3	3.4	4.3	3.7	4.1

Ref.: Volume II: Table No. 27

Section 2: Education

2.1 Persons able to read and write short simple statements in their everyday life with understanding

The ability to read and write short simple statements in everyday life with understanding for a particular age group is estimated by considering the following two cases:

- For persons who have never been enrolled in formal education, questions were administered to determine if they have the ability to read and write short, simple statements with understanding.
- For persons who are either currently enrolled or have ever been enrolled in formal education, they were categorized as having the ability to read and write short, simple statements with understanding if they have at least attended and completed pre-primary or Class I level of education.

A person is considered as 'literate' if he/she can read and write a simple message in any language with understanding. Persons who are not able to read and write a simple message with understanding in at least on language is considered as 'not literate'.

The information on the ability was obtained based on the informant's reporting, and no test was conducted to verify the same.

The percentage of persons able to read and write short simple statements in their everyday life with understanding as on date of survey, for different age groups in Delhi & at All-India level has been presented in Statement 2.

Statement 2: Percentage of persons able to read and write short simple statements in their everyday life with understanding as on date of survey in Delhi & at All-India level

Age group (years)	Delhi (State Sample)			All-India		
	Male	Female	Person	Male	Female	Person
15 – 24	98.5	97.7	98.2	97.9	96.0	97.0
15 – 29	98.7	97.4	98.1	97.5	94.6	96.1
15 years and above	97.7	89.7	94.1	88.3	74.8	81.6

Ref.: Volume II: Table No. 1

About 94.1% persons in Delhi in the age group '15 years & above' were able to read

and write short simple statements in their everyday life with understanding. However, at All-India level, the percentage was 81.6% for the same age group.

Figure 1.1 presents sector-wise estimates, while Figures 1.2 and 1.3 provide gender-sector-wise estimates of the percentage of persons having the ability to read and write short simple sentences in their everyday life with understanding in Delhi & at All-India level.

Fig. 1.1: Percentage of persons able to read and write short simple statements in their everyday life with understanding in Rural & Urban areas of Delhi & All-India

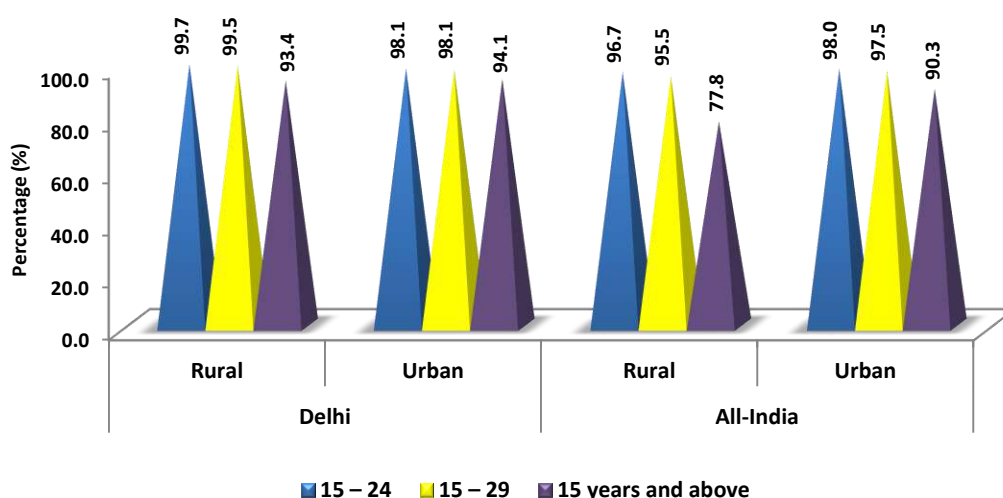

Fig. 1.2: Gender-wise percentage of persons able to read and write short simple statements in their everyday life with understanding in Rural areas of Delhi & All-India

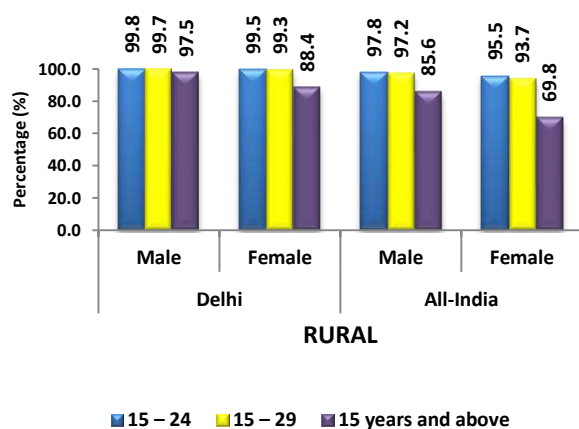

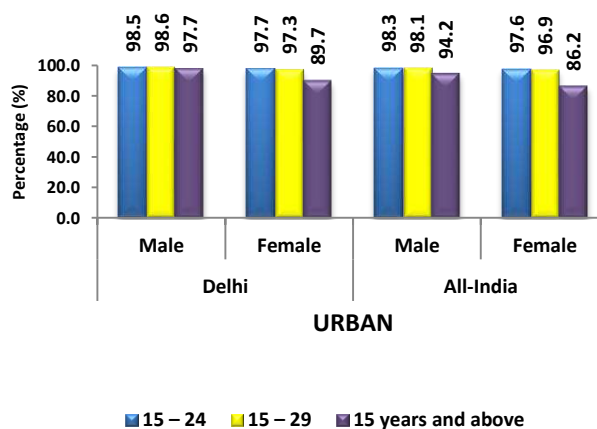

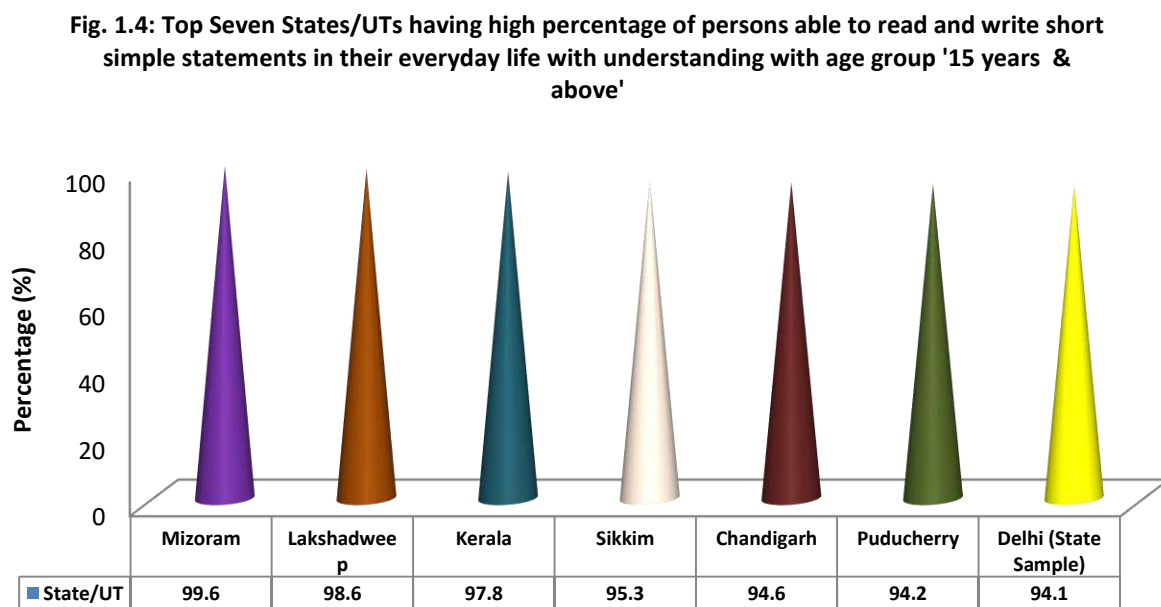

Fig.: 1.3: Gender-wise percentage of persons able to read and write short simple statements in their everyday life with understanding in Urban areas of Delhi & All-India

Top Seven States/UTs having high percentage of persons able to read and write short simple statements in their everyday life with understanding with age group '15 years & above' is presented in Figure 1.4.

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 1c

2.2 ***Persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations***

Simple arithmetic calculations involve the ability to perform basic mathematical operations such as addition, subtraction, multiplication, and division, which individuals typically use in their day-to-day lives.

No specific test was conducted to assess an individual's ability to perform these simple arithmetic calculations.

Age '15 Years & Above' was considered for this Indicator

The percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations as on date of survey, for different age groups in Delhi & at All-India level has been presented in Statement 3.

Statement 3: Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations as on date of survey in Delhi & at All-India level

Age group (years)	Delhi			All-India		
	Male	Female	Person	Male	Female	Person
15 – 24	98.5	97.7	98.2	97.8	95.9	96.9
15 – 29	98.7	97.4	98.1	97.4	94.4	95.9
15 years and above	97.7	89.1	93.8	87.9	74.2	81.2

Ref.: Volume II: Table No. 2

In Delhi, about 93.8 % persons in the age group '15 years & above' were able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations while at All-India level, it was 81.2% for the same age group.

Figure 2.1 presents sector-wise estimates, while Figures 2.2 and 2.3 provide gender-sector-wise estimates of the percentage of persons having this ability in Delhi and at All-India level.

Fig. 2.1: Sector-wise percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations in Rural & Urban areas of Delhi and All-India

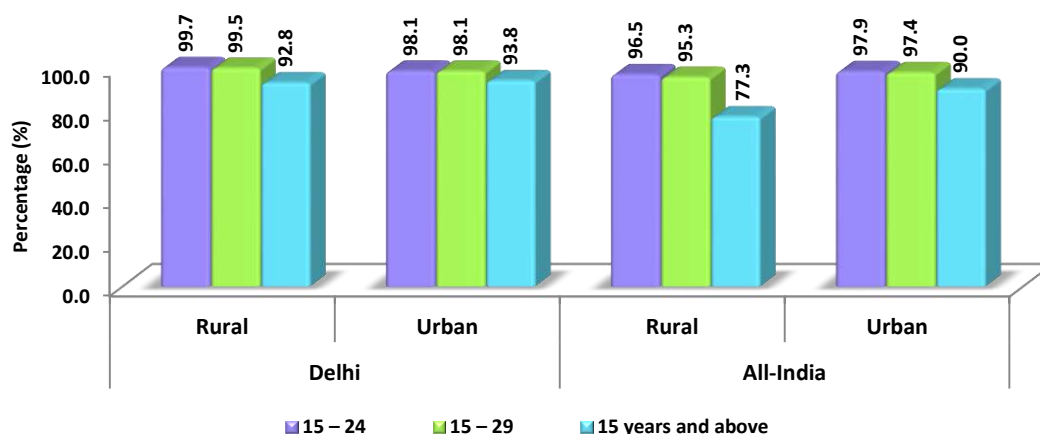

Fig. 2.2: Gender-wise percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations in Rural areas of Delhi and All-India

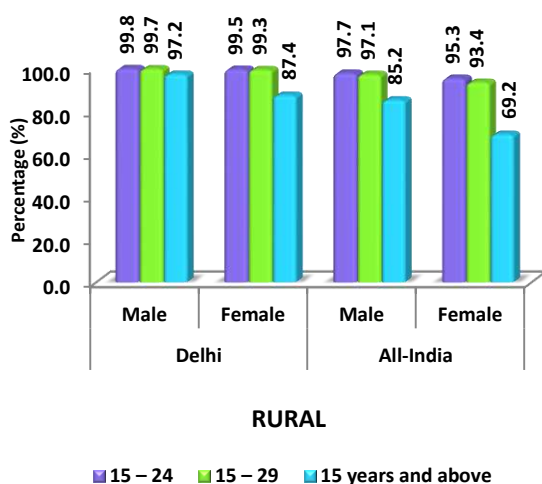

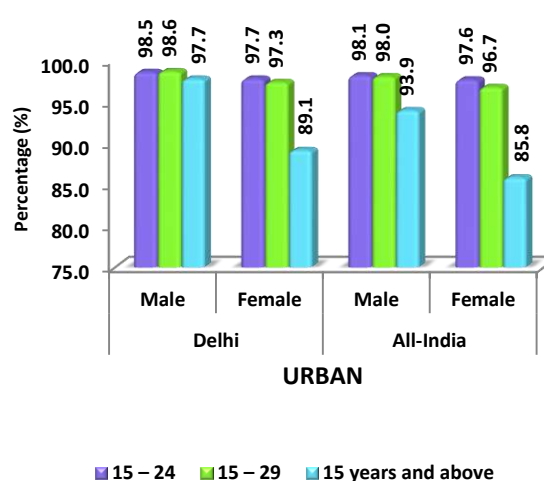

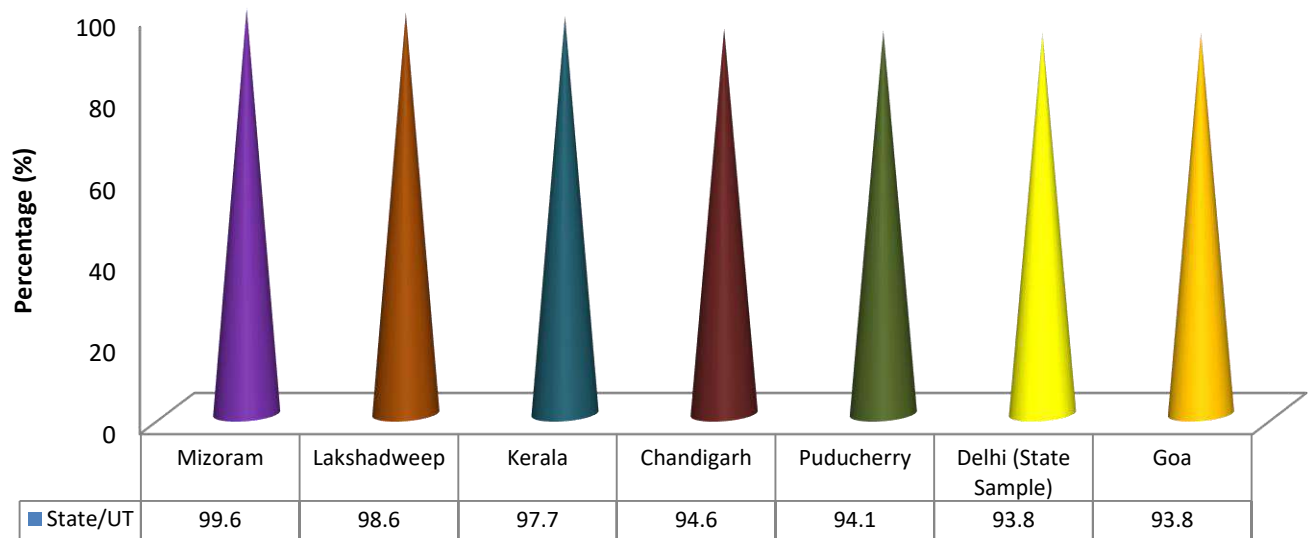

Fig. 2.3: Gender-wise percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations in Urban areas of Delhi and All-India

Top Seven States/UTs having high percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations with age group '15 years & above' is presented in Figure 2.4.

Fig. 2.4: Top Seven States/UTs having high percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations with age group '15 years & above'

Ref.: Volume IV: Table No. 2c

2.3 Mean years of schooling in formal education

In this survey, information was collected from each of the sampled persons, who were either 'currently enrolled' or 'ever enrolled but currently not enrolled' in formal education, on each course s/he attended/ attending, along with the corresponding number of years (excluding repeated years) completed/attended.

Formal education covers general, technical, professional, vocational courses offered by colleges, universities, open schools, open education universities, CA/CFA/ICWA/CS or similar professional bodies or other institutions.

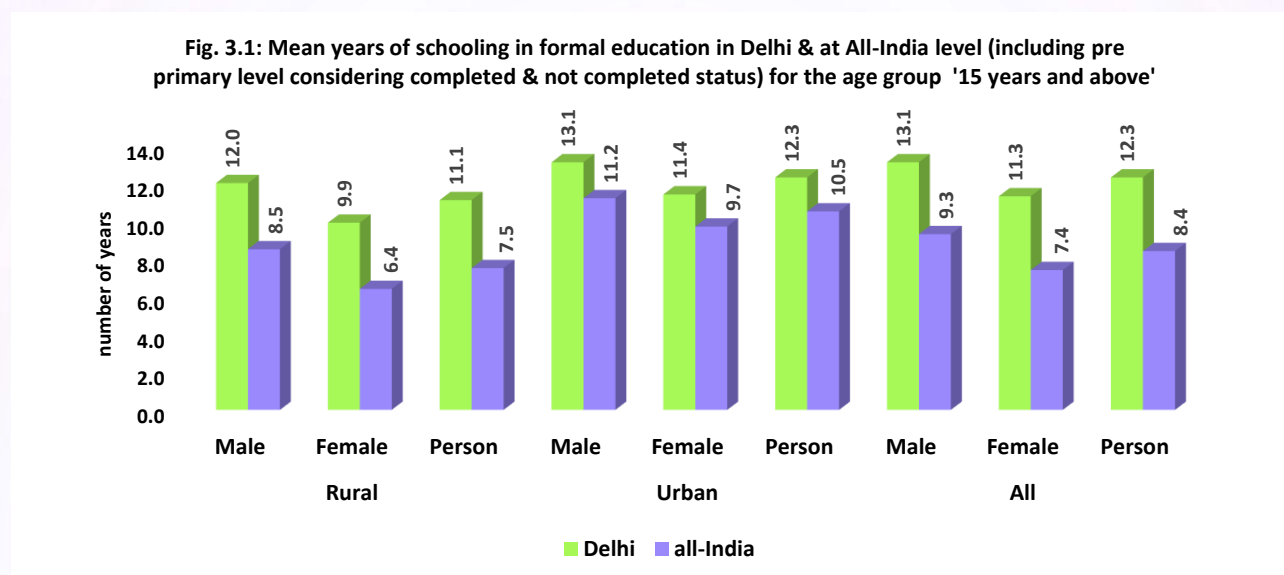

Non-formal educational courses are courses that does not have the level of curriculum, syllabus, accreditation and certification associated with formal education but has more structure than that associated with informal education.

Note: This information may not be used to derive class or course-wise enrollment figures in formal education.

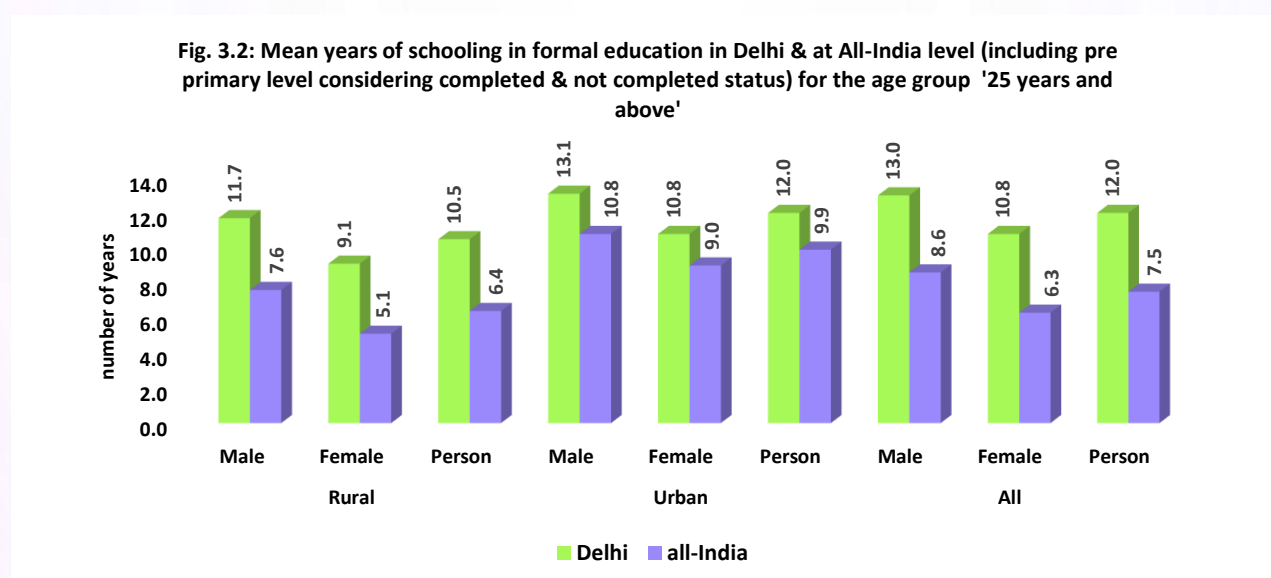

- ♠ The mean years of schooling (MYS) is calculated as the weighted average of the informal education (excluding repeated years) for all persons for any age group like '15 years and above'. Repeated years have not been considered in the calculation of MYS.
- ♠ The calculation includes all courses and educational levels, including pre-primary education, regardless of whether they were completed or not. For instance, if a course has duration of 3 years and a person attended 2 years only, then while calculating MYS, 2 years was considered.
- ♠ For persons who were reported as 'never enrolled' in formal education, '0' year is considered while calculating MYS. The calculations of MYS were generated by the tabulation software of NSS 79th Round.

Figures 3.1 and 3.2 present the mean years of schooling in formal education of persons of age '15 years and above' and '25 years and above' in Delhi & at All-India level.

Mean years of schooling in formal education for the age group '15 years & above' was 12.3 years in Delhi. However, at All-India level, the percentage was 8.4 years.

Ref.: Volume II: Table No. 3

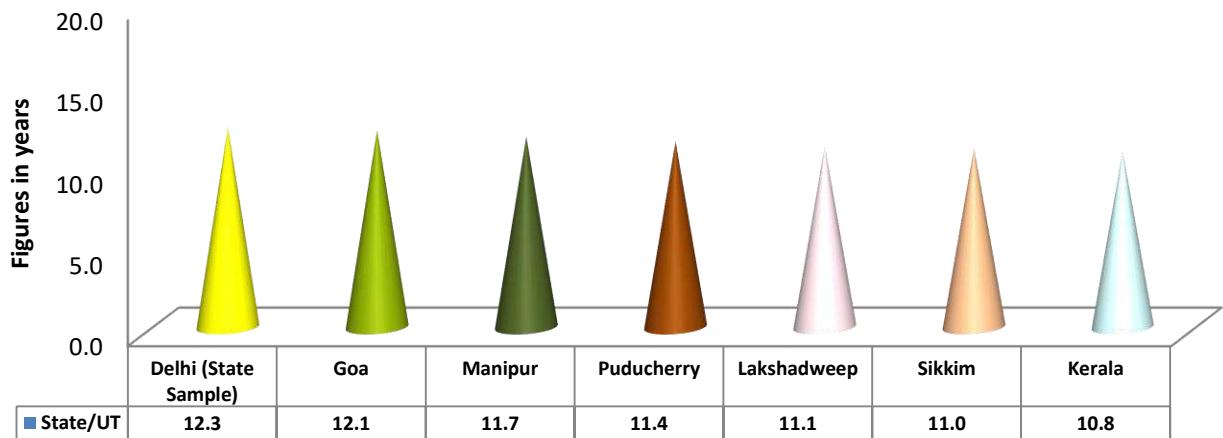

Ref.: Volume II: Table No. 3

Mean years of schooling in formal education for the age group '25 years & above' was 12.0 years in Delhi. However, at All-India level, the percentage was 7.5 years.

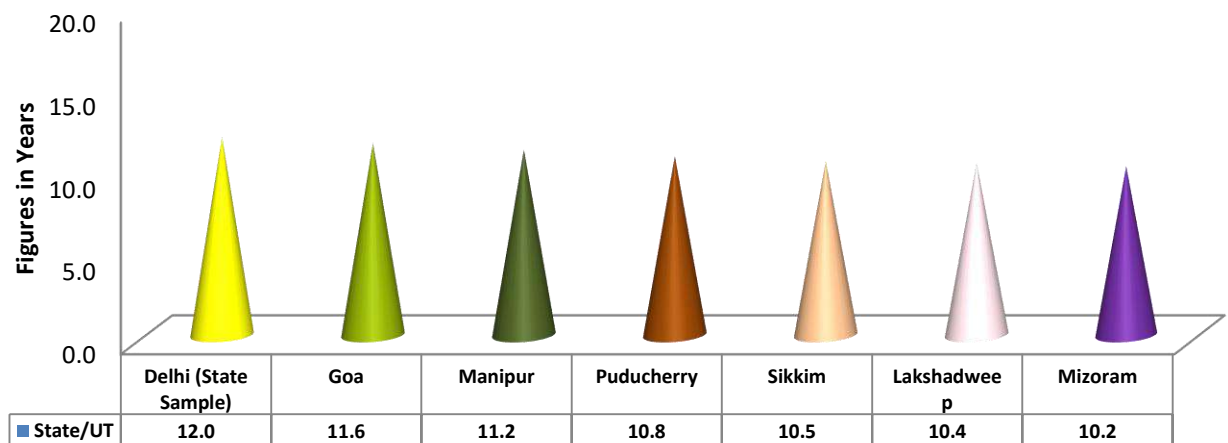

Top Seven States/UTs having high Mean years of schooling in formal education for the age group '15 years & above' and for the age group '25 years & above' are presented in Figure 3.3 & 3.4.

Fig. 3.3: Top Seven States/UTs having high Mean years of schooling in formal education for the age group 15 years & above

Ref.: Volume IV: Table No. 3b

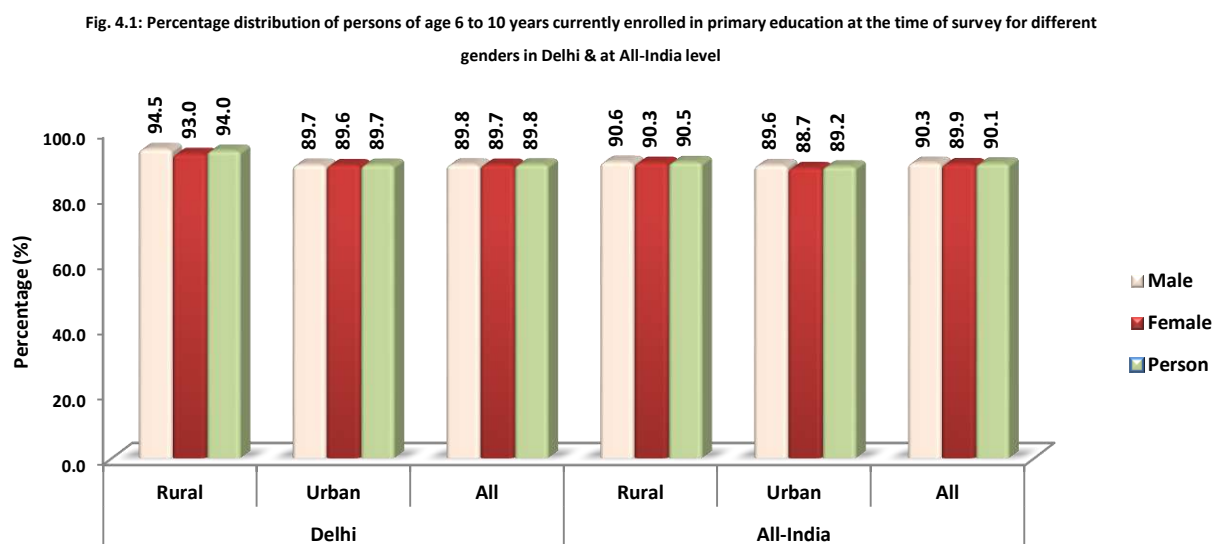

2.4 Persons of age 6 to 10 years currently enrolled in primary education (Class I to Class V)

- ♣ For this survey, Enrolment covered education acquired through formal pre-school, school, college, university, institutions, ITIs, vocational/technical training institutes, special schools for children with special needs, etc.
- ♣ Enrolment included enrolment in kindergarten (upper and lower), nursery, pre-primary school, Early Childhood Care and Education (ECCE) or Aanganwadi etc.

Type of School in which Currently Enrolled:

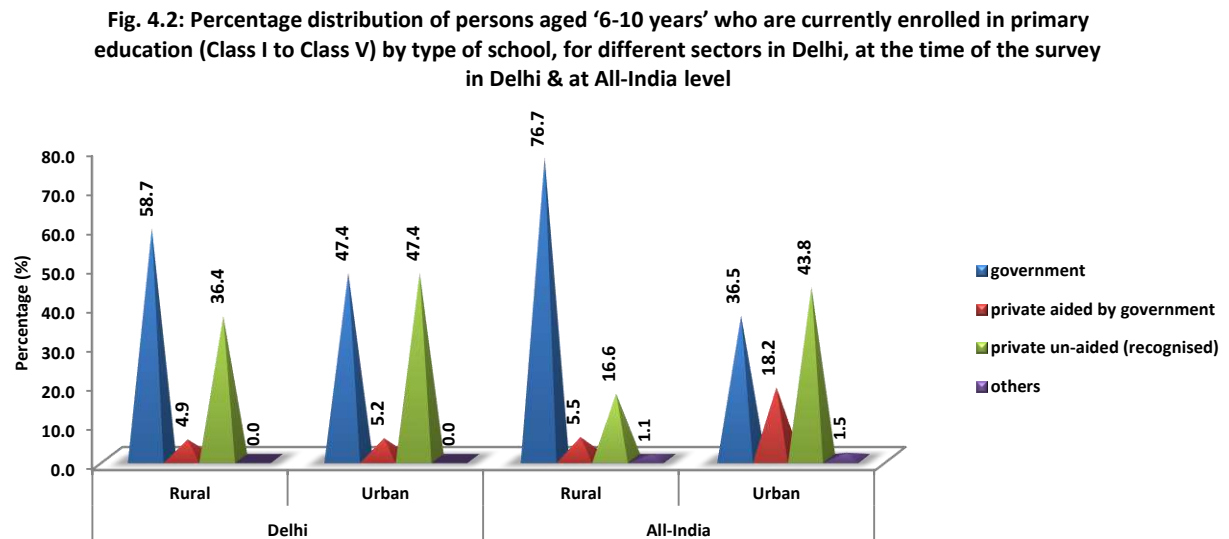

- Government School
- Private School Aided by Government
- Private Un-Aided (Recognised) School
- Unrecognised School

Figure 4.1 gives the sector-wise percentage distribution of persons aged '6-10 years' who are currently enrolled in primary education (Class I to Class V) at the time of survey, for different genders in Delhi and at All-India level. Percentage of persons in the age group '6 to 10 years' who were currently enrolled in primary education (Class I to Class V) were reported as 89.8% in Delhi while at All-India level, the percentage was 90.1%.

Ref.: Volume II: Table No.4

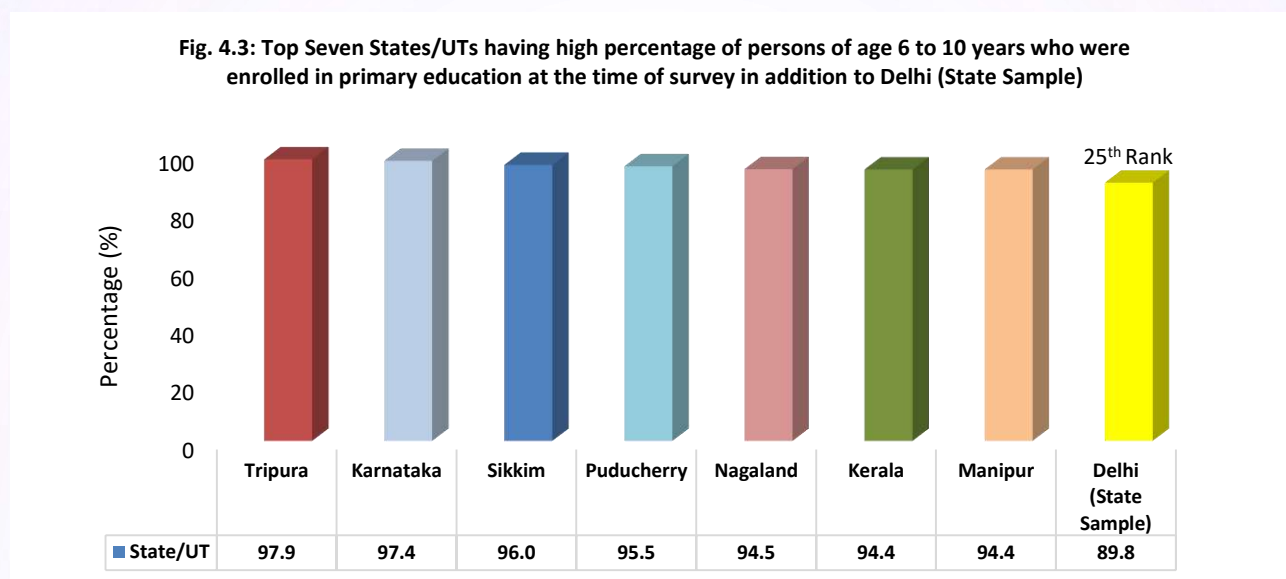

Figure 4.2 gives the percentage distribution of persons aged ‘6-10 years’ who are currently enrolled in primary education (Class I to Class V) by type of school, for different sectors in Delhi, at the time of the survey. *The type category ‘Others’, in Fig 4.2 below, also includes ‘unrecognized’ schools and schools whose affiliation status is ‘not known’ to the respondents.*

Ref.: Volume II: Table No.4

In Rural Delhi, 58.7% children of age group ‘6 to 10 years’ were currently enrolled in Government School while 36.4% children were enrolled in Private Un-Aided (Recognized) schools while in Urban Delhi, the percentage in respect to Government School came to 47.4% and the same percentage was came for Private Un-Aided (Recognized) schools. However, at All-India level, 76.7% children were enrolled in Government School in Rural areas while it was 36.5% in Urban areas. Similar trend was found both in Delhi & at All-India level.

Top Seven States/UTs having high percentage of persons of age 6 to 10 years who were enrolled in primary education at the time of survey in addition to Delhi (State Sample) are presented in figure 4.3.

Ref.: Volume IV: Table No. 4

2.5 Persons with some secondary education

If a person passed Class X or achieved a higher educational qualification, then that person was considered as a person 'with some secondary education'.

Fig. 5.1 : Percentage of persons (age ≥ 25 years) with some secondary education in Delhi & at All-India level

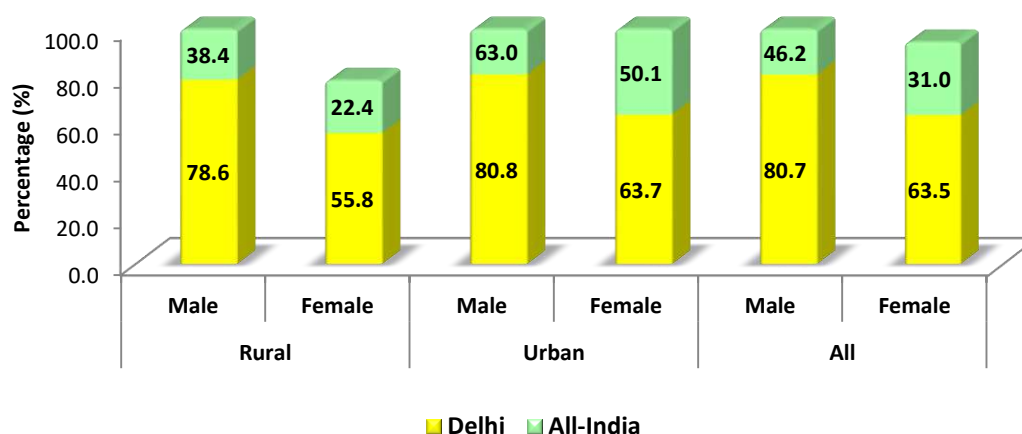

Ref.: Volume II: Table No. 6a

Figure 5.1 provides sector-wise estimates of persons with some secondary education in the age group '25 years and above' in Delhi & at All-India level.

About 68.0 % persons in the age group '25 years and above' in rural areas and 72.9 % in urban areas of Delhi reported that they have completed secondary education. However, at All-India level, the percentage was 30.4% in rural areas and 56.6% in urban areas. Overall, 72.8% persons in Delhi and 38.6% at All-India level have completed secondary education.

Figure 5.2 provides sector-gender-wise estimates of persons with some secondary education in the age group '25 years and above' in Delhi & at All-India level.

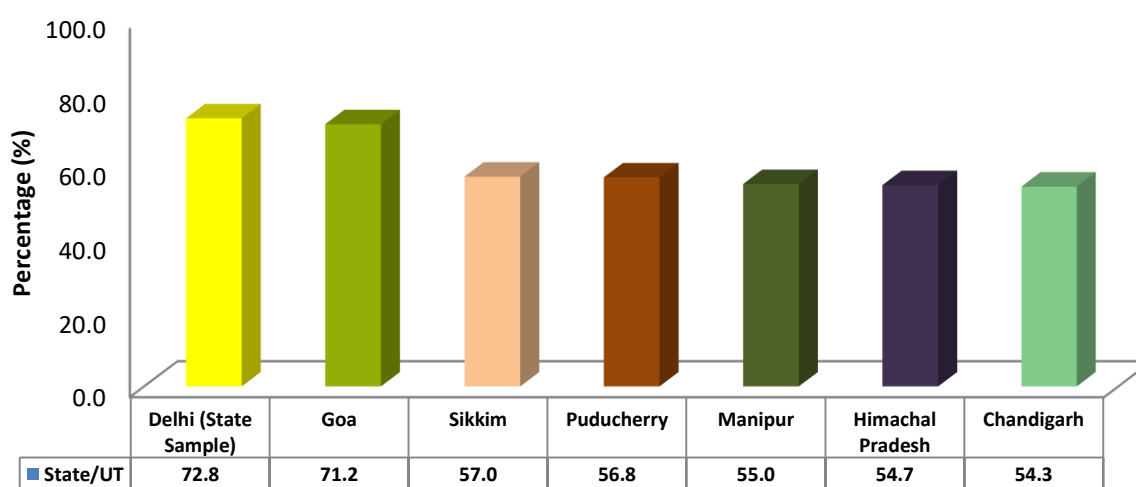

Fig. 5.2: Sector-Gender-wise percentage of persons with some secondary education for the age group 'age ≥ 25 years' in Delhi & at All-India level

Ref.: Volume II: Table No. 6a

Top Seven States/UTs having high percentage of persons with some secondary education is presented in figure 5.3.

Fig. 5.3: Top Seven States/UTs having high percentage of persons with some secondary education for the age group '25 years and above'

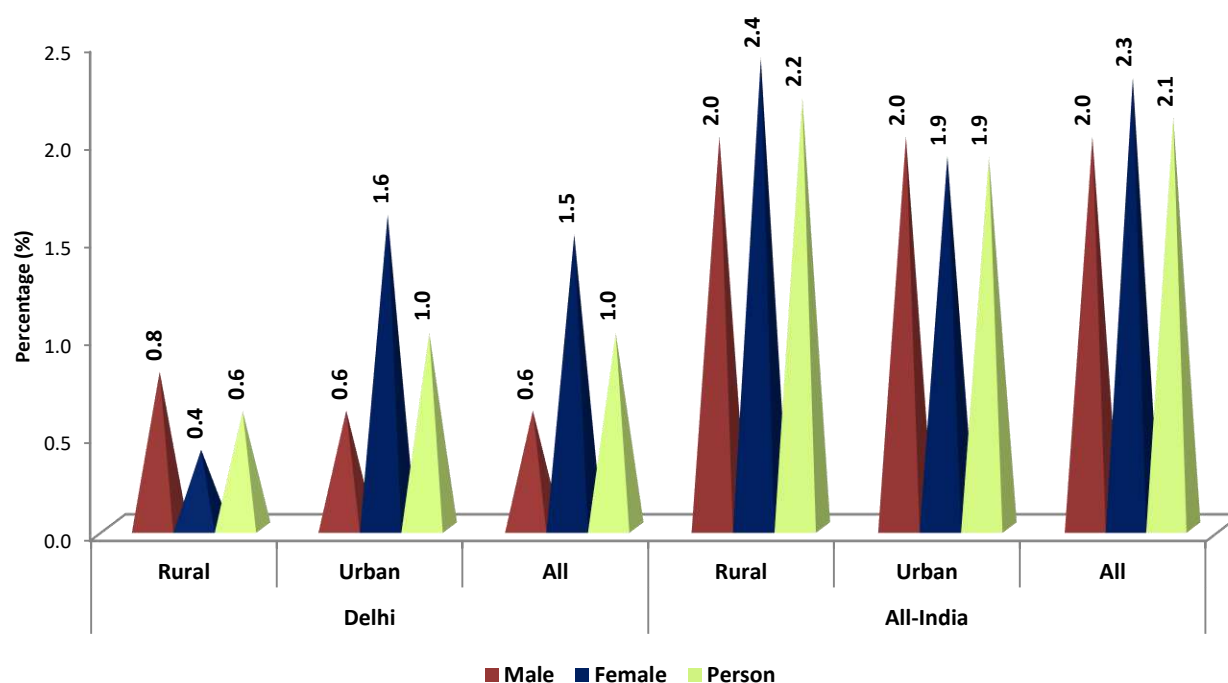

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 5

2.6 Persons of age 6 to 18 years who never enrolled in formal education by major Reasons

Figure 6.1 gives the percentage distribution of persons of age '6-18 years' who were never enrolled in formal education, for different genders and sectors in Delhi & at All-India level.

Fig.6.1: Gender-Sector-wise percentage of persons 6 to 18 years who never enrolled in formal education in Delhi & at All-India level

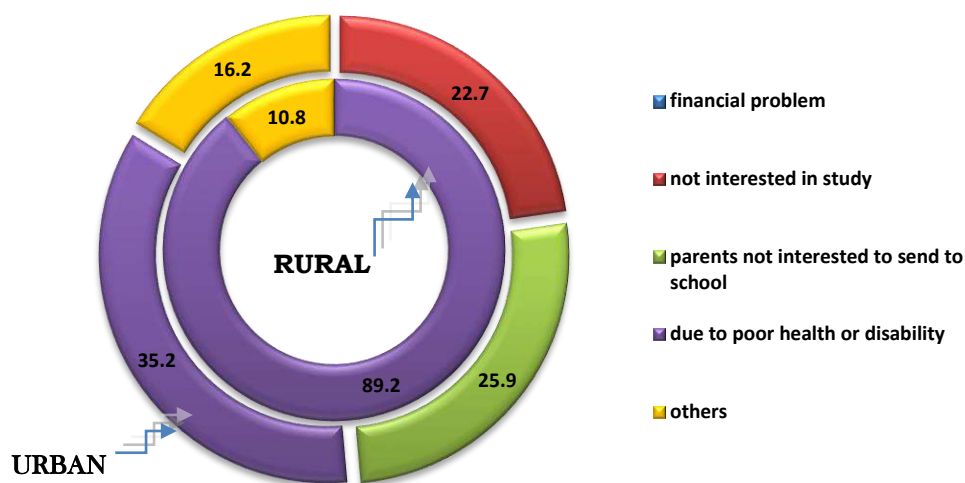

Ref.: Volume II: Table No. 5

Among the persons of age group '6 to 18 years', about 1.0% persons never enrolled in formal education in Delhi while at All-India level, the percentage was 2.1%.

Figures 6.2 & 6.3 give the percentage distribution of persons of age '6-18 years' who were never enrolled in formal education by major reasons, for different sectors in Delhi & at All-India level. Among the reasons, 'other reasons' include reasons like 'helping with domestic work', 'taking care of siblings', 'school far off'. It also includes those reasons that were not exactly classified.

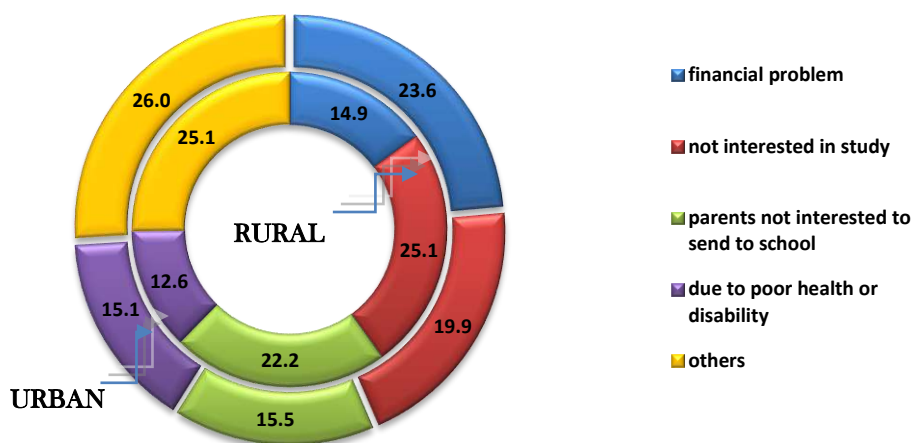

Fig. 6.2: Percentage distribution of persons of age 6 to 18 years who never enrolled in formal education by major reasons at the time of survey in Delhi

Ref.: Volume II: Table No. 5

Among the persons who never enrolled in formal education, about 89.2% persons in rural areas and 35.2% persons in urban areas in Delhi reported that due to poor health or disability, they have never enroll in formal education.

Fig.: 6.3: Percentage distribution of persons of age 6 to 18 years who never enrolled in formal education by major reasons at the time of survey at All-India level

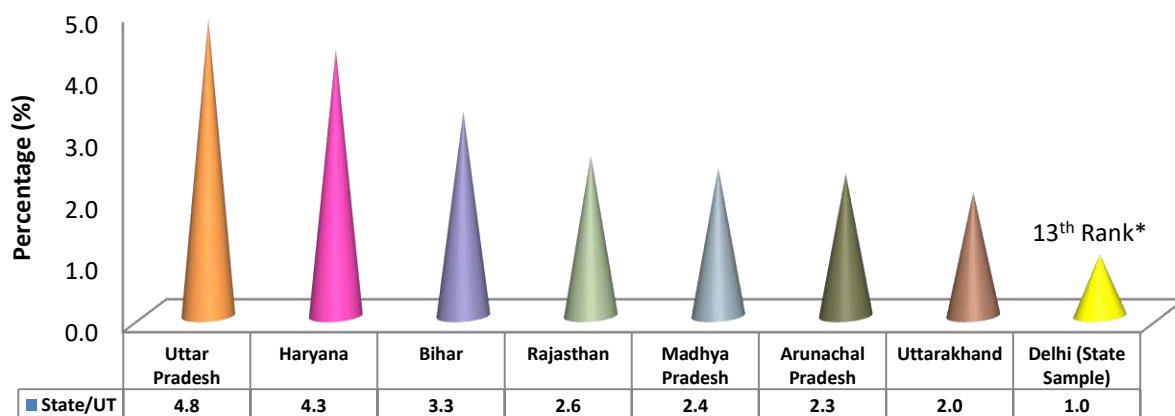

Ref.: Volume II: Table No. 5

About 12.6% persons in rural areas reported that due to poor health or disability they have not enrolled in formal education while in urban areas, about 15.1% persons have not enrolled for the same reason at All-India level.

Top Seven States/UTs having high percentage of persons 6 to 18 years who never enrolled in formal education in addition to Delhi (State Sample) is presented in figure 6.4.

Fig. 6.4: Top Seven States/UTs having high percentage of persons 6 to 18 years who never enrolled in formal education in addition to Delhi (State Sample)

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 6

Delhi stood at 13th rank when seen with other States/UTs with only **1.0% persons of age group 6 to 18 years who **never enrolled in formal education**.*

2.7 Persons graduated in science and technology among all graduates

A person has been considered as graduated in science and technology if s/he has completed graduate (degree/diploma) level courses or undergoing post-graduate degree/diploma or doctorate/post-doctorate degree in at least one of the disciplines like Agriculture and Fisheries, Engineering and Technology, IT and Computer Science, Medical Science (including Nursing), Management, Science, Veterinary and Animal Sciences.

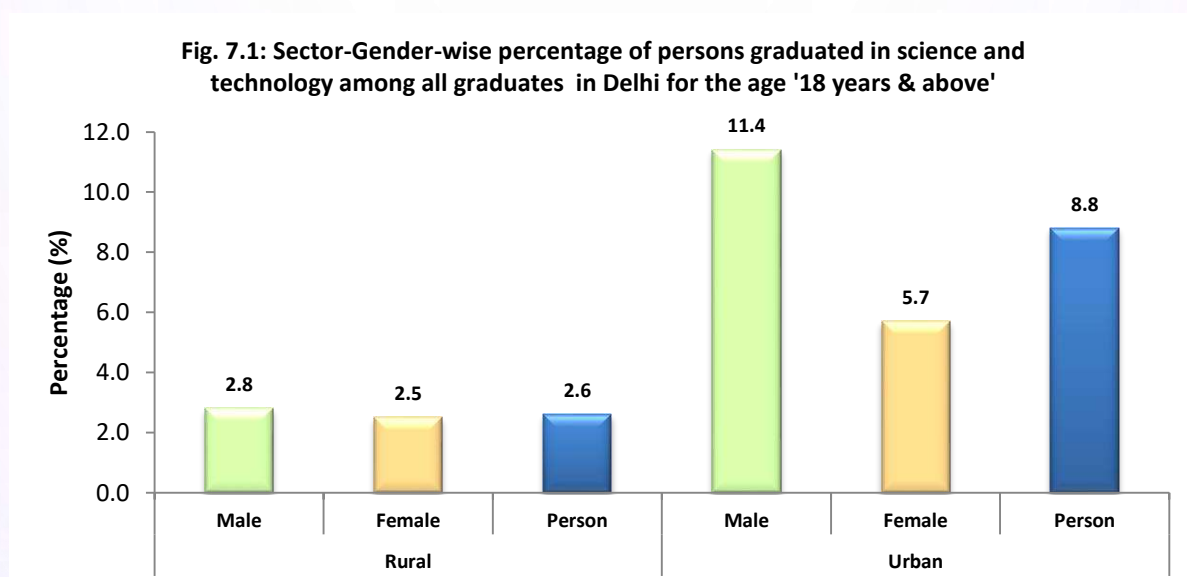

The percentage of persons who graduated in Science and Technology among all graduates, for different age groups in Delhi has been presented in Statement 4. About 8.7% persons in Delhi for the age group '18 years & above' were graduated in Science and Technology among all graduates.

Statement 4: Percentage of persons graduated in science and technology among all graduates in Delhi

Age : 18 years & above									
State/UT	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Delhi	2.8	2.5	2.6	11.4	5.7	8.8	11.2	5.6	8.7

Ref.: Volume II: Table No. 6

Figure 7.1 presents sector-gender-wise estimates of the percentage of persons who graduated in Science and Technology among all graduates.

2.8 Youth in formal and non-formal education and training in the previous 12 months

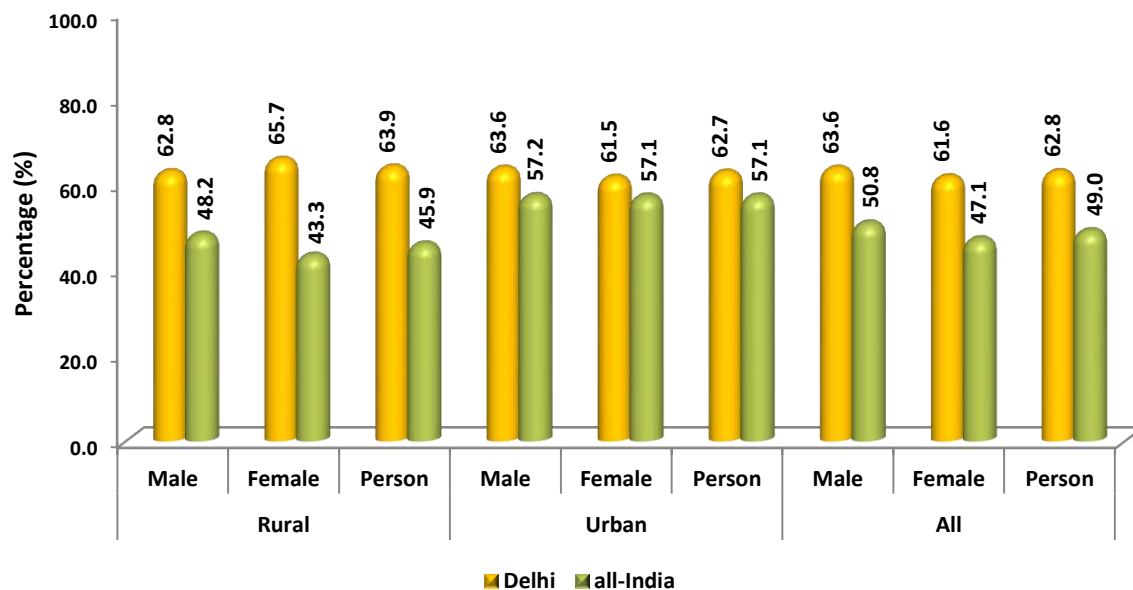

NON-FORMAL EDUCATION

(Courses From Government Programmes Like Non Formal Education Centres/Total Literacy Campaign Or Similar Programme Run By NGOs)

NON-FORMAL TRAINING (Like, Driving Training, Beautician Training, Hereditary Training, Cobbler Training, Barber Training, Training under Usttad Scheme etc.)

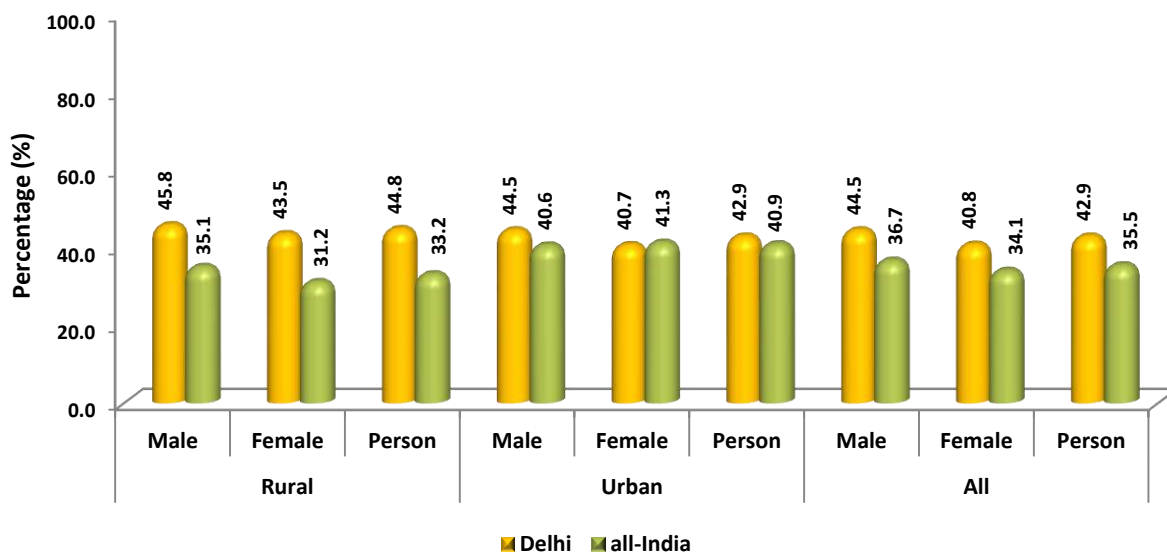

Figures 8.1 and 8.2 give the percentage of persons in formal and non-formal education and training during the last 12 months from the date of survey, for the age groups 15-24 years and 15-29 years across genders in Delhi. It has been observed that the percentage of male was higher than that for female in Delhi. Similar trend has been observed at All-India level for this indicator.

Fig. 8.1: Percentage of persons in formal and non-formal education and training in the previous 12 months in Delhi & at All-India level for the age 15-24 years

Ref.: Volume II: Table No. 7

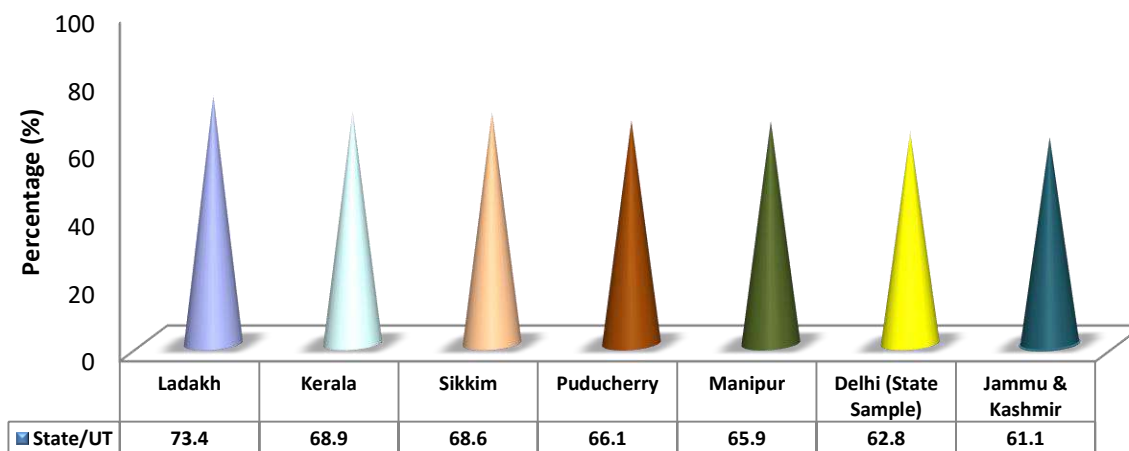

Fig. 8.2: Percentage of persons in formal and non-formal education and training in the previous 12 months in Delhi & at All-India level for the age 15-29 years

Ref.: Volume IV: Table No. 7b

2.9 Youth 'not in education, employment, or training' (NEET)

In this survey, information was collected on the current status of enrolment, and training (formal as well as informal). Information on work/activity status for each of the person in the age group '15 years and above' during the last 7 days preceding the date of the survey was also ascertained.

Figure 9.1 presents the percentage of youth reported to be not in education, employment, or training, as on date of survey, for different age groups in Delhi & at All-India level. However, figure 9.2 presents it sector-gender-wise.

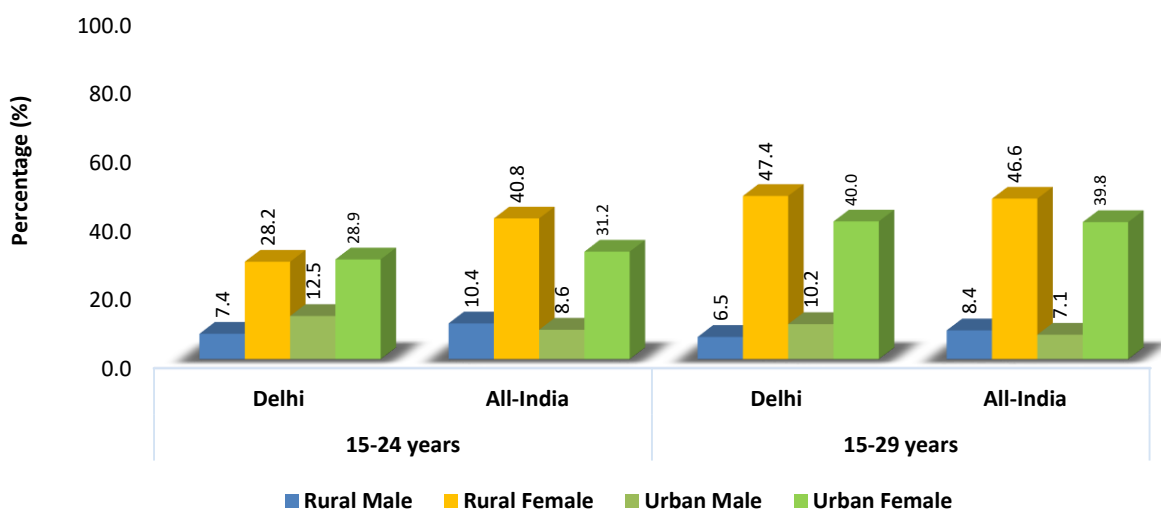

Fig. 9.1: Percentage of persons not in education, employment and training (NEET) in Delhi & at All-India level

Ref.: Volume II: Table No. 8

About 19.3% persons in the age group 15-24 years in Delhi and 23.3% persons at All-India level were not in education, employment and training (NEET). For the age group of 15-29 years, the percentages were 23.0 in Delhi and 25.6 at All-India level.

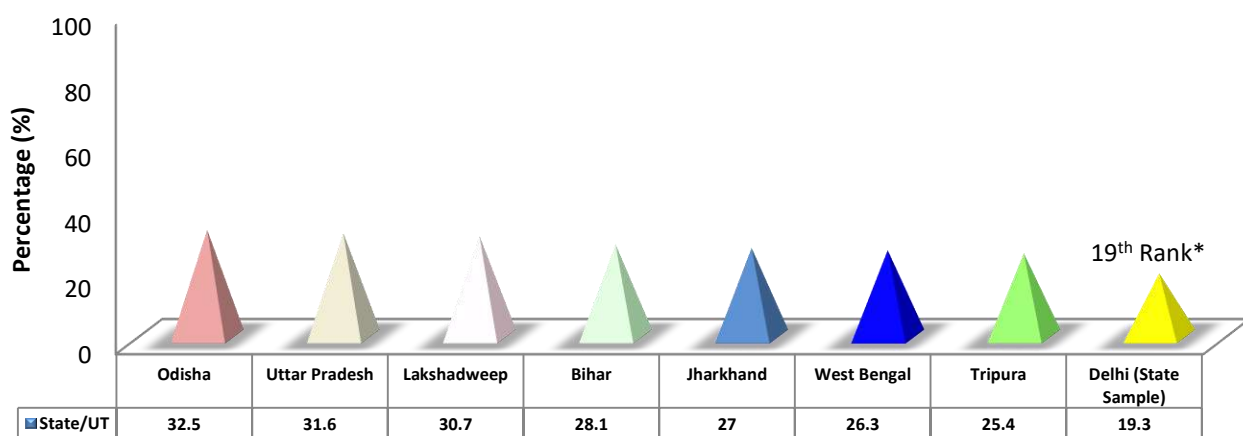

Fig. 9.2: Sector-Gender-wise percentage of persons not in education, employment and training (NEET) in Delhi & at All-India level

Ref.: Volume II: Table No. 8

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 8a

*Delhi stood at 19th Rank when seen with other States/UTs having 19.3% of persons who were not in education, employment and training (NEET) for the age group 15-24 years at the time of survey.

Top Seven States/UTs having high percentage of persons not in education, employment and training (NEET) in addition to Delhi (State Sample) for the age group 15-29 years is presented in figure 9.4.

Fig. 9.4: Top Seven States/UTs having high percentage of persons not in education, employment and training (NEET) in addition to Delhi (State Sample) for the age group 15-29 years

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 8b

*Delhi stood at 15th Rank when seen with other States/UTs having 23.0% of persons not in education, employment and training (NEET) for the age group 15-29 years at the time of survey.

Section 3: Health

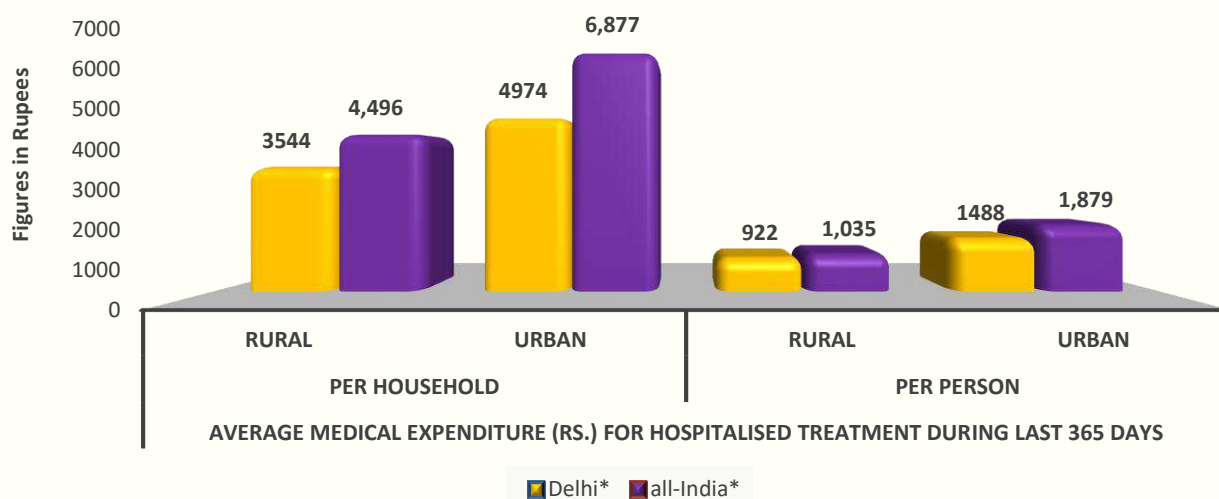

3.1 Expenditure (in Rs) on hospitalization (including institutional deliver during last 365 days and non-hospitalization in a 30-day period

Information on the expenditure (in Rs.) on hospitalization (including institutional delivery) during last 365 days and non-hospitalization in 30-day period was collected in this survey.

Note: It is pertinent to mention here that the NSO, MoSPI, GoI has changed the methodology/tabulation plan for the computation of average medical expenditure in 79th NSS Round. This shows departure from the methodology adopted in the NSS Rounds say 71st & 75th Rounds of the Health Survey. In earlier rounds, this indicator was derived based only on households that had actually incurred medical expenditure. However, in NSS 79th Round, the estimates were generated by including all households, irrespective of whether they had incurred any medical expenditure or not. Thus, the Average Medical Expenditure (in Rs.)/Average out-of-pocket Medical Expenditure (OOPME) comes in NSS 79th Round both in Central Report of CAMS 2022-23 & Delhi State Sample 2022-23 are not comparable.

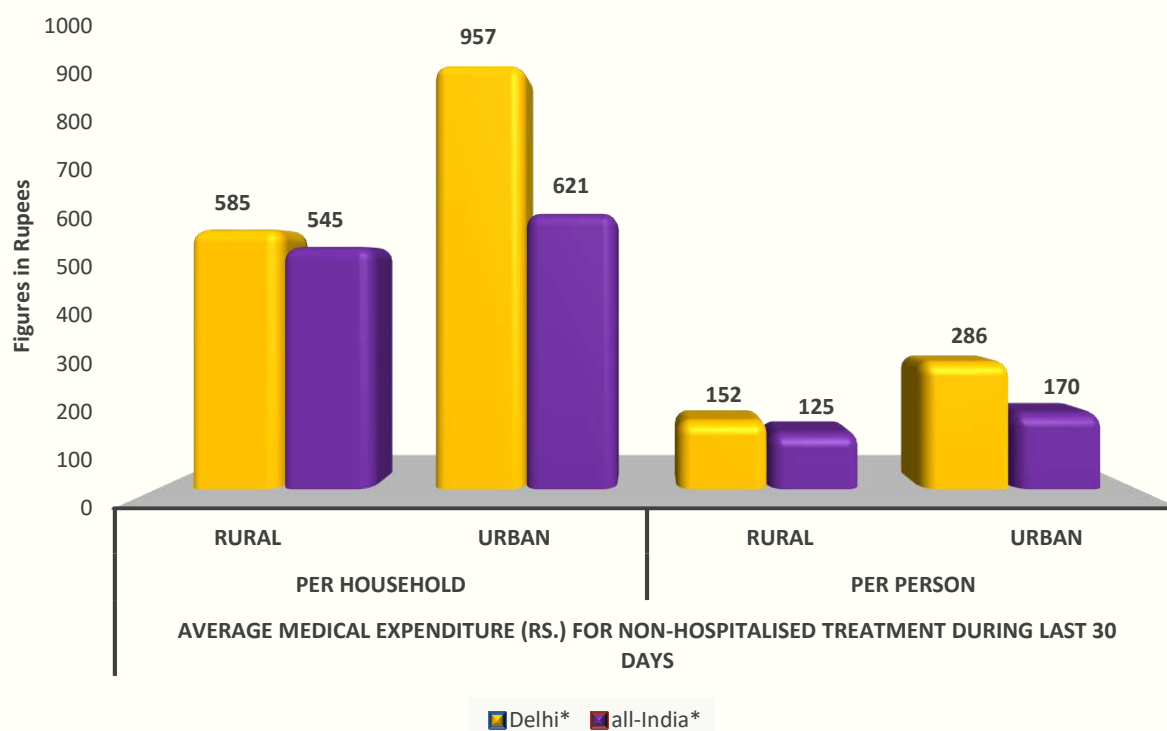

Figures 10.1 and 10.2 present the average medical expenditure per household and per person on hospitalized treatment during last 365 days and average medical expenditure per household and per person on non-hospitalized treatment during last 30 days separately for rural and urban India.

Fig. 10.1: Average medical expenditure (Rs.) per household and per person on hospitalised treatment (including institutional delivery) during the last 365 days in Delhi & at All-India level

Ref.: Volume II: Table No. 9

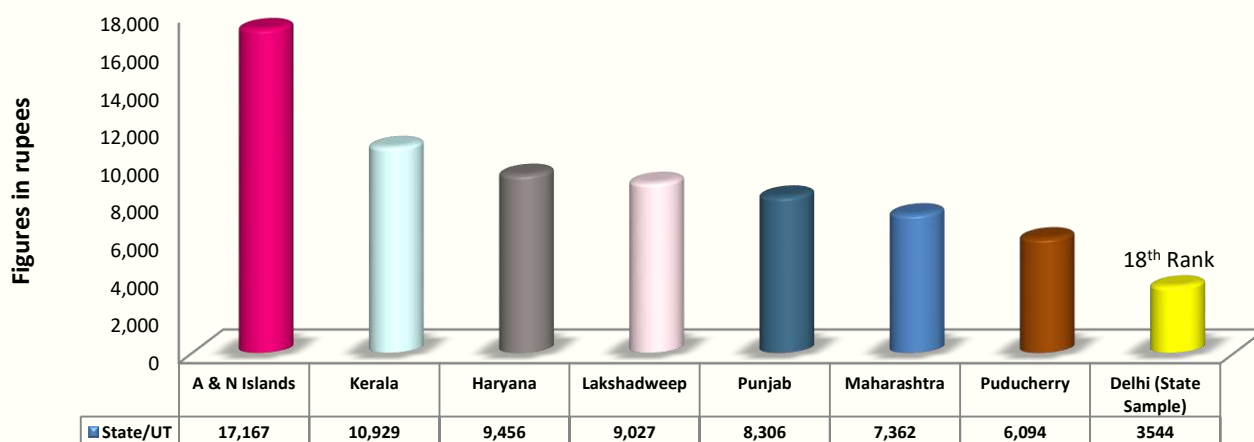

Fig. 10.2: Average medical expenditure (Rs.) per household and per person on non-hospitalised treatment during the last 30 days in Delhi & at All-India level

Ref.: Volume II: Table No. 9

Top Seven States/UTs (RURAL) having high average medical expenditure (Rs.) for hospitalised treatment during last 365 days per household in addition to Delhi (State Sample) are presented in figure 10.3.

Fig. 10.3: Top Seven States/UTs (RURAL) having high average medical expenditure (Rs.) for hospitalised treatment during last 365 days per household in addition to Delhi (State Sample)

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 9

Top Seven States/UTs (URBAN) having high average medical expenditure (Rs.) for hospitalised treatment during last 365 days per household in addition to Delhi (State Sample) are presented in figure 10.4.

Fig. 10.4: Top Seven States/UTs (URBAN) having high average medical expenditure (Rs.) for hospitalised treatment during last 365 days per household in addition to Delhi (State Sample)

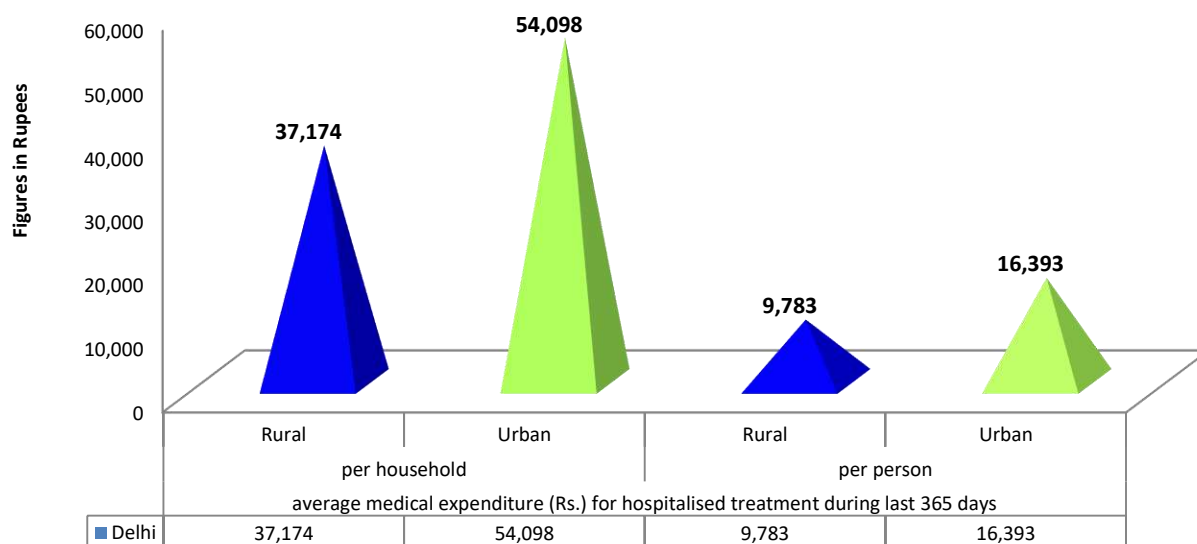

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 9

However, as per old methodology/tabulation plan for computation of average medical expenditure, the following figure no. 10.5 represents the estimates of average medical expenditure based on the estimation of households that had actually incurred medical expenditure in Delhi.

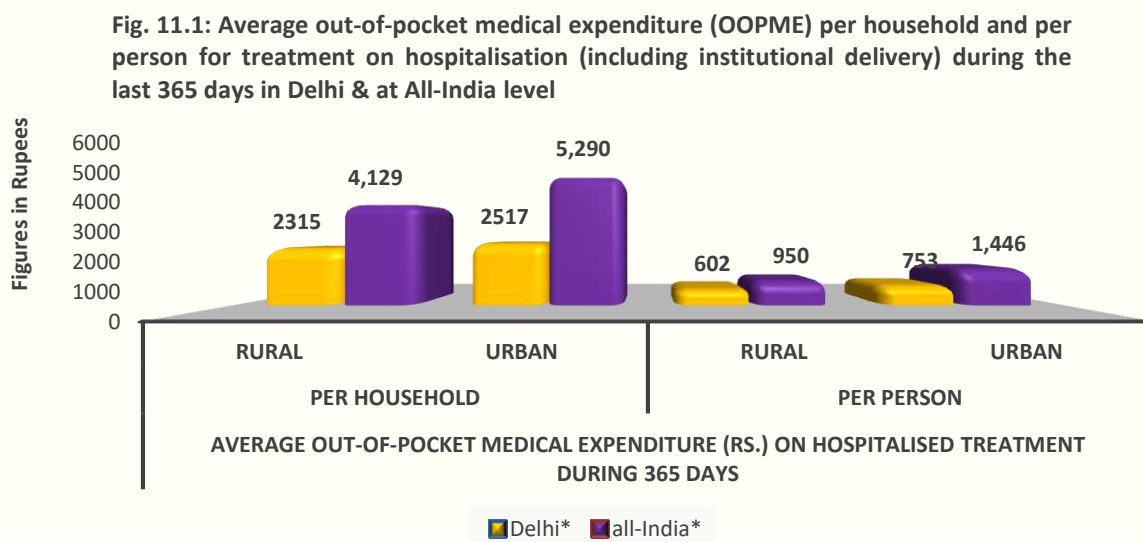

Fig. 10.5: Average medical expenditure (Rs.) per household and per person on hospitalised treatment (including institutional delivery) during the last 365 days in Delhi (As per old methodology)

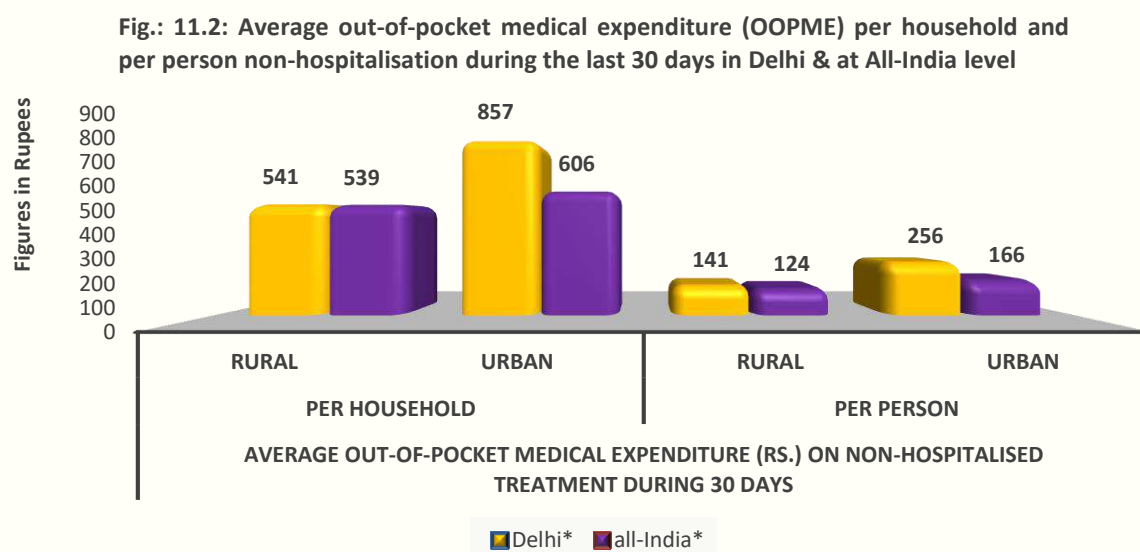

Ref.: Volume II: Table No. 9a

3.2 Out-of-pocket medical expenditure (OOPME) on hospitalization and non- hospitalization

Figures 11.1 and 11.2 present the average out of pocket medical expenditure per household and per person on hospitalized treatment during last 365 days and non-hospitalized treatment during last 30 days separately for rural and urban Delhi & at All-India level.

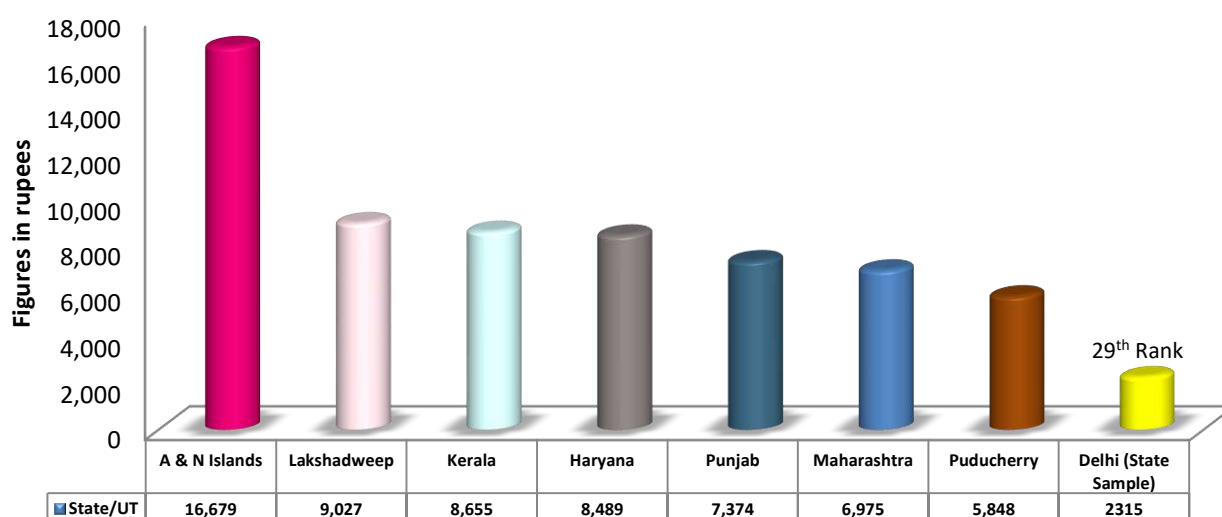

Ref.: Volume II: Table No. 10

Ref.: Volume II: Table No. 10

Top Seven States (RURAL) having high average out-of-pocket medical expenditure (Rs.) on hospitalised treatment during 365 days per household in addition to Delhi (State Sample) are presented in figure 11.3.

Fig. 11.3: Top Seven States (RURAL) having high average out-of-pocket medical expenditure (Rs.) on hospitalised treatment during 365 days per household in addition to Delhi (State Sample)

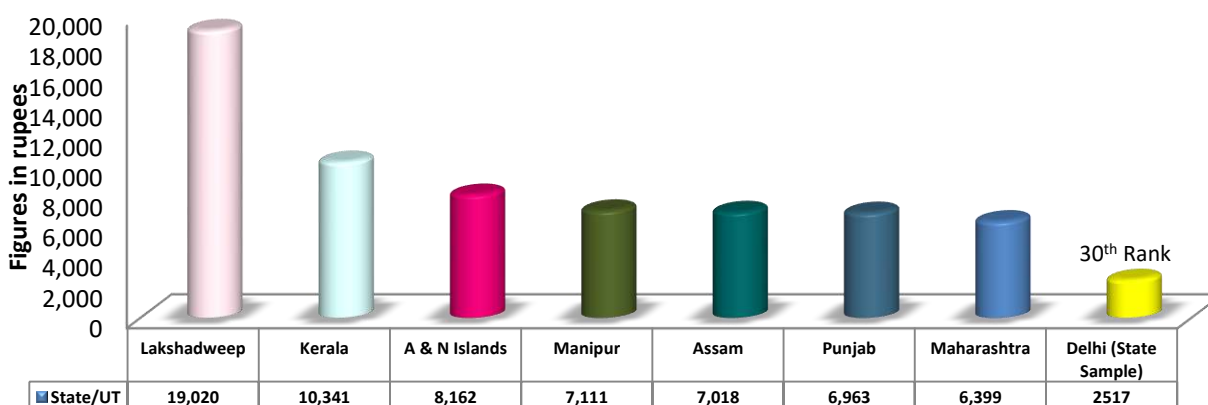

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 10

Top Seven States (URBAN) having high average out-of-pocket medical expenditure (Rs.) on hospitalised treatment during 365 days per household in addition to Delhi (State Sample) are presented in figure 11.4.

Fig. 11.4: Top Seven States (URBAN) having high average out-of-pocket medical expenditure (Rs.) on hospitalised treatment during 365 days per household in addition to Delhi (State Sample)

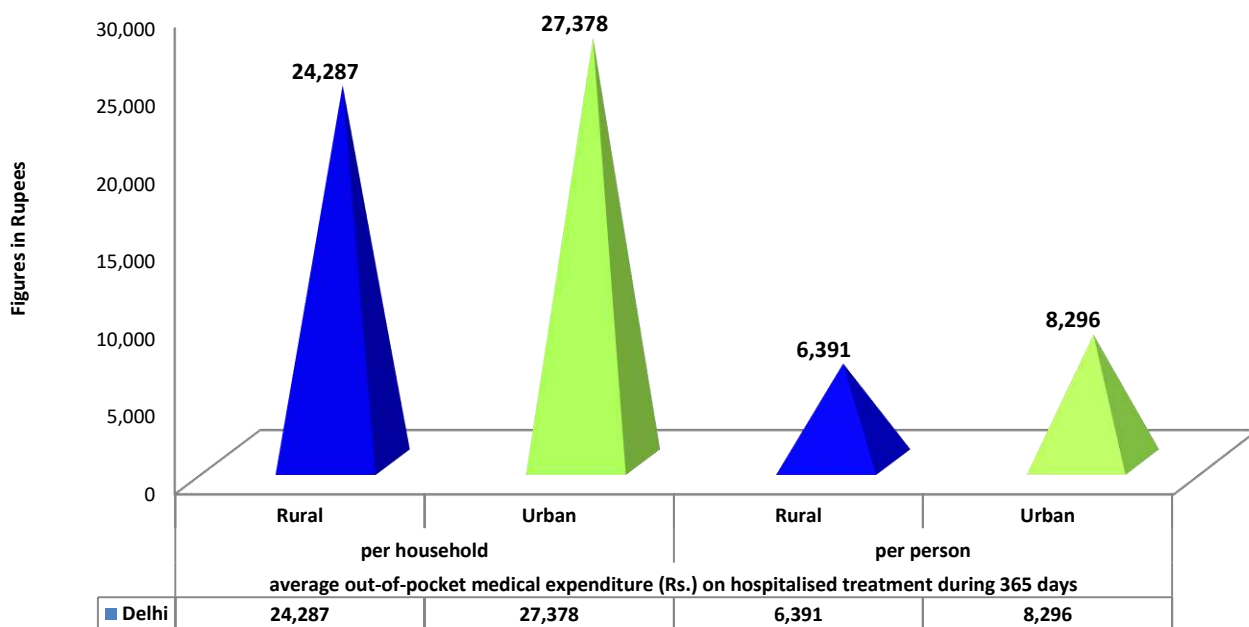

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 10

However, as per old methodology/tabulation plan for computation of average out-of-pocket medical expenditure, the following figure no. 11.5 represents the estimates of average out-of-pocket medical expenditure based on the estimation of households that had actually incurred medical expenditure in Delhi.

Fig. 11.5: Average out-of-pocket medical expenditure (Rs.) on hospitalised treatment during 365 days in Delhi (as per old methodology)

Ref.: Volume II: Table No. 10a

Health Financing Scheme/Insurance Scheme

Statement 5 gives percentage of households reported any member of the household covered by any health financing scheme/insurance in Rural & Urban Delhi.

Statement 5: Percentage of household covered by any health financing scheme/ insurance scheme in Rural & Urban Delhi		
State/ UT	Percentage of household covered by any health financing scheme/ insurance scheme	
	Rural	Urban
Delhi	31.7	46.2

Ref.: Volume III: Table No. E1

Section 4: Financial Inclusion

4.1 Accounts at bank/other financial institution/mobile money service provider

Mobile Money Service

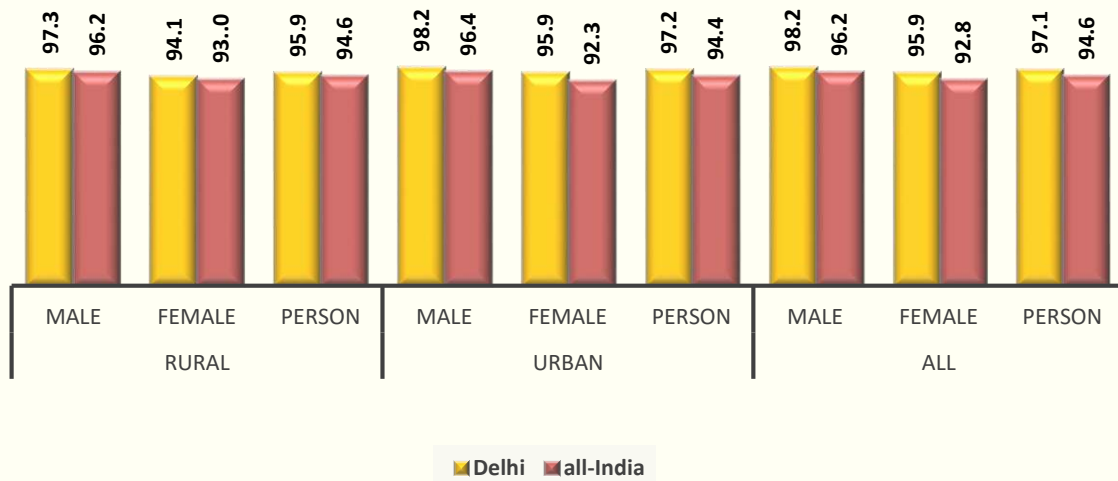

Payment services operated under financial regulations and performed from or via mobile device. Instead of paying with cash, cheque or credit card, a consumer can use a mobile to pay for a wide range of services. Some examples are Paytm, Google Pay, Phone pe, Free charge etc.

A person holding a mobile money account means that the person was using GSM Association (GSMA) Mobile Money for the Unbanked (MMU) services in the past 12 months to pay bills or to send

Figure 12.1 gives the percentage of persons (*18 years and above*) who had an account individually or jointly in any bank/other financial institution or with mobile money service provider as on date of survey for each of the gender in Delhi.

- A person holding an account at a bank means that the person is having an account at a nationalised bank, foreign commercial bank operating in India, regional rural bank, cooperative banks etc in the past 12 months.
- A person holding an account at a another type of financial institution means that the person is having an account at another type of financial institution, such as a credit union, microfinance institution, cooperative, or the post office (if applicable), or having a debit card in own name in the past 12 months.
- Possessing of bank account was to be considered in this question irrespective of the bank account being dormant or in operation.
- Loan account was not to be treated as bank account. Only savings and current accounts were considered in this survey.
- The household member who reported to be receiving wages, government transfers, or payments for agricultural products into an account at a financial institution in the past 12 months; paying utility bills or school fees from an account at a financial institution in the past 12 months; or receiving wages or government transfers into a card in the past 12 months were included under this category.

Fig. 12.1: Percentage of persons (18 years and above) who have an account individually or jointly in any bank/ other financial institution/mobile money service provider in Delhi & at All-India level

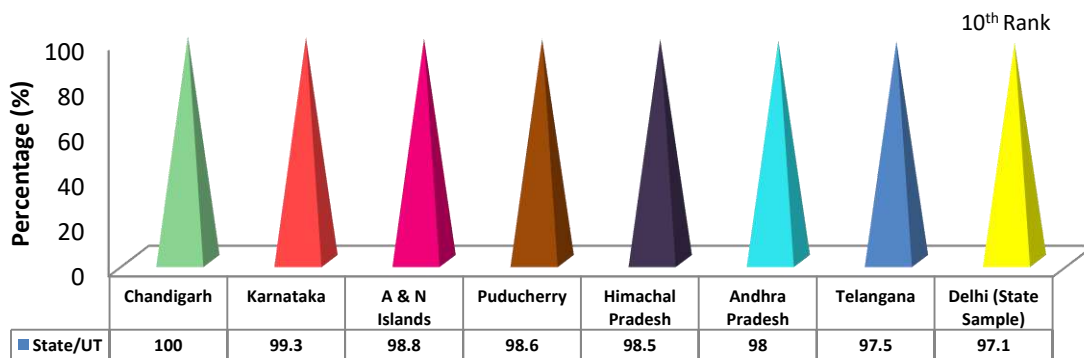

Ref.: Volume II: Table No. 11

It has been observed that in Delhi, 97.1% persons for the age group 18 years & above have an account individually or jointly in any bank/other financial institution/mobile money service provider. While, at All-India level, the percentage was 94.6.

Top Seven States/UTs having high percentage of persons who have an account individually or jointly in any bank/ other financial institution/mobile money service provider in addition to Delhi (State Sample) is presented in figure 12.2.

Fig. 12.2: Top Seven States/UTs having high percentage of persons (18 years & above) who have an account individually or jointly in any bank/ other financial institution/mobile money service provider in addition to Delhi (State Sample)

Ref.: Volume IV: Table No. 11

4.2 Number of borrowers per 1,00,000 persons

In this survey, a person is considered to be indebted if she/he has taken a cash loan of Rs. 500/- or above and that loan remained outstanding as on the date of survey.

Kind loans were outside the coverage of this survey.

Non-institutional Agencies:

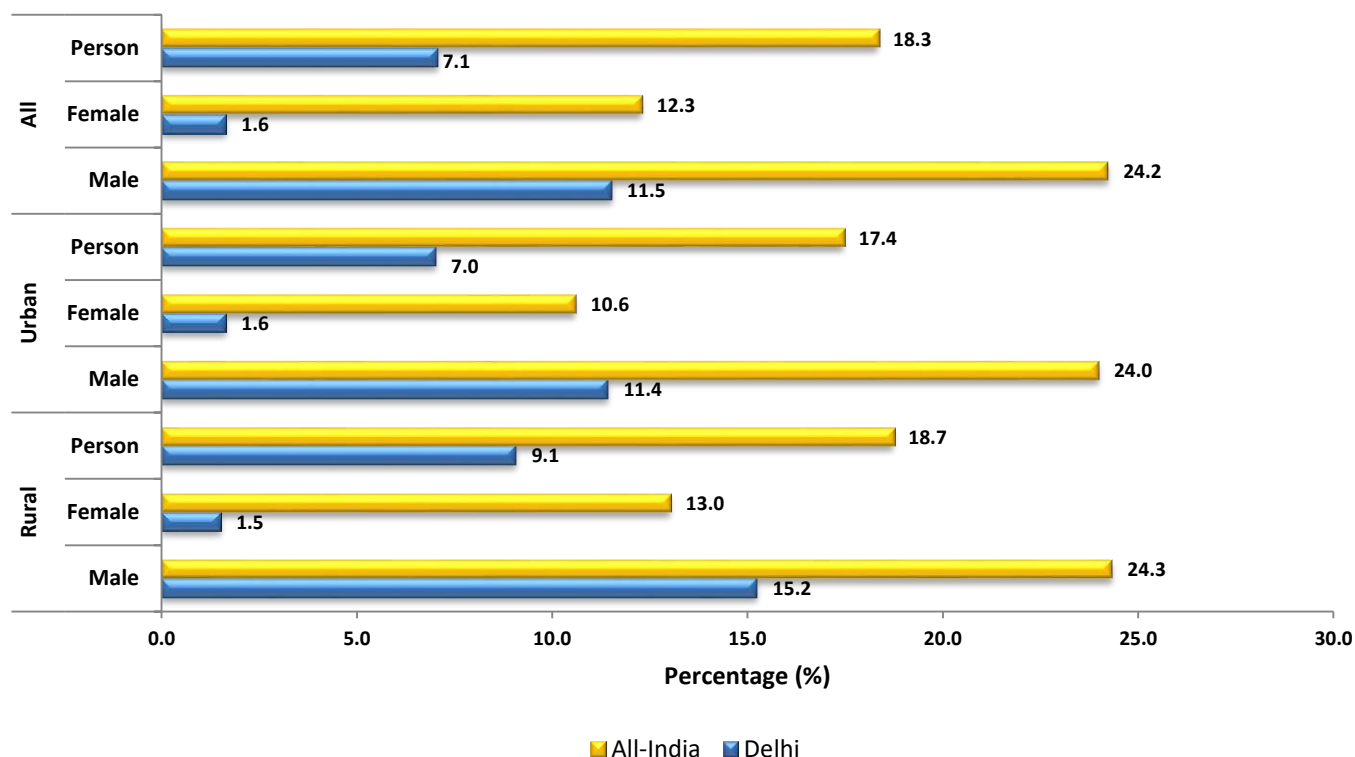

- self-help group
- money lender
- friends and relatives
- other non-institutional agencies

Institutional Agencies:

- Government
- bank (Commercial Banks including regional rural bank cooperative society/bank)
- insurance
- provident fund
- financial corporations/institutions
- other institutional agencies

Figure 13.1 gives the percentage of borrowers (18 years and above) who were indebted to any institutional/ non-institutional agency as on date of survey for each gender in Delhi& at All-India level. It is observed that 7.1% person in Delhi and 18.3% persons at All-India level for the age group '18 years and above' were indebted to any institutional/non-institutional agency as on date of survey.

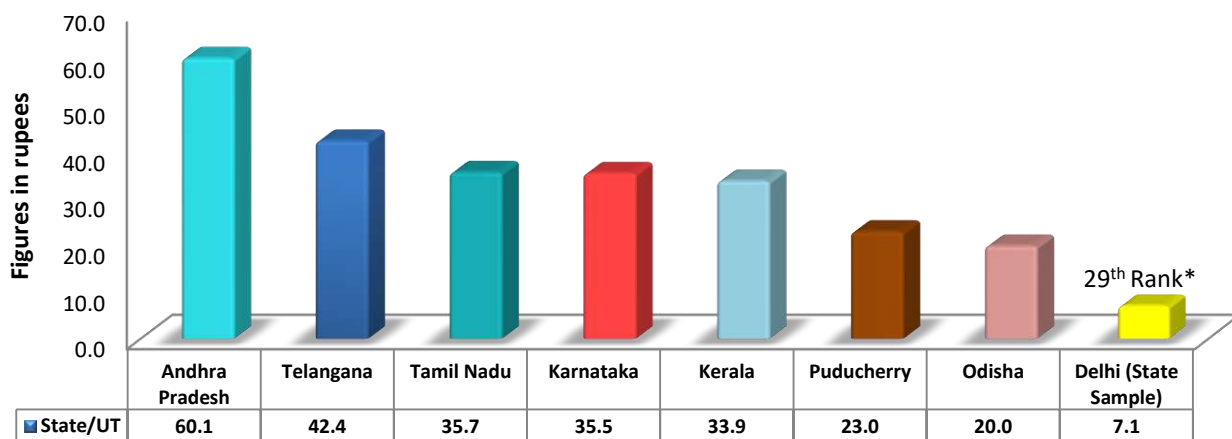

Fig. 13.1: Percentage of borrowers in Delhi & at All-India level for the age 18 years and above

Ref.: Volume II: Table No. 12

Top Seven States having high percentage of borrowers in addition to Delhi (State Sample) for the age group 18 years & above is presented in figure 13.2.

Fig. 13.2: Top Seven States having high percentage of borrowers in addition to Delhi (State Sample) for the age group 18 years & above

Source: NSS Report No. 590: Comprehensive Annual Modular Survey, 2022-23, MoSPI, GoI

Ref.: Volume IV: Table No. 12

Delhi stood at 29th Rank having 7.1 % borrowers of the age '18 years & above' being at a good rank in respect of borrowing.

Section 5: Mobile & Internet

5.1 Persons able to use mobile (including smart phone)

Smart phone is a mobile phone that performs many of the functions of a computer, typically having a touch screen interface, internet access, and an operating system capable of running downloaded apps.

Statement 6 gives the percentage of persons able to use mobile (including smart phone), as on date of survey, for different age groups and genders in Delhi & at the all-India level. It is observed that 96.6 % persons in Delhi and 86.5% persons at All-India level for the age group '15 years & above' were able to use mobile (including smart phone).

Statement 6 : Percentage of persons able to use mobile (including smart phones) in Delhi & at All-India level						
Age Group	Delhi			All-India		
	Male	Female	Person	Male	Female	Person
15-24 years	99.9	99.8	99.9	97.4	94.6	96.1
15-29 years	99.9	99.5	99.7	97.9	94.8	96.4
15 years & above	98.8	94.0	96.6	92.2	80.6	86.5

Ref.: Volume II: Table No. 13

Figure 14.1 presents sector-wise estimates, while Figures 14.2 and 14.3 provide gender-sector-wise estimates of the percentage of persons able to use mobile in Delhi & at All-India level.

Fig. 14.1: Percentage of persons who able to use mobile (including smartphones) in Delhi & at All-India level by sector for different age groups

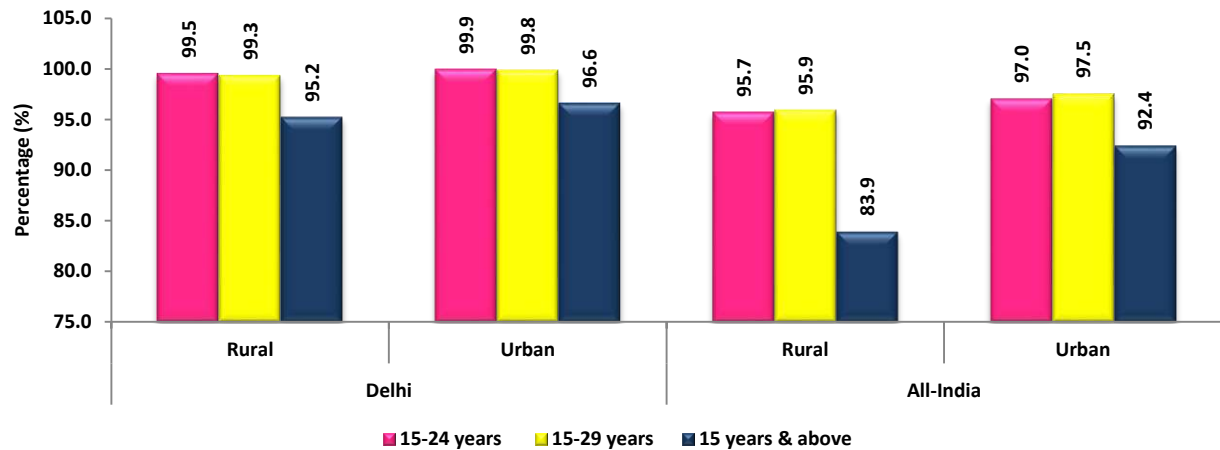

Fig. 14.2: Percentage of persons who able to use mobile (including smartphones) in Delhi & at All-India level by gender for different age groups under rural sector

5.4 Use of Internet during the last 3 months preceding the date of survey

Statement 15 gives the percentage of persons who used internet during last 3 months preceding the date of survey for different age groups and genders in Delhi. It has been observed that in Delhi, 88.1% persons for the age group '15 years & above' used internet during the last 3 months preceding the date of survey. However, at All-India level, the percentage was 57.5%.

Statement 15: Percentage of persons who used internet during last three months preceding the date of survey in Delhi & at All-India level

Age group	Delhi			All-India		
	Male	Female	Person	Male	Female	Person
15-24 years	99.8	98.2	99.1	87.9	78.3	83.3
15-29 years	99.7	97.8	98.9	88.1	77.1	82.8

5.5 Population covered by 4G or above mobile technology

Information on mobile technology mainly used was collected from each of the sample persons enumerated. If within an FSU, a person reported use of 4G or above mobile technology, the entire population of that FSU has been considered to be covered by 4G or above mobile technology.

Mobile technology refers to mobile-cellular signal.

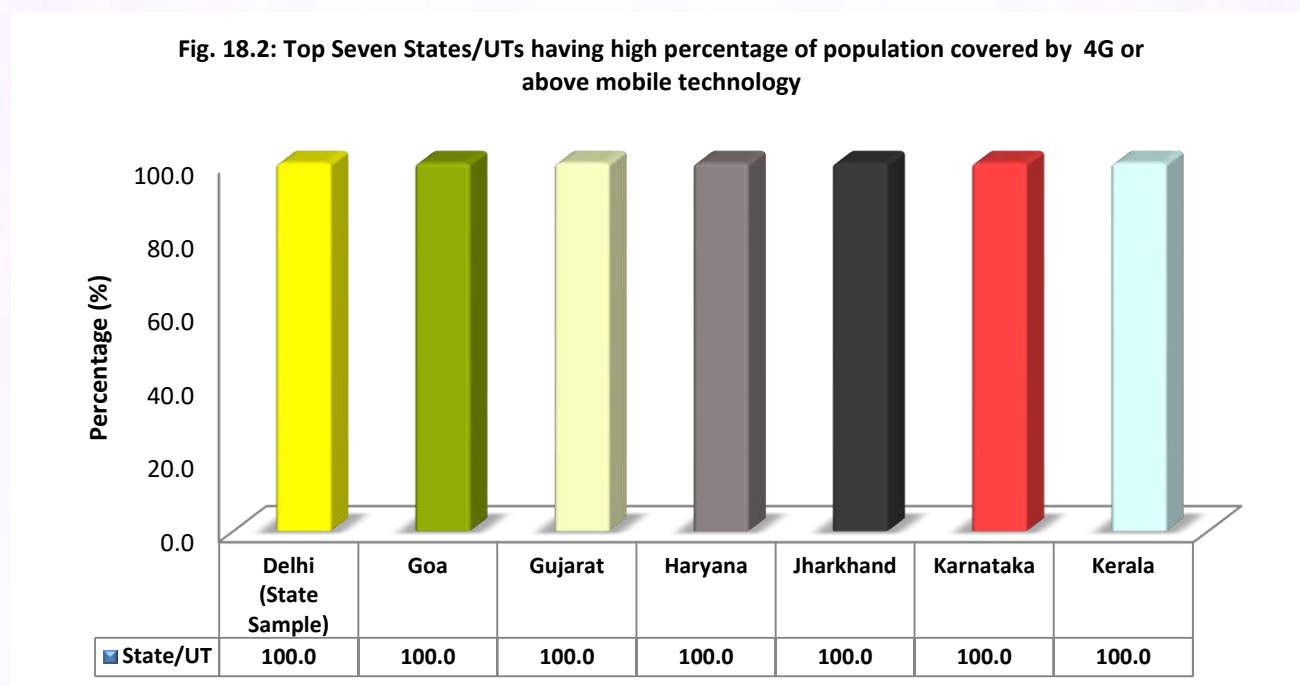

Figure 18.1 gives the percentage of persons covered by 4G or above mobile technology, in Delhi & at All-India level. It is observed that 100.0% persons were covered by 4G or above mobile technology while at All-India level, the percentage was 99.7%.

Fig. 18.1: Percentage of persons covered by 4G or above mobile technology, in Delhi.

Ref.: Volume IV: Table No. 17

Broadband Facility

For this survey, 'broadband' is defined as technologies that deliver advertised download speeds of at least 256 kbit/s. The main types of broadband services are i) Fixed (wired) broadband network, such as DSL, cable modem, high speed leased lines, fibre to-the-home/building, powerline and other fixed (wired) broadband; ii) Terrestrial fixed (wireless) broadband network, such as WiMAX, fixed CDMA; iii) Satellite broadband network (via a satellite connection); iv) Mobile broadband network (at least 3G, e.g. UMTS) via a handset and vi) Mobile broadband network (at least 3G, e.g. UMTS) via a card (e.g. integrated SIM card in a computer) or USB modem. Percentage of households with broadband internet facility within the household premises is presented in Statement 19.

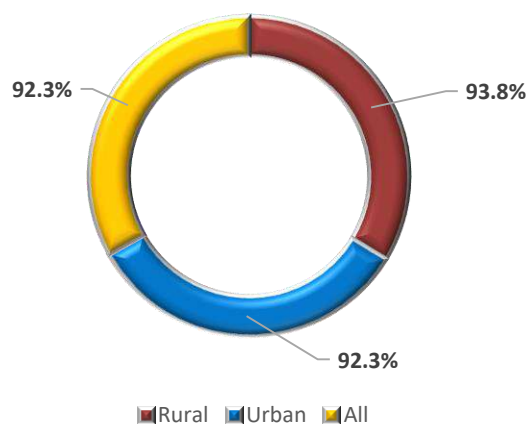

Statement 19: Percentage of households with broadband internet facility within the household premises in Delhi

State/UT	Rural	Urban	All
Delhi	93.8	92.3	92.3

Ref.: Table A8, Volume III

It has been found that about 92.3% households were with broadband internet facility within the household premises in Delhi.

Fig. 18.3: Percentage of households with broadband internet facility within the household premises in Delhi

Section 6: ICT SKILL

6.1 Persons sent messages with attached files

Information and Communication Technologies (ICT) Skill

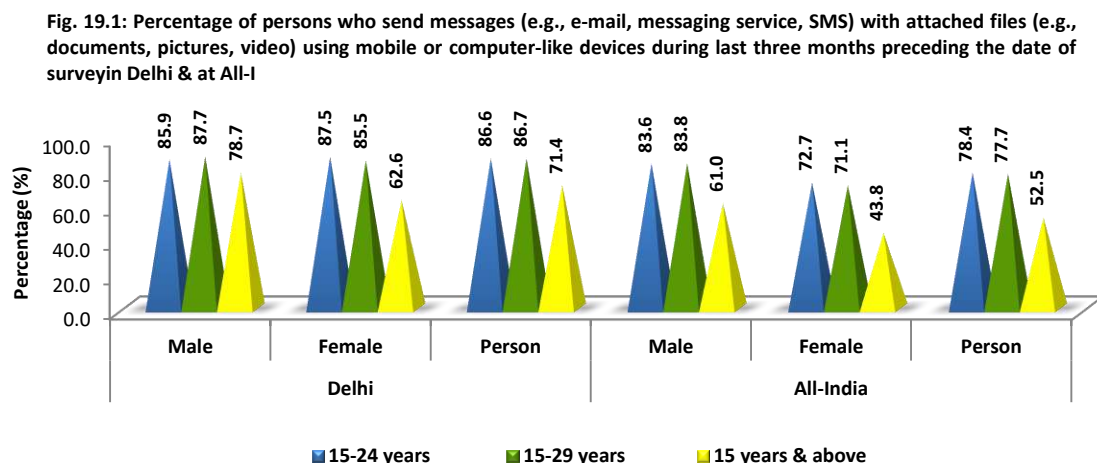

Statement 20 shows the percentages of persons who reported executing the skill of 'sent messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video)', using mobile or computer-like devices, during the last three months preceding the date of survey in Delhi for different age groups. It has been observed that about 71.4% persons in Delhi and 52.5% at All-India level for the age group '15 years & above' reported executing the skill of 'sent messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video)', using mobile or computer-like devices, during the last three months preceding the date of survey.

Statement 20: Percentage of persons who send messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video) using mobile or computer-like devices during last three months preceding the date of survey in Delhi & at All-India level

Age Group	Delhi			All-India		
	Male	Female	Person	Male	Female	Person

6.3.2 Persons able to send or receive emails

Percentage of persons who can send or receive emails, for different age groups in Delhi & at All-India level is given in Statement 30. It may be seen that 56.6% persons for the age group '15 years and above' in Delhi and 43.4% persons of the same age group at All-India level can send or receive emails.

Statement 30: Percentage of persons who can send or receive emails, for different age groups in Delhi & at All-India level		
	percentage of persons who can send or receive emails	
	Delhi	All-India
15-24 years	63.9	49.5
15-29 years	66.5	49.8
15 years & above	56.6	43.4

Figure 22.1 presents the percentage of persons who can send or receive emails, for different age groups in Delhi & at All-India level.

6.3.3 Persons able to perform online banking transactions

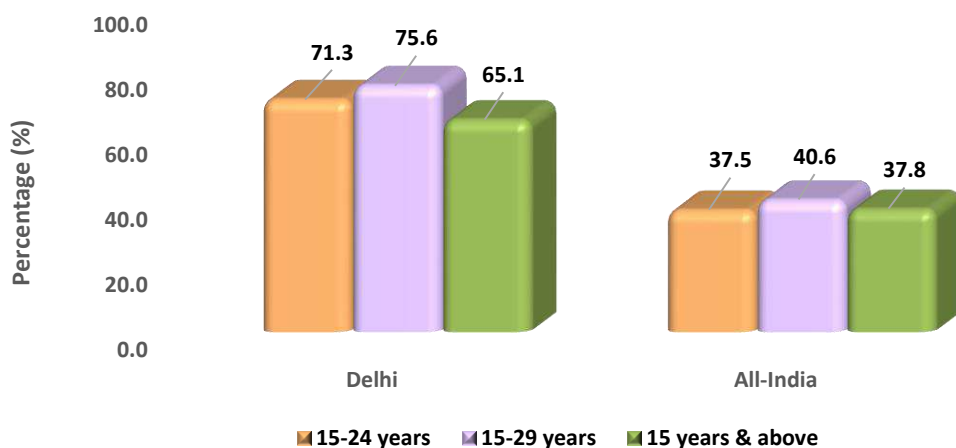

Percentage of persons who can perform online banking transactions, for different age groups in Delhi & at All-India level is given in Statement 32. About 65.1% persons in Delhi for the age group '15 years and above' reported that they were able to perform online banking transactions. However, at All-India level, the percentage was 37.8% for the same age group.

Statement 32: Percentage of persons who can perform online banking transactions, for different age groups in Delhi & at All-India level

	percentage of persons who can perform online banking transactions	
	Delhi	All-India
15-24 years	71.3	37.5
15-29 years	75.6	40.6
15 years & above	65.1	37.8

Figure 23.1 presents the percentage of persons who can perform online banking transactions, for different age groups in Delhi & at All-India level.

6.3.4 Persons able to search internet for information and able to send or receive emails and able to perform online banking

A person shall be considered **digitally literate** if he/she can operate digital devices like mobile phone, tablet, and computer to do all the following:

- ✚ Send or receive emails,
- ✚ Search internet for information and
- ✚ Perform some banking transactions like making digital payment.

From the statement 34, it has been observed that about 39.6% persons in Delhi for the age group '15 years and above' were able to search internet for information and who can send or receive emails and who can perform online banking transactions. While at All-India level, the percentage was 25.0% for the same age group.

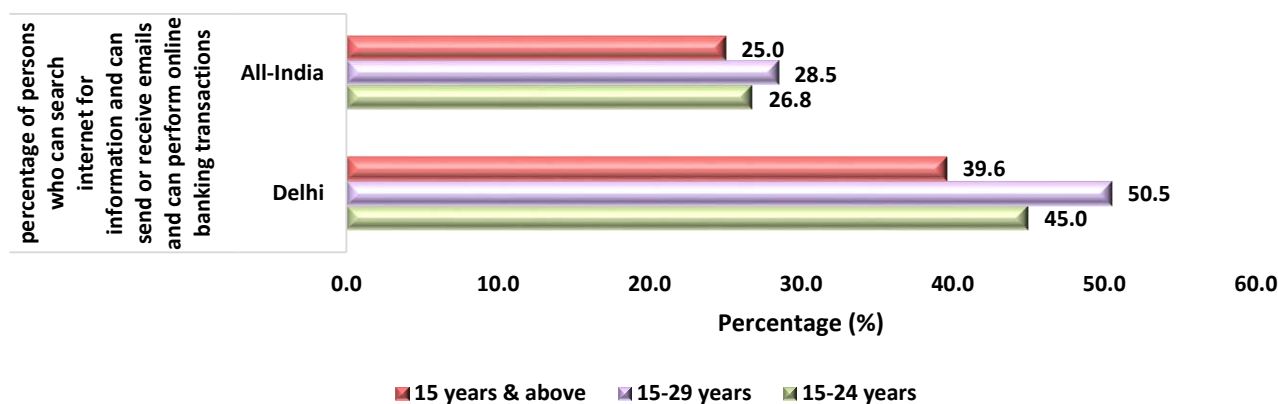

Statement 34: Percentage of persons who are digitally literate, for different age groups in Delhi & at All-India level

Age Group	percentage of persons who can search internet for information and can send or receive emails and can perform online banking transactions	
	Delhi	All-India

Section 7: OTHERS

7.1 Assets possessed by household

The number of possession of each of the following items for household use, as on the date of the survey were considered:

Telephone (including landline), Mobile phone (including smart phone), Desktop PC, Laptop, Tablet/Palmtop & Television.

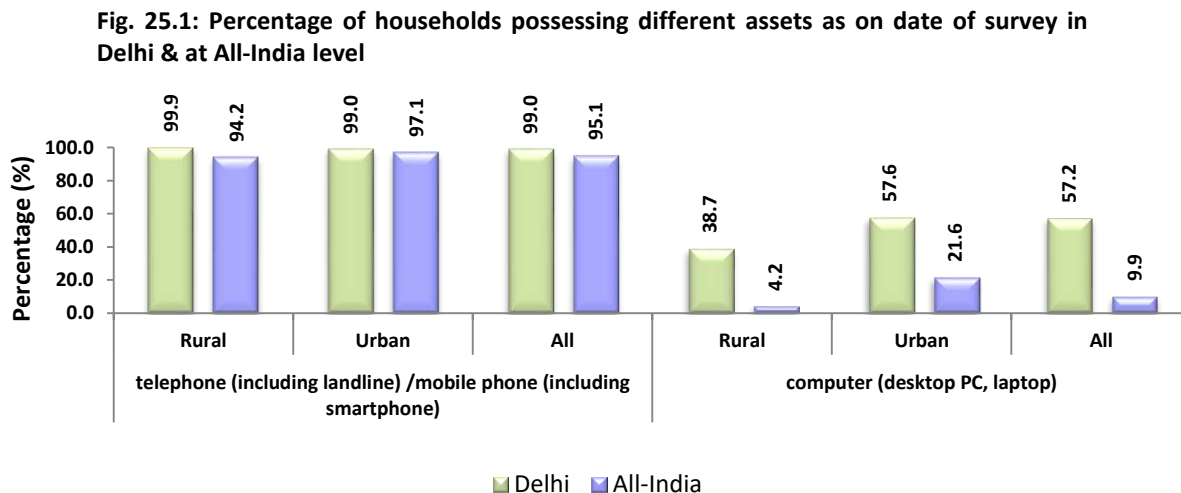

- ❖ Use of the items exclusively for enterprise purposes was excluded.
- ❖ If household uses any item both for residential as well as enterprise purposes, was considered that the household possessed that item.
- ❖ The items possessed by the household includes item provided by employer also.
- ❖ The items should be in working condition. If the item is not in working condition, as on the date of survey, it is to be considered for recording in this survey only if the household reports that it intends to repair the item for future use by the household for household purposes.

Percentage of households possessing different assets as on date of survey in Delhi & at All-India level is given in Statement 36. It has been observed that in Delhi about 99.0% household have possessed telephone (including landline)/mobile phone (including smart phone) at the time of survey while at All-India level, the percentage was 95.1%. Further, in case of possession of Computer (desktop PC, laptop), about 57.2% have such possession while at All-India level, this percentage was 9.9%.

Statement 36: Percentage of households possessing different assets as on date of survey in Delhi & at All-India level						
State/UT/All-India	percentage of households having					
	telephone (including landline) /mobile phone (including smartphone)			computer (desktop PC, laptop)		
	Rural	Urban	All	Rural	Urban	All
Delhi	99.9	99.0	99.0	38.7	57.6	57.2
All-India	94.2	97.1	95.1	4.2	21.6	9.9

7.2 Access to transport facilities

- Low-capacity public transport is defined as a shared passenger transport service with less capacity that is available to the general public.
- It includes cars, buses, trams that are shared by strangers without prior arrangement.
- Point to point shared taxi, auto, toto/tuktuk services are also to be included as low-capacity transport.
- However, taxis, car pools, and hired buses, which are not shared by strangers without prior arrangement, will not be included as low-capacity transport.
- Low-capacity transport also excludes informal, unregulated modes of transport (para-transit),

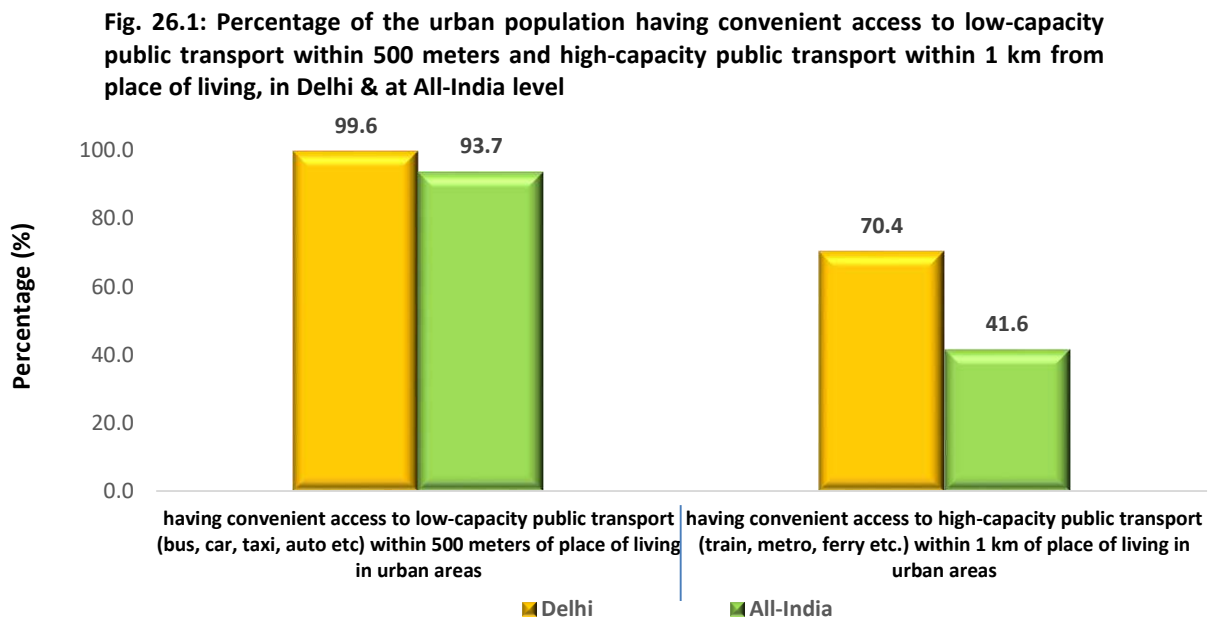

- High-capacity public transport is defined as a shared passenger transport service with high capacity that is available to the general public.
- High-capacity public transport system includes trains, metro, ferry etc. that are shared by strangers without prior arrangement.

Statement 37: Percentage of urban population having convenient access to transport facilities in Delhi & at All-India level		
State/UT/All-India	percentage of population	
	having convenient access to low-capacity public transport (<i>bus, car, taxi, auto etc.</i>) within 500 meters of place of living in urban areas	having convenient access to high-capacity public transport (<i>train, metro, ferry etc.</i>) within 1 km of place of living in urban areas
Delhi	99.6	70.4
all-India	93.7	41.6

Ref.: Volume II: Table No. 22

Statement 37 shows that 99.6% of the urban population having convenient access to low-capacity public transport (*bus, car, taxi, auto etc.*) within 500 meters and 70.4% of the urban population having convenient access to high-capacity public transport (*train, metro, ferry etc.*) within 1 km from place of living, in Delhi while at All-India level, it was 93.7% & 41.6% respectively.

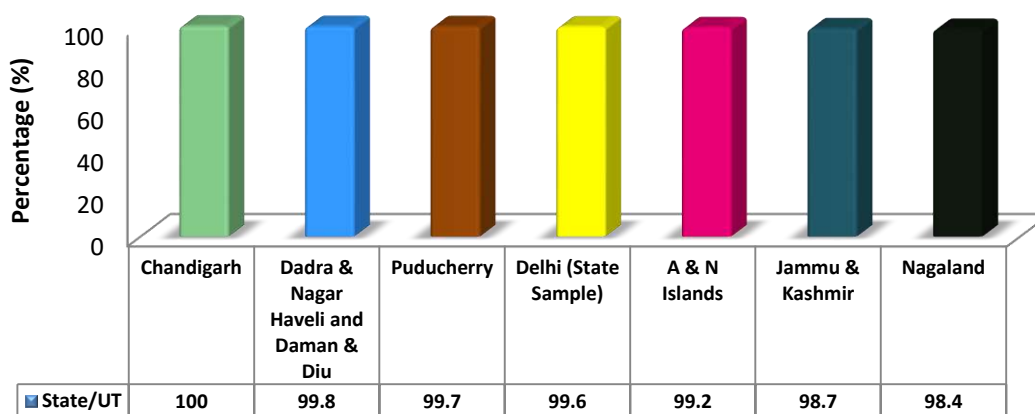

Figure 26.1 presents the percentage of the urban population having convenient access to low-capacity public transport (*bus, car, taxi, auto etc.*) within 500 meters and percentage of the urban population having convenient access to high-capacity public transport (*train, metro, ferry etc.*) within 1 km from place of living, in Delhi & at All-India level.

7.3 Availability of all-weather road within 2 km

In this survey, a road which is motorable all year round by the prevailing means of rural transport was considered as a road which is usable during all seasons in rural area.

Statement 38 gives the percentage of rural population with all-weather roads within a distance of 2 km from the place of living in Delhi & at All-India level. It may be seen that about 99.7% rural population have all-weather road within a distance of 2 km from the place of living of the household in rural areas. While at All-India level, the percentage was 94.2%.

Statement 38: Percentage of rural population with all-weather roads within a distance of 2 km from the place of living in Delhi & at All-India level

State/UT/All-India	percentage of population
	with all-weather road within a distance of 2 km from the place of living of the household in rural areas

7.5 Registration of births/receipt of birth certificates

- Birth Certificate issued by Municipalities, Panchayat, Government Health institution or other local authority appointed by State Government for registration of birth and issue of certificate was considered here.
- In this survey, civil authority includes municipality, panchayat, Government health institution or other local authority appointed by the State Government for registration of birth and issue of birth certificate.

- Transfer certificate issued by a school was not considered as birth certificate for this survey.
- For those children under the age of 5 years who had not received birth certificates or whose birth certificate status was unknown to the respondents, information was collected on whether they were registered with civil authorities (like municipality, panchayat, Government health institution or other local authority appointed by the State Government for registration of birth and issue of birth certificate) for birth certificates.

It is to be noted that for collecting this information, only the response of the informant was considered. No checking on the part of the data collector was carried out on whether the affirmative households possessed the certificate or not.

Percentage of persons of age less than 5 years, who have registered with civil authority for birth certificate ever in Delhi & at All-India level is given in Statement 39. It has been observed that about 97.6% persons in Delhi and 90.6% persons at All-India level have registered with civil authority for birth certificate ever.

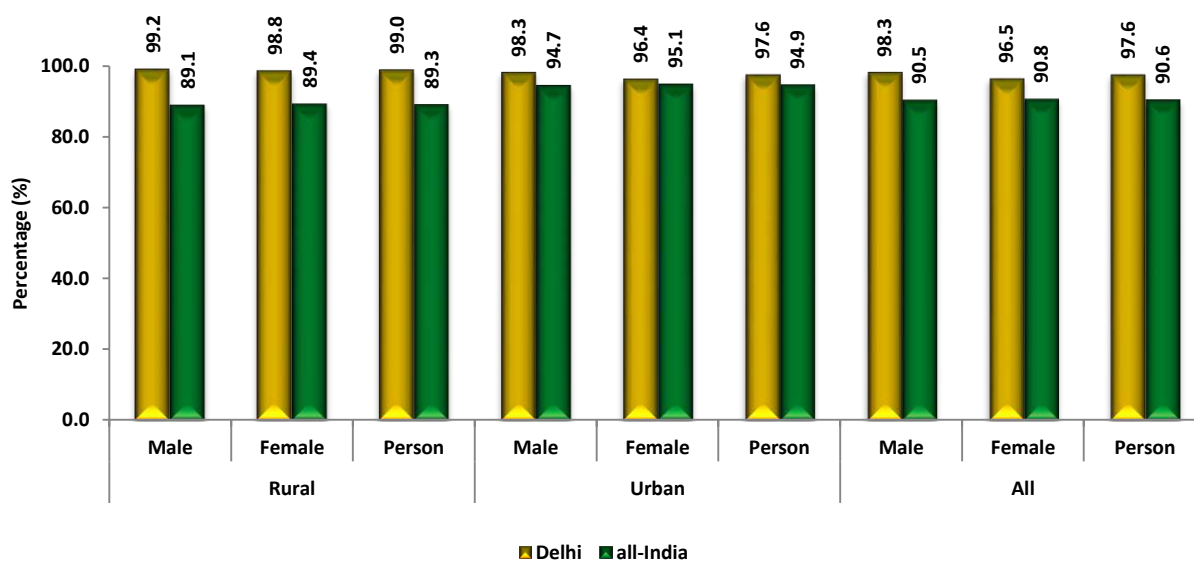

Statement 39: Percentage of persons of age less than 5 years, who have registered with civil authority for birth certificate ever in Delhi & at All-India level

State/UT/All-India	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
Delhi	99.2	98.8	99.0	98.3	96.4	97.6	98.3	96.5	97.6

7.6 Use of clean fuel as the primary source of energy for cooking/lighting/heating

Primary source of energy was defined as the source of energy which the household used majority of the time.

A household is categorized as using clean fuel for cooking, if the household reported the use of any one of the primary sources, viz.

LPG/other natural gas, Gobar gas/other bio gas, electricity(incl. generated by solar/wind power generators) & Solar cooker for cooking

Primary source of energy generally used by the household for heating purpose, viz.

Firewood, chips & crop residue, LPG, other natural gas, dung cake, kerosene, coke, coal, gobar gas, other biogas, charcoal, electricity (incl. generated by solar/wind power generators), solar cooker& others

- If more than one type of primary source of energy are used by the household for cooking/lighting/heating, the type of energy mainly used by the household was recorded.
- If a household does not cook food in the dwelling unit, rather depends on food purchased from outside, it was considered that the household has no cooking arrangement.
- For two or more different sources of energy for cooking/lighting/heating (for example, electricity for room heating and LPG for food and water heating), primary source of energy used for cooking/lighting/heating for most of the time by the household was recorded.
- Electricity may be availed by the household legally or illegally and the electricity may be supplied to the household either through public agencies, corporations or by private suppliers.
- If the household makes its own arrangement, either through generator or solar panel, to generate electricity, the household was considered for reporting.

Primary source of energy generally used by the household for lighting purpose, viz.

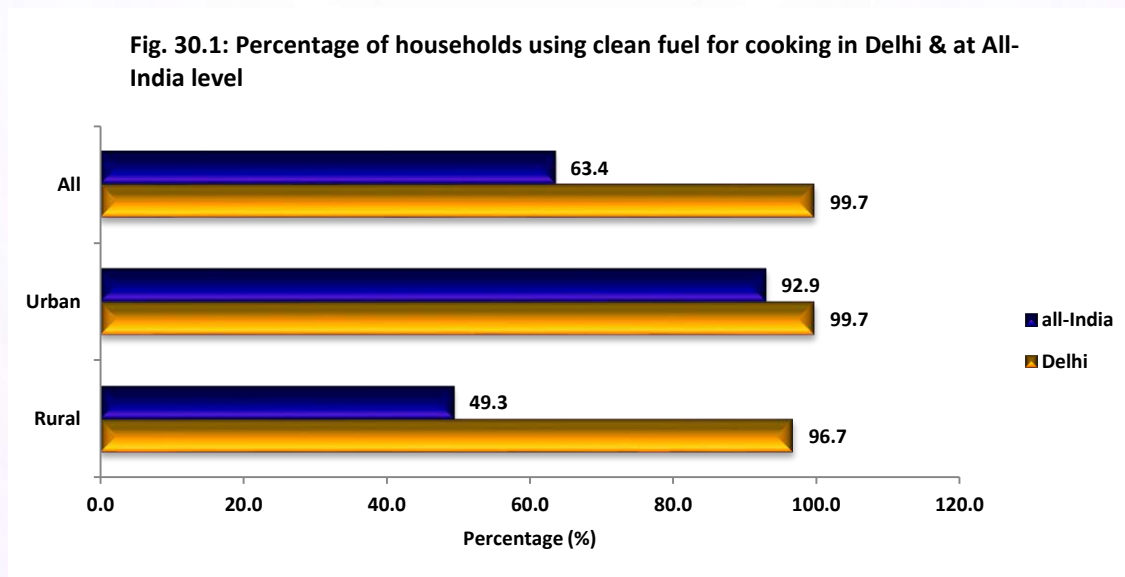

Electricity (incl. generated by solar or wind power generators), kerosene, other oil, gas, candle & others

Percentage of households using clean fuel for cooking/ lighting/heating in Delhi is given in Statement 40. It has been observed that about 100.0% households used clean fuel for lighting purpose in Delhi.

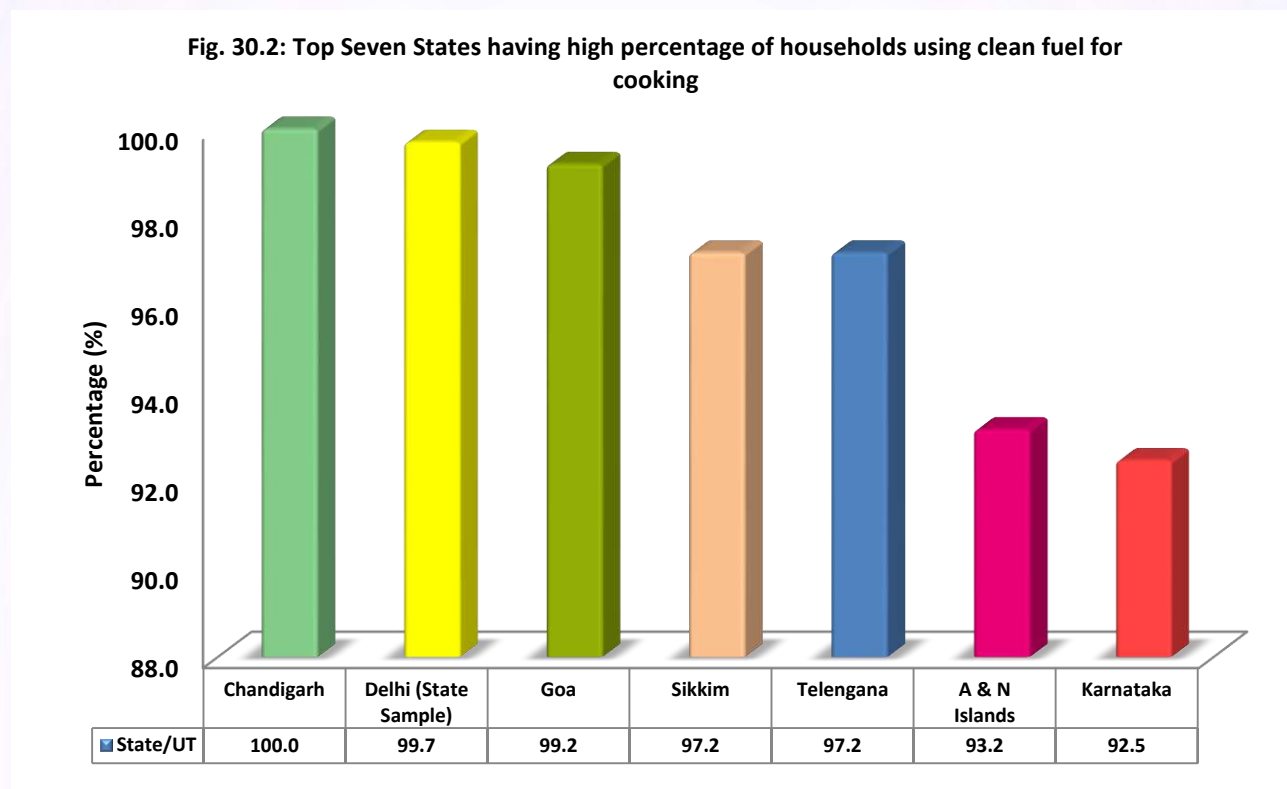

Statement 40: Percentage of households using clean fuel for cooking/ lighting/heating in Delhi			
Description	Rural	Urban	All
(1)	(2)	(3)	(4)
Cooking	96.7	99.7	99.7
Lighting	99.9	100.0	100.0
Heating	95.0	98.6	98.6

Ref.: Volume III: Table No. A11

Figure 30.1 gives the percentage of households using clean fuel for cooking (among households reported having cooking arrangements) in Delhi & at All-India level. It may be seen that in Delhi, 99.7% households used clean fuel for cooking while at All-India level, the percentage was 63.4%.

Top Seven States having high percentage of households using clean fuel for cooking is presented in figure 30.2.

Ref.: Volume IV: Table No. 24

7.7 Improved principal source of drinking water

The *principal source of drinking water* of a household meant the source of water from which the household obtained most of its drinking water during the last 365 days.

For all the selected households, the following information was obtained by the household during the last 365 days:

- Access to the principal source of the drinking water.
- Availability of drinking water from the principal source sufficient throughout the year (i.e. during each calendar month of the last 12 months).
- Method used by the household for treatment of drinking water received from principal source.
- The distance to the principal source (from which most of the drinking water is obtained) from the dwelling unit

Principal source of drinking water

- Bottled water
- Piped water into dwelling
- Piped water to yard/plot
- Piped water from neighbor
- Public tap/standpipe
- Tube well
- Hand pump
- Protected well
- Unprotected well
- Public tanker truck
- Private tanker truck
- Protected spring
- Unprotected spring
- Rainwater collection
- Tank/pond
- Other surface water (river, dam, stream, canal, lake, etc.)
- Others (cart with small tank or drum, etc.)

Out of the Principal source of drinking water, the following are considered as “Improved source of drinking water”

- Bottled water
- Piped water into dwelling
- Piped water to yard/plot
- Piped water from neighbor
- Public tap/standpipe
- Tube well
- Hand pump
- Protected well
- Public tanker truck
- Private tanker truck
- Protected spring
- Rainwater collection

For all the selected household, only the prevailing situation in respect of the principal source of drinking water was considered as reported by the sample household and not the legal right to use the principal source of drinking water.

Percentage of persons having access to improved principal source of drinking water in Delhi & at All-India level is given in Statement 41. About 100.0% households have access to improved principal source of drinking water in Delhi. However, at All-India level, the percentage was 95.7%.

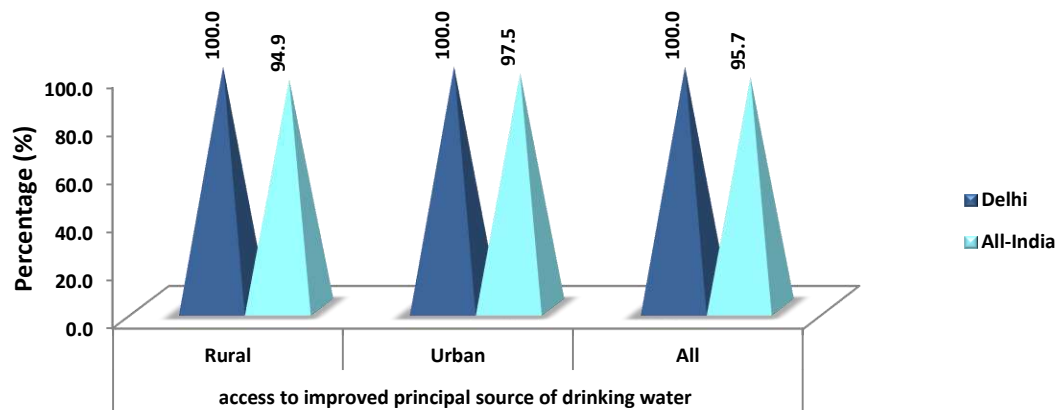

Statement 41: Percentage of households having access to improved principal source of drinking water in Delhi & at All-India level

State/UT/All-India	access to improved principal source of drinking water		
	Rural	Urban	All
Delhi	100.0	100.0	100.0
All-India	94.9	97.5	95.7

Ref.: Volume II: Table No. 25

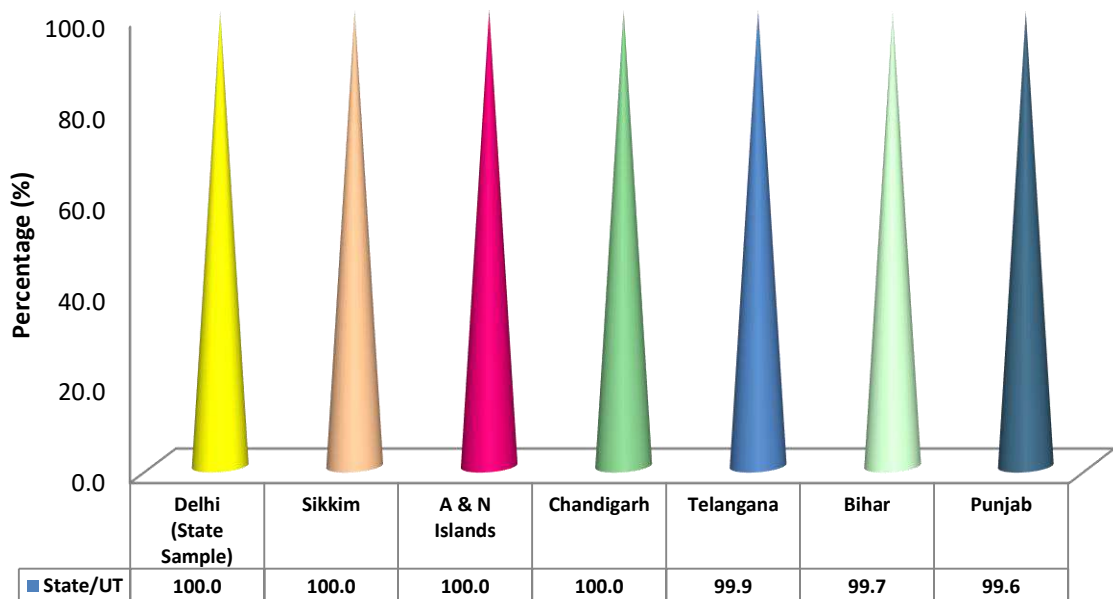

Figure 31.1 gives the percentage of households having access to improved principal sources of drinking water in Delhi & at All-India level.

Fig. 31.1: Percentage of households having access to improved principal sources of drinking water in Delhi & at All-India level

Treatment of drinking water

Drinking water received by the household from the principal source may be treated at home by various methods before use. Treatment of drinking water can be done through boiling, filtering, by using chemicals, by using electric/non-electric purifiers etc.

45.7% of persons used Electric Purifier for treatment of drinking water received from principal source in Delhi.

52.8% of persons did not treat drinking water before use in Delhi.

Ref.: Volume III: Table No. D6

Statement 42: Percentage distribution of persons by method used for treatment of drinking water received from principal source in Delhi

State/UT	Methods of treatment									
	Not required to treat	Electric purifier	Non Electric purifier	Boiling	Chemically treated with alum	Chemically treated with bleach/ chlorine tablets	Filtered with cloth	Others	Not treated	all
Delhi	52.8	45.7	0.1	1.2	0.0	0.0	0.0	0.0	0.2	100.0

In Delhi, about 73% persons have piped water into dwelling while 26% persons used bottled water for drinking purpose.

Distance to the principal source of drinking water

Statement 44: Percentage distribution of persons by distance to the principal source of drinking water in Delhi				
State/UT	Distance to the principal source of drinking water			
	Within dwelling	Outside dwelling but within premises	outside premises	all
Delhi	97.7	1.7	0.6	100.0

Ref.: Volume III: Table No. D5

7.8 Access to improved latrine

A 'latrine' is defined as an infrastructure which allows safer and more hygienic disposal of human excreta.

Types of Latrine

- Flush/pour-flush to piped sewer system
- Flush/pour-flush to septic tank
- Flush/pour-flush to twin leach pits/single pit
- Flush/pour-flush to elsewhere (open drain, open pit, open field, etc)
- Ventilated improved pit latrine
- Pit latrine with slab
- Pit latrine without slab/open pit
- Composting latrine
- Others

Improved latrine

- Flush/pour-flush to piped sewer system,
- Flush/pour-flush to septic tank,
- Flush/pour-flush to twin leach pits/single pit,
- Ventilated improved pit latrine,
- Pit latrine with slab and
- Composting latrine

In this survey, a household was considered to have access to a latrine if the majority of household members had the facility of using the latrine, irrespective of whether it was used by them or not.

Percentage of persons having access to improved latrine (among persons with access to latrine) in Delhi and percentage of households having access to improved latrine (among households with access to latrine) at All-India level is given in statements 45 & 46. It has been observed that in Delhi, about 99.7% persons have access to improved latrine while at All-India level, 97.8% households have this access.

Statement 45: Percentage of persons having access to improved latrine (among persons with access to latrine) in Delhi			
State/UT/All-India	access to improved latrine (among persons with access to latrine)		
	Rural	Urban	All
Delhi	96.5	99.7	99.7

Statement 46: Percentage of households having access to improved latrine (among households with access to latrine) at All-India level			
State/UT/All-India	access to improved latrine (among households with access to latrine)		
	Rural	Urban	All
All-India	97.1	98.9	97.8

Ref.: Volume II: Table No.25

Figure 32.1 gives the percentage of persons with access to improved latrine (among persons reported having access to latrine) in Delhi. However, Figure 32.2 gives the percentage of households with access to improved latrine (among households reported having access to latrine) at All-India level.

Fig. 32.1: Percentage of persons having access to improved latrine (among persons with access to latrine) in Delhi

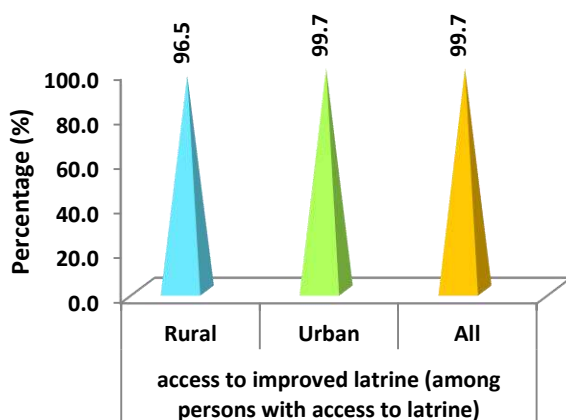

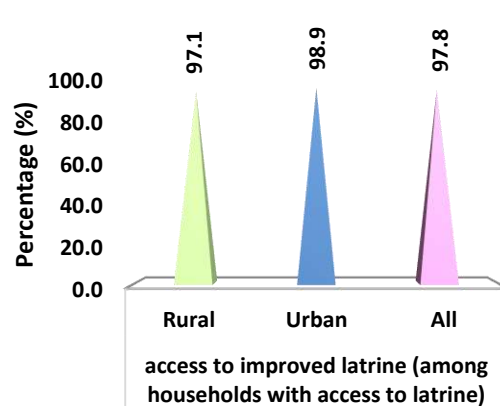

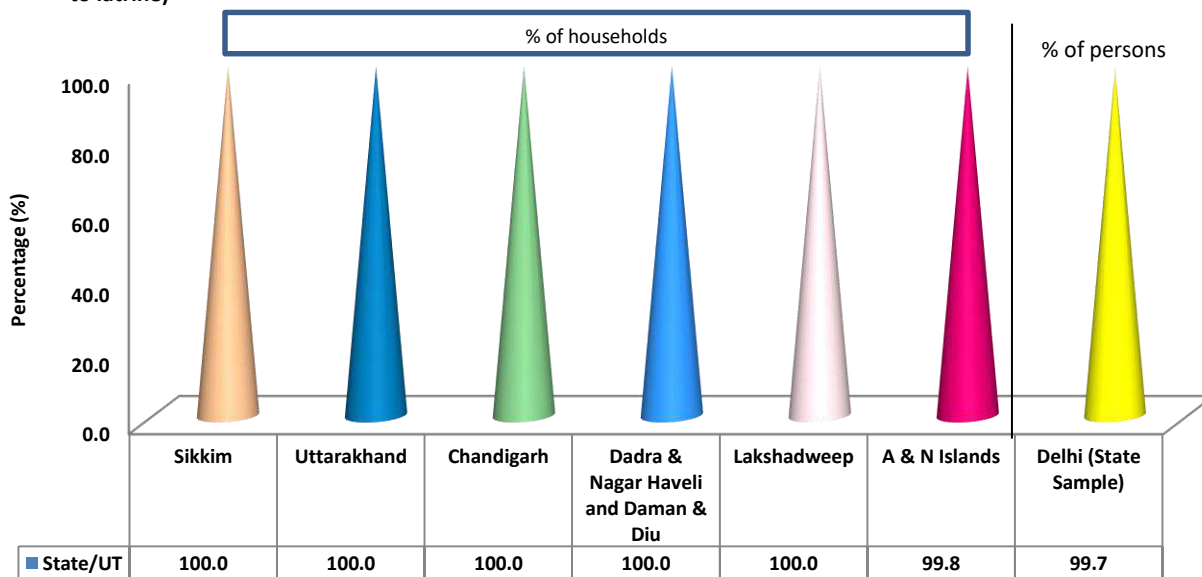

Fig. 32.2: Percentage of households having access to improved latrine (among households with access to latrine) at All-India level

Top Seven States/UTs having high percentage of households with access to improved latrine (among households with access to latrine) with Delhi (State Sample) for percentage of persons with access to improved latrine (among persons with access to latrine) are presented in figure 32.3.

Fig. 32.3: Top Seven States/UTs having high percentage of households* with access to improved latrine with Delhi (State Sample) for percentage of persons with access to improved latrine (among persons with access to latrine)

Hand washing Facility

Hand washing facility is an important hygienic facility required for removing dirt, soil, germs from hands before and after taking meal, after defecation etc. which prevent attack from diseases like diarrhoea/other stomach problems etc. to a great extent.

Points to remember:

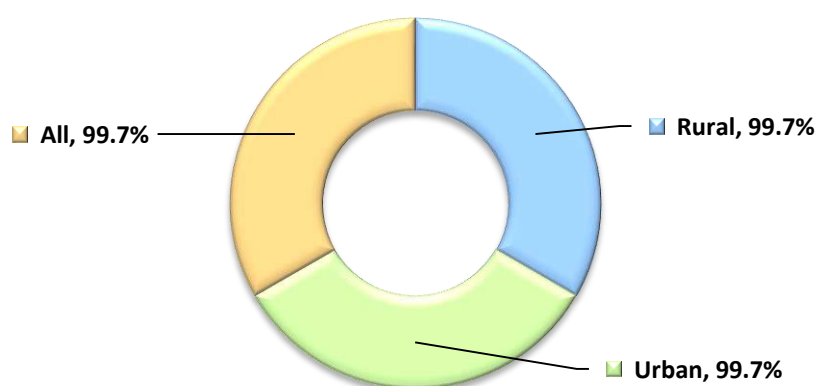

- ❖ Sanitizer & Wet tissue paper were treated as 'with water and soap/detergent'.
- ❖ Dry tissue paper was treated as 'with water only'.
- ❖ The availability of facility of hand washing was given importance, not to the practice of hand washing.

Statement 47: Percentage of persons having hand washing facilities with water, soap/ detergent in Delhi

State/UT	Rural	Urban	All
Delhi	99.7	99.7	99.7

All-India	4,129	5,290	950	1,446	539	606	124	166

*: It is pertinent to mention here that the NSO, MoSPI, Gol has changed the methodology/tabulation plan for the computation of average medical expenditure in 79th NSS Round. This shows departure from the methodology adopted in the NSS Rounds say 71st & 75th Rounds of the Health Survey. In earlier rounds, this indicator was derived based only on households that had actually incurred medical expenditure. However, in NSS 79th Round, the estimates were generated by including all households, irrespective of whether they had incurred any medical expenditure or not. Thus, the Average Medical Expenditure (in Rs.)/Average out-of-pocket Medical Expenditure (OOPME) comes in NSS 79th Round both in Central Report of CAMS 2022-23 & Delhi State Sample are not comparable.

Delhi (State Sample)

List of Detailed Tables of NSS 79th Round for Delhi (State Sample)

Table No.	Description	Page No.
A1	Number of borrowers per 1,00,000 persons (youth and adult) and percentage distribution of population having accounts by age group in Delhi	B-1 to B-5
A2	Percentage distribution of persons of age < 5 years by status of birth certificate in Delhi	B-6 to B-10
A3.1	Percentage distribution of population of age 3 years or more using mobile telephones with an active sim card during last 3 months by age group in Delhi	B-11 to B-15
A3.2	Percentage of population covered by mobile network by type of technology in Delhi	B-16
A4	Percentage distribution of population of age 3 years or more able to use internet by status of regular usage by age group in Delhi	B-17 to B-21
A4.1	Percentage of population of age 3 years or more used internet during last 3 months and 12 months by age group, among all persons of age 3 years or more in Delhi	B-22 to B-26
A5	Percentage of persons (15 years and above) by type of ICT skills for each age group of youth and adult population in Delhi	B-27 to B-35
A6	Percentage of persons in formal and non-formal education and training in the previous 12 months in Delhi	B-36 to B-44
A7_1524	Percentage of persons not in employment, education and training (NEET) by age group in Delhi	B-45 to B-53
A7_1529	Percentage of persons not in employment, education and training (NEET) by age group in Delhi	B-54 to B-62
A8	Percentage of households possessing computer, laptop, TV. etc for household use in Delhi	B-63 to B-65
A-9	Percentage of persons having improved drinking water source accessible on premises, available when needed and treated in Delhi	B-66 to B-68
A10	Percentage of persons having exclusive access to improved latrine with hand washing facilities with water, soap/detergent in Delhi	B-69 to B-71
A10.1	Percentage of persons having hand washing facilities within household premises in Delhi	B-72 to B-74
A11	Proportion of households using clean fuel as a primary source of energy in Delhi	B-75 to B-77
A12	Percentage of persons with all-weather road within a distance of 2 km from the place of living of the household in Delhi	B-78
A13	Percentage of persons having convenient access to low and high capacity public transport in Delhi	B-78

A14	Percentage distribution of households by distance of the nearest open public space from the place of living of the householdin Delhi	B-78
B1	Percentage distribution of population able to use internet out of those able to use mobile or computer like devices* by type of purpose in Delhi	B-79 to B-87
B2	Percentage of persons who are digitally literatein Delhi	B-88 to B-96
B3	Percentage of persons in tertiary education, percentage of graduates in science and technology and percentage of persons with some secondary education in Delhi	B-97 to B-105
B4	Percentage distribution of persons (age 6 to 10 years) who are enrolled in primary education by type of school currently enrolled in Delhi	B-106 to B-114
B5_15	Percentage of literate personsin Delhi	B-115 to B-123
B5_18	Percentage of literate personsin Delhi	B-124 to B-132
B5_1524	Percentage of literate personsin Delhi	B-133 to B-141
B5_1529	Percentage of literate personsin Delhi	B-142 to B-150
B5_1559	Percentage of literate personsin Delhi	B-151 to B-159
B5_1859	Percentage of literate personsin Delhi	B-160 to B-168
B6_6	Percentage distribution of persons who have never being enrolled in formal education by major reasons in Delhi	B-169 to B-177
B6_15	Percentage distribution of persons who have never being enrolled in formal education by major reasons in Delhi	B-178 to B-186
B6_35	Percentage distribution of persons who have never being enrolled in formal education by major reasonsin Delhi	B-187 to B-195
B6_614	Percentage distribution of persons who have never being enrolled in formal education by major reasons in Delhi	B-196 to B-204
B6_618	Percentage distribution of persons who have never being enrolled in formal education by major reasons in Delhi	B-205 to B-213
B7	Average number (0.0) of telephone, mobile phone, Desktop PC, Laptop, TV etc. possessed by household in Delhi	B-214 to B-216
C1	Average medical expenditure (Rs.) per household for treatment on non-hospitalisation and/or preventive measures and/or self-care during the last 30 days and its break-up by component of expenditure (AS PER NEW METHODOLOGY) in Delhi	B-217 to B-218
C2	Average medical expenditure (Rs.) per household for treatment on hospitalisation (including institutional delivery) at medical institution by the household during the last 365 day and its break-up by component of expenditure (AS PER NEW METHODOLOGY) in Delhi	B-219

C3	Average out-of-pocket medical expenditure (OOPME) per household for treatment on hospitalisation during the period of last 365 days and non-hospitalisation during the last 30 days (AS PER NEW METHODOLOGY)in Delhi	B-220
C1a	Average medical expenditure (Rs.) per person for treatment on non-hospitalisation and/or preventive measures and/or self-care during the last 30 days and its break-up by component of expenditure(AS PER NEW METHODOLOGY)in Delhi	B-221 to B-222
C2a	Average medical expenditure (Rs.) per person for treatment on hospitalisation (including institutional delivery) at medical institution by the person during the last 365 day and its break-up by component of expenditure (AS PER NEW METHODOLOGY) in Delhi	B-223
C3a	Average out-of-pocket medical expenditure (OOPME) per person for treatment on hospitalisation during the period of last 365 days and non-hospitalisation during the last 30 days (AS PER NEW METHODOLOGY) in Delhi	B-224
C1o	Average medical expenditure (Rs.) per household for treatment on non-hospitalisation and/or preventive measures and/or self-care during the last 30 days and its break-up by component of expenditure (AS PER OLD METHODOLOGY)in Delhi	B-225 to B-226
C2o	Average medical expenditure (Rs.) per household for treatment on hospitalisation (including institutional delivery) at medical institution by the household during the last 365 day and its break-up by component of expenditure (AS PER OLD METHODOLOGY)in Delhi	B-227 to B-228
C3o	Average out-of-pocket medical expenditure (OOPME) per household for treatment on hospitalisation during the period of last 365 days and non-hospitalisation during the last 30 days (AS PER OLD METHODOLOGY)in Delhi	B-229
D1	Number of first stage units (FSUs) allotted, surveyed and number of sample households surveyed in Delhi	B-230
D2	Estimated number of persons (00) and average household size (0.0) classified by household social group and religion group in Delhi	B-231 to B-256
D3	Percentage distribution of persons by principal source of drinking water in Delhi	B-257 to B-259
D4	Percentage distribution of persons by distance to the principal source of drinking water in Delhi	B-260 to B-262
D5	Percentage distribution of persons by method used for treatment of drinking water received from principal source in Delhi	B-263 to B-265
D6	Percentage distribution of persons with access to latrine by types of latrine in Delhi	B-266 to B-268
D7	Percentage distribution of households by primary source of energy used for cooking in Delhi	B-269 to B-271
D8	Percentage distribution of population of age 3 years or	B-272 to B-276

	more who are able to use mobile telephone by type of mobile phone in Delhi	
D9	Percentage distribution of population of age 3 years or more who are able to use mobile telephone by type of usage in last 3 months preceding date of survey in Delhi	B-277 to B-281
D10_15	Mean years of schooling (considering completed status) in Delhi	B-282 to B-284
D10_25	Mean years of schooling (considering completed status) in Delhi	B-285 to B-287
D10_1540	Mean years of schooling (considering completed status) in Delhi	B-288 to B-290
D10_2540	Mean years of schooling (considering completed status) in Delhi	B-291 to B-293
D10_3040	Mean years of schooling (considering completed status) in Delhi	B-294 to B-296
D11_15	Mean years of schooling (considering completed and non-completed status) in Delhi	B-297 to B-299
D11_25	Mean years of schooling (considering completed and non-completed status) in Delhi	B-300 to B-302

*: It is pertinent to mention here that the NSO, MoSPI, GoI has changed the methodology/tabulation plan for the computation of average medical expenditure in 79th NSS Round. This shows departure from the methodology adopted in the NSS Rounds say 71st& 75th Rounds of the Health Survey. In earlier rounds, this indicator was derived based only on households that had actually incurred medical expenditure. However, in NSS 79th Round, the estimates were generated by including all households, irrespective of whether they had incurred any medical expenditure or not. Thus, the Average Medical Expenditure (in Rs.)/Average out-of-pocket Medical Expenditure (OOPME) comes in NSS 79th Round both in Central Report of CAMS 2022-23 & Delhi State Sample are not comparable.

List of Comparative Tables of Delhi (State Sample) with States/UTs

Table No.	Description	Page No.
1a	Percentage of persons able to read and write short simple statements in their everyday life with understanding for each State/UT for the age group 15-24 years	C-1
1b	Percentage of persons able to read and write short simple statements in their everyday life with understanding for each State/UT for the age group 15-29 years	C-2
1c	Percentage of persons able to read and write short simple statements in their everyday life with understanding for each State/UT for the age group 15 years & above	C-3
2a	Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations for each State/UT for the age group 15-24 years	C-4
2b	Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations for each State/UT for the age group 15-29 years	C-5
2c	Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations for each State/UT for the age group 15 years & above	C-6
3a	Mean years of schooling in formal education for each State/UT for the age group 15 years & above	C-7
3b	Mean years of schooling in formal education for each State/UT for the age group 25 years & above	C-8
4	Percentage distribution of persons of age 6 to 10 years currently enrolled in primary education at the time of survey by type of school for each State/UT	C-9 to C-17
5	Percentage of persons with some secondary education for each State/UT for the age group 25 years & above	C-18
6	Percentage distribution of persons of age 6 to 18 years who never enrolled in formal education by major reasons at the time of survey for each state/UT	C-19 to C-27
7a	Percentage of persons in formal and non-formal education and training in the previous 12 months for each State/UT for the age group 15-24 years	C-28
7b	Percentage of persons in formal and non-formal education and training in the previous 12 months for each state/UT for the age group 15-29 years	C-29
8a	Percentage of persons not in education, employment and training (NEET) for each State/UT for the age group 15-24 years	C-30
8b	Percentage of persons not in education, employment and training (NEET) for each State/UT for the age group 15-29 years	C-31

9	Average medical expenditure (Rs.) per household and per person on hospitalised treatment (including institutional delivery) during the last 365 days and on non-hospitalised treatment during the last 30 days for each State/UT	C-32
10	Average out-of-pocket medical expenditure (OOPME) per household and per person for treatment on hospitalisation (including institutional delivery) during the last 365 days and non-hospitalisation during the last 30 days for each State/UT	C-33
11	Percentage of persons who have an account individually or jointly in any bank/ other financial institution/mobile money service provider for each State/UT for the age group 18 years & above	C-34
12	Number of borrowers per 1,00,000 persons for each State/UT	C-35
13a	Percentage of persons able to use mobile (including smart phones) for each State/UT for the age group 15-24 years	C-36
13b	Percentage of persons able to use mobile (including smartphones) for each State for each State/UT for the age group 15-29 years	C-37
13c	Percentage of persons able to use mobile (including smartphones) for each State for each State/UT for the age group 15 years & above	C-38
14a	Percentage of persons who used mobile telephone with an active sim card during the last three months preceding the date of the survey for each State/UT for the age group 15-24 years	C-39
14b	Percentage of persons who used mobile telephone with an active sim card during the last three months preceding the date of the survey for each State/UT for the age group 15-29 years	C-40
14c	Percentage of persons who used mobile telephone with an active sim card during the last three months preceding the date of the survey for each State/UT for the age group 15 years & above	C-41
15a	Percentage of persons who are able to use internet for each State/UT for the age group 15-24 years	C-42
15b	Percentage of persons who are able to use internet for each State/UT for the age group 15-29 years	C-43
15c	Percentage of persons who are able to use internet for each State/UT for the age group 15 years & above	C-44
16a	Percentage of persons who used internet during last three months preceding the date of survey for each State/UT for the age group 15-24 years	C-45
16b	Percentage of persons who used internet during last three months preceding the date of survey for each State/UT for the age group 15-29 years	C-46
16c	Percentage of persons who used internet during last three months preceding the date of survey for each State/UT for the age group 15 years & above	C-47
17	Percentage of population covered by 4G or above mobile technology for each State/UT	C-48
18a	Percentage of persons who send messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video) using mobile or computer-like devices during last three months preceding the date of survey for each State/UT for the age group 15-24 years	C-49
18b	Percentage of persons who send messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video) using mobile or computer-like devices during last three months preceding the date of survey for each State/UT for the age group 15-29 years	C-50

	years	
18c	Percentage of persons who send messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video) using mobile or computer-like devices during last three months preceding the date of survey for each State/UT for the age group 15 years & above	C-51
19a	Percentage of persons who performed copy and paste tools to duplicate or move data, information, documents, etc using mobile or computer-like devices during last three months preceding the date of survey for each State/UT for the age group 15-24 years	C-52
19b	Percentage of persons who performed copy and paste tools to duplicate or move data, information, documents, etc using mobile or computer-like devices during last three months preceding the date of survey for each State/UT for the age group 15-29 years	C-53
19c	Percentage of persons who performed copy and paste tools to duplicate or move data, information, documents, etc using mobile or computer-like devices during last three months preceding the date of survey for each State/UT for the age group 15 years & above	C-54
20a	Percentage of persons who can search internet for information and percentage of persons who can send or receive emails and percentage of persons who can perform online banking transactions for each State/UT for the age group 15-24 years	C-55 to C-63
20b	Percentage of persons who can search internet for information and percentage of persons who can send or receive emails and percentage of persons who can perform online banking transactions for each State/UT for the age group 15-29 years	C-64 to C-72
20c	Percentage of persons who can search internet for information and percentage of persons who can send or receive emails and percentage of persons who can perform online banking transactions for each State/UT for the age group 15 years & above	C-73 to C-81
21	Percentage of households possessing different assets as on date of survey for each State/UT	C-82
22	Percentage of urban population having convenient access to transport facilities and percentage of rural population with all-weather roads within a distance of 2 km from the place of living for each State/UT	C-83
23	Percentage of persons of age less than 5 years, who have registered with civil authority for birth certificate ever for each State/UT	C-84
24	Percentage of households using clean fuel for cooking for each State/UT	C-85
25	Percentage of households having access to improved principal sources of drinking water and percentage of households having access to improved latrine (among households with access to latrine) for each State/UT	C-86

Table 1a: Percentage of persons able to read and write short simple statements in their everyday life with understanding for each State/UT									
Age: 15-24 years

Table 9: Average medical expenditure (Rs.) per household and per person on hospitalised treatment (including institutional delivery) during the last 365 days and on non-hospitalised treatment during the last 30 days for each State/UT

State/UT/All-India	average medical expenditure (Rs.) for hospitalised treatment during last 365 days				average medical expenditure (Rs.) for non-hospitalised treatment during last 30 days				Remark
	per household		per person		per household		per person		
	Rural	Urban	Rural	Urban	Rural	Urban	Rural	Urban	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	*: It is pertinent to mention here that the NSO, MoSPI, GoI has changed the methodology/tabulation plan for the computation of average medical expenditure in 79 th NSS Round. This shows departure from the methodology adopted in the NSS Rounds say 71 st & 75 th Rounds of the Health Survey. In earlier rounds, this indicator was derived based only on households that had actually incurred medical expenditure. However, in NSS 79 th Round, the estimates were generated by including all households, irrespective of whether they had incurred any medical expenditure or not. Thus, the Average Medical Expenditure (in Rs.)/Average out-of-pocket Medical Expenditure (OOPME) comes in NSS 79 th Round both in Central Report of CAMS 2022-23 & Delhi State Sample are not comparable.

Sample Design & Estimation Procedure

Survey Design and Estimation Procedure

1.0 Introduction

The National Sample Surveys (NSSs) are conducted by the Government of India since 1950 to collect data on various socio-economic indicators employing scientific sampling methods. The Seventy-ninth round of NSS was commenced from July 2022 to June 2023.

NSS 79th round was earmarked for collection of data for compilation of a number of Sustainable Development Goal (SDG) indicators through a 'Comprehensive Annual Modular Survey (CAMS)' along with a survey on Ayurveda, Yoga, Naturopathy, Unani, Siddha, Sowa-Rigpa/Amchi and Homoeopathy (AYUSH). Two separate reports on the subjects, "Comprehensive Annual Modular Survey (CAMS)" and "Survey on AYUSH" are prepared for NSS 79th Round.

1.1 Subject Coverage of NSS 79th Round for CAMS:

1.1.1 Comprehensive Annual Modular Survey (CAMS): CAMS was introduced to cater the emerging need for supply of information on high-frequency socio-economic indicators that are not available from any other sources like, administrative data etc. Information required for the purpose of generating some SDG indicators and sub-indicators of Global Indices was also collected.

1.2 Outline of the Survey Programme

1.2.1 Geographical Coverage: The Delhi Sample Survey covered the rural and urban Delhi.

1.2.2 Survey Period: The survey was commenced from July 2022 and it was of one year duration. CAMS and AYUSH were carried out simultaneously in same FSUs but in different households.

1.2.3 Sub-rounds: The survey period of the round was divided into four sub-rounds of three months duration each as follows:

Sub-round 1	:	July-September 2022
Sub-round 2	:	October-December 2022
Sub-round 3	:	January-March 2023
Sub-round 4	:	April-June 2023

In each of these four sub-rounds equal number of sample First Stage Units (FSUs) were allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period.

1.2.4 Schedule of enquiry: During this round, for survey on CAMS, the following Schedules of enquiry were canvassed:

Schedule 00CM:	List of Households
Schedule CAMS 2022-23:	Comprehensive Annual Modular Survey

2.0 Sample Design

2.1 Formation of sub-units (SUs):

2.1.1 Rural Areas:

2.1.1.1 A rural village was notionally divided into a number of sub-units (SUs) of more or less equal population during the preparation of frame. Census 2011 population of villages was projected by applying suitable growth rates and the numbers of SUs formed in a village were determined apriori.

2.1.1.2 The above procedure of SU formation was implemented in the villages with population more than or equal to 1000 as per Census 2011. In the remaining villages, no SU was formed.

2.1.1.3 The number of SUs formed in the villages (with Census 2011 population 1000 or more) of the frame was decided before selection of the samples following the criteria given below:

Projected population of the village	no. of SUs formed
Less than 1200	1
1200 to 2399	2
2400 to 3599	3
3600 to 4799	4
4800 to 5999	5
..... and so on	

2.1.2 Urban areas:

2.1.2.1 SUs were formed in urban sector also. The procedure was similar to that adopted in rural areas except that SUs were formed on the basis of households in the UFS frame instead of population, since UFS frame does not have population. Each UFS block with number of households more than or equal to 250 was divided into a number of SUs. In the remaining UFS blocks, no SU was formed.

2.1.2.2 The number of SUs formed in the UFS blocks of the frame were decided before selection of the samples following the criteria given below:

Number of households of the UFS block	no. of SUs formed
less than 250	1
250 to 499	2
500 to 749	3
750 to 999	4
1000 to 1249	5
.....and so on	

2.3 Outline of sample design:

A stratified multi-stage design was adopted for the 79th round survey. The first stage units (FSU) were villages/UFS blocks/sub-units (SUs) as per the situation. The ultimate stage units (USU) were households in both the sectors.

2.4 Sampling Frame for First Stage Units (FSUs):

2.4.1 There was no SU formation in uninhabited villages and villages with population less than 1000 as per Census 2011 and the entire village was considered as one FSU.

2.4.2 In the remaining villages, notional sub-units (SUs) were formed according to the procedure. Such SUs were considered as First Stage Units.

2.4.3 For the UFS blocks with less than 250 households, the entire UFS block was considered as one FSU. In the remaining UFS blocks, the SUs were considered as First Stage Units (FSUs).

2.4.4 The list of FSUs constitutes the sampling frame for respective sectors i.e. rural and urban areas.

2.5 Sub-stratification of FSUs:

2.5.1 Rural Sector: Three groups of villages were formed within each stratum:

Group 1: all villages with Census 2011 population less than 250

Group 2: all villages with Census 2011 population more than or equal to 250 but less than 500

Group 3: remaining villages

The sample size for a rural stratum was allocated among 3 groups in proportion to population. Let r_1 , r_2 and r_3 be the allocations to Group 1, Group 2 and Group 3 respectively. The villages within each group were first arranged in ascending order of number of population. For all the three groups within each strata, ' $r_i/4 > 1$ ',

' $r_2/4$ '>1 and ' $r_3/4$ '>1, imply formation of 2 or more sub-strata in each group. Sub-strata was demarcated in Group 1, Group 2 and Group 3 respectively in such a way that each sub-stratum comprised a group of villages (all SUs of a village considered together) of the arranged frame and have more or less equal population. If number of FSUs in a particular Group was very small, no sub-stratum was formed in that group.

2.5.2 Urban Sector: Let 'u' be the sample size allocated for an urban stratum. For all strata, if ' $u/4$ '>1, imply formation of 2 or more sub-strata, all the UFS blocks within the stratum were first arranged in ascending order of total number of households in the UFS blocks as per urban frame. Then sub-strata was demarcated in such a way that each sub-stratum comprised a group of UFS blocks (all SUs of a block considered together) with more or less equal number of households. If number of blocks in a particular stratum was very small, no sub-stratum was formed in the stratum.

2.6 Total sample size (FSUs): Total 180 FSUs (136 urban FSUs + 44 rural FSUs) were surveyed in Delhi for CAMS survey.

2.7 Selection of FSUs within a stratum/sub-stratum:

From all the sub-strata in both rural and urban sector within each stratum, the required numbers of FSUs were selected by Simple Random Sampling without Replacement (SRSWOR) scheme.

2.8 Formation of sub-units and listing of households

2.8.1 Proper identification of the FSU boundaries:

The first task of the field investigators was to ascertain the exact boundaries of the village as per its identification particulars given in the sample list. The village may either itself be a sample FSU or may contain a sample FSU (i.e. SU). For urban samples, the boundaries of the UFS block were identified by referring to the map for that UFS block.

2.8.2 Procedure of formation of SUs:

After identification of the boundaries of the village/UFS block which contains the sample FSU, the village/UFS block was divided into a number of SUs (say, D) as given in the sample list by more or less equalising the present population of the village/UFS block in which the sample FSUs are located. It was ensured that SUs formed were clearly identifiable in terms of physical landmarks. For villages/blocks where the number of SUs formed was 1 as per the sample list, no SU formation was required.

2.8.3 Listing of households:

All the households of the sample FSU were listed. Temporarily locked households were also listed after ascertaining the temporariness of the locking of households through local enquiry.

2.8.4 Formation of Sub-divisions in the selected SU:

2.8.4.1 Where the approximate ascertained present population/number of households in the selected SU was very high and listing becomes very difficult, the SU was sub-divided into a number of smaller units (sub-divisions), each containing more or less equal population content, and one of them was randomly selected. Listing and selection of households were then carried out within the selected sub-division unit only. The procedure for formation of sub-divisions is the same as that for formation of SUs within villages/blocks.

2.8.4.2 The criteria for determining the number of sub-divisions (D1) to be formed in the selected rural/urban SUs is as follows:

Approx. population of the SU (1)	no. of Sub-divisions(D1) to (2)
Less than 1500	1
1500 to 2399	2
2400 to 3599	3
3600 to 4799	4
4800 to 5999	5
.....and so on	

2.9 Formation of Second Stage Strata (SSS) of households and allocation among SSS

CAMS: 2 SSS were formed for CAMS with the following criteria:

- SSS1: households with at least one member (including deceased former member) hospitalized (including institutional childbirth) during last 365 days.
- SSS2: remaining households

A total of 20 households were surveyed in each selected FSU for CAMS.

5 households were selected from SSS1 and 15 households were selected for SSS2 with "Simple Random Sampling Without Replacement (SRSWOR).

SURVEY	SSS	Composition of SSS	Number of households surveyed
CAMS	1	Households with at least one member (including deceased former member) hospitalized (including institutional childbirth) during last 365 days	5
	2	Remaining households	15

2.10 Selection of households: The sample households from each SSS for each of the Schedule were selected by SRSWOR. The two different surveys (CAMS & AYUSH) were conducted in two different households. If there is any shortage of households then same households were canvassed for different schedules.

3.0 Estimation Procedure

3.1 Notations:

s= subscript for s-th stratum

t= subscript for t-th sub-stratum

i= subscript for i-th FSU [SU/village/panchayat ward/block]

j= subscript for j-th second stage stratum in an FSU

k= subscript for k-th sample household within an FSU

D_1 = total number of sub-divisions formed in the sample FSU. ($D_1 = 1$, if no sub-division is formed in the SU)

N= total number of FSUs in any rural/urban sub-stratum

n= number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding casualty for a particular sub-stratum

H= total number of households listed in a second-stage stratum of an FSU

h= number of households surveyed in a second-stage stratum of an FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}$, $\hat{Y}$ = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{stijk} = observed value of the characteristic y for the k-th household of the j-th second stage stratum of the i-th FSU for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Formulae for Estimation of Aggregates for a stratum x sub-stratum:

3.2.1 Schedule OOCM (Rural/Urban):

- (i) For estimating the number of households in a stratum x sub-stratum possessing a characteristic:

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n D_1 \times y_i$$

Where y_i is the total number of households possessing the characteristics y in i-th FSU respectively.

3.2.2 Schedule CAMS 2022-23:

3.2.2.1 For j-th second-stage stratum of a stratum x sub-stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} [D_1 * \frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijk}]$$

Where n_j is the number of sample FSUs with non-void j-th second-stage stratum.

3.2.2.2 Aggregate $\hat{Y}$ is obtained combining all the second-stage strata:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Note: Value of j for Schedule CAMS 2022-23 is 2

i.e. for Schedule CAMS, j=1,2.

3.3 Overall Estimate for Aggregates for a stratum:

Overall estimate for a stratum ($\hat{Y}_s$) will be obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/UT/all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/UT/all-India.

3.5 Estimates of Ratios:

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/UT/all-India level.

Then the combined ratio estimate ($\hat{R}$) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

3.6 Estimation of Errors:

3.6.1 Formula for estimated variance (for Rural/Urban):

3.6.1.1 Here FSU is selected by SRSWOR method and USU (households) also selected by SRSWOR method. If i^{th} FSU has been selected then h_i unit is selected from this particular FSU x SSS by SRSWOR method.

(a) Formula for aggregate $\hat{Y}$ (for Rural/Urban):

$$\hat{Y}_{ij} = H_{ij} \times \bar{y}_{ij} \times D_{1st} \quad \text{and} \quad \bar{y}_{ij} = \frac{\sum_{k=1}^{h_{ij}} y_{ijk}}{h_{ij}}$$

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s) = \sum_s \sum_t \sum_j V\hat{a}r(\hat{Y}_{stj})$$

$$V\hat{a}r(\hat{Y}_{stj}) = N_{st}^2 \left(\frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) \left(\frac{1}{(n_{stj}-1)} \sum_{l=1}^{n_{stj}} (H_{stlj} \times D_{1stl} \times \bar{y}_{stlj})^2 - \frac{1}{n_{stj}} \sum_{l=1}^{n_{stj}} H_{stlj} \times D_{1stl} \times \bar{y}_{stlj} \right)^2 + \frac{N_{st}}{n_{stj}} \sum_{l=1}^{n_{stj}} H_{stlj}^2 \times D_{1stl}^2 \left(\frac{1}{h_{stlj}} - \frac{1}{H_{stlj} \times D_{1stl}} \right) s_{wlij}^2$$

$$\text{where, } s_{wlij}^2 = \frac{1}{(h_{stlj}-1)} \sum_{k=1}^{h_{stlj}} (y_{stljk} - \bar{y}_{stlj})^2$$

(b) Formula for ratio $\hat{R}$ (for Rural/Urban):

Note that $X^2 \text{MSE}(\hat{R})$ is unbiased estimated by $V(\hat{Y} - R\hat{X})$

$$V(\hat{Y} - R\hat{X}) = v(\hat{u}) \text{ where } u_{ijk} = (y_{ijk} - R x_{ijk}),$$

$U_i = (Y_i - R X_i)$ and $U = (Y - RX) = 0$ at domain level (State/District).

$$\widehat{X^2 \text{MSE}}(\hat{R}) = \widehat{V}(\hat{U}) \text{ at } R = \hat{R}$$

$$\hat{Y}_{stij} = \frac{1}{N_{st}} \sum_k y_{stijk} \times n_{stj} \times \text{multiplier}$$

$$\hat{X}_{stij} = \frac{1}{N_{st}} \sum_k x_{stijk} \times n_{stj} \times \text{multiplier}$$

$$\text{M}\hat{\text{S}}\text{E}(\hat{R}) = \frac{1}{\hat{X}^2} \sum_s \sum_t \text{M}\hat{\text{S}}\text{E}_{st}(\hat{R})$$

$$\text{M}\hat{\text{S}}\text{E}_{st}(\hat{R}) = \sum_j N_{st}^2 \left(\frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) \left(\frac{1}{(n_{stj}-1)} \sum_{l=1}^{n_{stj}} (H_{stlj} \times D_{1stl} \times \bar{u}_{ij})^2 - \frac{1}{n_{stj}} \sum_{l=1}^{n_{stj}} H_{stlj} \times D_{1stl} \times \bar{u}_{ij} \right)^2 + \sum_j \frac{N_{st}}{n_{stj}} \sum_{l=1}^{n_{stj}} H_{stlj}^2 \times D_{1stl}^2 \left(\frac{1}{h_{stlj}} - \frac{1}{H_{stlj} \times D_{1stl}} \right) s_{u lij}^2$$

$$\text{where, } s_{u lij}^2 = \left(\frac{1}{(h_{stlj}-1)} \sum_{k=1}^{h_{stlj}} (u_{stljk} - \bar{u}_{ij})^2 \right)$$

$$\bar{u}_{ij} = \bar{y}_{ij} - \hat{R} \bar{x}_{ij}$$

4.0 Multipliers:

4.1 The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a Questionnaire type are given below:

Schedule	Sector	Formula for multipliers
00CM	Rural/Urban	$\frac{N_{st}}{n_{st}}$
CAMS: 2022-23	Rural/Urban	$\frac{N_{st}}{n_{stj}} \times D_1 \times \frac{H_{stij}}{h_{stij}}$
	j=1,2	

Note:

- (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.
- (ii) Multipliers have to be computed on the basis of information available in the listing Schedule 00CM irrespective of any misclassification observed between the listing Schedule and detailed enquiry Schedule.

5.0 Treatment for zero cases, casualty cases etc.:

5.1 While counting the number of FSUs surveyed (n_{st} or n_{stj}) in a stratum/sub-stratum, all the FSUs with survey codes 1 to 6 in listing Schedule 00CM are considered. In addition, if no household is available in the frame, then also that FSU is treated as surveyed. However, households are available in the frame of the FSU, but none of these could be surveyed, then that FSU is treated as a casualty and not as surveyed.

5.2 Casualty cases: FSUs with survey code 7 as per listing Schedule 00CM are treated as casualties. In addition to this, an FSU, although surveyed, may have to be treated as casualty for a particular schedule type and a particular second stage stratum as given in the following para:

FSUs with survey codes 1 or 4 as per listing Schedule 00CM having number of households in the frame of j-th second stage stratum greater than 0 (i.e. $H > 0$) but number of households surveyed according to data file as nil ($h = 0$), are considered as casualties for j-th second stage stratum.

All the FSUs with survey codes 1 to 6 as per listing Schedule 00CM minus the number of casualties as identified above are considered as the number of surveyed FSUs (n_{stj}) for that (stratum/sub-stratum) x (second stage stratum).
